**...Critically Dry Afternoon Relative Humidity Levels Today Through Monday...**

**WEATHER DISCUSSION:** Very dry airmass is over the region next for next several days with near single digit afternoon relative humidity values and very poor recovery as well. Despite the periods of smoke around the perimeter, abundant sunshine is expected through the weekend with high mixing heights and improved ventilation. The combination of these weather elements may lead to an increase in fire activity, especially during the afternoon and early evening hours through Monday.

**Today (Saturday 0600-1800):**

**Weather:** Sunny with smoke...continued very hot and dry.

**Max Temperature:** Below 4,000 ft: 95-100. Above 4,000 ft: 90-94.

**Min Humidity: Below 4,000 feet:** 11-16%...Single digits possible during the late afternoon.

**Above 4,000 feet and higher:** 13 - 18%...Possible falling to near 10% by late afternoon.

**20 Foot Winds:**

**Lower/Mid Slopes:** Downslope or east 2-4 mph until 1300, then upslope or Northwest 3-5mph gusts to 10 mph.

**Upper Slopes/Ridges:** East 1-4 until 1300, then Northwest 4-6 mph with Gusts to 12 mph until sunset.

**Stability:** Low valley inversions lift 1200. Mid-level inversion will hold in place through at least 1300 hrs. All inversions breaking by 1400.

**Afternoon Mixing Height:** 7-9 k feet AGL.

**Smoke Transport Wind:** Southwest 10 mph.

---

**Tonight (1800-0600):**

**Weather:** Clear with smoke. Very Low RH recoveries.

**Low Temperatures:** Valley-Midslope: 61-65°; Upper slope/Ridge: 64-68°.

**Max Humidity: Below 4000 feet:** 25-35%.

**Above 4000 feet:** 20-30%.

**20 Foot Winds:**

**Lower/Mid Slopes:** Upslope or West-Northwest 2-5 mph until 2200 hrs, then East or downslope 3-6 mph.

**Ridges:** Northwest 3-5 mph gusts to 10 mph until 2200 hrs, then East and Northeast 3-6 mph with gusts to 10 mph.

**Sunday:** Mostly sunny. Max Temps: 92-96°. Minimum RH: 10-15%. Afternoon Winds - Lower Slopes: North or upslope 3-5 mph gust to 10 mph. Upper slopes/Ridges: Upslope or North at 4-6 mph Gust to 12 mph.

**Monday and Tuesday Outlook:** Sunny and very low RH. Max Temperatures in the upper 90s. Afternoon humidity 13-18%. Northwest to North winds 2-5 mph with gusts around 10 mph.

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER</b> 33	<b>TYPE OF INCIDENT:</b> Wildland Fire
<b>INCIDENT NAME:</b> Red Salmon Complex	<b>OPERATIONAL PERIOD</b> Day/Night Shift 08/29-08/30 2002
<b>DATE ISSUED:</b> 28 Aug 2020	<b>TIME ISSUED:</b> 2000
<b>UNIT:</b> Six Rivers NF	<b>SIGNED:</b> /s/ Gayle Sorenson, Gayle Sorenson, FBAN

### INPUTS

**WEATHER SUMMARY:** See Preceding Fire Weather Forecast.

Temp 95-100 degrees below 4000 ft and 88-92 above 4000 ft, RH 11-16% below 4000 ft and 13-18% above 4000 ft, Mixing Height 7000-9,000 ft, Winds AM East 2-4 mph, PM Upslope/Northwest 3-5g10 mph

### FUELS CONDITIONS:

Fuels in the Red Salmon Complex consist of mixed conifer with Mountain brush, timber litter and grass understory. Fires in the past few years including 1999 Megram (SW), 3013 Butler (N), 2006 Bake-Oven (SE), and 2013 Corral (S) have more of a shrub and grass component with standing dead snags and heavy dead/down fuels. ERC's are slightly above normal and at the 90th percentile. 1000-hr fuel moisture is below normal at 9% which is the 97th percentile.

