INCIDENT OBJECTIVES	1. INCIDENT NAME River Complex	2. DATE 8/17/2015	3. TIME 2200																
4. OPERATIONAL PERIOD (DATE/TIME) Day Shift 8/18/2015, 0600-2100; Night Shift 8/18-19/2015, 1800-0900																			
5. GENERAL CONTROL OBJECTIVES <u>Incident Strategy</u> The suppression strategy for the River Complex will utilize a combination of direct, indirect and point protection. A key element of the plan is flexibility and the ability to apply the right resource, to the right task, at the right time, for the right duration. It is understood fireline will be constructed only where it is feasible and safe to do so. It is the responsibility of the Incident Commander and their Staff to work with the Agency Administrator to ensure the plan is regularly reviewed and updated. <u>Leader's Expectations</u> <ul style="list-style-type: none"> • Provide the highest level of customer services to all involved with or impacted by the River Complex. All incident assigned personnel should be prepared to take the appropriate actions regarding: <ul style="list-style-type: none"> • Personal interactions both internal and external to the incident management organization • Personal safety and the safety of others • An incident-within-an-incident <u>Management Objectives:</u> <ul style="list-style-type: none"> • Provide for firefighter and public safety by ensuring LCES is evaluated and by utilizing sound Risk Management Principles. • Maintain and build on Cooperator, Partner, and Stakeholder relationships. • Suppress the Complex at the smallest size, while not exposing firefighters or aircraft to unnecessary risk. • In Wilderness, favor indirect attack by using natural barriers, topography and watercourses, and low impact, "light hand" suppression techniques. <u>Control Objectives:</u> <ul style="list-style-type: none"> • Protect life and property in nearby communities of Denny, Bell Flat, Hoboken, Dailey, and Trinity Village/Hawkins Bar area. • Implement direct and indirect suppression strategies to minimize fire spread and to protect Values at Risk including private property and public improvements and natural resources.

River Complex Fire Weather Forecast

FORECAST NO: 17

NAME OF FIRE: River Complex

PREDICTION FOR: Tuesday Aug 18th

UNIT: SHF/SRF

SHIFT DATE: 0600 Tue-0600 Wed

SIGNED: Brooke Taber 

TIME AND DATE

Incident Meteorologist

FORECAST ISSUED: 2100 Mon Aug 17th

WEATHER DISCUSSION:

.....Warm and Dry Weather Continues with Poor Ridgetop Recoveries....

A strong ridge of high pressure will continue across the River Complex Today, which will result in a strong inversion with dry conditions and mainly terrain driven winds. Areas of thick smoke will prevail, especially in the deeper river valleys with some clearing in the upper slopes and ridgetops. The thick smoke canopy will once again keep temperatures slightly cooler and relative humidity values a little higher, in the Denny area and in Div's W, T, and Q. Highs today will range from lower 80's to lower 90's with relative humidity values in the upper teens to mid 20's. A midslope thermal belt will develop again tonight, resulting in very poor relative humidity values above 3500 feet and mild overnight temperatures. In addition, ridgetop winds will shift from northwest to northeast after midnight at 5 to 10 mph with gusts up to 15 mph.

WEATHER FORECAST Tuesday:

WEATHER: Areas of heavy smoke.

HIGH TEMPERATURES: 85-91 valleys. 82-87 ridgetops.

HUMIDITY: 18-23% lower elevations below 2000 feet. 22-27% in areas of smoke above 3000 feet.

20 FT WINDS:

RIDGETOP – Southeast winds 4 to 8 mph with gusts to 12 mph, becoming northwest at 5-10 mph after 1500.

SLOPE/VALLEY - Light until 1200 then up-canyon 3-6 mph with localized gusts to 8 mph.

HAINES INDEX: 4. **INVERSION:** Strong inversion holds.

WEATHER FORECAST For Tuesday Night:

WEATHER: Areas of heavy smoke.

TEMPERATURES: 59 to 64

HUMIDITY: Poor recover relative humidity recoveries 18 to 25% in upper slopes and ridgetops. 75 to 85% lower slopes/valleys.

20 FT WINDS:

RIDGETOP - Northwest winds 4 to 8 mph becoming northeast 5 to 10 mph with gusts to 15 mph after midnight.

SLOPE/VALLEY - Evening down-canyon winds 2 to 5 mph.

