River Complex

INCIDENT ACTION PLAN CA-SHF-002066 0514P5J0HR

DAY OPS MONDAY, 8/17/15 0700-2100

NIGHT OPS MONDAY, 8/17/15, 1800 -TUESDAY, 8/18/15, 0800

This incident is using NAD83
DD° MM.MM

IAP QR CODE

INCIDENT OBJECTIVES 1. INCIDENT NAME River Complex 2. DATE 8/16/2015 3. TIME 2200

4. OPERATIONAL PERIOD (DATE/TIME)

Day Shift 8/17/2015, 0700-2100; Night Shift 8/17-18/2015, 1800-0800

5. GENERAL CONTROL OBJECTIVES

Incident Strategy

The suppression strategy for the River Complex will utilize a combination of direct, indirect and point protection. A key element of the plan is flexibility and the ability to apply the right resource, to the right task, at the right time, for the right duration. It is understood fireline will be constructed only where it is feasible and safe to do so and when there is a high probability of meeting incident objectives. It is the responsibility of the Incident Commander and their Staff to work with the Agency Administrator to ensure the plan is regularly reviewed and updated.

Leader's Expectations:

Provide the highest level of customer services to all involved with or impacted by the River Complex. All incident assigned personnel should be prepared to take the appropriate actions regarding;

- Personal interactions both internal and external to the incident management organization.
- Personal safety and the safety of others.
- An incident-within-an-incident.

Management Objectives:

- Provide for firefighter and public safety by ensuring LCES is evaluated and by utilizing sound Risk Management Principles.
- Maintain and build on Cooperator, Partner, and Stakeholder relationships.
- Choose strategy and tactics that limit exposing firefighters or aircraft to unnecessary risk.
- In Wilderness, where possible utilize natural barriers, topography and watercourses along with suppression techniques that have the least impact on Wilderness values.

Control Objectives:

• Protect life and property in the communities of Denny, Bell Ranch, Hoboken, Trinity Village, Hawkins Bar, Dailey and the Highway 299 corridor from the impacts of unwanted wildfire.

River Complex Fire Weather Forecast

Envore The FORECAST NO: 16 NAME OF FIRE: River Complex

PREDICTION FOR: Monday Aug 17th UNIT: SHF/SRF

SHIFT DATE: 0700 Mon-0700 Tue **SIGNED:** Brooke Taber

TIME AND DATE **Incident Meteorologist**

FORECAST ISSUED: 2100 Sun Aug 15th

WEATHER DISCUSSION:

.....Hot and Dry Weather Continues with Poor Ridgetop Recoveries....

A strong ridge of high pressure will continue across the western United States through Tuesday...as hot and dry weather will prevail. The development of a weak thermal trough will produce southeast winds in the morning, becoming northwest in the afternoon on the ridges with light terrain driven upslope/upvalley winds in the deeper canyons. A few higher gusts in the aligned north to south canyons and valleys will be possible after 1600 when the strong inversion lifts. Areas of thick smoke will continue, especially in the deeper valleys. Highs today will range from mid 80's to mid 90's with relative humidity values in the upper teens to mid 20's. The thick smoke canopy will limit surface heating and keep relative humidity values higher, especially in the Denny area and in Div's W. T. and Q. A midslope thermal belt will develop again Monday Night, resulting in much lower relative humidity values above 3500 feet and mild overnight temperatures.

WEATHER FORECAST Monday:

WEATHER: Areas of heavy smoke...otherwise mostly sunny.

HIGH TEMPERATURES: 92-97 valleys. 79-84 ridgetops.

HUMIDITY: 18-23% lower elevations below 2000 feet. 22-27% in areas of smoke above 4000 feet.

20 FT WINDS:

RIDGETOP – Southeast winds 3 to 5 mph, becoming northwest at 4-8 mph after 1400. **SLOPE/VALLEY -** Light until 1200 then up-canyon 3-6 mph with localized gusts to 10 mph.

HAINES INDEX: 4. INVERSION: Strong inversion through 1600.

WEATHER FORECAST For Monday Night:

WEATHER: Areas of heavy smoke.

