INCIDENT OBJECTIVES	1. INCIDENT NAME River Complex	2. DATE 8/15/2015	3. TIME 2200																
4. OPERATIONAL PERIOD (DATE/TIME) Day Shift 8/16/2015, 0700-2100; Night Shift 8/16-17/2015, 1800-0800																			
<p>5. GENERAL CONTROL OBJECTIVES</p> <p><u>Incident Strategy</u></p> <p>The suppression strategy for the River Complex will utilize a combination of direct, indirect and point protection. A key element of the plan is flexibility and the ability to apply the right resource, to the right task, at the right time, for the right duration. It is understood fireline will be constructed only where it is feasible and safe to do so and when there is a high probability of meeting incident objectives. It is the responsibility of the Incident Commander and their Staff to work with the Agency Administrator to ensure the plan is regularly reviewed and updated.</p> <p><u>Leader's Expectations:</u></p> <p>Provide the highest level of customer services to all involved with or impacted by the River Complex. All incident assigned personnel should be prepared to take the appropriate actions regarding;</p> <ul style="list-style-type: none"> • Personal interactions both internal and external to the incident management organization. • Personal safety and the safety of others. • An incident-within-an-incident. <p><u>Management Objectives:</u></p> <ul style="list-style-type: none"> • Provide for firefighter and public safety by ensuring LCES is evaluated and by utilizing sound Risk Management Principles. • Maintain and build on Cooperator, Partner, and Stakeholder relationships. • Choose strategy and tactics that limit exposing firefighters or aircraft to unnecessary risk. • In Wilderness, where possible utilize natural barriers, topography and watercourses along with suppression techniques that have the least impact on Wilderness values. <p><u>Control Objectives:</u></p> <ul style="list-style-type: none"> • Protect life and property in the communities of Denny, Bell Ranch, Hoboken, Trinity Village, Hawkins Bar, Dailey and the Highway 299 corridor from the impacts of unwanted wildfire. • Protect life, property resources and cultural values on or near the Hoopa Valley Indian Reservation.

River Complex Fire Weather Forecast

FORECAST NO: 15

NAME OF FIRE: River Complex

PREDICTION FOR: Sunday Aug 16th

UNIT: SHF/SRF

SHIFT DATE: 0700 Sun-0700 Mon

SIGNED: Brooke Taber *Brooke Taber*

TIME AND DATE

Incident Meteorologist

FORECAST ISSUED: 2100 Sat Aug 15th

WEATHER DISCUSSION:

.....Hot and Dry Weather Continues....

Hot and very dry weather will continue as the region remains under a ridge of high pressure through Monday with weak offshore flow at night. Expect upslope/upvalley winds with localized gusts to 10 mph in aligned north to south valleys on exposed midslope areas with lighter winds under the thicker smoke canopy. Meanwhile, ridgetop winds will continue from the northwest at 4 to 8 mph, which is expected to keep the highest concentration of smoke in Div's O/Q and Z. The thick smoke canopy will limit surface heating and keep relative humidity values higher in these divisions much like Saturday. The inversion will lift by 1500. A midslope thermal belt will develop again Sunday Night, resulting in much lower relative humidity values feet and warmer temperatures.

WEATHER FORECAST Sunday:

WEATHER: Areas of heavy smoke...otherwise mostly sunny.

HIGH TEMPERATURES: 90-95 valleys. 75-80 ridgetops.

HUMIDITY: 18-23% lower elevations below 2000 feet. 28-35% in areas of smoke above 4000 feet.

20 FT WINDS:

RIDGETOP – Northwest winds 4-8 mph.

SLOPE/VALLEY - Light until 1200 then up-canyon 3-6 mph with localized gusts to 10 mph.

HAINES INDEX: 4. **INVERSION:** Strong inversion through 1500.

WEATHER FORECAST For Sunday Night:

WEATHER: Areas of heavy smoke developing.