EXTENDED FORECAST: A subtle trough passage on Wednesday will produce a weak onshore flow with slightly cooler temperatures. Northeast winds will become northwest at 5 to 10 mph on the ridgetops after 1400 with a few higher gusts in the aligned northwest to southeast upper slope canyons and valleys. Relative humidity values will remain low with temperatures in the upper 70s to upper 80s. On Thursday a lowering inversion will produce very light valley winds with slightly cooler temperatures and higher rh values. Ridgetops will continue with very low relative humidity values with northwest winds at 5 to 10 mph. Areas of thick smoke with poor visibilities will prevail, especially in the deeper valleys.

FIRE BEHAVIOR FORECAST

PREDICTION FOR: 8/18/15 24hr.

FORECAST NO. 17

NAME OF FIRE: River Complex

SIGNED: /s/ Nick Yturri
FIRE BEHAVIOR ANALYST

UNIT: CA-SHF 2066

DATE & TIME ISSUED: 08/17 2100 hr

WEATHER SUMMARY: Warming and Drying

Winds: Day, Ridges SE 4-8 mph w/ gusts to 12 mph, becoming NW at 5-10 mph after 1500.

Slopes/Valley: Light until 1200, then up-canyon 3-6 mph gusts to 8 mph

Night: Ridges-NW 4-8 mph, NE 5-10 w/gusts to 15 after midnight.

Slopes-Evening down canyon 2-5 mph

Min. RH: Day 18-23% low elevations, 22-23% in inversion.

Night 18-25% Midslopes/Ridges. 75-85% lower slopes/valleys

Temperatures: Day 85-91 Valleys 82-87 Ridgetops. Night 59-64

LAL 1 Pig 80-90% ERC 56 94th percentile BI 67 Haines 4

FIRE BEHAVIOR FORECAST

GENERAL FIRE BEHAVIOR:

Smoke should linger over the fire for most of the day, but a thermal belt developing midslope overnight may lead to an increase in fire activity earlier in the shift. Primary fire spread will be where fuels & topography align which could lead to single/group tree torching. Rates of spread will be from 1 to 9 chains per hour with flame lengths 1-9 feet in the timber. Most of the active areas of the fire are in a backing alignment. With warmer and dryer temperatures, the fire could remain active later into the night, especially with the development of the thermal belt. **Falling snags and rollout will challenge containment lines and will increase the potential for fire spread over barriers that would normally hold the fire.**

Specific:

Branch I: Expect surface fire burning in the heavier fuels in DIV L. Single and group tree torching may occur interior with radiant heating of fuels.

Branch II&III: Expect flanking fire in heavy fuels and surface litter. Single and group tree torching will continue. NE flank of the fire will continue to be active throughout the day and into the night. Fire to the SE will continue to spread laterally along the drainages and on the slope below Iron Mountain. The fire will continue to impact the 5N04 Rd and progress towards the wilderness boundary. The Hwy 299 corridor is still threatened as the N518 road continues to be challenged. The fire is not expected to impact crews working on structure prep along the 299 corridor or in Denny. The fire is burning north of the Miller Ranch and will continue to actively back towards the ranches.

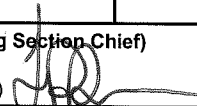

Air Operations: Strong inversion will shut down air operations.

Safety:

INCIDENT SAFETY ANALYSIS 215a

River Complex CA-SHF-002066 - Tuesday, August 18, 2015

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
All	Driving & Traffic	<ul style="list-style-type: none"> ~ Practice "Defensive Driving" techniques traveling on all roads. ~ Use spotters when backing. ~ Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts. ~ Use chock blocks, turn wheels into hill. ~ Avoid distractions (eating, cell phones, radio). ~ Follow Speed Limit of 5mph in ICP area ~ Be Aware of road construction areas ~ Watch for rolling material in fire areas ~ Maintain awareness of road stability & condition
All	Hazard Trees	<ul style="list-style-type: none"> ~ Follow "Hazard Tree Safety" guidelines, IRPG page 22. ~ Post lookouts, or use a spotter in mop-up areas with personnel. ~ Don't park vehicles or take breaks in high concentrations of hazard trees. ~ Establish trigger points for disengagement during high wind events. ~ Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
Div L, Q, T, W	Heavy Equipment Operations	<ul style="list-style-type: none"> ~ Ensure communications are established with operators use hand signals if needed. ~ Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. ~ Avoid working below heavy equipment.
All	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> ~ Maintain 8'-10' spacing when working & walking. ~ Lookout for rolling rocks, debris, or burning material. ~ Evaluate necessity to send personnel in areas with limited access. ~ Post lookouts (IRPG pg 6).
All	Chain Saw Operations	<ul style="list-style-type: none"> ~ Only fell and buck trees within your expertise, and training. ~ Follow "Procedural Felling Operations" on page 79 in IRPG. ~ Do not fall trees during high wind events. ~ Ensure proper use of all required PPE.
Night Group	Night Operations	<ul style="list-style-type: none"> ~ Maintain high visibility in work area and wear vest while in roadway. ~ Use glow sticks to mark hazards. ~ Ensure personnel have a personal light (headlamp). ~ Watch for signs of fatigue.
Div L, Q, T, W	Indirect Fireline	<ul style="list-style-type: none"> ~ Post lookouts, identify escape routes and safety zones (IRPG pg. 6). ~ Review "Strategy/Indirect Attack" (IRPG pg. 87).
All	Firefighter & Public Smoke Exposure	<ul style="list-style-type: none"> ~ Use warning lights and provide traffic control on roadways during smoky and night operations. ~ Rotate crews out of smoky areas
All	Air Operations	<ul style="list-style-type: none"> ~ Follow " Aviation Watch-Out Situations" on page 44, IRPG. ~ Don't plan on air resources for medical transport or resupply. ~ Refer to page 57, IRPG for directing bucket drops. ~ Ensure positive communication with all air resources.
All	Poisonous Plants	<ul style="list-style-type: none"> ~ Identify and Avoid hazard areas. ~ Launder clothing. ~ Shower frequently.
All, ICP	Heat Related Illness (HRI)& Dehydration	<ul style="list-style-type: none"> ~ Drink Fluids throughout operational period (6-8 qts/shift). Water/electrolyte ratio of 3 to 1. ~ Take Frequent breaks, 10 minutes every hour. ~ Allow out of area resources time to acclimatize ~ Recognize symptoms of HEAT RELATED ILLNESS
All	Marijuana cultivation & processing sites	<ul style="list-style-type: none"> ~ Avoid contact with persons, plants & materials ~ Immediately leave area ~ Notify supervisor & resources of location

HEALTH AND SAFETY MESSAGE

***SAFETY* starts with *YOU* PREDICTABLE IS PREVENTABLE**

For Day/Night Operations: August 18, 2015

INCIDENT: **River Complex**

DATE: August 17, 2015

TIME: 2000

Major Hazards and Risks:

- **DRIVING:** Drive defensively, Be aware of unstable & hazardous road conditions, Be alert and watch for public and other non-operational personnel in fire areas
- **HAZARD TREES:** Look up, Look down, Look around for signs of fire weakened trees
- **STEEP & RUGGED TERRAIN** – Be aware not to work above persons and rolling material
- **HEAVY EQUIPMENT** – Avoid working below equipment, maintain a safe distance from equipment

Fire Order of the Day:

Fire Order of the Day:

Maintain control of your forces at all times

- **TASK.....**What is to be done.....Strategy and tactics
- **PURPOSE.....**Why it is to be done.....Big picture.....who, what, when, where, why, etc.....
- **END STATE.....**How it should look when done....Quantify your expectations.....**Leaders Intent**

****YOU ARE RESPONSIBLE FOR YOUR OWN SAFETY****

-If you practice safety, your co-workers will appreciate it and your personal welfare can be protected-

Remember that it is your life that is on the line. You have the right to voice your opinion and concerns about personal safety. Don't hesitate to speak up if you feel uncomfortable with the situation or the circumstance in which you are. Firefighting is inherently hazardous. Discuss your concerns with your immediate supervisor or with a Safety Officer.

We are in this together!

Life only comes one day at a time....Make sure you show up tomorrow!

SAFETY ZONES

Make sure everyone is aware of their locations.

Thanks from your Safety Team!!

