

River Complex

INCIDENT ACTION PLAN

CA-SHF-002066

0514P5J0HR

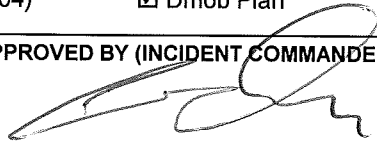

DAY

SATURDAY 8/15/15, 0700-2100

NIGHT

SATURDAY-SUNDAY

8/15-16/15, 1800-0800

INCIDENT OBJECTIVES	1. INCIDENT NAME River Complex	2. DATE 8/14/2015	3. TIME 2200																
4. OPERATIONAL PERIOD (DATE/TIME) Day Shift 8/15/2015, 0700-2100; Night Shift 8/15-16/2015, 1800-0800																			
5. GENERAL CONTROL OBJECTIVES <u>Incident Strategy</u> The suppression strategy for the River Complex will utilize a combination of direct, indirect and point protection. A key element of the plan is flexibility and the ability to apply the right resource, to the right task, at the right time, for the right duration. It is understood fireline will be constructed only where it is feasible and safe to do so. It is the responsibility of the Incident Commander and their Staff to work with the Agency Administrator to ensure the plan is regularly reviewed and updated. <u>Leader's Expectations</u> <ul style="list-style-type: none"> • Provide the highest level of customer services to all involved with or impacted by the River Complex. All incident assigned personnel should be prepared to take the appropriate actions regarding: <ul style="list-style-type: none"> • Personal interactions both internal and external to the incident management organization • Personal safety and the safety of others • An incident-within-an-incident <u>Management Objectives:</u> <ul style="list-style-type: none"> • Provide for firefighter and public safety by ensuring LCES is evaluated and by utilizing sound Risk Management Principles. • Maintain and build on Cooperator, Partner, and Stakeholder relationships. • Suppress the Complex at the smallest size, while not exposing firefighters or aircraft to unnecessary risk. • In Wilderness, favor indirect attack by using natural barriers, topography and watercourses, and low impact, "light hand" suppression techniques. <u>Control Objectives:</u> <ul style="list-style-type: none"> • Protect life and property in nearby communities of Denny, Bell Flat, Hoboken, Dailey, and Trinity Village/Hawkins Bar area. • Implement direct and indirect suppression strategies to minimize fire spread and to protect Values at Risk including private property and public improvements and natural resources.

River Complex Fire Weather Forecast

FORECAST NO: 14

NAME OF FIRE: River Complex

PREDICTION FOR: Saturday Aug 15th

UNIT: SHF/SRF

SHIFT DATE: 0700 Sat-0700 Sun

SIGNED: Brooke Taber *Brooke Taber*

TIME AND DATE

Incident Meteorologist

FORECAST ISSUED: 2100 Fri Aug 14th

WEATHER DISCUSSION:

.....Hot and Dry Weather Expected This Weekend.....

A ridge of high pressure will build into northern California this weekend, which will produce an off shore flow over the River Complex. This will result in much warmer temperatures and lower relative humidity values. Northwest ridgetop winds will become northeast by Saturday with gusts up to 15 mph. These winds are expected to push smoke back toward the ICP. Expect upslope/upvalley winds with localized gusts to 14 mph in aligned north to south valleys on exposed midslope areas with light winds under the thicker canopy. With north to northeast winds expect the highest concentration of smoke in Div's O/Q and Z, which will limit surface heating some and keep relative humidity values slightly higher. Temperatures will range from the upper 80s to lower 90s in the valleys and lower 70s on the ridgetops Saturday. Haines index will be a 4. A midslope thermal belt is expected Saturday night into Sunday morning with poor relative humidity recoveries.

WEATHER FORECAST Saturday:

WEATHER: Areas of heavy smoke...otherwise mostly sunny.

HIGH TEMPERATURES: 89-94 valleys. 74-79 ridgetops.

HUMIDITY: 17-23% lower elevations below 2000 feet. 28-33% smoky areas above 4000 feet.

20 FT WINDS:

RIDGETOP – Northeast winds 4-8 mph becoming northwest wind gust to 12 mph after 1500.

SLOPE/VALLEY - Light until 1100 then up-canyon 3-7 mph with localized gusts to 12 mph in exposed midslope locations.

HAINES INDEX: 4. **INVERSION:** Moderate to strong inversion through 1500.