TEMPERATURES: 57 to 62

HUMIDITY: Poor recover relative humidity recoveries 28 to 35% in midslopes and ridgetops. 70 to 80% lower slopes/valleys.

20 FT WINDS:

RIDGETOP - Northwest winds 4 to 8 mph becoming northeast after midnight.

SLOPE/VALLEY - Evening down-canyon winds 2 to 5 mph.

EXTENDED FORECAST: Hot and dry weather will continue into early this upcoming week as a ridge of high pressure continues across the River Complex. Winds will be light north to northeast with diurnal winds dominating most of the drainages. Highs 93 to 98 valleys and 78 to 83 ridgetops and under smoke canopy, with RH values 17-27% with poor midslope recoveries at night. Smoke will be hard to mix out most days with strong inversion setting up over the area under strong high pressure. A subtle trough passage on Tuesday may produce a weak onshore flow with slightly cooler temperatures and higher RH values for midweek.

FIRE BEHAVIOR FORECAST

PREDICTION FOR: 8/16/15 24hr.

FORECAST NO. 15

NAME OF FIRE: River Complex

SIGNED: /s/ Nick Yturri

UNIT: CA-SHF 2066

FIRE BEHAVIOR ANALYST

DATE & TIME ISSUED: 08/15 2100 hr

WEATHER SUMMARY: Warming and Drying

Winds: Day, Ridges NE 4-8 mph

Slopes/Valley: Light until 1200, then up-canyon 3-6 mph gusts to 10 mph

Night: NW 4-8 mph, becoming NE after midnight.

Min. RH: Day 18-23% low elevations, 28-35% in inversion.

Night 28-35% Midslopes/Ridges. 70-80% lower slopes/valleys

Temperatures: Day 90-95 Valleys 75-80 Ridgetops. Night 57-62

LAL 1 Pig 80-90% ERC 56 82nd percentile BI 49 Haines 4

FIRE BEHAVIOR FORECAST

GENERAL FIRE BEHAVIOR:

Smoke over the fire could clear out around 1500 hrs., but a thermal belt developing midsole overnight may lead to an increase in fire activity earlier in the shift. When the inversion clears out, sun will heat the fuels increasing fire activity and single to group tree torching. Primary fire spread will be where fuels & topography align. Rates of spread will be from 1 to 9 chains per hour with flame lengths 1-9 feet in the timber. Most of the active areas of the fire are in a backing alignment. With warmer and dryer temperatures, the fire could remain active later into the night.

Falling snags and rollout will challenge containment lines and will increase the potential for fire spread over barriers that would normally hold the fire.

Specific:

Branch I: Expect surface fire burning in the heavier fuels. Single and group tree torching will occur interior with radiant heating of fuels. Fire progression will continue to the Northwest and towards the Branch break.

Branch II&III: Expect flanking fire in heavy fuels and surface litter. Single and group tree torching will continue. NE flank of the fire will continue to be active throughout the day and into the night. Fire to the SE will continue to spread laterally along the drainages and on the slope below Iron Mt.. The fire will continue to impact the 5N04 Rd and progress towards the wilderness boundary. The N518 Rd will also be challenged and pose a threat to the Hwy 299 corridor. The fire is not expected to impact crews working on structure prep along the 299 corridor or in Denny. The fire is burning north of the Miller Ranch and will continue to actively back towards the ranches. The fire east of New River will impact Hoboken as backing fire during the burn period. New River should act as a barrier further north towards Denny.

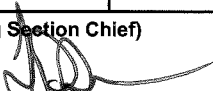

Air Operations: Inversion might clear around 1500, but could linger for most of the day.

Safety: When inversion lifts, be aware of increased fire activity.

6. Control Operations/Work Assignments:						
Maintain readiness to implement structure defense plan in the communities of Salyer, Trinity Village, Hawkins Bar, Burnt Ranch, and Cedar Flat.						
7. Special Instructions:						
** Resources in River Group are designated for Initial Attack.						
** Make contact with and coordinate efforts with the South Complex (NorCal Team 2).						
** Only use the hydrant at the Salyer Work Center for emergencies.						
** Inventory all water handling equipment on the division and provide Lat. and Long. to the Situation Unit.

