Spot Forecast for Loyalton Fire... USFS ... forecaster Boyd National Weather Service Reno NV 945 AM PDT Sun Aug 16 2020

Forecast is based on forecast start time of 1800 PDT on August 16. If conditions become unrepresentative...contact the National Weather Service in Reno.

...RED FLAG WARNING IN EFFECT UNTIL 7 PM PDT THIS EVENING FOR DRY LIGHTNING DUE TO THUNDERSTORMS AND GUSTY OUTFLOW WINDS...

.DISCUSSION...

Extreme fire behavior will be possible again this afternoon and evening. Fire whirls will be possible. Thunderstorms today will be faster and produce some dry lightning strikes outside of rain cores and gusty outflow winds. Chances of a thunderstorm over the Loyalton Fire will increase from 15% to 25% after 1600. Additional chances of thunderstorms can be expected each afternoon, but storm motions will slow down. Dry lightning chances decrease, but heavy rain chances increase Monday and Tuesday. Afternoon temperatures will turn hot for several days with the Nevada valleys up near 100 degrees with overnight lows staying uncomfortably warm as well.

.TONIGHT... Sky/Weather......Mostly cloudy. Haze and areas of smoke . Isolated to scattered showers and thunderstorms until 2100. Temperature.....Min 61-66. RH......Max 40-50%. 20-Foot Winds......South to southeast 8-14 mph with gusts up to 24 mph in the afternoon for valley floors. Southwest . 10-16 mph with gusts to 27 mph for slopes and ridges. Winds decreasing overnight to around 10 mph overnight. Gusty and erratic winds expected near thunderstorms in the afternoon. LAL.....2 until 2100 becoming 1 overnight. Chc Wetting Rain.... Up to 5% for lower elevations 10% off valley floors. Mixing Height......9500-10000 ft agl in the evening dropping to around 1000-1500 ft agl overnight. Transport Winds.....Southwest at 16 mph becoming light overnight. Ventilation.....Excellent decreasing to poor overnight. Haines Index.....5. .MONDAY... Sky/Weather......Partly cloudy becoming mostly cloudy. Isolated showers and thunderstorms in the afternoon. Haze and areas of smoke. Temperature......Max 92-98. 20-Foot Winds......Upslope winds becoming south to southeast 8-12 mph with gusts up to 22 mph in the afternoon. Southwest winds for upper slopes and ridges. LAL.....l increasing to 2 in the afternoon.

Mixing Height......800-1300 ft agl in the morning increasing to 11000-11500

ft agl in the afternoon.

Chc Wetting Rain....10% in the afternoon.

Transport Winds.....South around 10 mph.

Haines Index.....5.

Ventilation.....Poor increasing to excellent.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 2	TYPE OF FIRE: Wildland Fire
FIRE NAME: Loyalton	OPERATIONAL PERIOD: 1800-0600, Aug 16-17, 2020
DATE ISSUED: August 16 2020	TIME ISSUED: 1100
UNIT: Tahoe National Forest	SIGNED: Isi Josh Schmalenberger, FBAN (t)
	MOUTO

INPUTS

WEATHER SUMMARY:

See attached Spot Weather Forecast

Discussion: **Red Flag Warning in effect until 1900** Mostly cloudy. Haze and areas of smoke. Isolated to scattered showers and thunderstorms until 2100.

Min Temp: 61-66; Max RH: 40-50%. 20' winds will be strong South to SE until evening (SW on ridges). Winds will decrease overnight to around 10mph.

FIRE BEHAVIOR

GENERAL

Thunderstorm cells and column collapse have shown fire behavior to remain active through the evening and night. Poor overnight humidity recovery combined with excellent ventilation late into the evening will allow for moderate to extreme rates of spread.

ERC levels on most surrounding RAWS are above the 90th percentile.

The primary carrier on the Loyalton Fire is the grass and shrub fuels. The mahogany and bitter brush has very low live woody fuel moisture and is burning with more aggressive fire behavior than the grass sage fuels and is present on the midslopes in the transition zone between the grass shrub and the timber. The majority of the timber stands and stringers at the higher elevations should be within the interior of the fire.

SPECIFIC FIRE BEHAVIOR

Grass/ Shrub fuel types: Anticipated rates of spread are 30 to 40 chains per hour when downslope winds align with topography. Flame lengths 6-10' with spotting up to 1/10 of a mile. Probability of ignition 20-30%.

Mahogany/ Bitter Brush: Last night fire behavior in this fuel type showed periods of torching and crowning with flame heights of 60-100'. Rates of spread were not significant however the fireline intensity was too extreme for direct fire suppression. Similar fire behavior is expected tonight in this fuel type.

Timber fuel types: Anticipate low to moderate rates of spread with spotting. Unburned areas of timber are receptive and quickly may result in single to group tree torching.

