

River Complex

INCIDENT ACTION PLAN

CA-SHF-002066

0514P5J0HR

DAY

FRIDAY 8/14/15, 0700-2100

NIGHT

FRIDAY – SATURDAY

8/14/15, 1800-0800

INCIDENT OBJECTIVES	1. INCIDENT NAME River Complex	2. DATE 8/13/2015	3. TIME 2200																
4. OPERATIONAL PERIOD (DATE/TIME) Day Shift 8/14/2015, 0700-1900; Night Shift 8/14-15/2015, 1900-0700																			
5. GENERAL CONTROL OBJECTIVES <u>Incident Strategy</u> <p>The suppression strategy for the River Complex will utilize a combination of direct, indirect and point protection. A key element of the plan is flexibility and the ability to apply the right resource, to the right task, at the right time, for the right duration. It is understood fireline will be constructed only where it is feasible and safe to do so. It is the responsibility of the Incident Commander and their Staff to work with the Agency Administrator to ensure the plan is regularly reviewed and updated.</p> <u>Leader's Expectations</u> <ul style="list-style-type: none"> • Provide the highest level of customer services to all involved with or impacted by the River Complex. All incident assigned personnel should be prepared to take the appropriate actions regarding: <ul style="list-style-type: none"> • Personal interactions both internal and external to the incident management organization • Personal safety and the safety of others • An incident-within-an-incident <u>Management Objectives:</u> <ul style="list-style-type: none"> • Provide for firefighter and public safety by ensuring LCES is evaluated and by utilizing sound Risk Management Principles. • Maintain and build on Cooperator, Partner, and Stakeholder relationships. • Suppress the Complex at the smallest size, while not exposing firefighters or aircraft to unnecessary risk. • In Wilderness, favor indirect attack by using natural barriers, topography and watercourses, and low impact, "light hand" suppression techniques. <u>Control Objectives:</u> <ul style="list-style-type: none"> • Protect life and property in the communities of Denny, Bell Flat, Hoboken, Dailey, and Trinity from the impacts of unwanted wildfire. • Scout western side of Complex for access and implement suppression actions to minimize spread of fire toward the Community of Hoopa. • Develop and implement structure defense plan for the Trinity Village/Hawkins Bar area.

River Complex Fire Weather Forecast

FORECAST NO: 13

NAME OF FIRE: River Complex

PREDICTION FOR: Friday Aug 14th

UNIT: SHF/SRF

SHIFT DATE: 0700 Fri-0700 Sat

SIGNED: Brooke Taber *Brooke Taber*

TIME AND DATE

Incident Meteorologist

FORECAST ISSUED: 2100 Thurs Aug 13th

WEATHER DISCUSSION: A trough of low pressure off the Pacific Northwest Coast will weaken and lift into the northern Rockies by Friday evening. Meanwhile, a ridge of high pressure located over southern California will build into the River Complex this weekend. This will result in drier and warmer temperatures along with lighter winds by the weekend. Northwest ridgetop winds will continue on Friday with higher gusts up to 15 mph in the afternoon. With northwest winds expect the highest concentration of smoke in Div's O/Q, which will limit surface heating and keep relative humidity values slightly higher. Temperatures will be a degree or two cooler with slightly higher relative humidity values in the lower elevations and western portion of the fire. Haines index will be a 4, lower than previous days due to less instability. By evening expect inversion to develop with light drainage winds in the valleys with ridgetop winds becoming northeast by Saturday. This may push the smoke back toward the ICP by Saturday morning.

WEATHER FORECAST Friday:

WEATHER: Heavy smoke through early afternoon... otherwise mostly sunny.

HIGH TEMPERATURES: 80-84 lower portions of Branch I along Denny Road. 66-72 at 5000 feet.

HUMIDITY: 30-38% lower elevations below 2000 feet. 34-40% smoky areas above 4000 feet.

20 FT WINDS:

RIDGETOP – Northwest winds 4-8 mph with gusts to 15 mph afternoon 1400.