INCIDENT SAFETY ANALYSIS 215a

River Complex CA-SHF-002066 - Sunday, August 16, 2015

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
All	Driving & Traffic	<ul style="list-style-type: none"> ~ Practice "Defensive Driving" techniques traveling on all roads. ~ Use spotters when backing. ~ Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts. ~ Use chock blocks, turn wheels into hill. ~ Avoid distractions (eating, cell phones, radio). ~ Follow Speed Limit of 5mph in ICP area ~ Be Aware of road construction areas ~ Watch for rolling material in fire areas ~ Maintain awareness of road stability & condition
All	Hazard Trees	<ul style="list-style-type: none"> ~ Follow "Hazard Tree Safety" guidelines, IRPG page 22. ~ Post lookouts, or use a spotter in mop-up areas with personnel. ~ Don't park vehicles or take breaks in high concentrations of hazard trees. ~ Establish trigger points for disengagement during high wind events. ~ Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
Div L, Q, T, W	Heavy Equipment Operations	<ul style="list-style-type: none"> ~ Ensure communications are established with operators use hand signals if needed. ~ Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. ~ Avoid working below heavy equipment.
All	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> ~ Maintain 8'-10' spacing when working & walking. ~ Lookout for rolling rocks, debris, or burning material. ~ Evaluate necessity to send personnel in areas with limited access. ~ Post lookouts (IRPG pg 6).
All	Chain Saw Operations	<ul style="list-style-type: none"> ~ Only fell and buck trees within your expertise, and training. ~ Follow "Procedural Felling Operations" on page 79 in IRPG. ~ Do not fall trees during high wind events. ~ Ensure proper use of all required PPE.
A,D,Z,Q,T,W	Night Operations	<ul style="list-style-type: none"> ~ Maintain high visibility in work area and wear vest while in roadway. ~ Use glow sticks to mark hazards. ~ Ensure personnel have a personal light (headlamp). ~ Watch for signs of fatigue.
All	Firefighter & Public Smoke Exposure	<ul style="list-style-type: none"> ~ Use warning lights and provide traffic control on roadways during smoky and night operations. ~ Rotate crews out of smoky areas
Div L, Q, T, W	Indirect Fireline	<ul style="list-style-type: none"> ~ Post lookouts, identify escape routes and safety zones (IRPG pg. 6). ~ Review "Strategy/Indirect Attack" (IRPG pg. 87).
All	Air Operations	<ul style="list-style-type: none"> ~ Follow " Aviation Watch-Out Situations" on page 44, IRPG. ~ Don't plan on air resources for medical transport or resupply. ~ Refer to page 57, IRPG for directing bucket drops. ~ Ensure positive communication with all air resources.
All	Poisonous Plants	<ul style="list-style-type: none"> ~ Identify and Avoid hazard areas. ~ Launder clothing. ~ Shower frequently.
All, ICP	Heat Related Illness (HRI)& Dehydration	<ul style="list-style-type: none"> ~ Drink Fluids throughout operational period (6-8 qts/shift). Water/electrolyte ratio of 3 to 1. ~ Take Frequent breaks, 10 minutes every hour. ~ Allow out of area resources time to acclimatize ~ Recognize symptoms of HEAT RELATED ILLNESS
All	Marijuana cultivation & processing sites	<ul style="list-style-type: none"> ~ Avoid contact with persons, plants & materials ~ Immediately leave area ~ Notify supervisor & resources of location

HEALTH AND SAFETY MESSAGE

SAFETY starts with ***YOU*** PREDICTABLE IS PREVENTABLE

For Day/Night Operations: August 16, 2015

INCIDENT: **River Complex** DATE: August 16, 2015 TIME: 2000

Major Hazards and Risks:

- **DRIVING:** Drive defensively, Be aware of unstable & hazardous road conditions, Be alert and watch for public and other non-operational personnel in fire areas
- **HAZARD TREES:** Look up, Look down, Look around for signs of fire weakened trees
- **STEEP & RUGGED TERRAIN** – Be aware not to work above persons and rolling material
- **HEAVY EQUIPMENT** – Avoid working below equipment, maintain a safe distance from equipment

Fire Order of the Day:

Identify escape routes & safety zones, make them know (#4)

- Is your escape route free of trip hazards, debris, obstacles?
- Is your escape route a road, have you monitored it for debris?
- Your Safety Zone is a place you can survive without the use of a shelter.
Flag escape routes and brief your crews.

Hazard Tree Safety

Size up snag hazards in work area.

Never become complacent.

Always look up.

Get weather reports.

Scout out parking, sleeping, work areas safety zones.

Advise co-workers of known hazards.

Face your hazard and take appropriate actions.

Examine work area for other hazards.

Take extra caution around heavy equipment.

You are ultimately responsible for your own safety.

Take Time to review the Hazard Tree Safety information in the IRPG (Pages 22-23) with resources assigned to you!!

- Keep it at or below the Speed Limit.
- Closed roads still have speed limits.
- Share the roads.

It is our job to Expect the Unexpected!!!!

Thanks from your Safety Team!!

Laney Cutshaw
Ed Breece
Dave Stone
Kenny Roger
Carson Jones

Wildland Fire Lessons Learned Center

Proper Use of Trigger Points

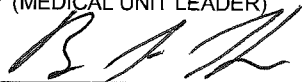

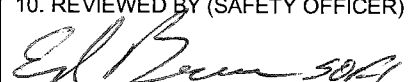

Weather/Fire Behavior Category

Accurate situational awareness (SA) requires constant reassessment of conditions (existing or potential) that may impact the safety and effectiveness of tactics. Monitoring for the 18 Watchout Situations and establishing operational / environmental limits ("trigger points") ahead of time can help to focus SA, prompt reassessment, and help you re-evaluate the risk of current actions. The following items are things to consider in your planning and discussion. Remember, trigger points are NOT decision makers, but serve as predetermined cues to prompt you to re-evaluate the current and potential situation and associated risks, and help you to determine and implement the proper course of action.

- Preplan! Don't wait until you're in the wrong place at the wrong time---with no time.
- Trigger points should be based on measurable factors such as:
 - RH
 - Winds
 - Fire Behavior
 - Topographical boundaries
 - Time constraints/Time of day
 - Time/distance to safety zones
 - Loss of suppression resources
 - Other operational considerations (e.g., firefighter fatigue, loss of lookouts or communication, weather change)
- As you approach predetermined trigger points, go through the Risk Management Process to help you decide if a change in tactics is required. (See the Incident Response Pocket Guide)
 - Gather information to assure good Situational Awareness
 - Assess hazards to anticipate serious risks
 - Establish hazard controls to mitigate serious risks
 - Make decisions based on your ability to mitigate those serious risks
 - Evaluate effectiveness of current actions
- Command/Leadership responsibilities when changing tactics
 - Communicate the changes to your subordinates, as well as to adjacent forces and up the chain of command
 - Account for all your people
 - Make sure everyone knows and follows the new plan

Have an idea? Have feedback? Share it.

ICS 206	9. PREPARED BY (MEDICAL UNIT LEADER) Bruce Hicks 		10. REVIEWED BY (SAFETY OFFICER) 		

MEDICAL PLAN (ICS 206 WF)

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS/DISPATCH

Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: Provide incident summary and command structure.

Nature of Injury/Illness		<i>Describe the injury (Ex: Broken leg with bleeding)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
Incident Commander		<i>Name of IC</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report.

