Fire Weather Forecast

FORECAST NO: 3
PREDICTION FOR: Night Shift
DATE: August 18th, 2020
FORECAST ISSUED: 1000 August 18th, 2020

NAME OF FIRE: Loyalton
UNIT: Tahoe National Forest
Incident Meteorologist: Derek Williams
Signed: *Derek Williams*

WEATHER DISCUSSION: There is chance for outflow winds from showers and thunderstorms that develop east of the fire through the early evening hours. Otherwise, quieter conditions are expected tonight under partly cloudy skies with slightly cooler temperatures. Barring any outflow winds from shower activity the east this evening, expect a light southwest wind overnight along ridgetops and exposed slopes and valleys. RH recoveries will be lower as a drier air mass moves into the area.

TONIGHT:

WEATHER: Early evening isolated showers and thunderstorms primarily east of US-395. Otherwise, partly cloudy skies overnight.

TEMPERATURES: 50-55° (1-2° cooler)

HUMIDITY: 50-60% (10-15% lower)

20 FT WINDS:

Valleys: Downslope/downvalley at 2-5 mph developing after 2000.

Ridges: Southwest wind 3-7 mph.

CWR (>0.10 of an inch): 0%

LIGHTNING ACTIVITY LEVEL: 1.

INVERSION: Weak inversion developing. Expect poorer RH recoveries on mid slopes.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 6

TYPE OF FIRE: Wildland Fire

FIRE NAME: Loyalton

OPERATIONAL PERIOD: 1800-0600, Aug 18-19, 2020

DATE ISSUED: August 18 2020

TIME ISSUED: 1200

UNIT: Tahoe National Forest

INPUTS

WEATHER SUMMARY: *** See attached Fire Weather Forecast***

Sky Weather: Partly cloudy with early evening isolated showers and thunderstorms primarily east of US-395.

Temp: 50-55; Max RH: 50-60%. 20' valley winds downslope 2-5 after 2000. 20' ridge winds southwest 3-7
Weak inversion developing late with poor RH recovery on mid slopes.

FIRE BEHAVIOR

GENERAL

Nighttime humidity recoveries and lighter winds should decrease fire behavior tonight. Evening west winds and late night through early morning southwest winds will be favorable for Divisions A and Z tonight.

Observed fire behavior on portions of Division A exhibited extreme fire behavior the late evenings and nights of both 8/16 and 8/17. Portions of the fire may exhibit similar conditions as predicted for tonight especially if outflow gusts from thunderstorms occur. This is a heads up for fire behavior potential tonight.

ERC levels on Dog Valley RAWs station are just above the 90th percentile. The values are forecasted to climb close to 97th percentile by the end of the week.

The primary carrier on the Loyalton Fire is the grass and shrub fuels. The timber stands and stringers with understory brush will continue to burn in the evening and through the night.

SPECIFIC FIRE BEHAVIOR

Grass/ Shrub fuel types: Anticipated rates of spread are 20 to 25 chains per hour when downslope winds align with topography. Flame lengths 10-15' with spotting up to 1/10 of a mile. Probability of ignition dropping to 20%. Early morning hours anticipate much lower rates of spread and lower flame lengths due to the RH recovery.

Timber with Mahogany/ Bitter Brush: Anticipate low to moderate rates of spread with spotting. 10hr fuels will not react to overnight humidity and are expected to carry fire where present through the night. Timbered areas are receptive and have potential for single to group tree torching.

During any outflow wind occurrence, expect fire-line intensity and rates of spread to increase.

AIR OPERATIONS

Sunset: 19:52 08/18 Sunrise: 06:17 08/19

SAFETY

Watch for diurnal wind shifts mid evening. Base all actions on current and expected behavior of fire. Know what your fire is doing at all times.

SAFETY MESSAGE

STRUCTURE PROTECTION PLANNING

- Don't enter a burning structure unless you are trained, equipped, and authorized.
- Always stay mobile and wear all of your PPE.
- Back in equipment to allow for a quick escape.
- Coil a short, 1 ½", charged line with fog nozzle on your engine for safety and quick knock down capability.
- Don't make long hose lays. Keep at least 100 gallons of water reserve in your tank.
- Check the road system before the fire approaches. Know bridge limits, alternate access routes, and turnarounds for your vehicle and other support vehicles.
- Determine if residents are home. Leave inside and outside lights on regardless of the time of day, close the garage door.
- Check and mark hazmat; (ie. LPG, pesticides, and paint storage)

Be sure all elements of your safety plan are in place prior to engagement

Decision Points

Establish Decision Point(s) when potential exists for your fire situation to degrade.

Insure that your situation awareness includes monitoring factors that relate to the Decision Point(s) you set.

Have a planned response in place.

Do not ignore a Decision Point that has been hit!

Driving Safety

Lots of public in area. They are paying more attention to the fire activity than the fire personal and equipment.

Expect the unexpected.

Drive defensively.

Adhere to all posted speed limits.

Use pullouts to park in. If parked on road for any reason use hazard lights, overheads or arrow bars.