SLOPE/VALLEY - Light until 1100 then up-canyon 3-6 mph with localized gusts to 15 mph in exposed midslope locations.

HAINES INDEX: 4. **INVERSION:** Moderate to strong inversion through 1500.

WEATHER FORECAST For Friday Night:

WEATHER: Areas of heavy smoke developing.

TEMPERATURES: 54-58

HUMIDITY: Poor recover relative humidity recoveries in midslopes and ridgetops. 75% lower slopes Branch II and 30-40% upper slopes Branch I.

20 FT WINDS:

RIDGETOP - Northwest winds 5 to 10 mph becoming northeast after midnight with gusts to 15 mph.

SLOPE/VALLEY - Evening down-canyon 1-4 mph.

EXTENDED FORECAST: A ridge of high pressure will build across the region this weekend, resulting in drier and warmer conditions. Winds will be light north to northeast with diurnal winds dominating most of the drainages. Highs warming 85 to 95 over the weekend. RH values 15-25% with only poor midslope recoveries at night. Smoke will be hard to mix out most days with strong inversion setting up over the area under strong high pressure.

FIRE BEHAVIOR FORECAST

FORECAST NO. 13

PREDICTION FOR: 8/14/15 24hr.

NAME OF FIRE: River Cmplx

UNIT: CA-SHF 2066

SIGNED: /s/ Nick Yturri

DATE & TIME ISSUED: 08/13 2200 hr

FIRE BEHAVIOR ANALYST

WEATHER SUMMARY: Warming and Drying

Winds: Day, Ridges NW 4-8mph Gusts 15 mph(after 1400).

Slopes/Valley: 3-6 mph with localized gusts to 15 mph on exposed slopes

Night: NW 5-10 mph, becoming NE after midnight.

Min. RH: Day 30-38% Night 75-80% Temperatures: Day 82-87. Night 54-58

LAL 1 Pig70-80% ERC 61 90th percentile BI 54 Haines 4

FIRE BEHAVIOR FORECAST

GENERAL FIRE BEHAVIOR:

Smoke out over the fire could clear out around 1500 hrs. When the inversion clears out, sun will heat the fuels increasing fire activity, expect torching trees. Primary fire spread will be where fuels & topography align. Falling snags will challenge containment lines and will increase the potential for fire spread over barriers that would normally hold the fire. Rates of spread will be from 1 to 6 chains per hour with flame lengths 1-7 feet in the timber. Most of the active areas of the fire are in a backing alignment. Primary spotting will be from rolling material. Expect the fires to remain active most of the night until the inversion sets in.

Specific:

Branch I: Expect surface fire burning in the heavier fuels. Single and group tree torching will occur interior with radiant heating of fuels. Fire progression will continue to the Northwest and towards the Branch break. Roll out and falling snags will challenge established line.

If fire crosses the 7N04 Rd. it will be backing fire. Rolling material will challenge the 7N04.

Branch II: Expect flanking fire in heavy fuels and surface litter. Single and group tree torching will continue. Spot fires will continue from rolling material. NE flank of the fire will continue flanking the ridges above Denny.

Fire to the SE. will continue to spread laterally along the drainages and on the slope below Iron Mt.. The fire will continue to impact the 504 Rd and progress towards the wilderness boundary.

The fire is not expected to impact crews working on structure prep along the 299 corridor or in Denny. The fire is burning north of the Miller Ranch and will continue to actively back towards the ranches. The fire east of New River will impact Hoboken as backing fire during the burn period. New River should act as a barrier further north towards Denny

Expect the fire to remain active until midnight.

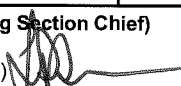

Air Operations: Inversion might clear around 1500 to allow for air ops, but could linger for most of the day.

Safety: Rolling material means fire can ignite below you. Post lookouts that can see you the fire and below.