TEMPERATURES: 59 to 64

HUMIDITY: Poor recover relative humidity recoveries 26 to 31% in midslopes and ridgetops. 65 to 75% lower slopes/valleys.

20 FT WINDS:

RIDGETOP - Northwest winds 4 to 8 mph becoming southeast after midnight.

SLOPE/VALLEY - Evening down-canyon winds 2 to 5 mph.

EXTENDED FORECAST: Hot and dry weather will prevail as a ridge of high pressure continues across the River Complex through midweek. Daily thermal troughs will develop producing northwest winds 4 to 8 mph in the afternoon and northeast to southeast winds at night. Highs 91 to 96 valleys and 78 to 83 ridgetops, with very dry conditions continuing. Poor midslope and ridgetop relative humidity recoveries will occur at night. Smoke will be hard to mix out most days with a strong inversion over the area under high pressure. A subtle trough passage by Thursday may produce a weak onshore flow with slightly cooler temperatures and higher RH values.

FIRE BEHAVIOR FORECAST

FORECAST NO. 16

NAME OF FIRE: River Complex

UNIT: CA-SHF 2066

DATE & TIME ISSUED: 08/16 2100 hr

PREDICTION FOR: 8/17/15 24hr.

SIGNED: /s/ Nick Yturri

FIRE BEHAVIOR ANALYST

WEATHER SUMMARY: Warming and Drying

Winds: Day, Ridges SE 3-5 mph, becoming NW at 4-8 mph after 1400. Slopes/Valley: Light until 1200, then up-canyon 3-6 mph gusts to 10 mph Night: NW 4-8 mph then SE after midnight. Evening down canyon 2-5 mph

Min. RH: Day 18-23% low elevations, 22-27% in inversion.
Night 26-31% Midslopes/Ridges. 65-75% lower slopes/valleys
Temperatures: Day 92-97 Valleys 79-84 Ridgetops. Night 59-64
LAL 1 Pig 80-90% ERC 56 87th percentile BI 56 Haines 4

FIRE BEHAVIOR FORECAST GENERAL FIRE BEHAVIOR:

Smoke should linger over the fire until at least 1600 hrs., but a thermal belt developing midslope overnight may lead to an increase in fire activity earlier in the shift. When the inversion clears out, sun will heat the fuels increasing fire activity and single to group tree torching. Primary fire spread will be where fuels & topography align. Rates of spread will be from 1 to 9 chains per hour with flame lengths 1-9 feet in the timber. Most of the active areas of the fire are in a backing alignment. With warmer and dryer temperatures, the fire could remain active later into the night. Falling snags and rollout will challenge containment lines and will increase the potential for fire spread over barriers that would normally hold the fire.

Specific:

Branch I: Expect surface fire burning in the heavier fuels in DIV L. Single and group tree torching may occur interior with radiant heating of fuels. Fire progression could continue to the Northwest.

Branch II&III: Expect flanking fire in heavy fuels and surface litter. Single and group tree torching will continue. NE flank of the fire will continue to be active throughout the day and into the night. Fire to the SE will continue to spread laterally along the drainages and on the slope below Iron Mountain. The fire will continue to impact the 5N04 Rd and progress towards the wilderness boundary. The Hwy 299 corridor is still threatened as the N518 road continues to be challenged. The fire is not expected to impact crews working on structure prep along the 299 corridor or in Denny. The fire is burning north of the Miller Ranch and will continue to actively back towards the ranches. The fire east of New River will impact Hoboken as backing fire during the burn period. New River should act as a barrier further north towards Denny.

Air Operations: String inversion until at least 1600 will shut down air operations.

Safety: Be aware of falling snags and rollout that can lead to spotfires.

6. Control Operations/Work Assignments:	
Post lookouts and be prepared to initiate the structure defense plan. Ensure good access to the safety zone at Denny.	
Secure the infrastructure and both water sources at Denny, Hoboken, Nobel, Five Waters, and Forks.	
Begin line construction from DP 11 to northwest, utilizing the 7N15 Road where possible.	
7. Special Instructions:	
Inventory all water handling equipment on the Division and provide Lat/Long to the Situation Unit. For water conservation purposes, the metered hydrant by the Post Office has been designated as the only hydrant to be used in Willow Creek. If needed, initiate firing on the east side of the New River for structure protection.