### GENERAL FIRE BEHAVIOR:

Continuing the hotter and drier trend with higher mixing heights which increase ventilation and chance of plume dominated fire. Expect again a general increase in fire behavior including more torching, spotting and uphill runs. Also, of note is the lack of RH recovery overnight which means the fire will stay more active at night and be primed for a rapid increase in activity when the inversion lifts out around 1200-1300 especially in areas of clear sky.

Flame lengths will generally be 1-4 feet. ROS upslope 12-20 ch/hr and backing <3 ch/hr. Spread is primarily on the surface with associated single/group tree torching. Spotting distances of 0.1-0.25 miles is possible with longer spotting distances occurring as the fire nears ridgelines and is exposed to higher winds. Fire behavior will be most active generally on the upper 1/3 of slopes.

### SPECIFIC FIRE BEHAVIOR:

**DIV A/D:** Minimal fire behavior expected. Continue to monitor fire behavior below your position (DP-22)

**Main fire (Northeast):** Active fire behavior and increased spotting. Continued movement Northeast along China Creek, North and East across Nordheimer Creek and backing to the Southeast. Good chance of the fire spreading east up to the backbone as well.

**DIV K:** There was minimal RH recovery last night and will very low today which may make firing operations more difficult. East winds will be available for a shorter duration (until 1300) during the shift, then again at sunset.

**DIV M/N:** Minimal activity expected. Interior smoldering.

**DIV O, P, R:** The fire continues to move south across the slopes. Watch for mid slope alignment and uphill runs. There is potential for highly active fire behavior including significant spotting with organized runs. High likelihood of handline in DIV R to be pushed aggressively.

**DIV U:** Continued burnout of heavy fuels. Smoldering and creeping.

**DIV W, Y:** Minimal fire behavior expected.

**Night SHIFT:** Firing operations (DIV K) will have greater success after sunset when East, Northeast winds surface although RHs are going to remain low overnight.

### SAFETY

**SAFETY:** Several things are lining up to produce very active fire behavior with a well-developed plume. Be vigilant anticipating column collapsing and spreading fire in numerous directions. Fuel type changes and slope reversals could be triggers to collapse a column.

**AIR OPERATIONS:** Inversion over the lower elevations of the fire may hamper visibility until 1400.

# Red Salmon Complex – Safety Message

INCIDENT #CA-SRF-000656

DATE: 08-29/30-2020 TIME: 0600-0600 Day/Night Shift

## Hazard Control Around Trees

- Eliminate the hazards with qualified sawyers, blasters/explosives, or heavy equipment.
- Avoid hazards by designating “No Work Zones” (flag, sign, and map).
- Modify suppression tactics or fireline location to avoid high-risk areas.
- Post lookouts to help secure high-risk areas.
- Utilize road/traffic controls in high-risk areas.
- Fireproof potential hazard trees to prevent ignition.
- Keep clear of bucket drops near trees/snags.
- Reposition firefighters to secure areas in response to high wind forecast.
- Provide timely feedback to others regarding any hazard trees.

Covid-19 Incident Stats

Symptomatic Personnel: 11

Positive # of Cases: 0

## LCES

- **Lookouts**- Use experienced people, know your trigger points, do not depend on air resources and check your surroundings!
- **Communications**- Know your radio frequencies, check batteries, and be cognizant of any problems with direct communications.
- **Escape Routes**- Know them, time them, discuss them, and reassess them!
- **Safety Zones**- Evaluate the “black” as your safety zone. Reassess for problems.