6. Control Operations/Work Assignments:						
Maintain readiness to implement structure defense plan in the communities of Salyer, Trinity Village, Hawkins Bar, Burnt Ranch, and Cedar Flat.						
7. Special Instructions:						
** Resources in River Group are designated for Initial Attack. ** Make contact with and coordinate efforts with the South Complex (NorCal Team 2). ** Only use the hydrant at the Salyer Work Center for emergencies. ** Inventory all water handling equipment on the division and provide Lat. and Long. to the Situation Unit.

HEALTH AND SAFETY MESSAGE

SAFETY starts with ***YOU*** **PREDICTABLE IS PREVENTABLE**

For Day/Night Operations: August 14, 2015

INCIDENT: **River Complex** DATE: August 13, 2015 TIME: 2000

Major Hazards and Risks:

- **DRIVING:** Drive defensively, Be aware of unstable & hazardous road conditions, Be alert and watch for public and other non-operational personnel in fire areas
- **HAZARD TREES:** Look up, Look down, Look around for signs of fire weakened trees
- **STEEP & RUGGED TERRAIN** – be aware not to work above persons and rolling material
- **Marijuana Cultivation areas** – Maintain awareness, avoid contact, report appropriately

Fire Order of the Day:

Maintain control of your forces at all times

- Have you briefed your subordinates on strategy and tactics for today??
- Does everybody have the “CAN DO SAFELY” attitude??
- Is your “LEADERS INTENT” clear????

WATCH OUT SITUATION of the DAY

Instructions and Assignments not Clear

COMMUNICATION RESPONSIBILITIES

- **Brief others as needed.....give good briefings**
- **Debrief your actions**
- **Communicate hazards....use the Incident Risk Analysis**
- **Acknowledge messages....ask for feedback**
- **Ask if you don't know...ensure you understand**

HAZARD TREE SAFETY

Hazard Tree Indicators:

- **Trees that have burned**
- **Shallow tree root systems**
- **Dead & broken top trees**
- **Leaning or hung up trees**

Need more?????

Check IRPG, pages 20 & 89

Thanks from your Safety Team!!

SERIOUS INJURY PROCEDURES

Firefighter Health & First Aid

Dealing with serious injuries on the fireline can add even more stress to our hectic work environment. In the event a fireline accident occurs, adherence to the following principles is important to insure an adequate and appropriate response is made.

- Before entering the scene, determine whether it is safe to approach. Look for hazards as well as what may have happened. It may be necessary to move the patient or to make the area safe before doing an assessment.
- Provide first aid and assess the extent of the injuries.
- Make contact with your supervisor. Depending on the complexity of the fire, that could be your crew boss, the Division Supervisor, the IC, or even dispatch. If your fire has a medical plan, follow the plan.
- Provide them with accurate, concise information on the following
 - Number of people injured
 - Type of injuries
 - Severity of injuries (light, moderate, severe, life threatening)
 - Mechanism of injury
 - Vital signs (pulse, respirations, level of consciousness, etc)
- Determine the best method of evacuation. Depending on the severity of injury or availability of resources, this decision may already be made for you.
- Keep the radio frequency clear of non-emergency traffic, provide updates of the patient's condition and await instructions.
- If evacuation is by helicopter, it may be necessary to construct a helispot. Document treatment provided in case it is necessary to send the information along with the patient in the aircraft.
- If the patient needs to be carried to a road, insure enough people are available to work in relays.
- Once the patient is clear, take a moment to write down witness statements, clean up notes and timelines, and document any other pertinent information.

Have an idea? Have feedback? Share it.

ICS 206	9. PREPARED BY (MEDICAL UNIT LEADER)			10. REVIEWED BY (SAFETY OFFICER)		
						

MEDICAL PLAN (ICS 206 WF)

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS/DISPATCH

Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: Provide incident summary and command structure.

Nature of Injury/Illness		<i>Describe the injury (Ex: Broken leg with bleeding)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
Incident Commander		<i>Name of IC</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report.

