WEATHER DISCUSSION: A few cumulus clouds will form during the afternoon to evening with no impacts expected. Smoke will continue to flow through the fire area from the southerly fires. RH values continue to be challenging with pockets of dry air passing through the area. Broadly speaking there will be a warming and drying trend for the next several days, this however, will be counteracted by the smoke making the forecast a bit less certain.

Today (Wednesday 0600-1800):

Weather: Filtered sunshine from smoke...Some improvement in the afternoon.

Max Temperature: Below 4,000 ft: 91-96. Above 4,000 ft: 81-85.

Min Humidity: Below 4,000 feet: 25-30%.

Lower/Mid Slopes: Downslope or east 2-4 mph until 1200, then upslope or West 3-6 mph.

Upper Slopes/Ridges: East 1-4 until 1200, then West and Southwest 4-6 mph with Gusts to 12 mph until sunset.

LAL: 1 **Chance of Wetting Rain (0.10"): 0%**

Stability: Low valley inversions lift 1200. Mid-level inversion will hold in place through at least 1300 hrs.

Afternoon Mixing Height: Valleys: 5,000 feet AGL. Ridges: 6,000 feet AGL.

Smoke Transport: Toward the North and Northeast.

Tonight (1800-0600):

Weather: Partially cloudy with smoke.

Low Temperatures: Valley-Midslope: 59-64°; Upper slope/Ridge: 64-69°.

Max Humidity: Below 4000 feet: 55 to 65%.

Above 4000 feet: 30 to 40%.

20 Foot Winds:

Lower/Mid Slopes: West and Southwest 2-5 mph until 2100 hrs, then East or downslope 1-4 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 30	TYPE OF FIRE Wildfire

INPUTS

WEATHER SUMMARY:

WEATHER: Filtered sunshine from smoke... Some improvement in the afternoon.

MAX TEMP: Below: 4000 ft 91-96° Above: 4000 ft 81-85° **MIN RH:** 22-27%

20 FOOT WINDS: East 1-4 until 1200, then West and Southwest 4-6 mph with Gusts to 12 mph until sunset.

LAL: 1 CHANCE OF WETTING RAIN ($\geq 0.10''$): 0%

FUELS: The major fuel types, found in and around the fire area are timber litter and shrubs.

Ignition Receptiveness: ERC levels are just the 90th percentile. Probability of Ignition 64% Night 25%.

Dryness: Dead and down fuel moistures :1 hour – 5% day, 10 hour– 6%, 100 hour–7%, and 1000 hour– 8%.

FIRE BEHAVIOR

The weather will become hotter and drier over the next few days. Expect a moderate risk burn environment due to high temperatures, low RH and critically low 1000 hr. fuel moistures. When the inversions lifts and clear air exists, prepare for the fire to become active. Uphill runs and spotting will be an issue where slope and wind align.

SPECIFIC

SPECIFIC FIRE BEHAVIOR:

Division A: Low activity consisting of creeping and smoldering.

Division D: No fire behavior expected. Continue to monitor fire behavior below your position (DP-22)

Main fire (Northeast): Will continue to move with active fire behavior and spotting. Expect to see movement Northeast along China Creek, East across Nordheimer Creek and backing to the Southeast.

Division K: Firing operations will be successful once RH drop below 35-40%. East winds will be available for a shorter duration (until 1200) during the shift, then again at sunset.

Division M / N: Minimal activity expected. Interior smoldering.

Division O: Watch for fire mid-slope to align and make upslope runs. Highly active fire behavior could be produced with significant spotting potential.

Division U: The main fire continues to move south across the slopes. Watch for mid slope alignment and uphill runs. There is potential for highly active fire behavior

Division P, R: No Fire Behavior expected.

Division W, Y: low activity mostly creeping and smoldering in the interior.

Night Division: Firing operations (DIV K) will have greater success after 2100 when East, Northeast winds surface and RH are below 30-40%

AIR OPERATIONS

Low level inversions will lift at approx. 1200, mid-level at approx. 1500.

Safety Message

WATCH OUT SITUATIONS: Winds increasing and/or changing direction.