## HUMAN FACTOR BARRIERS TO SITUATIONAL AWARENESS

- **Fatigue**
  - Carbon Monoxide
  - Dehydration
  - Heat Stress
  - Fitness Level
  - 24-hrs awake affects your decision making like 0.1 blood alcohol content
- **Hazardous Attitude**
  - Invulnerability
  - Anti-Authority
  - Impulsive
  - Over confident
  - Complacent
  - Resigned
  - Afraid to speak up or disagree

## Common Denominators

There are five major common denominators of fire behavior on fatal and near-fatal fires. Such fires often occur:

- On relatively small fires or deceptively quiet areas of large fires.
- In relatively light fuels, such as grass, herbs, and light brush.
- When there is an unexpected shift in wind direction or in wind speed.
- When fire responds to topographic conditions and runs uphill.
- Critical burn period between 1400 and 2000.

## Red Salmon Complex COVID-19 Expectations

- All incident personnel will follow all local, State and CDC guidelines for COVID-19.
- **As you travel through the highway 96 corridor to the Fire, the Hoopa and Yurok Reservations are closed. Please do not stop in Hoopa or Weitchpec.**
- Use the COVID-19 Daily Screening Tool provided in the IAP to monitor self and module.
- Utilize Module-As-One concept to reduce the risk of transmitting the novel Coronavirus. This limits “close contacts” to those within the module. A “close contact” is defined as less than 6 feet, for at least 15 minutes with or without face coverings/masks. A “casual contact” is defined as less than 6 feet for less than 15 minutes or more than 6 feet for more than 15 minutes.
- **Social Distancing.** Maintain a minimum of 6 feet physical distancing from those outside of your module-as-one.
- **Face Coverings.** Face coverings are required to be worn in the appropriate manner covering nose and mouth when at ICP and camps.
- **Wash your hands.** Wash your hands often with soap and water for at least 20 seconds, especially after blowing your nose, coughing or sneezing. If soap and water are not readily available, use hand sanitizer that contains at least 60% alcohol. Do not use hand sanitizer containing methanol or 1-propanol. Cover all surfaces of your hands and rub them together until they feel dry. Avoid touching your eyes, nose and mouth with unwashed hands.
- **Clean and disinfect vehicles and equipment.** Disinfect all high-touch surfaces frequently, such as radios, phones, door handles, etc.

## FINANCE MESSAGE

Thank you for submitting your times in the safest way possible. The options for submitting your CTR's and Shift Tickets are:

- **Electronic fillable PDF CTR/Shift Ticket.** QR codes to fillable forms are included below. If you do not have QR capabilities, Finance can email you forms directly. Make sure the forms are signed by the supervisor before submitting to Finance. In order to use fillable forms, you must have some version of Adobe Acrobat downloaded on your device, or you can send to your email and fill out.
- **Hard copy CTR/Shift Ticket.** You may fill out a hard copy CTR/Shift Ticket, snap a picture and email to Finance OR you may turn in your actual hard copy as usual. If you send in a picture, please make sure it is legible and includes the supervisor's signature at the bottom. The phone numbers listed below are hard line phones, so texting does not work.

### PLEASE:

- Crews need to include a manifest with their first CTR.
- Try to submit your times at least every other day. There is a drop box at Orleans Base Camp in Check-in to drop off your time.
- Write your email on your CTR
- Hazard pay justifications are required on your CTR's in comments section. "H=Hazard" is not enough.

### WHEN YOU ARE CLOSE TO DEMOB:

- Give Finance a "Courtesy Call" to make sure all your documents have been received.
- Follow the demob plan instructions based on your travel route home. This will determine whether your demob will be in-person or remote.
- Submit all time documentation (including travel home) ahead of demob.
- Send only one representative per resource to finance tent.
- Abide by scheduled demob time or call finance for an unscheduled demob.

Equipment Time: (530) 629-1678

# STANDARD OPERATING PROCEDURES—FINANCE SECTION

## WORK REST CYCLE

IT IS NATIONAL DIRECTION TO MEET 2 TO 1 WORK/REST RATIO (1 hour of sleep/rest for every 2 hours of work). Every effort shall be made to manage work hours so you don't exceed the maximum of 16 hrs. Work hours exceeding 16 hours shall be approved by your supervisor in advance, and a justification/mitigation form completed for review by Section Chief & approved by IC. It is each person's responsibility to comply with this direction to manage for fatigue and safety.