WEATHER FORECAST For Saturday Night:

WEATHER: Areas of heavy smoke developing.

TEMPERATURES: 57 to 62

HUMIDITY: Poor recover relative humidity recoveries in midslopes and ridgetops. 60 to 70% lower slopes/valleys and 28 to 38% midslopes.

20 FT WINDS:

RIDGETOP - North winds 4 to 8 mph with gusts to 14 mph before midnight.

SLOPE/VALLEY - Evening down-canyon winds 2 to 5 mph.

EXTENDED FORECAST: A ridge of high pressure will continue across the River Complex into early next week. Winds will be light north to northeast with diurnal winds dominating most of the drainages. Highs 94 to 98 valleys and 78 to 83 ridgetops with RH values 15-22% with poor midslope recoveries at night. Smoke will be hard to mix out most days with strong inversion setting up over the area under strong high pressure. A weak trough passage on Tuesday may produce a weak onshore flow with slightly cooler temperatures and higher RH values.

FIRE BEHAVIOR FORECAST

PREDICTION FOR: 8/15/15 24hr.

FORECAST NO. 14

NAME OF FIRE: River Complex

UNIT: CA-SHF 2066

DATE & TIME ISSUED: 08/14 2200 hr

SIGNED: /s/ Nick Yturri
FIRE BEHAVIOR ANALYST

WEATHER SUMMARY: Warming and Drying

Winds: Day, Ridges NE 4-8mph Becoming NW with gusts to 15mph(after 1500).

Slopes/Valley: Light until 1100, then up-canyon 3-7mph gust to 12mph exposed midslope areas.

Night: NW 5-10 mph, becoming NE after midnight.

Min. RH: Day 17-23% Night 24-30% Ridges and 60-70% Valleys

Temperatures: Day 88-93. Night 57-62

LAL 1 Pig80-90% ERC 56 80th percentile BI 48 Haines 4

FIRE BEHAVIOR FORECAST

GENERAL FIRE BEHAVIOR:

Smoke over the fire could clear out around 1500 hrs., but a thermal belt developing midslope overnight may lead to an increase in fire activity earlier in the shift. When the inversion clears out, the sun will heat fuels, increasing fire activity and single to group tree torching. Primary fire spread will be where fuels & topography align. Falling snags will challenge containment lines and will increase the potential for fire spread over barriers that would normally hold the fire. Rates of spread will be from 1 to 10 chains per hour with flame lengths 1-9 feet in the timber. Most of the active areas of the fire are in a backing alignment. With warmer and dryer temperatures, the fire could remain active later into the night.

Specific:

Branch I: Expect surface fire burning in the heavier fuels. Single and group tree torching will occur interior with radiant heating of fuels. Fire progression will continue to the Northwest and towards the Branch break. Roll out and falling snags will challenge established line.

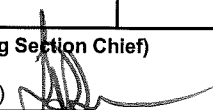

Branch II: Expect flanking fire in heavy fuels and surface litter. Single and group tree torching will continue. Spot fires will continue from rolling material. NE flank of the fire will continue to be active throughout the day and into the night. Fire to the SE. will continue to spread laterally along the drainages and on the slope below Iron Mtn. The fire will continue to impact the 504 Rd and progress towards the wilderness boundary.

The fire is not expected to impact crews working on structure prep along the 299 corridor or in Denny. The fire is burning north of the Miller Ranch and will continue to actively back towards the ranches. The fire east of New River will impact Hoboken as backing fire during the burn period. New River should act as a barrier further north towards Denny.

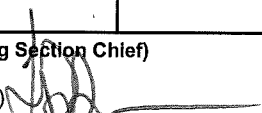

Air Operations: Inversion might clear around 1500 to allow for air ops, but could linger for most of the day.

Safety: Weather getting hotter and dryer.... Monitor Weather & Post Lookouts!