DOZER/PLOW OPERATIONS

Vehicles & Roads Category

Dozers/tractor plows provide suppression and support capability for fire operations. When working on or around dozers on the fireline, it is important to respect the following guidelines:

- Load/unload equipment from the transport in a safe manner on a level, stable surface.
- Park transport in an area free of fuel. Clear an area if needed to protect parked equipment.
- Do not sit or bed down near equipment. Walk around the equipment before starting or moving it.
- Lower the dozer blade and/or fire plow to the ground when the equipment is idling or stopped.
- When working a dozer or tractor plow, stay at least 100 feet in front or 50 feet behind the equipment.
- Allow no one but the operator to ride on the equipment.
- Never get on or off equipment while it is moving.
- Provide front and rear lights for equipment working at night or in heavy smoke.
- Provide lights and fluorescent vests to personnel working with dozer/tractor plow units.
- Use hand signals for direction and safety.
- Do not use a dozer or tractor plow without a canopy or brush guard and radio communications.
- Operators will wear required PPE and carry a fire shelter.
- Be aware of different fuel types, rates of spread, and flammability.
- Watch for wetlands, steep slopes, rocks, ditches, and other obstacles that might stop the equipment.
- Do not get too far ahead of a firing crew during firing operations.
- Anchor the line to a secure firebreak and create a black line (burn out) until the fire is completely enclosed.
- Tractor plow operators should wear headgear protection for head, face, eyes, and ears while also providing radio reception and ventilation capabilities.
- Tractor plow crews should consist of a minimum of two people.
- When the dozer or tractor plow is equipped with a hand-clutch lever, always take equipment out of gear when mounting and dismounting.

ICS 206	9. PREPARED BY (MEDICAL UNIT LEADER) Bruce Hicks 	10. REVIEWED BY (SAFETY OFFICER) 			

MEDICAL PLAN (ICS 206 WF)

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS/DISPATCH

Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: Provide incident summary and command structure.

Nature of Injury/Illness		<i>Describe the injury (Ex: Broken leg with bleeding)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
Incident Commander		<i>Name of IC</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report.

Number of Patients:	Male / Female	Age:	Weight:
Conscious? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Breathing? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Mechanism of Injury: <i>What caused the injury?</i>			
Lat/Long (Datum WGS84) Ex: N 40° 42.45' x W 123° 03.24'			

4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
<input type="checkbox"/> URGENT-RED Life threatening injury or illness. <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE.
<input type="checkbox"/> PRIORITY-YELLOW Serious Injury or illness. <i>Ex: Significant trauma, not able to walk, 2° - 3° burns not more than 1-2 palm sizes.</i>	Ambulance or consider air transport if at remote location. Evacuation may be DELAYED.
<input type="checkbox"/> ROUTINE-GREEN Not a life threatening injury or illness. <i>Ex: Sprains, strains, minor heat-related illness.</i>	Non-Emergency. Evacuation considered Routine of Convenience.

5. TRANSPORT PLAN:

Air Transport: (Agency Aircraft Preferred)

<input type="checkbox"/> Helispot	<input type="checkbox"/> Short-haul/Hoist	<input type="checkbox"/> Life Flight	<input type="checkbox"/> Other
-----------------------------------	---	--------------------------------------	--------------------------------

Ground Transport:

<input type="checkbox"/> Self-Extract	<input type="checkbox"/> Carry-Out	<input type="checkbox"/> Ambulance	<input type="checkbox"/> Other
---------------------------------------	------------------------------------	------------------------------------	--------------------------------

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

<input type="checkbox"/> Paramedic/EMT(s)	<input type="checkbox"/> Crew(s)	<input type="checkbox"/> SKED/Backboard/C-Collar
<input type="checkbox"/> Burn Sheet(s)	<input type="checkbox"/> Oxygen	<input type="checkbox"/> Trauma Bag
<input type="checkbox"/> Medication(s)	<input type="checkbox"/> IV/Fluid(s)	<input type="checkbox"/> Cardiac Monitor/AED
<input type="checkbox"/> Other (i.e. splints, rope rescue, wheeled litter)		

7. COMMUNICATIONS:

Function	Channel Name/Number	Receive (Rx)	Tone/NAC *	Transmit (Tx)	Tone/NAC *
Ex: Command	Forest Rpt, Ch. 2	168.3250	110.9	171.4325	110.9
COMMAND					
AIR-TO-GRND					
TACTICAL					

*(NAC for digital radio system)

8. EVACUATION LOCATION:

Lat/Long (Datum WGS84) EX: N 40 42.45' x W 123 03.24'	
Patient's ETA to Evacuation Location:	
Helispot/Extraction Size and Hazards:	

9. CONTINGENCY:

Considerations: <i>If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...</i>	REMEMBER: Confirm ETA's of resources ordered Act according to your level of training Be Alert. Keep Calm. Think Clearly. Act Decisively.