## OPERATIONAL SHIFTS

Pay status for assigned overhead and crews on the fireline will not start prior to the posted briefing time and will terminate on arrival back in camp (except for debriefing—additional hours may be accrued by those required to attend debriefing). Supervisors will be allowed ½ hour prior to briefing and after return to camp to ready crew and equipment.

## DUTY STATUS

Division/Group supervisors and Unit Leaders are responsible for establishing on and off duty status. The objective is a 2 to 1 work/rest ratio. Personnel will normally work, travel, and/or be placed on ORDERED standby 8 to 16 hours per day and be off duty 8 hours or more (breaks count towards 8 hrs.). Off duty time will be in a non-pay status. Each federal employee is guaranteed at least 8 hours of pay status each 24-hour period (midnight to midnight) unless it is the first or last day of an assignment or stated otherwise in a contract or agreement.

## PERSONNEL/EQUIPMENT TIME REPORTING

Personnel time will be reported to the Time Unit daily or every other day once they are signed by the next level supervisor. Situations entitling you to HAZARD PAY are to be noted in remarks (i.e. HP=Uncontrolled Fireline, hovering hookups, low level flights, etc.)

Private Contracted Equipment time must be tracked on a Shift Ticket daily or every other day and hours on shift noted even if it is a daily rate. When swapping out operators you need to notify Finance as well as changing from single to double shift and vice versa.

Supervisor's - If you are responsible for daily tracking of equipment or personnel, please ensure you understand the agreement, and follow the rules provided in this document. Do not sign documents for resources you did not manage unless you have knowledge of their assignment hours.

## MEAL AND OTHER WORK BREAKS

Compensable meal periods are the exception, not the rule (5 CFR 551.411 © and 29 CFR 785.19(a)). Until the fire is controlled, personnel on the fireline MAY BE compensated for meal periods if all of the following conditions are met: 1) The fire is not controlled and 2) The Operations Section Chief makes a decision that it is critical to the effort of controlling the fire that personnel remain at their post of duty and continue to work as they eat, and 3) The compensable meal break is approved by the supervisor at the next level and documented on CTR. For personnel in support positions, and fireline personnel after control of a fire, a meal period of at least 30 minutes must be ordered and taken for each work shift of eight hours or more. In those situations where personnel cannot be relieved from work and must remain at a post of duty, a meal period may be counted as time worked, which will be compensable. If breaks are NOT able to be taken, CTR should have a statement in remarks explaining the situation.

## Resource Advisor Message

- Resource advisors are available in nearly all Divisions on the fire and are here to support the mission of containing this wildfire while at the same time aim to minimize resource damage impacts. If you feel something needs to be brought to a Resource Advisor (or Cultural Specialist), go through your appropriate chain of command to make the notification.
- The Six Rivers, Klamath and Shasta-Trinity National Forests, as well as California Team 4, have been working very closely with cultural specialists from the three main tribes in this area (the Hoopa, Karuk and Yurok) so please help us to maintain and foster these good relationships.
- The area in which the fire is burning is a very sacred place to these tribal cultures so please work with us utilizing MIST tactics to protect cultural and wilderness values.

## Local Government Resources on CFAA

If you are demobing from an incident and there is no OES AREP on site  
F-42 thru the Incident Finance Section Chief or the Incident Commander  
**One of them must sign your 42's**

The Incident keeps the Pink copy and you keep the Golden.  
The Original and Green you mail to OES Headquarters as per the  
instructions on the front of your F-42

## Human Resources Message

### When is a Joke – Not a Joke?

1. When it embarrasses someone,
2. When it is negative humor,
3. When it is a put-down because of sex, race, color, national origin, age, religion, mental or physical handicap or sexual orientation.

Humor and fun need to be part of our teamwork picture, but not when it is at the expense of others.