INCIDENT SAFETY ANALYSIS 215a

River Complex CA-SHF-002066 - Saturday, August 15, 2015

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
All	Driving & Traffic	<ul style="list-style-type: none"> ~ Practice "Defensive Driving" techniques traveling on all roads. ~ Use spotters when backing. ~ Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts. ~ Use chock blocks, turn wheels into hill. ~ Avoid distractions (eating, cell phones, radio). ~ Follow Speed Limit of 5mph in ICP area ~ Be Aware of road construction areas ~ Watch for rolling material in fire areas ~ Maintain awareness of road stability & condition
All	Hazard Trees	<ul style="list-style-type: none"> ~ Follow "Hazard Tree Safety" guidelines, IRPG page 22. ~ Post lookouts, or use a spotter in mop-up areas with personnel. ~ Don't park vehicles or take breaks in high concentrations of hazard trees. ~ Establish trigger points for disengagement during high wind events. ~ Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
Div L, Q, T, W	Heavy Equipment Operations	<ul style="list-style-type: none"> ~ Ensure communications are established with operators use hand signals if needed. ~ Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. ~ Avoid working below heavy equipment.
Night Div	Night Operations	<ul style="list-style-type: none"> ~ Maintain high visibility in work area and wear vest while in roadway. ~ Use glow sticks to mark hazards. ~ Ensure personnel have a personal light (headlamp). ~ Watch for signs of fatigue.
All	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> ~ Maintain 8'-10' spacing when working & walking. ~ Lookout for rolling rocks, debris, or burning material. ~ Evaluate necessity to send personnel in areas with limited access. ~ Post lookouts (IRPG pg 6).
All	Marijuana cultivation & processing sites	<ul style="list-style-type: none"> ~ Avoid contact with persons, plants & materials ~ Immediately leave area ~ Notify supervisor & resources of location
All	Firefighter & Public Smoke Exposure	<ul style="list-style-type: none"> ~ Use warning lights and provide traffic control on roadways during smoky and night operations. ~ Rotate crews out of smoky areas
All	Air Operations	<ul style="list-style-type: none"> ~ Follow " Aviation Watch-Out Situations" on page 44, IRPG. ~ Don't plan on air resources for medical transport or resupply. ~ Refer to page 57, IRPG for directing bucket drops. ~ Ensure positive communication with all air resources.
All	Chain Saw Operations	<ul style="list-style-type: none"> ~ Only fell and buck trees within your expertise, and training. ~ Follow "Procedural Felling Operations" on page 79 in IRPG. ~ Do not fall trees during high wind events. ~ Ensure proper use of all required PPE.
All, ICP	Heat Related Illness (HRI)& Dehydration	<ul style="list-style-type: none"> ~ Drink Fluids throughout operational period (6-8 qts/shift). Water/electrolyte ratio of 3 to 1. ~ Take Frequent breaks, 10 minutes every hour. ~ Allow out of area resources time to acclimatize ~ Recognize symptoms of HEAT RELATED ILLNESS
Div Q, T, W	Indirect Fireline	<ul style="list-style-type: none"> ~ Post lookouts, identify escape routes and safety zones (IRPG pg. 6). ~ Review "Strategy/Indirect Attack" (IRPG pg. 87).
All	Poisonous Plants	<ul style="list-style-type: none"> ~ Identify and Avoid hazard areas. ~ Launder clothing. ~ Shower frequently.

HEALTH AND SAFETY MESSAGE

SAFETY starts with **YOU** **PREDICTABLE IS PREVENTABLE**

For Day/Night Operations: August 15, 2015

INCIDENT: River Complex

DATE: August 14, 2015

TIME: 2000

Major Hazards and Risks:

- **DRIVING:** Drive defensively, Be aware of unstable & hazardous road conditions, Be alert and watch for public and other non-operational personnel in fire areas
- **HAZARD TREES:** Look up, Look down, Look around for signs of fire weakened trees
- **STEEP & RUGGED TERRAIN** – be aware not to work above persons and rolling material
- **Marijuana Cultivation areas** – Maintain awareness, avoid contact, report appropriately

Fire Order of the Day:

Uninformed on Strategy, Tactics, and Hazards

- Be alert to changing conditions.....does your perception = reality?????
- Share as much information as possible.....sometimes it's the little things that make the difference
- Flag hazards and mitigate by avoidance, removing the hazard, and sharing with all personnel

Wildlife Encounters

Do not leave trash on the line or throw food scraps on the ground. This attracts wildlife! You know, ...Da Bears Boo Boo!

Risk Management Process

Situation Awareness

Gather Information

- | | |
|-----------------|------------------------|
| Objective(s) | Previous Fire Behavior |
| Communication | Weather Forecast |
| Who's in Charge | Local Factors |

Hazard Assessment

Estimate Potential Hazards

- Look Up/Down/Around Indicators
- Identify Tactical Hazards

What other safety hazards exist?