GOOD MORNING. COULD YOU READ THE HEADLINE THIS MORNING? IT SAYS "HUMAN RESOURCES MESSAGE", BUT THIS TIME IT WAS WRITTEN IN WING-DINGS.

COMMUNICATION IS ESSENTIAL ON A FIRE, AND ALSO BASICALLY IN LIFE. UNFORTUNATELY, SOMETIMES THE WORDS THAT COME OUT OF OUR MOUTHS END UP SOUNDING LIKE WING-DINGS TO THE PERSON WE ARE SPEAKING TO. YOU DON'T MEAN FOR THAT TO HAPPEN, BUT IT DOES.

GOOD COMMUNICATION SKILLS REQUIRE TWO THINGS — LISTENING AND SPEAKING. WE HAVE 2 EARS AND 1 MOUTH FOR A REASON — TO LISTEN TWICE AS MUCH AS WE SPEAK. AND IF YOU NOTICE, OUR EARS ALWAYS STAY OPEN, WHILE OUR MOUTHS HAVE A HINGE SO IT CAN BE CLOSED. TAKE THE TIME TO LISTEN AND TRULY COMMUNICATE WITH ONE ANOTHER.

HUMAN RESOURCE SPECIALIST S: KAREN HARTMAN AND KAREN MORA (T) 530-629-2010

Training Message

Trainees...remember to make a copy of your task book when you get home in case you lose the original.

Trainees and Trainers -- when demobing

Please remember to check out, together, with the Training Specialists prior to being demobed to complete the paperwork and discuss the training assignment.

Trainers need to fill out the relevant parts of the task book and discuss the assignment with the trainees.

Trainers will also need to do an Incident Personnel Performance Rating (I have some) and discuss this with the trainee.

If you do all this, the rest will take just a few minutes. Stop by the evening before and avoid the rush.

DON WASHCO 623-695-6487

River Complex Social Media Policy

Your Images Are Powerful – Be Careful How You Use Them...

It is the policy of the Great Basin IMT2 to *allow* firefighters or other personnel to post information, photos, or videos about work-related activities on personal social media accounts or websites outside of work hours. **However**, firefighters should be mindful that posting work-related information or activities on their personal social media accounts or websites reflects on the professionalism of their crew, the team, and the wildland firefighting community.

Firefighters' lives often depend on their ability to be keenly aware of their surroundings and intensely focused on the tasks they are performing. **Activities that distract from firefighters' situational awareness threaten the safety of those directly involved, and also of others around them.** In addition, photographs, videos, and other information taken by firefighters could cause complications in the event of litigation regarding the fire. Any photos taken of accidents or injuries are for internal incident use only. They are not to be shared externally. This will also help to maintain the privacy of those involved.

With the ability to transmit information and images across the globe instantaneously, it has never been more important for firefighters to conduct themselves professionally. If a firefighter has a question about a specific photo taken on the incident that he or she wishes to post when off duty, please discuss it with Fire Information personnel. Remember, it is the responsibility of every firefighter to maintain the entire organization's reputation, regardless of agency or entity.

Firefighters that do capture photos, video or other media while working on the River Complex are encouraged to transfer this information to Fire Information for possible official use.

Ourada's Team Expectations

Safety is the Team's Number One Priority

Everyone is a safety officer—See It, Say It, and Fix It!

The Team is committed to identifying clear Task, Purpose, and End State that achieves the Agency Administrator's direction and objectives in a timely and cost effective manner.

The Team provides every person associated with the incident a safe, productive, and supportive work environment.

The Team operates in a transparent manner, facilitating open communication and dialogue up, down, and across the chain of command, with active listening and opportunity for discussion and collaboration.

Here are a few ways you can help the Team create an atmosphere of **Duty, Respect, and Integrity** as outlined in the Incident Response Pocket Guide (IRPG):

If you Need to Leave the Incident Environment when Off Duty:

Notify your supervisor of destination and estimated time of return in the event you are needed for duty prior to expected time.

Alcohol /Illegal Drugs / Fitness for Duty

Alcohol and illegal drugs are not permitted within the incident environment. Be ready, willing, and able to perform your duties. If you are unable to perform your duties, you may be released from the incident with the home unit or employer being notified of the circumstances.