INCIDENT SAFETY ANALYSIS 215a

River Complex CA-SHF-002066 - Monday, August 17, 2015

	cr comple	x CA-SHF-002066 - Monday, August 17, 2015
8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
All	Driving & Traffic	~ Practice "Defensive Driving" techniques traveling on all roads. ~ Use spotters when backing. ~ Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts. ~ Use chock blocks, turn wheels into hill. ~ Avoid distractions (eating, cell phones, radio). ~ Follow Speed Limit of 5mph in ICP area ~ Be Aware of road construction areas ~ Watch for rolling material in fire areas ~ Maintain awareness of road stability & condition
All	Hazard Trees	 Follow "Hazard Tree Safety" guidelines, IRPG page 22. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
Div L, Q, T, W	Heavy Equipment Operations	~ Ensure communications are established with operators use hand signals if needed. ~ Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. ~ Avoid working below heavy equipment.
All	Steep Terrain & Rolling Debris	 ∼ Maintain 8'-10' spacing when working & walking. ∼ Lookout for rolling rocks, debris, or burning material. ∼ Evaluate necessity to send personnel in areas with limited access. ∼ Post lookouts (IRPG pg 6).
All	Chain Saw Operations	 Only fell and buck trees within your expertise, and training. Follow "Procedural Felling Operations" on page 79 in IRPG. Do not fall trees during high wind events. Ensure proper use of all required PPE.
Div A,D,Z,Q,T,W	Night Operations	 Maintain high visibility in work area and wear vest while in roadway. Use glow sticks to mark hazards. Ensure personnel have a personal light (headlamp). Watch for signs of fatigue.
All	Firefighter & Public Smoke Exposure	∼ Use warning lights and provide traffic control on roadways during smoky and night operations. ∼ Rotate crews out of smoky areas
Div L, Q, T, W, N	Indirect Fireline	~ Post lookouts, identify escape routes and safety zones (IRPG pg. 6). ~ Review "Strategy/Indirect Attack" (IRPG pg. 87).
All	Air Operations	 Follow " Aviation Watch-Out Situations" on page 44, IRPG. Don't plan on air resources for medical transport or resupply. Refer to page 57, IRPG for directing bucket drops. Ensure positive communication with all air resources.
All	Poisonous Plants	∼ Identify and Avoid hazard areas.∼ Launder clothing.∼ Shower frequently.
All, ICP	Heat Related Illness (HRI)& Dehydration	~ Drink Fluids throughout operational period (6-8 qts/shift). Water/electrolyte ratio of 3 to 1. ~Take Frequent breaks, 10 minutes every hour. ~Allow out of area resources time to acclimatize ~ Recognize symptoms of HEAT RELATED ILLNESS
All	Marijuana culivation & processing sites	∼Avoid contact with persons, plants & materials ∼ Immediately leave area ∼ Notify supervisor & resources of location
	processing sites	~ Notify supervisor & resources of location

ENDER SOFT

HEALTH AND SAFETY MESSAGE

SAFETY starts with **YOU** PREDICTABLE IS PREVENTABLE

For Day/Night Operations: August 17, 2015

INCIDENT: River Complex

DATE: August 16, 2015

TIME: 2000

Major Hazards and Risks:

- DRIVING: Drive defensively, Be aware of unstable & hazardous road conditions, Be alert and watch for public and other non-operational personnel in fire areas
- HAZARD TREES: Look up, Look down, Look around for signs of fire weakened trees
- STEEP & RUGGED TERRAIN Be aware not to work above persons and rolling material
- HEAVY EQUIPMENT Avoid working below equipment, maintain a safe distance from equipment

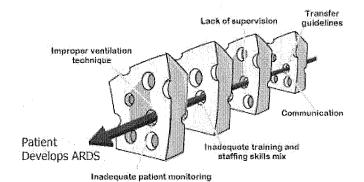

Fire Order of the Day:

Be alert. Keep calm. Think clearly. Act decisively

- Be alert......does your perception equal the reality of the situation.....were talking S.A. here!!
- **Keep calm**.....know yourself, what are your trigger points??
- Think clearly.....make sound, and timely decisions......
- Act decisively.....Be the leader, and practice what you have learned

Accident Avoidance

- Speak up if you see something that looks wrong!!!
- Get a good briefing prior to beginning task
- Ask if you don't understand!!!!