Consider severity vs. probability?

Hazard Control

Identify hazard mitigation actions

What other controls are necessary?

Decision Point

Are controls in place for identified hazards?

NO - Reassess situation YES - Next question

Are selected tactics based on expected actions/outcomes?

NO - Reassess situation YES - Next question

Have instructions been given and understood?

NO - Reassess situation YES - Initiate action

Evaluate

Human Factors: Low experience level?

Distracted from primary tasks?

Fatigue or stress reaction?

Hazardous attitude?

The Situation: What is changing?

Thanks from your Safety Team!!

Wildland Fire Lessons Learned Center

DRIVING SAFETY

Vehicles/Roads Category

Driving is one of the most hazardous things we do because we literally perform the task hundreds of times in the course of our daily lives we tend to take it for granted. Based on recent accident trends, vehicle accidents are the source of more deaths and serious injuries to wildland firefighters than any other single cause.

- ◆ To be a safe driver you have to *want* to be one. Take a good hard look at your driving habits. Are you training yourself to do the right things the right way, like fastening your seat belt, checking your mirrors, and maintaining safe following distances?
- ◆ Inattentiveness is a major contributing factor in motor vehicle accidents within the wildland firefighting community. Since the average adult attention span is 15-20 minutes we must develop techniques that allow us to refocus our attention on our driving.
- ◆ Many things can lure our attention away from our driving such as: fatigue, eating and drinking, reading directions and maps, writing, cell phone and radio use, conversation within the vehicle and music.
 - ✓ Drive only when you are well rested and alert and avoid driving during the hours of 10:00 PM and 6:00 AM. Take a 10 to 15 minute break after every 2 hours.
 - ✓ Practice situational awareness; be aware of what is happening in front, behind, and on both sides of your vehicle.
 - ✓ Never drive when taking medications that make you drowsy.
 - ✓ Delegate navigation and communication to a passenger or pull over.
 - ✓ By constantly moving your vision, checking mirrors and distant road conditions, you can avoid highway hypnosis and daydreaming.
 - ✓ Avoid eating or drinking while driving.
 - ✓ When talking with passengers, keep your eyes on the road and both hands on the steering wheel. Avoid serious or argumentative conversations.
 - ✓ Do not be in a hurry, be patient.
- ◆ Safe driving starts with a safe vehicle. Something as simple as under-inflated tires can have serious consequences. Before operating any vehicle, do a walk-around to look for potential problems, make sure the lights and blinkers work, and adjust your seat and mirrors. If it is the first time you have driven the vehicle, make yourself aware of where everything is.

MEDICAL PLAN (ICS 206 WF)

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS/DISPATCH

Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: Provide incident summary and command structure.

Nature of Injury/Illness		<i>Describe the injury (Ex: Broken leg with bleeding)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
Incident Commander		<i>Name of IC</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report.

Number of Patients:	Male / Female	Age:	Weight:
Conscious? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Breathing? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Mechanism of Injury: <i>What caused the injury?</i>			
Lat/Long (Datum WGS84) <i>Ex: N 40° 42.45' x W 123° 03.24'</i>			

4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
<input type="checkbox"/> URGENT-RED Life threatening injury or illness. <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE .
<input type="checkbox"/> PRIORITY-YELLOW Serious injury or illness. <i>Ex: Significant trauma, not able to walk, 2° - 3° burns not more than 1-2 palm sizes.</i>	Ambulance or consider air transport if at remote location. Evacuation may be DELAYED .
<input type="checkbox"/> ROUTINE-GREEN Not a life threatening injury or illness. <i>Ex: Sprains, strains, minor heat-related illness.</i>	Non-Emergency. Evacuation considered Routine of Convenience .