Number of Patients:	Male / Female	Age:	Weight:
Conscious? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Breathing? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Mechanism of Injury: <i>What caused the injury?</i>			
Lat/Long (Datum WGS84) <i>Ex: N 40° 42.45' x W 123° 03.24'</i>			

4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
<input type="checkbox"/> URGENT-RED Life threatening injury or illness. <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE.
<input type="checkbox"/> PRIORITY-YELLOW Serious Injury or illness. <i>Ex: Significant trauma, not able to walk, 2° – 3° burns not more than 1-2 palm sizes.</i>	Ambulance or consider air transport if at remote location. Evacuation may be DELAYED.
<input type="checkbox"/> ROUTINE-GREEN Not a life threatening injury or illness. <i>Ex: Sprains, strains, minor heat-related illness.</i>	Non-Emergency. Evacuation considered Routine of Convenience.

5. TRANSPORT PLAN:

Air Transport: (Agency Aircraft Preferred)

<input type="checkbox"/> Helispot	<input type="checkbox"/> Short-haul/Hoist	<input type="checkbox"/> Life Flight	<input type="checkbox"/> Other
Ground Transport:			
<input type="checkbox"/> Self-Extract	<input type="checkbox"/> Carry-Out	<input type="checkbox"/> Ambulance	<input type="checkbox"/> Other

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

<input type="checkbox"/> Paramedic/EMT(s)	<input type="checkbox"/> Crew(s)	<input type="checkbox"/> SKED/Backboard/C-Collar
<input type="checkbox"/> Burn Sheet(s)	<input type="checkbox"/> Oxygen	<input type="checkbox"/> Trauma Bag
<input type="checkbox"/> Medication(s)	<input type="checkbox"/> IV/Fluid(s)	<input type="checkbox"/> Cardiac Monitor/AED
<input type="checkbox"/> Other (i.e. splints, rope rescue, wheeled litter)		

7. COMMUNICATIONS:

Function	Channel Name/Number	Receive (Rx)	Tone/NAC *	Transmit (Tx)	Tone/NAC *
<i>Ex: Command</i>	<i>Forest Rpt, Ch. 2</i>	<i>168.3250</i>	<i>110.9</i>	<i>171.4325</i>	<i>110.9</i>
COMMAND					
AIR-TO-GRND					
TACTICAL					

*(NAC for digital radio system)

8. EVACUATION LOCATION:

Lat/Long (Datum WGS84) <i>EX: N 40 42.45' x W 123 03.24'</i>	
Patient's ETA to Evacuation Location:	
Helispot/Extraction Size and Hazards:	

9. CONTINGENCY:

Considerations: <i>If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...</i>	REMEMBER: Confirm ETA's of resources ordered Act according to your level of training Be Alert. Keep Calm. Think Clearly. Act Decisively.

Incident Replacement Policy

Prior to release from the incident, personnel may request replacement of equipment and supplies that were damaged, lost, consumed, or worn out during the incident. Personnel will fill out a General Message form to document the request. Worn out or damaged property **will be turned into the Supply Unit** prior to an Incident Replacement Requisition being approved.

Approval for replacement of non-standard cache items has been delegated to the Finance Section Chief. You should initiate this process at least two days prior to demob. Personnel who need to replace/repair damaged property will document the request on a Property Loss and Damage Report (SF-289). The item(s) will then be taken to either, Supply, Communications or Ground Support for inspection and recommendation for replacement or repair. The next step is to bring the form to COMP/CLAIMS who will review the request and forward it to the FSC. The FSC will make a decision as to whether or not the items can be replaced or repaired with incident funds. Some items of high dollar value must be approved by the Incident Business Advisor (IBA).

Items originally provided through use of preparedness funds which need to be replaced due to **normal wear and tear** should be accomplished using home unit funds, not incident funds. If government property was damaged on the incident due to a specific event, e.g. wind event destroys tent, the incident could, upon receipt of required documentation and proof of damage, authorize replacement using the Incident Replacement Requisition. Replacement of non standard items that are worn out is the responsibility of the home unit.