HELP BREAK THE "ERROR CHAIN"!!

Thanks from your Safety Team!!

Cd/ See 58

Laney Cutshaw Ed Breece Dave Stone Kenny Roger Carson Jones Lee Freemen
Dan Mapstone
Frank Pingiczer
Aaron Utterback

Common Denominators

- On a small fire, or deceptively quiet area of a large fire.
- In light fuels, such as grass, or light brush.
- Unexpected shift in wind direction or increase in wind speed
- Fire responds to topographic conditions

Wildland Fire Lessons Learned Center

HAZARD TREE - RISK MANAGEMENT

Felling Safety Category

Environment:

- · Existing winds and forecast
- · Night operations
- Steep slopes
- · Diseased or bug-kill areas
- Number, density, and height of hazard trees
- Anticipated burn-down time
- Potential for domino effect to surrounding trees
- Maintain situational awareness and continually reassess hazards

Hazard Tree Indicators:

- · Trees burning for any period of time
- High risk tree species (rot and shallow roots)
- Numerous downed trees
- Dead, broken, or burning tops and limbs overhead
- Accumulation of downed limbs
- Absence of needles, bark or limbs
- Leaning or hung-up

Note: In addition to suppression and mop-up operations, assess, control, and monitor hazard trees along roads and when selecting break areas or campsites.

Hazard Control:

- Eliminate the hazards with qualified sawyers, blasters/explosives, or heavy equipment
- Avoid hazards by designating "No Work Zones" (NWZ) (flag, sign, and map)
- Modify suppression tactics or fireline location to avoid extreme/high risk rated area
- Post lookouts to help maintain secure area
- Fire proof potential hazard trees to prevent ignition
- Initiate road/traffic control and area closure
- Keep clear of bucket drops near trees/snags
- Establish trigger points for reposition to secure areas in response to high winds

Training Message - Trainees and Trainers, if you haven't checked in with the Training Specialist, please do so as soon as possible.

Training Watch Out - You see your trainer driving out of camp, heading home, and you still haven't gone over your task book!

HUMAN RESOURCE MESSAGE

This Incident is Alcohol and Non-Prescription Drug FREE

Being under the influence:

- Compromises safety and could cause injury or death of yourself or others
- Interferes with our mission, particularly when resources are stretched and optimal performar is needed from everyone
- You WILL get you sent home, thus damaging your reputation and career

Karen Hartman, Human Resource Specialist Karen Mora, Human Resource Specialist (t)

530-629-2010

River Complex Social Media Policy

Your Images Are Powerful – Be Careful How You Use Them...

It is the policy of the Great Basin IMT2 to *allow* firefighters or other personnel to post information, photos, or videos about work-related activities on personal social media accounts or websites outside of work hours. *However*, firefighters should be mindful that posting work-related information or activities on their personal social media accounts or websites reflects on the professionalism of their crew, the team, and the wildland firefighting community.

Firefighters' lives often depend on their ability to be keenly aware of their surroundings and intensely focused on the tasks they are performing. Activities that distract from firefighters' situational awareness threaten the safety of those directly involved, and also of others around them. In addition, photographs, videos, and other information taken by firefighters could cause complications in the event of litigation regarding the fire. Any photos taken of accidents or injuries are for internal incident use only. They are not to be shared externally. This will also help to maintain the privacy of those involved.

With the ability to transmit information and images across the globe instantaneously, it has never been more important for firefighters to conduct themselves professionally. If a firefighter has a question about a specific photo taken on the incident that he or she wishes to post when off duty, please discuss it with Fire Information personnel. Remember, it is the responsibility of every firefighter to maintain the entire organization's reputation, regardless of agency or entity.

Firefighters that do capture photos, video or other media while working on the Staley Complex are encouraged to transfer this information to Fire Information for possible official use.

Ourada's Team Expectations

Safety is the Team's Number One Priority

Everyone is a safety officer—See It, Say It, and Fix It!