5. TRANSPORT PLAN:

Air Transport: (Agency Aircraft Preferred)

<input type="checkbox"/> Helispot	<input type="checkbox"/> Short-haul/Hoist	<input type="checkbox"/> Life Flight	<input type="checkbox"/> Other
-----------------------------------	---	--------------------------------------	--------------------------------

Ground Transport:

<input type="checkbox"/> Self-Extract	<input type="checkbox"/> Carry-Out	<input type="checkbox"/> Ambulance	<input type="checkbox"/> Other
---------------------------------------	------------------------------------	------------------------------------	--------------------------------

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

<input type="checkbox"/> Paramedic/EMT(s)	<input type="checkbox"/> Crew(s)	<input type="checkbox"/> SKED/Backboard/C-Collar
<input type="checkbox"/> Burn Sheet(s)	<input type="checkbox"/> Oxygen	<input type="checkbox"/> Trauma Bag
<input type="checkbox"/> Medication(s)	<input type="checkbox"/> IV/Fluid(s)	<input type="checkbox"/> Cardiac Monitor/AED
<input type="checkbox"/> Other (i.e. splints, rope rescue, wheeled litter)		

7. COMMUNICATIONS:

Function	Channel Name/Number	Receive (Rx)	Tone/NAC *	Transmit (Tx)	Tone/NAC *
<i>Ex: Command</i>	<i>Forest Rpt, Ch. 2</i>	<i>168.3250</i>	<i>110.9</i>	<i>171.4325</i>	<i>110.9</i>
COMMAND					
AIR-TO-GRND					
TACTICAL					

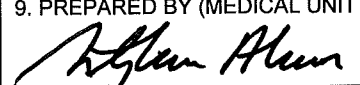

*(NAC for digital radio system)

8. EVACUATION LOCATION:

Lat/Long (Datum WGS84) <i>EX: N 40 42.45' x W 123 03.24'</i>	
Patient's ETA to Evacuation Location:	
Helispot/Extraction Size and Hazards:	

9. CONTINGENCY:

Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? <i>Be thinking ahead...</i>	REMEMBER: Confirm ETA's of resources ordered Act according to your level of training Be Alert. Keep Calm. Think Clearly. Act Decisively.

HUMAN RESOURCE MESSAGE

What Makes a Firefighter GREAT!

1. High integrity.
2. Good communication skills.
3. Ability to work under stress.
4. Ability to adapt and overcome.
5. Team player.
6. Good with technical problem solving.
7. Able to work long days at a single task.
8. Good judgement and common sense.
9. Self-sacrificing.
10. Optimistic.

A Message from Finance

- If you are claiming hazard pay, you need to put the reason why you are eligible on the bottom of the Crew Time Report.
- All crew time reports and equipment shift tickets must be legible. This includes the signature. If your signature is illegible, please print your name below it.
- Time recorded in excess of 16 hours must have a written explanation/justification and mitigation measures in the remarks block of the CTR/shift ticket. The appropriate Section Chief needs to sign the CTR/Shift Ticket.
- All equipment shift tickets need to record the hours worked, even if the equipment was hired on a daily rate. Please put your Resource Order number on the shift ticket.
- Compensable meal periods are the exception, not the rule. Personnel on the fireline may be compensated for their meal period if all of the following conditions are met:
 - The fire is to controlled, and
 - The Operations Section Chief makes a decision that it is critical to the effort of controlling the fire that personnel remain a their post of duty and continue to work as they eat, and
 - The compensable meal break is approve by the supervisor at the next level and is documented on the CTR.
- For personnel in support positions, and fireline personnel after control of the fire, a meal period of at least 30 minutes must be ordered and taken for each work shift e.g., a minimum 30 minute break for shifts of 8 hours or more.
- ***Contractors that have been here at least 14 days, that would like an interim payment should go visit Equipment time.***
- ***Casuals that have been here at least 14 days, who would like an interim payment should visit Personnel time.***
- **The following contractors need to see Equipment Time:**
 - E-67 FIRESTORM
 - E-71 Ketchum Fire Department
 - E-113 Trudy Woodman
 - E-130 Doug McKellers
 - E-133 Eagle Cap
 - E-155 TNK Engine 58
 - O-27 Spikes
 - O-101 John Burch
 - O-108 Shawn Coder
 - O-160 Corbiere
 - O-217 Tanner
 - O-235 Russell Hodgson
 - O-250 CTS Ventures, Inc.

Training Message

Have you taken a few minutes to review the task book, **together**, and plan for today?

Task	Training/Coaching?	Evaluation?
(Example) #10 Brief / assign tasks	X	
(Example) # 7 Obtain work materials and equipment		X

REMEMBER!!!

On-the-job training and evaluation of task performance are two separate functions. It's similar to instruction in the classroom and taking a test. The two functions are separate. They can be performed in sequence, but not at the same time.