Please feel free to visit me in the Finance Section if you have any questions.

Carol Bass
Finance Section Chief

HUMAN RESOURCE MESSAGE

Does anything ever stay constant on an incident? NO! The only thing that remains constant on an incident is that nothing remains constant.

The Management Team on the Incident has changed, but one expectation remains the same; to continue to run smoothly. The way to keep things running smoothly is to:

- 1) Appreciate the efforts of those before you.
- 2) Communicate openly in order to maintain understandings,
- 3) Trust one another to always do our best.

This is the time when maintaining your composure is the most critical. Any time we experience change, we have the opportunity to lose focus on what is important. Remember you are here to deal with the incident. You've done a great job so far, so keep up the good work.

Ourada's Type 1 IMT Incident Information and Operating Procedures

Welcome to the River Complex Incident

This handout is to inform Incident personnel of the Team's operating procedures. While it is intended to be a guide for all to follow, situations may arise which require adjustment. Every attempt will be made to inform Incident personnel of adjustments. Make sure you review the Incident Action Plan (IAP) daily.

The Team is committed to caring for all Incident personnel. Team Members will do what is reasonably possible to assure that every person assigned to the incident receives the support needed to do their job.

SAFETY is the Team's Number One PRIORITY.

All operations will be planned with firefighter safety as the top priority. In conducting ALL Incident activities including ICP, camps and in all fireline operations YOU MUST make time to ensure that you and others around you are operating in a safely. Each individual assigned to our incident will return home, SAFELY.

Our second priority is: ***To accomplish the objectives of the Agency Administrator.***

Our third priority is: ***To manage the Incident effectively with minimum fiscal, social and environmental impacts***

There is no greater experience than to know that an assignment was a positive.

It is important that our expectations are clear and understood by all Incident personnel. If you have comments or questions concerning the Team Operating Procedures, contact any Team Member.

GENERAL PROCEDURES

This is a general guide to assist incoming Incident personnel.

SPECIAL NEEDS: If any personnel have special needs (i.e. diet, supplies, etc.), let the Logistics Section Chief know. Every reasonable attempt will be made to meet these needs.

Vehicles:

- All incoming vehicles and Contract Equipment will report to the Ground Support Unit to receive parking area assignments, inspection and "E" or an "O" numbers on the window.

Check In:

- Find the nearest Incident Check-in location and provide the requested information (i.e. manifest, order/request number, name, qualifications, etc.)

Planning Section:

- The Resources Unit will inform you of your incident status.
 1. Immediate assignment to duty status.
 2. Ordered standby (must be documented) *(this applies to federal agency resources only)*
 3. Off-duty until assigned. You are off duty as soon as you complete the check-in process unless specifically directed otherwise.

Finance Section:

- Turn in travel time and fill out an ITS resource form to initiate an incident time report (if you have prepared time reports, turn them in at this time).
- Any questions regarding pay status, time keeping procedures, commissary, etc., will be answered in this section.

After checking with the Finance Section, what you do depends on your duty status.

IF ASSIGNED TO DUTY STATUS:

1. Report to assigned supervisor. For OPERATIONS assignments, make sure you report with the necessary tools and equipment to complete the assignment.
2. Check personal gear with the Base/Camp Manager if secured storage is required.

IF ASSIGNED TO STANDBY STATUS: *(this applies to federal agency resources only)*

1. Report to designated staging area.

IF OFF DUTY:

1. Contact Base/Camp Manager for designated sleeping area, meal times, etc.
2. Check out any supplies for your sleeping area from the Supply Unit.
3. Single resources tag both ends of your tent with your name and position. Crews tag tent with individual's name and crew name.
4. Check with the Planning Section regarding your assignment, when and where to report.

Time schedule for briefings, meals and other significant events will be posted at various locations throughout incident facilities. If unable to find the schedule, check with the Planning Section.