AIR OPERATIONS

Early evening should pose no limitations to Air Operations. Gusty outflow winds from smoke plume and thunderstorms could cause turbulence.

Sunset: 19:54 08/16

Sunrise: 06:15 08/17

SAFETY

When developing strategies and tactics, safety zones and escape routes, you should be evaluating potential fire behavior (worst case scenario), not just observed fire behavior. The predicted thunderstorm activity and related outflow winds can result in extreme fire behavior tonight.

INCIDENT RISK ANALYSIS (ICS 215A) Loyalton Fire Night 08/16/2020

		215A) Loyalton Fire Night 08/16/2020
DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	POINT PROTECTION	 Do not commit to stay in areas without adequate safety zones. Set trigger points to disengage and allow adequate time to relocate to primary and secondary safety zones. Look for propane tanks and other hazardous materials.
ALL	LIGHT FLASHY FUELS / DRY FUEL CONDITIONS	 Anticipate active fire behavior and rapid rates of spread throughout the night. Establish and maintain LCES. Expect increased spot fires. Allow for adequate time to escape routes and safety zones.
ALL	HEAT RELATED ILLNESS (HRI) & DEHYDRATION	 Drink 2 to 1 water to sports drinks. Take frequent breaks. Recognize symptoms of HEAT RELATED ILLNESS which include: lack of energy, headaches, dizziness, lack of rest, no hunger, poor eating habits, hot skin, and lack of sweating.
ALL	POWERLINES	 Treat all powerlines as live. Some structures may have generators that may be putting power back into the lines. Review Powerline Safety section in IRPG (pg 24-26). Communicate, Identify, Isolate, Deny Entry.
ALL	THUNDERSTORMS / EXTREME FIRE BEHAVIOR	 Anticipate active fire behavior and rapid rates of spread throughout the night. Multiple areas of fire activity. Keep an eye out for out-flow winds from thunderstorms. Keep an eye out for lightning in area or new fire starts. Review Thunderstorm Safety- IRPG pg 21
ALL	COVID	 Maintain 6' foot distance whenever possible. Utilize masks, frequent handwashing/sanitizing, disinfect common surfaces, follow county Public health guidelines. Monitor for symptoms, follow reporting procedures.
ALL	RAILROADS	 Treat all railroads as being active. Trains may not slowdown in fire area. Highway 70 corridor. Be aware of Union Pacific assessment operations in the Scott Rd/ Highway 395 areas.
ALL	HEAVY EQUIPMENT OPERATIONS	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment. Use a spotter when backing.
ALL	DIRECTLINE CONSTRUCTION	 Conduct thorough briefing for all personnel. Ensure LCES in place prior to engagement. Adhere to 10 Std. Orders, mitigate 18 Situations. Use Downhill Line Checklist. Utilize Risk Management Process.
ALL	INDIRECT LINE CONSTRUCTION	 Establish and maintain LCES. Locate line in favorable location, lighter fuels and gentler topography when possible. Utilize natural or existing barriers.
ALL	SPOT FIRES	 Size up prior to engagement. Watch for multiple spots. Ensure LCES is in place. Maintain Situational Awareness at all times.
ALL .	FIRING OPERATIONS	 Conduct thorough briefing for all personnel (inside rear cover IRPG). Qualified personnel for all assignments. Trainees to have qualified trainers. Required PPE to be worn by all personnel involved. Establish LCES prior to implementing burning operations
All	ROAD CLOSURES/ EVACUATIONS	 395 has controlled traffic. Park off highway and use turnouts. Use overhead lights or at a minimum flashers on 395 and 70. Even though there are mandatory evacuation, some people may be staying in place. Go through DIVS if law enforcement is needed.
INCIDENT	Loyalton	DATE PREPARED: August 16, 2020 Night 08/16-17/2020 1800-0600 Prepared by Frank Pingiczer TIME PREPARED: 0900 HOURS OPERATIONAL PERIOD Night 08/16-17/2020 1800-0600 Prepared by Frank Pingiczer

Lookouts Communications Escape Routes Safety Zones

LOYALTON FIRE

Operation Period: 08/16-17/2020 Night Shift

SAFETY MESSAGE

How to Reduce Exposure to Risk

- Can the operation be moved to a location with less exposure?
- Will an alternative tactic reduce risk?
- Are there non-essential resources present that do not need to be there?
- Can you accomplish the task with less people?
- Are you using the appropriate resource for the task? (Dozer vs. Crew)
- Will accomplishing the task at a certain time of day, or day vs. night shift reduce exposure?
- Will the acceptance of risk today reduce greater risk in the future?