Number of Patients:	Male / Female	Age:	Weight:
Conscious? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Breathing? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Mechanism of Injury: <i>What caused the injury?</i>			
Lat/Long (Datum WGS84) <i>Ex: N 40° 42.45' x W 123° 03.24'</i>			

4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
<input type="checkbox"/> URGENT-RED Life threatening injury or illness. <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE.
<input type="checkbox"/> PRIORITY-YELLOW Serious Injury or illness. <i>Ex: Significant trauma, not able to walk, 2° - 3° burns not more than 1-2 palm sizes.</i>	Ambulance or consider air transport if at remote location. Evacuation may be DELAYED.
<input type="checkbox"/> ROUTINE-GREEN Not a life threatening injury or illness. <i>Ex: Sprains, strains, minor heat-related illness.</i>	Non-Emergency. Evacuation considered Routine of Convenience.

5. TRANSPORT PLAN:

Air Transport: (Agency Aircraft Preferred)

<input type="checkbox"/> Helispot	<input type="checkbox"/> Short-haul/Hoist	<input type="checkbox"/> Life Flight	<input type="checkbox"/> Other
Ground Transport:			
<input type="checkbox"/> Self-Extract	<input type="checkbox"/> Carry-Out	<input type="checkbox"/> Ambulance	<input type="checkbox"/> Other

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

<input type="checkbox"/> Paramedic/EMT(s)	<input type="checkbox"/> Crew(s)	<input type="checkbox"/> SKED/Backboard/C-Collar
<input type="checkbox"/> Burn Sheet(s)	<input type="checkbox"/> Oxygen	<input type="checkbox"/> Trauma Bag
<input type="checkbox"/> Medication(s)	<input type="checkbox"/> IV/Fluid(s)	<input type="checkbox"/> Cardiac Monitor/AED
<input type="checkbox"/> Other (i.e. splints, rope rescue, wheeled litter)		

7. COMMUNICATIONS:

Function	Channel Name/Number	Receive (Rx)	Tone/NAC *	Transmit (Tx)	Tone/NAC *
<i>Ex: Command</i>	<i>Forest Rpt, Ch. 2</i>	<i>168.3250</i>	<i>110.9</i>	<i>171.4325</i>	<i>110.9</i>
COMMAND					
AIR-TO-GRND					
TACTICAL					

*(NAC for digital radio system)

8. EVACUATION LOCATION:

Lat/Long (Datum WGS84) <i>EX: N 40 42.45' x W 123 03.24'</i>	
Patient's ETA to Evacuation Location:	
Helispot/Extraction Size and Hazards:	

9. CONTINGENCY:

Considerations: *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...*

REMEMBER: Confirm ETA's of resources ordered
Act according to your level of training
Be Alert. Keep Calm. Think Clearly. Act Decisively.

Training Message

Trainees and Trainers -- if either or both are demobing

You need to remember to check out, **together**, with the Training Specialists prior to being demobed to complete the paperwork and discuss the training assignment.

- Trainers need to fill out the relevant parts of the task book and discuss the assignment with the trainees.
- Trainers will also need to do an Incident Personnel Performance Rating (forms at Check-In) and discuss this with the trainee.

If you do all this, the rest will take just a few minutes.

Training Watch Out

It's Day 6 of the incident and your trainer still can't remember your name.

HUMAN RESOUCE MESSAGE

When is a joke – NOT a joke?

1. When it embarrasses someone,
2. When it is negative humor,
3. When it is a put-down because of sex, race, color, National origin, age, religion, mental or physical handicap.

Humor and fun need to be part of our teamwork picture, but not when it is at the expense of others.

Are the horizontal lines parallel or do they slope?

Remember, people often see things differently, so what's funny to you, might not be funny to them!

Ourada's Team Expectations

Safety is the Team's Number One Priority

Everyone is a safety officer—See It, Say It, and Fix It!

The Team is committed to identifying clear Task, Purpose, and End State that achieves the Agency Administrator's direction and objectives in a timely and cost effective manner.

The Team provides every person associated with the incident a safe, productive, and supportive work environment.

