CIIMT 4 Safety Group

Operational Period: 0600-0600		
-	INCIDENT NAME:	
 Utilize social distancing, wear facemasks in camp ALWAYS. Maintain the "module of one" concept. Disinfect vehicles, tools, and commonly touch surfaces frequently. 	COVID-19	ALL
 Keep alert for wildlife, deer, rattlesnakes, bees, and plants. Watch footing and hand placement around rocks. Personal hygiene is #1 when it comes to Poison Oak Prevention. Pick up and remove all trash from fireline, return to camp and place in dumpsters. 	ENVIRONMENTAL HAZARDS	ALL
 Follow "Aviation Watch-Out Situations" on page 46, IRPG. Don't plan on air resources for tactical support or medical transportation. Refer to page 58, IRPG for directing bucket drops. Ensure positive communication with all air resources. 	AIR OPERATIONS	ALL
 Have a purpose for where you drive and what you do. Don't rush into assignments. Use caution where you park or stage, especially in steep timbered areas. Use available time for briefings on roads, terrain, and potential rolling material, especially if the resources are new to the area. Increase SA by trying to see the work area during daylight hours. Use glow sticks to mark hazards, and ensure personnel have headlamps. 	NIGHT OPERATIONS	A,D,K, W,Y
 Share your Situational Awareness (hazards, changes, etc) to those who have a need. Radio communications may be poor in some areas. Use human repeaters as needed Ensure all personnel are familiar with the incident communications plan. 	COMMUNICATIONS	ALL
 Follow the chain of command when undertaking burning operations. Ensure that aerial/ground ignition plans have been well briefed including LCES and drought related fire behavior considerations. Wear and use appropriate PPE. Initiate burning after ensuring the plan is authorized and understood by all. 	FIRING OPERATIONS and DEVICES	К,О,U
 Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Monitor ALL resources for level of fatigue. Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. Take steps to maintain situational awareness for the duration of the incident. 	FATIGUE/COMPLACENCY	ALL
 Keep good Situational Awareness while engaged in indirect line construction. Post lookouts. Make sure to stay in contact with someone who can see the main fire Ensure all personnel are familiar with the plan. Make sure all personnel know their escape routes and safety zones. Remember there is "unburned fuel between you and the main fire." 	INDIRECT FIRELINE	D,F,H, K,O,P,
 Maintain 8'-10' spacing when working & walking. Be alert for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access. Post lookouts where feasible. 	STEEP TERRAIN AND ROLLING DEBRIS	ALL
 Follow Hazard Tree Safety Guidelines (IRPG p.22.) Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. Be alert around hazard trees during wind events, even green trees. The hazard zone extends a minimum of 2½ tree lengths. Do not park vehicles or take breaks under or near hazard trees. 	HAZARD / DANGER TREES	ALL
	TRAFFIC HAZARDS AND DRIVING	ALL