Work Environment/Human Relations:

Conduct yourselves as professionals and maintain a positive, non-hostile work environment with mutual respect. Sexual harassment, discrimination, acts of reprisal or any inappropriate behavior that violates human rights, the provisions of equal employment opportunity (EEO), or ethics and conduct standards will not be tolerated. If you need clarification of these expectations, contact the Human Resource Specialist.

Your actions in the community outside of the incident environment must also conform to these standards while assigned to this incident. Your integrity is shown by obeying the law and following local rules and ordinances. Non-compliance with these expectations could result in your being released from the incident with the home unit or employer being notified of the circumstances.

Work / Rest Guidelines:

Any shift times over 16 hours require written justification and approval by the appropriate Section Chief on the Crew Time Report, and will be reviewed by the Incident Commander.

Performance Evaluations:

Performance Evaluations will be completed for all trainees and contractors (including ADs). Any unsatisfactory performance will be documented on an evaluation. It is your responsibility to ensure that your supervisor has completed an evaluation.

Use of Social Media on Wildland Fire Assignments

Firefighters and Incident Management Team (IMT) members should be aware that existing agency-specific ethics and conduct regulations and restrictions governing the use of social media by federal employees on fire assignments apply.

Only authorized employees designated by the hosting unit may represent the government on public social media websites. If you choose to post to a social media website you should have a disclaimer that clearly states the views or opinions that you express are yours alone and do not represent the views of your agency or the IMT.

However, anything that you do post regarding wildland firefighting and the agency you work for reflects on that agency, the IMT you are assigned to and all wildland firefighters.

Social media sites are regularly monitored by federal agencies and employees may be held accountable for inappropriate conduct or ethics. When in doubt, don't post!

I hope you have a safe, productive and rewarding experience here. If you have any needs or concerns that cannot be addressed by my Command and General Staff, please feel free to visit with me.

Chris Ourada, Incident Commander

Incident Operations Driving Guidelines

These guidelines document Great Basin Team 2's expectations for driving by personnel assigned to the Whiskey Complex and Mack fires. This includes driving while in support, mobilization, and demobilization to an assigned incident.

1. Agency resources assigned to an incident will adhere to the current agency work/rest policy for determining length of duty day.
2. No driver will drive more than 10 hours (behind the wheel) within any duty-day.
3. Multiple drivers in a single vehicle may drive up to the duty-day limitation provided no driver exceeds the individual driving (behind the wheel) time limitation of 10 hours.
4. To manage fatigue, every effort should be made to conduct mobilization and demobilization travel between 0500 hours and 2200 hours.
5. As stated in the current agency work/rest policy, documentation of mitigation measures used to reduce fatigue is required for drivers who exceed 16 hour work shifts. This is required regardless of whether the driver was still compliant with the 10 hour individual (behind the wheel) driving time limitations.
6. A driver shall drive only if they have had at least 8 consecutive hours off-duty before beginning a shift.
7. Drivers should wear seatbelts and operate with headlights on.
8. Utilize a spotter when backing a vehicle.
9. Practice Defensive Driving.

Drivers are responsible to follow these policies and it is the supervisor's responsibility to ensure that employees adhere to the proper driving limitations and monitor employee fatigue.

Great Basin Team 2 Evaluation

1. How would you rate the treatment you/or your crew received on this incident?
 Excellent Good Fair Poor

Comments:

2. How well did the following items meet your needs?

	Excellent	Good	Fair	Poor
Food	_____	_____	_____	_____
Sleeping Area	_____	_____	_____	_____
Medical	_____	_____	_____	_____
Showers	_____	_____	_____	_____
Sanitation	_____	_____	_____	_____
Time Keeping	_____	_____	_____	_____
Supply	_____	_____	_____	_____
Transportation	_____	_____	_____	_____
Commissary	_____	_____	_____	_____

Comments:

3. How would you rate the suppression tactics used on this assignment?
 Excellent Good Fair Poor

Comment:

4. How would you rate the knowledge level and performance of your line overhead?
 Excellent Good Fair Poor

Comments:

5. How would you rate the team's attitude toward your safety?
 Excellent Good Fair Poor

Comments:

6. Did anything really frustrate you about how this incident was managed? If so, what could this team do to concentrate on improving performance? No Yes Suggestions:
What could we do better?

7. On a scale of 1 to 10, with 10 being best, how would you rate the overall job this team did on the incident?

1 ___ 2 ___ 3 ___ 4 ___ 5 ___ 6 ___ 7 ___ 8 ___ 9 ___ 10 ___

What could we do better?