The Team operates in a transparent manner, facilitating open communication and dialogue up, down, and across the chain of command, with active listening and opportunity for discussion and collaboration.

Here are a few ways you can help the Team create an atmosphere of **Duty, Respect, and Integrity** as outlined in the Incident Response Pocket Guide (IRPG):

If you Need to Leave the Incident Environment when Off Duty:

Notify your supervisor of destination and estimated time of return in the event you are needed for duty prior to expected time.

Alcohol /Illegal Drugs / Fitness for Duty

Alcohol and illegal drugs are not permitted within the incident environment. Be ready, willing, and able to perform your duties. If you are unable to perform your duties, you may be released from the incident with the home unit or employer being notified of the circumstances.

Work Environment/Human Relations:

Conduct yourselves as professionals and maintain a positive, non-hostile work environment with mutual respect. Sexual harassment, discrimination, acts of reprisal or any inappropriate behavior that violates human rights, the provisions of equal employment opportunity (EEO), or ethics and conduct standards will not be tolerated. If you need clarification of these expectations, contact the Human Resource Specialist.

Your actions in the community outside of the incident environment must also conform to these standards while assigned to this incident. Your integrity is shown by obeying the law and following local rules and ordinances. Non-compliance with these expectations could result in your being released from the incident with the home unit or employer being notified of the circumstances.

Work / Rest Guidelines:

Any shift times over 16 hours require written justification and approval by the appropriate Section Chief on the Crew Time Report, and will be reviewed by the Incident Commander.

Performance Evaluations:

Performance Evaluations will be completed for all trainees and contractors (including ADs). Any unsatisfactory performance will be documented on an evaluation. It is your responsibility to ensure that your supervisor has completed an evaluation.

Use of Social Media on Wildland Fire Assignments

Firefighters and Incident Management Team (IMT) members should be aware that existing agency-specific ethics and conduct regulations and restrictions governing the use of social media by federal employees on fire assignments apply.

Only authorized employees designated by the hosting unit may represent the government on public social media websites. If you choose to post to a social media website you should have a disclaimer that clearly states the views or opinions that you express are yours alone and do not represent the views of your agency or the IMT.

However, anything that you do post regarding wildland firefighting and the agency you work for reflects on that agency, the IMT you are assigned to and all wildland firefighters.

Social media sites are regularly monitored by federal agencies and employees may be held accountable for inappropriate conduct or ethics. When in doubt, don't post!

I hope you have a safe, productive and rewarding experience here. If you have any needs or concerns that cannot be addressed by my Command and General Staff, please feel free to visit with me.

Chris Ourada, Incident Commander

Incident Operations Driving Guidelines

These guidelines document Great Basin Team 2's expectations for driving by personnel assigned to the River Complex. This includes driving while in support, mobilization, and demobilization to an assigned incident.

1. Agency resources assigned to an incident will adhere to the current agency work/rest policy for determining length of duty day.
2. No driver will drive more than 10 hours (behind the wheel) within any duty-day.
3. Multiple drivers in a single vehicle may drive up to the duty-day limitation provided no driver exceeds the individual driving (behind the wheel) time limitation of 10 hours.
4. To manage fatigue, every effort should be made to conduct mobilization and demobilization travel between 0500 hours and 2200 hours.
5. As stated in the current agency work/rest policy, documentation of mitigation measures used to reduce fatigue is required for drivers who exceed 16 hour work shifts. This is required regardless of whether the driver was still compliant with the 10 hour individual (behind the wheel) driving time limitations.
6. A driver shall drive only if they have had at least 8 consecutive hours off-duty before beginning a shift.
7. Drivers should wear seatbelts and operate with headlights on.
8. Utilize a spotter when backing a vehicle.
9. Practice Defensive Driving.

Drivers are responsible to follow these policies and it is the supervisor's responsibility to ensure that employees adhere to the proper driving limitations and monitor employee fatigue.