The Team is committed to identifying clear Task, Purpose, and End State that achieves the Agency Administrator's direction and objectives in a timely and cost effective manner.

The Team provides every person associated with the incident a safe, productive, and supportive work environment.

The Team operates in a transparent manner, facilitating open communication and dialogue up, down, and across the chain of command, with active listening and opportunity for discussion and collaboration.

Here are a few ways you can help the Team create an atmosphere of **Duty**, **Respect**, and **Integrity** as outlined in the Incident Response Pocket Guide (IRPG):

If you Need to Leave the Incident Environment when Off Duty:

Notify your supervisor of destination and estimated time of return in the event you are needed for duty prior to expected time.

Alcohol /Illegal Drugs / Fitness for Duty

Alcohol and illegal drugs are not permitted within the incident environment. Be ready, willing, and able to perform your duties. If you are unable to perform your duties, you may be released from the incident with the home unit or employer being notified of the circumstances.

Work Environment/Human Relations:

Conduct yourselves as professionals and maintain a positive, non-hostile work environment with mutual respect. Sexual harassment, discrimination, acts of reprisal or any inappropriate behavior that violates human rights, the provisions of equal employment opportunity (EEO), or ethics and conduct standards will not be tolerated. If you need clarification of these expectations, contact the Human Resource Specialist.

Your actions in the community outside of the incident environment must also conform to these standards while assigned to this incident. Your integrity is shown by obeying the law and following local rules and ordinances. Non-compliance with these expectations could result in your being released from the incident with the home unit or employer being notified of the circumstances.

Work / Rest Guidelines:

Any shift times over 16 hours require written justification and approval by the appropriate Section Chief on the Crew Time Report, and will be reviewed by the Incident Commander.

Performance Evaluations:

Performance Evaluations will be completed for all trainees and contractors (including ADs). Any unsatisfactory performance will be documented on an evaluation. It is your responsibility to ensure that your supervisor has completed an evaluation.

Use of Social Media on Wildland Fire Assignments:

Firefighters and Incident Management Team (IMT) members should be aware that existing agency-specific ethics and conduct regulations and restrictions governing the use of social media by federal employees on fire assignments apply.

Only authorized employees designated by the hosting unit may represent the government on public social media websites. If you choose to post to a social media website you should have a disclaimer that clearly states the views or opinions that you express are yours alone and do not represent the views of your agency or the IMT.

However, anything that you do post regarding wildland firefighting and the agency you work for reflects on that agency, the IMT you are assigned to and all wildland firefighters.

Social media sites are regularly monitored by federal agencies and employees may be held accountable for inappropriate conduct or ethics. When in doubt, don't post!

I hope you have a safe, productive and rewarding experience here. If you have any needs or concerns that cannot be addressed by my Command and General Staff, please feel free to visit with me.

Chris Ourada

Incident Operations Driving Guidelines

These guidelines document Great Basin Team 2's expectations for driving by personnel assigned to the River Complex. This includes driving while in support, mobilization, and demobilization to an assigned incident.

- 1. Agency resources assigned to an incident will adhere to the current agency work/rest policy for determining length of duty day.
- 2. No driver will drive more than 10 hours (behind the wheel) within any duty-day.
- 3. Multiple drivers in a single vehicle may drive up to the duty-day limitation provided no driver exceeds the individual driving (behind the wheel) time limitation of 10 hours.
- 4. To manage fatigue, every effort should be made to conduct mobilization and demobilization travel between 0500 hours and 2200 hours.
- 5. As stated in the current agency work/rest policy, documentation of mitigation measures used to reduce fatigue is required for drivers who exceed 16 hour work shifts. This is required regardless of whether the driver was still compliant with the 10 hour individual (behind the wheel) driving time limitations.
- 6. A driver shall drive only if they have had at least 8 consecutive hours off-duty before beginning a shift.
- 7. Drivers should wear seatbelts and operate with headlights on.
- 8. Utilize a spotter when backing a vehicle.
- 9. Practice Defensive Driving.

Drivers are responsible to follow these policies and it is the supervisor's responsibility to ensure that employees adhere to the proper driving limitations and monitor employee fatigue.