MAJOR HAZARDS AND RISKS

Trains	Extreme Fire Behavior	Light Flashy Fuels
Point Protection	Dry Fuel Conditions	Heat Related Illness
Highways	Powerlines	Spot Fires

Be sure all elements of your safety plan are in place prior to engagement

Communication Responsibilities

All firefighters have five communication responsibilities:

- Brief others as needed.
- Debrief your actions.
- Communicate hazards to others.
- Acknowledge messages.
- Ask if you don't know or are unclear.

In addition, all leaders of firefighters have the responsibility to provide complete briefings that include a clearly stated "Leader's Intent."

- Task = What is to be done?
- Purpose = Why it is to be done?
- End State = How it should look when done?

Situational Awareness

Help maintain your Situational Awareness by doing the following:

- Constantly observing your environment.
- Interpret and process information received.
- Sharing information by discussing the situation.

CIIMT Team 10 Safety Officers Frank Pingiczer ,Chuck Frank SOF2, Robert Hilfer SOF2(T)

Fire and COVID-19 Briefing Checklist

Self-Awareness / Screening
□ Immediately separate yourself from others.
□ Notify supervisor if you or others experience:
o Cough, more than expected
o Shortness of breath or difficulty breathing
o New loss of taste or smell
o Fever o Chills
o Sore throat o Muscle pain
$\hfill\square$ Review and follow crew and division plans to isolate, triage, and transport symptomatic personnel.
Hygiene on the Fireline
□ Properly wash or sanitize your hands often, especially before and after eating or entering a public
place, and after coughing or sneezing.
□ Avoid handshakes and communal use items.
□ Maintain a supply of hand sanitizer and hand wipes. Inform supervisor of needed resupply.
□ Disinfect high touch surfaces often:
o Radios, phones, doors, pumps, fuel cans, etc.
Social Distancing and Protective Equipment
□ Initiate, practice, and remind others of social distancing.
☐ Conduct briefings and conversations outdoors and at least 6 feet apart.
□ Utilize face coverings as a tool when practical.
☐ Clean or replace dirty face coverings, equipment, and PPE.

Communications

□ Face coverings and social distancing complicate communications. Ensure effective sender/receiver messaging.

Protect yourself, your crew, and your camp!

Find more information: https://www.nwcg.gov/coronavirus

WILDLAND FIRE COVID-19 SCREENING TOOL

Have you in the past 14 days, had contact with a person known to be infected with the Coronavirus (COVID-19)?

Today or in the past 24 hours, have you had any of the following symptoms?

+ Cough more than expected?

+ Shortness of breath or difficulty breathing?

+ Fever? Chills?

+ Sore throat?

+ Nausea or vomiting?

+ Diarrhea?

+ New loss of taste or smell?

+ Fatigue, outside your normal for firefighting?

- + Headache, outside your normal for firefighting?
- + Congestion or runny nose, outside your normal for firefighting?
- + Muscle pain, outside your normal for firefighting?

Loyalton Fire Incident Training Program

A TNSP is assigned to this incident and will be performing the majority of duties "virtually".

To receive documented credit for your assignment, scan the QR Code below to access and complete the Trainee Registration Form. Once registered you will receive additional instructions via text/email For training related questions, call Mike Dunkel (TNSP-t) at 661-599-0571 or email michael_dunkel@firenet.gov

Trainnee Check-In Form

Loyalton Fire Online Covid-19 Tracking Form

Please complete the questions **daily** for self-screening at the beginning of shift. If you or a member of your crew answer true for any of these questions, please notify your supervisor. Supervisors will then contact MEDL immediately prior to leaving base camp and follow Covid 19 protocols.

MEDICAL PLAN (ICS 206 WF)

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.		
 CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic." INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care." 		
Severity of Emergency / Transport Priority Care Priority Pr		
Nature of Injury or Illness & Mechanism of Injury	an opidino, diano, miso roca (diano misos)	Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care		Name of Care Provider (Ex: EMT Smith)
3. INITIAL PATIENT ASSESSMENT	Complete this section for each patient as applicable (start with the most severe	patient)
Agency Affiliation: (NO NAMES OR CREW NAMES) Federal Contractor Local Government		
Assessment: Age: Weight: Chief Complaint:		
(If Pertinent to Injury) Skin Sig	ns: Level of Consciousness:	B/P: HR: RR:
Treatment:		
4. TRANSPORT PLAN:		0.5000000000000000000000000000000000000
Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:		
Helispot / Extraction Site Size and Hazards:		
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:		
Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication		
6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable		
Function Channel Name/Numb	er Receive (RX) Tone/NAC * Tran	smit (TX) Tone/NAC *
COMMAND		
AIR-TO-GRND		
TACTICAL		
7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.		
8. ADDITIONAL INFORMATION: Updates/Changes, etc.		
REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