Work/Rest Guidelines:

To limit fatigue, operational periods will not exceed 16 hours, **with 12 to 14 hours being the goal**, except in emergency situations. Operational periods in excess of 16 hours should be rare events requiring written justification and approval by the appropriate Section Chief on the Crew Time Report, and will be reviewed by the Incident Commander. It is your responsibility to ensure you meet the 2:1 work/rest ratio standard. For example, please do not show up at a 0600 operational period briefing if you got off-duty after 2200 hours the previous night. You will be briefed before any operational assignment is made.

Leaving the Incident Environment when OFF DUTY:

Notify the Resources Unit of destination and estimated time of return in the event you are needed for duty prior to expected time.

Alcohol and/or Drugs within the Incident Environment:

Alcohol and illegal drugs are not permitted within the incident environment. Each employee has the responsibility to be ready, willing and able to perform duties for which they are qualified. If the employee is unable to perform these duties when called upon, the employee can expect to be sent home at the earliest opportunity with the appropriate documentation of the circumstances sent to their home unit.

Use of Social Media on Wildland Fire Assignments:

Firefighters and Incident Management Team (IMT) members should be aware that existing agency-specific ethics and conduct regulations and restrictions governing the use of social media by federal employees on fire assignments apply. Only authorized employees designated by the hosting unit may represent the government on public social media websites. If you choose to post to a social media website you should have a disclaimer that clearly states the views or opinions that you express are yours alone and do not represent the views of your agency or the IMT. However, anything that you do post regarding wildland firefighting and the agency you work for reflects on that agency, the IMT you are assigned to and all wildland firefighters. Social media sites are regularly monitored by federal agencies and employees may be held accountable for inappropriate conduct or ethics. When in doubt, don't post!

Work Environment/Human Relations:

This team expects everyone assigned to the Incident to conduct themselves as professionals and maintain a positive work environment. Sexual harassment, discrimination, acts of reprisal or any inappropriate behavior that violates ethic and conduct standards will not be tolerated. Your actions outside of the incident environment must also conform to these standards while assigned to this incident. If you need clarification of these expectations, contact the Human Resource Specialist. Non-compliance with these expectations could result in your being sent home at the earliest opportunity with the appropriate documentation of circumstances sent to the home unit.

Performance Evaluations:

Performance Evaluations will be completed for all employees assigned to the incident. It is your responsibility to assure that your supervisor has completed an evaluation.

I hope you have a safe, productive and rewarding experience here. Good luck in your assignment. If you have any needs or concerns that cannot be addressed by my staff, please feel free to visit with me.

Chris Ourada, Incident Commander

Incident Operations Driving Guidelines**

These guidelines document Great Basin Team 2's expectations for driving by personnel assigned to the River Complex. This includes driving while in support, mobilization, and demobilization to an assigned incident.

1. Agency resources assigned to an incident will adhere to the current agency work/rest policy for determining length of duty day.
2. No driver will drive more than 10 hours (behind the wheel) within any duty-day.
3. Multiple drivers in a single vehicle may drive up to the duty-day limitation provided no driver exceeds the individual driving (behind the wheel) time limitation of 10 hours.
4. To manage fatigue, every effort should be made to conduct mobilization and demobilization travel between 0500 hours and 2200 hours.
5. As stated in the current agency work/rest policy, documentation of mitigation measures used to reduce fatigue is required for drivers who exceed 16 hour work shifts. This is required regardless of whether the driver was still compliant with the 10 hour individual (behind the wheel) driving time limitations.
6. A driver shall drive only if they have had at least 8 consecutive hours off-duty before beginning a shift.
7. Drivers should wear seatbelts and operate with headlights on.
8. Utilize a spotter when backing a vehicle.
9. Practice Defensive Driving.

Drivers are responsible to follow these policies and it is the supervisor's responsibility to ensure that employees adhere to the proper driving limitations and monitor employee fatigue.