INCIDENT RISK ANALYSIS RED SALMON COMPLEX CA-SRF-000656 (ICS 215a) Day/Night Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on uphill side. Use spotters when backing, or turning around. • Practice "Defensive Driving" techniques. Assume other drivers are fatigued and complacent. • 5mph speed limit in and around ICP, keep your speed down in all areas. • Use warning lights when working on roads or traveling in smoke. • Drive at or below posted speed limits. • Be alert for wildlife.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p.22.) • Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. • Be alert around hazard trees during wind events, even green trees. • The hazard zone extends a minimum of 2½ tree lengths. • Do not park vehicles or take breaks under or near hazard trees.
ALL	STEEP TERRAIN AND ROLLING DEBRIS	<ul style="list-style-type: none"> • Maintain 8'-10' spacing when working & walking. • Be alert for rolling rocks, debris, or burning material. • Evaluate necessity to send personnel in areas with limited access. • Post lookouts where feasible.
D,F,H, K,O,P, R,U	INDIRECT FIRELINE	<ul style="list-style-type: none"> • Keep good Situational Awareness while engaged in indirect line construction. • Post lookouts. Make sure to stay in contact with someone who can see the main fire • Ensure all personnel are familiar with the plan. • Make sure all personnel know their escape routes and safety zones. • Remember there is "unburned fuel between you and the main fire."
ALL	FATIGUE/COMPLACENCY	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. • Maintain 2:1 work/rest ratio. • Monitor ALL resources for level of fatigue. • Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. • Take steps to maintain situational awareness for the duration of the incident.
K,O,U	FIRING OPERATIONS and DEVICES	<ul style="list-style-type: none"> • Follow the chain of command when undertaking burning operations. • Ensure that aerial/ground ignition plans have been well briefed including LCES and drought related fire behavior considerations. • Wear and use appropriate PPE. • Initiate burning after ensuring the plan is authorized and understood by all.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness (hazards, changes, etc) to those who have a need. • Radio communications may be poor in some areas. Use human repeaters as needed • Ensure all personnel are familiar with the incident communications plan.
A,D,K, W,Y	NIGHT OPERATIONS	<ul style="list-style-type: none"> • Have a purpose for where you drive and what you do. Don't rush into assignments. • Use caution where you park or stage, especially in steep timbered areas. • Use available time for briefings on roads, terrain, and potential rolling material, especially if the resources are new to the area. • Increase SA by trying to see the work area during daylight hours. • Use glow sticks to mark hazards, and ensure personnel have headlamps.
ALL	AIR OPERATIONS	<ul style="list-style-type: none"> • Follow "Aviation Watch-Out Situations" on page 46, IRPG. • Don't plan on air resources for tactical support or medical transportation. • Refer to page 58, IRPG for directing bucket drops. • Ensure positive communication with all air resources.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> • Keep alert for wildlife, deer, rattlesnakes, bees, and plants. Watch footing and hand placement around rocks. • Personal hygiene is #1 when it comes to Poison Oak Prevention. • Pick up and remove all trash from fireline, return to camp and place in dumpsters.
ALL	COVID-19	<ul style="list-style-type: none"> • Utilize social distancing, wear facemasks in camp ALWAYS. • Maintain the "module of one" concept. • Disinfect vehicles, tools, and commonly touch surfaces frequently. • Do not share equipment and wash hands frequently.

INCIDENT #CA-SRF-000656

DATE: 08-26/27-20 TIME: 0600-0600 Day/Night

Directing Helicopter Bucket Drops

- Give general location on the incident.
- Finalize location with: Clock direction – straight in front of the aircraft is 12 o'clock; the right door is 3 o'clock; the tail is 6 o'clock; and the left door is 9 o'clock. When giving directions, remember that helicopters generally orbit in a clockwise pattern.
- Visualize what the pilot sees from the air and describe the target.
- Describe the target from your location and explain the mission. The pilot will decide drop technique and flight path, or you can ask the pilot for a hover drop or line drop in a given direction.
- Assure pilot that all personnel are safe and they know the aircraft's intentions before the drop.
- Give feedback to the pilot about drop accuracy. Be honest and constructive. Let pilot know if drop is early, late, uphill, downhill, etc. The pilot wants to provide you with the best support possible.

Red Salmon Complex COVID-19 Expectations

- All incident personnel will follow all local, State and CDC guidelines for COVID-19.
- **As you travel through the highway 96 corridor to the Fire, the Hoopa and Yurok reservations are closed so please do not stop in Hoopa or Weitchpec.**
- Use the COVID-19 Daily Screening Tool, provided in the IAP, to monitor self and module.
- Utilize Module-as-one concepts to reduce the risk of transmitting the novel Coronavirus. This limits “close contacts” to those within the module. A “close contact” is defined as less than 6 feet, for at least 15 minutes with or without face coverings/masks. A “casual contact” is defined as less than 6 feet for less than 15 minutes **or** more than 6 feet for more than 15 minutes.
- **Social Distancing.** Maintain a minimum of 6’ physical distancing from those outside of your module-as-one.
- **Face Coverings.** Face coverings are required to be worn, **in the appropriate manner covering nose and mouth**, when at ICP and Camps. Outside of camps, all incident personnel will wear a face covering when social distancing is not possible with those outside your module-as-one.
- **Wash your hands.** Wash your hands often with soap and water for at least 20 seconds, especially after blowing you nose, coughing or sneezing. If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Do not use hand sanitizers containing methanol or 1-propanol. Cover all surfaces of your hands and rub them together until they feel dry. Avoid touching your eyes, nose and mouth with unwashed hands.
- Clean and disinfect vehicles and equipment. Disinfect all high-touch surfaces frequently, such as radios, phones, door handles, etc.