Note: All trainees and their trainers (if you haven't done so yet) please check in with the Training Specialist, (located in yurt with Check-In).

Don Washco 623-695-6487

Ourada's Team Expectations

Safety is the Team's Number One Priority

Everyone is a safety officer—See It, Say It, and Fix It!

The Team is committed to identifying clear Task, Purpose, and End State that achieves the Agency Administrator's direction and objectives in a timely and cost effective manner.

The Team provides every person associated with the incident a safe, productive, and supportive work environment.

The Team operates in a transparent manner, facilitating open communication and dialogue up, down, and across the chain of command, with active listening and opportunity for discussion and collaboration.

Here are a few ways you can help the Team create an atmosphere of **Duty, Respect, and Integrity** as outlined in the Incident Response Pocket Guide (IRPG):

If you Need to Leave the Incident Environment when Off Duty:

Notify your supervisor of destination and estimated time of return in the event you are needed for duty prior to expected time.

Alcohol /Illegal Drugs / Fitness for Duty

Alcohol and illegal drugs are not permitted within the incident environment. Be ready, willing, and able to perform your duties. If you are unable to perform your duties, you may be released from the incident with the home unit or employer being notified of the circumstances.

Work Environment/Human Relations:

Conduct yourselves as professionals and maintain a positive, non-hostile work environment with mutual respect. Sexual harassment, discrimination, acts of reprisal or any inappropriate behavior that violates human rights, the provisions of equal employment opportunity (EEO), or ethics and conduct standards will not be tolerated. If you need clarification of these expectations, contact the Human Resource Specialist.

Your actions in the community outside of the incident environment must also conform to these standards while assigned to this incident. Your integrity is shown by obeying the law and following local rules and ordinances. Non-compliance with these expectations could result in your being released from the incident with the home unit or employer being notified of the circumstances.

Work / Rest Guidelines:

Any shift times over 16 hours require written justification and approval by the appropriate Section Chief on the Crew Time Report, and will be reviewed by the Incident Commander.

Performance Evaluations:

Performance Evaluations will be completed for all trainees and contractors (including ADs). Any unsatisfactory performance will be documented on an evaluation. It is your responsibility to ensure that your supervisor has completed an evaluation.

Use of Social Media on Wildland Fire Assignments

Firefighters and Incident Management Team (IMT) members should be aware that existing agency-specific ethics and conduct regulations and restrictions governing the use of social media by federal employees on fire assignments apply.

Only authorized employees designated by the hosting unit may represent the government on public social media websites. If you choose to post to a social media website you should have a disclaimer that clearly states the views or opinions that you express are yours alone and do not represent the views of your agency or the IMT.

However, anything that you do post regarding wildland firefighting and the agency you work for reflects on that agency, the IMT you are assigned to and all wildland firefighters.

Social media sites are regularly monitored by federal agencies and employees may be held accountable for inappropriate conduct or ethics. When in doubt, don't post!

I hope you have a safe, productive and rewarding experience here. If you have any needs or concerns that cannot be addressed by my Command and General Staff, please feel free to visit with me.

Incident Operations Driving Guidelines**

These guidelines document Great Basin Team 2's expectations for driving by personnel assigned to the River Complex. This includes driving while in support, mobilization, and demobilization to an assigned incident.

1. Agency resources assigned to an incident will adhere to the current agency work/rest policy for determining length of duty day.
2. No driver will drive more than 10 hours (behind the wheel) within any duty-day.
3. Multiple drivers in a single vehicle may drive up to the duty-day limitation provided no driver exceeds the individual driving (behind the wheel) time limitation of 10 hours.
4. To manage fatigue, every effort should be made to conduct mobilization and demobilization travel between 0500 hours and 2200 hours.
5. As stated in the current agency work/rest policy, documentation of mitigation measures used to reduce fatigue is required for drivers who exceed 16 hour work shifts. This is required regardless of whether the driver was still compliant with the 10 hour individual (behind the wheel) driving time limitations.
6. A driver shall drive only if they have had at least 8 consecutive hours off-duty before beginning a shift.
7. Drivers should wear seatbelts and operate with headlights on.
8. Utilize a spotter when backing a vehicle.
9. Practice Defensive Driving.

Drivers are responsible to follow these policies and it is the supervisor's responsibility to ensure that employees adhere to the proper driving limitations and monitor employee fatigue.