STANDARD OPERATING PROCEDURES—FINANCE SECTION

WORK REST CYCLE

IT IS NATIONAL DIRECTION TO MEET 2 TO 1 WORK/REST RATIO (1 hour of sleep/rest for every 2 hours of work). Every effort shall be made to manage work hours so you don't exceed the maximum of 16 hrs. Work hours exceeding 16 hours shall be approved by your supervisor in advance, and a justification/mitigation form completed for review by Section Chief & approved by IC. It is each person's responsibility to comply with this direction to manage for fatigue and safety.

OPERATIONAL SHIFTS

Pay status for assigned overhead and crews on the fireline will not start prior to the posted briefing time and will terminate on arrival back in camp (except for debriefing—additional hours may be accrued by those required to attend debriefing). Supervisors will be allowed ½ hour prior to briefing and after return to camp to ready crew and equipment.

DUTY STATUS

Division/Group supervisors and Unit Leaders are responsible for establishing on and off duty status. The objective is a 2 to 1 work/rest ratio. Personnel will normally work, travel, and/or be placed on ORDERED standby 8 to 16 hours per day and be off duty 8 hours or more (breaks count towards 8 hrs.). Off duty time will be in a non-pay status. Each federal employee is guaranteed at least 8 hours of pay status each 24-hour period (midnight to midnight) unless it is the first or last day of an assignment or stated otherwise in a contract or agreement.

PERSONNEL/EQUIPMENT TIME REPORTING

Personnel time will be reported to the Time Unit daily or every other day once they are signed by the next level supervisor. Situations entitling you to HAZARD PAY are to be noted in remarks (i.e. HP=Uncontrolled Fireline, hovering hookups, low level flights, etc.)

Private Contracted Equipment time must be tracked on a Shift Ticket daily or every other day and hours on shift noted even if it is a daily rate. When swapping out operators you need to notify Finance as well as changing from single to double shift and vice versa.

Supervisor's - If you are responsible for daily tracking of equipment or personnel, please ensure you understand the agreement, and follow the rules provided in this document. Do not sign documents for resources you did not manage unless you have knowledge of their assignment hours.

MEAL AND OTHER WORK BREAKS

Compensable meal periods are the exception, not the rule (5 CFR 551.411 © and 29 CFR 785.19(a)). Until the fire is controlled, personnel on the fireline MAY BE compensated for meal periods if all of the following conditions are met: 1) The fire is not controlled and 2) The Operations Section Chief makes a decision that it is critical to the effort of controlling the fire that personnel remain at their post of duty and continue to work as they eat, and 3) The compensable meal break is approved by the supervisor at the next level and documented on CTR. For personnel in support positions, and fireline personnel after control of a fire, a meal period of at least 30 minutes must be ordered and taken for each work shift of eight hours or more. In those situations where personnel cannot be relieved from work and must remain at a post of duty, a meal period may be counted as time worked, which will be compensable. If breaks are NOT able to be taken, CTR should have a statement in remarks explaining the situation.

HUMAN RESOURCE MESSAGE

TRANSITIONS AND REUNIONS

As you reunite with loved ones, friends and co-workers consider a smooth transition. You have been gone for a while and your loved ones, friends and co-workers have done a good job fulfilling your role during your absence. If possible, slowly assert yourself as you re-establish your position.

SMOOTH TRANSITIONS AND REUNIONS INVOLVE:

- ☺ Appreciating the efforts of others
- ☺ Communicating to understand the current state
- ☺ Trusting in one another
- ☺ Rebuilding relationships

Feel free to call/text or come by HR if you have questions, concerns, or just want to chat.

Adam Alvarez – (HRSP) - (707) 373-8715

Resource Advisor Message

- Resource advisors are available in nearly all Divisions on the fire and are here to support the mission of containing this wildfire while at the same time aim to minimize resource damage impacts. If you feel something needs to be brought to a Resource Advisor (or Cultural Specialist), go through your appropriate chain of command to make the notification.
- The Six Rivers, Klamath and Shasta-Trinity National Forests, as well as California Team 4, have been working very closely with cultural specialists from the three main tribes in this area (the Hoopa, Karuk and Yurok) so please help us to maintain and foster these good relationships.
- The area in which the fire is burning is a very sacred place to these tribal cultures so please work with us utilizing MIST tactics to protect cultural and wilderness values.

Message #2 from Leaf Hillman, Karuk Cermonial Leader, about the importance of fire to the Karuk Tribe:
