INCIDENT OBJECTIVES	1. INCIDENT NAME River Complex	2. DATE 8/20/2015	3. TIME 2200																
4. OPERATIONAL PERIOD (DATE/TIME) Day Shift.... 8/21/2015 , 0600-2100; Night Shift.... 8/21-22 , 1800-0900																			
5. GENERAL CONTROL OBJECTIVES <u>Incident Strategy</u> <p>The suppression strategy for the River Complex will utilize a combination of direct, indirect and point protection. A key element of the plan is flexibility and the ability to apply the right resource, to the right task, at the right time, for the right duration. It is understood fireline will be constructed only where it is feasible and safe to do so and when there is a high probability of meeting incident objectives. It is the responsibility of the Incident Commander and his staff to work with the Agency Administrator to ensure the plan is regularly reviewed and updated.</p> <p><u>Leader's Expectations:</u> Provide the highest level of customer services to all involved with or impacted by the River Complex. All incident assigned personnel should be prepared to take the appropriate actions regarding;</p> <ul style="list-style-type: none"> • Personal interactions both internal and external to the incident management organization. • Personal safety and the safety of others. • An incident-within-an-incident. <p><u>Management Objectives:</u></p> <ul style="list-style-type: none"> • Provide for firefighter and public safety by ensuring LCES is evaluated and by utilizing sound Risk Management Principles. • Maintain and build on existing Cooperator, Partner, and Stakeholder relationships. • Choose strategy and tactics that limit exposing firefighters or aircraft to unnecessary risk. • In Wilderness, where possible utilize natural barriers, topography and watercourses along with suppression techniques that have the least impact on Wilderness values. <p><u>Control Objectives:</u></p> <ul style="list-style-type: none"> • Protect life and property in the nearby communities including Dailey, Denny, Bell Ranch, Hoboken, Trinity Village, Hawkins Bar, French Creek, Del Loma and the Highway 299 corridor from the impacts of unwanted wildfire. • Protect life, property resources and cultural values on or near the Hoopa Valley Indian Reservation.

River Complex Fire Weather Forecast

FORECAST NO: 20

NAME OF FIRE: River Complex

PREDICTION FOR: Friday Aug 21st

UNIT: SHF/SRF

Brooke Taber

SHIFT DATE: 0600 Fri-0600 Sat

SIGNED: Brooke Taber

TIME AND DATE

Incident Meteorologist

FORECAST ISSUED: 2100 Thu Aug 20th

WEATHER DISCUSSION:

High pressure will build back over the River Complex today, with warm temperatures and very dry conditions prevailing. The wind speeds at midslope and ridgetops will be slightly weaker today, but with less smoke to mix out, the inversion will break up at mid/upper slopes by 1300 and partially break in the deeper valleys near Denny by 1500. As a weak thermal trough develops from surface heating, expect southeast ridgetop winds to becoming northwest after 1400 at 4 to 8 mph with a few higher gusts in the northwest to southeast aligned upper ridge valleys. Relative humidity values will drop into the mid-20s to mid-30s. A developing southeast offshore wind Friday night will enhance the mid/upper level thermal belt with poor recovery relative humidities expected. A few gusts up to 15 mph will be possible on Friday Night, on the ridgetops, light winds with good recoveries in the valleys.

WEATHER FORECAST Friday:

WEATHER: Areas of smoke, clearing after 1400.

HIGH TEMPERATURES: 85-91 valleys. 75-81 ridgetops.

HUMIDITY: 25-33% elevations below 2000 feet. 28-35% above 4000 feet.

20 FT WINDS:

RIDGETOP – Northeast winds 4 to 8 mph, becoming northwest with gusts to 14 mph after 1400.

SLOPE/VALLEY - Light until 1200 then up-canyon 3-7 mph.

HAINES INDEX: 4. **INVERSION:** Lifting by 1300 ridges and partially breaking up by 1500 valleys.

WEATHER FORECAST For Friday Night:

WEATHER: Areas of heavy smoke.

TEMPERATURES: 53 to 58

HUMIDITY: Ridgetop and midslope relative humidity 28 to 38%. 87 to 97% lower slopes/valleys.

20 FT WINDS:

RIDGETOP - Northwest winds 4 to 8 mph until midnight becoming southeast 5 to 10 mph with gusts up to 15 mph.

SLOPE/VALLEY - Evening down-canyon winds 2 to 5 mph.

EXTENDED FORECAST: High pressure continues into the weekend with continued very dry conditions and above normal temperatures. Daily thermal troughs will develop changing the winds from east/southeast in the morning to northwest at ridgetops in the afternoon. Poor relative humidity recoveries are possible in the midslope thermal belt. Daily inversions will be tough to break, given the weak flow and limited mixing. Next system with increased moisture and stronger winds arrives Tuesday into Wednesday.

FIRE BEHAVIOR FORECAST

PREDICTION FOR: 8/21/15 24hr.

FORECAST NO. 20

NAME OF FIRE: River Complex

SIGNED: /s/ Nick Yturri

UNIT: CA-SHF 2066

FIRE BEHAVIOR ANALYST

DATE & TIME ISSUED: 08/20 2100 hr

WEATHER SUMMARY:

Winds: Day, Ridges NE 4-8 mph becoming NW 4-8 mph gusting 14 mph after 1400.

Slopes/Valley: Light until 1200, then up-canyon 3-7 mph.

Night: Ridges-NW 4-8 mph until midnight, then SE 5-10 mph gusting to 15 mph.

Slopes-Evening down canyon 2-5 mph

Min. RH: Day 25-33% below 2000', 28-32% above 4000'.

Night, 28-38% Midslope/Ridges. 87-97% lower slopes/valleys.

Temperatures: Day, 85-91 Valleys 75-81 Ridgetops. Night 53-58

LAL 1 Pig 80-90% ERC 72 96th percentile BI 62 Haines 4

FIRE BEHAVIOR FORECAST

GENERAL FIRE BEHAVIOR:

Smoke will be hang over the fire for part of the day with a weaker thermal belt in place midslope creating an environment that could produce slightly higher fire activity. Primary fire spread will be where fuels & topography align which could lead to single/group tree torching. Rates of spread will be from 1 to 9 chains per hour with flame lengths 1-9 feet in the timber. Rates of spread will increase on steeper slopes due to roll-out. Most of the active areas of the fire are in a backing alignment. **Falling snags and rollout will challenge containment lines and will increase the potential for fire spread over barriers that would normally hold the fire.**

Specific:

Branch I: DIV L may experience some surface fire burning in the heavier and burnout of interior fuels.

Branch II&III: Denny Group can expect burnout of unburned fuels, both on the line and internally, as a result of firing operations. In Division T, expect the fire to continue to impact the 5N04 Rd, especially from rollout in steep terrain. Expect flanking fire in heavy fuels and surface litter. Single and group tree torching will continue. The NE flank of the fire will continue to be active throughout the day and into the night. Fire to the E/SE, especially in DIV Q, will continue to spread laterally. In the SE portion of the fire, expect fire activity from spotting to appear throughout the shift. Single/group tree torching and short range spotting could lead to rapid rates of spread when slope and winds align.

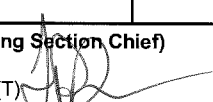

Air Operations: Strong inversion will remain over the fire possible breaking in the higher elevations around 1300 and the lower elevations around 1500.

Safety: If using aviation resources, be aware of rollout due to bucket operations that could lead to spot fires.

HEALTH AND SAFETY MESSAGE

***SAFETY* starts with *YOU* PREDICTABLE IS PREVENTABLE**

For Day/Night Operations: August 21, 2015

INCIDENT: River Complex DATE: August 20, 2015 TIME: 2000

Major Hazards and Risks:

- **DRIVING:** Drive defensively, Be aware of unstable & hazardous road conditions, Be alert and watch for public and other non-operational personnel in fire areas
- **HAZARD TREES:** Look up, Look down, Look around for signs of fire weakened trees
- **STEEP & RUGGED TERRAIN** – Be aware not to work above persons and rolling material
- **HEAVY EQUIPMENT** – Avoid working below equipment, maintain a safe distance from equipment

Fire Order of the Day:

Maintain prompt communications with your forces, your supervisor, and adjoining forces

- Ensure positive communication with assigned line personnel and Initial Attack forces during suppression actions.
- Give good briefings to suppression forces, and concise size-up.
- Ensure all personnel have Air/Ground frequencies and know how to communicate with fixed wing and rotor aircraft

Watch Out Situation #11

11. UNBURNED FUEL BETWEEN YOU AND THE FIRE

Human Factor Watch Outs

Watching out for yourself, coworkers, subordinates and your boss is a primary responsibility for everyone involved in high risk activities. Watch outs are not just for the tactical environment. The Human Factor Watch Outs are designed to create an opportunity for you to take a tactical pause and re-evaluate your situation.

If any of the following occur:

- Your briefing was unclear.
- You are not getting answers to your questions.
- You are not getting clear acknowledgement of your message.
- You are encountering hazards that are not mentioned in your brief.
- Your team is not debriefing.
- Your tempo is too high to maintain command and control.

**Take moment to re-assess your situation.
Think.**

Thanks from your Safety Team!!

Laney Cutshaw
Ed Breece
Carson Jones
Aaron Utterback

Dan Mapstone
Frank Pingiczer

Wildland Fire Lessons Learned Center

"This Day in History" is a brief summary of a powerful learning opportunity. You can use this summary as a foundation and launch point for further dialogue and discussion. Apply these lessons learned to yourself, your crew, your team and your unit.

Origin of the 10 and 18's – June 17th, 1957

Summary: The original ten Standard Firefighting Orders were developed in 1957 by a task force commissioned by the USDA-Forest Service Chief Richard E. McArdle. The task force reviewed the records of 16 tragedy fires that occurred from 1937 to 1956. The Standard Firefighting Orders were based in part on the successful "General Orders" used by the United States Armed Forces. The Standard Firefighting Orders are organized in a deliberate and sequential way to be implemented systematically and applied to all fire situations.

Shortly after the Standard Firefighting Orders were incorporated into firefighter training, the 18 Situations That Shout Watch Out were developed. These 18 situations are more specific and cautionary than the Standard Fire Orders and described situations that expand the 10 points of the Fire Orders with the intent that if firefighters follow the Standard Firefighting Orders and are alerted to the 18 Watch Out Situations, much of the risk of firefighting can be reduced. Below is the original recommendation and fire orders from the report.

Standard Firefighting Orders.

Recommendation:

Adopt for service-wide use the attached "Standard Firefighting Orders." These orders are to be committed to memory by all personnel with fire control responsibilities.

STANDARD FIREFIGHTING ORDERS

1. FIRE WEATHER. Keep informed of fire weather conditions and predictions.
2. INSTRUCTIONS. Know exactly what my instructions are and follow them at all times.
3. RIGHT THINGS FIRST. Identify the key points of my assignment and take action in order of priority.
4. ESCAPE PLAN. Have an escape plan in mind and direct subordinates in event of a blow-up.
5. SCOUTING. Thoroughly scout the fire areas for which I am responsible.
6. COMMUNICATION. Establish and maintain regular communication with adjoining forces, subordinates, and superior officers.
7. ALERTNESS. Quickly recognize changed conditions and immediately revise plans to handle.
8. LOOKOUT. Post a lookout for every possibly dangerous situation.
9. DISCIPLINE. Establish and maintain control of all men under my supervision and at all times know where they are and what they are doing.
10. SUPERVISION. Be sure men I commit to any fire job have clear instructions and adequate overhead.

Discussion Points

Have everyone at the briefing look at the IRPG outside back cover, the current Standard Fire Orders. Compare the current and original list.

- Is the same material covered?
- What are the biggest differences?

Though the Fire Orders are in the form of a list, they are *not* a checklist. The intended use of the Orders is not to check off 1 through 10 and be done with them, but to act as reminders of conditions that need to be continuously maintained and assessed.

- What is the connection between the Standard Fire Orders and situational awareness?

Originally there were 13 Watchout Situations with the last 5 being added on in 1987.

- If you could add one more Watch Out what would it be and why?

The original recommendation in 1957 states that the Fire Orders "are to be committed to memory".

- What do you and your crew/unit do to help each other remember and understand the 10 & 18's?

MEDICAL PLAN (ICS 206 WF)

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS/DISPATCH

Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: Provide incident summary and command structure.

Nature of Injury/Illness		<i>Describe the injury (Ex: Broken leg with bleeding)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
Incident Commander		<i>Name of IC</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report.

Number of Patients:	Male / Female	Age:	Weight:
Conscious? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Breathing? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Mechanism of Injury: <i>What caused the injury?</i>			
Lat/Long (Datum WGS84) Ex: N 40° 42.45' x W 123° 03.24'			

4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
<input type="checkbox"/> URGENT-RED Life threatening injury or illness. <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE.
<input type="checkbox"/> PRIORITY-YELLOW Serious injury or illness. <i>Ex: Significant trauma, not able to walk, 2° – 3° burns not more than 1-2 palm sizes.</i>	Ambulance or consider air transport if at remote location. Evacuation may be DELAYED.
<input type="checkbox"/> ROUTINE-GREEN Not a life threatening injury or illness. <i>Ex: Sprains, strains, minor heat-related illness.</i>	Non-Emergency. Evacuation considered Routine of Convenience.

5. TRANSPORT PLAN:

Air Transport: (Agency Aircraft Preferred)

<input type="checkbox"/> Helispot	<input type="checkbox"/> Short-haul/Hoist	<input type="checkbox"/> Life Flight	<input type="checkbox"/> Other
-----------------------------------	---	--------------------------------------	--------------------------------

Ground Transport:

<input type="checkbox"/> Self-Extract	<input type="checkbox"/> Carry-Out	<input type="checkbox"/> Ambulance	<input type="checkbox"/> Other
---------------------------------------	------------------------------------	------------------------------------	--------------------------------

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

<input type="checkbox"/> Paramedic/EMT(s)	<input type="checkbox"/> Crew(s)	<input type="checkbox"/> SKED/Backboard/C-Collar
<input type="checkbox"/> Burn Sheet(s)	<input type="checkbox"/> Oxygen	<input type="checkbox"/> Trauma Bag
<input type="checkbox"/> Medication(s)	<input type="checkbox"/> IV/Fluid(s)	<input type="checkbox"/> Cardiac Monitor/AED
<input type="checkbox"/> Other (i.e. splints, rope rescue, wheeled litter)		

7. COMMUNICATIONS:

Function	Channel Name/Number	Receive (Rx)	Tone/NAC *	Transmit (Tx)	Tone/NAC *
Ex: Command	Forest Rpt, Ch. 2	168.3250	110.9	171.4325	110.9
COMMAND					
AIR-TO-GRND					
TACTICAL					

*(NAC for digital radio system)

8. EVACUATION LOCATION:

Lat/Long (Datum WGS84) EX: N 40 42.45' x W 123 03.24'	
Patient's ETA to Evacuation Location:	
Helispot/Extraction Size and Hazards:	

9. CONTINGENCY:

Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...	REMEMBER: Confirm ETA's of resources ordered Act according to your level of training Be Alert. Keep Calm. Think Clearly. Act Decisively.

Training Message

Trainees...remember to make a copy of your task book when you get home in case you lose the original.

If you haven't done so yet, please check in with the Training Specialist, (located in with Check-In)

DOCUMENTATION

It is getting close to time to turn in all documents. Please remember that they need to be in order according to the national system of record retention. If you need any labeled folders or help in getting your files in order, I will be glad to help. I am located in the Plans yurt.

Documents need to be filed by form, with the latest date at the front; the oldest toward the back. Only one copy of 213s needs to be turned in. Ideally, this would be the one with the most writing (documentation) on it.

Remember, a good document package is a reflection of the valuable work performed by the team and all other resources. It will be turned over to the incoming team and needs to be well organized so they can carry on in a seamless fashion. Thank you all!! *Charlotte* **DOCL**

River Complex Social Media Policy

Your Images Are Powerful – Be Careful How You Use Them...

It is the policy of the Great Basin IMT2 to *allow* firefighters or other personnel to post information, photos, or videos about work-related activities on personal social media accounts or websites outside of work hours. **However**, firefighters should be mindful that posting work-related information or activities on their personal social media accounts or websites reflects on the professionalism of their crew, the team, and the wildland firefighting community.

Firefighters' lives often depend on their ability to be keenly aware of their surroundings and intensely focused on the tasks they are performing. **Activities that distract from firefighters' situational awareness threaten the safety of those directly involved, and also of others around them.** In addition, photographs, videos, and other information taken by firefighters could cause complications in the event of litigation regarding the fire. Any photos taken of accidents or injuries are for internal incident use only. They are not to be shared externally. This will also help to maintain the privacy of those involved.

With the ability to transmit information and images across the globe instantaneously, it has never been more important for firefighters to conduct themselves professionally. If a firefighter has a question about a specific photo taken on the incident that he or she wishes to post when off duty, please discuss it with Fire Information personnel. Remember, it is the responsibility of every firefighter to maintain the entire organization's reputation, regardless of agency or entity.

Firefighters that do capture photos, video or other media while working on the River Complex are encouraged to transfer this information to Fire Information for possible official use.

Ourada's Team Expectations

Safety is the Team's Number One Priority

Everyone is a safety officer—See It, Say It, and Fix It!

The Team is committed to identifying clear Task, Purpose, and End State that achieves the Agency Administrator's direction and objectives in a timely and cost effective manner.

The Team provides every person associated with the incident a safe, productive, and supportive work environment.

The Team operates in a transparent manner, facilitating open communication and dialogue up, down, and across the chain of command, with active listening and opportunity for discussion and collaboration.

Here are a few ways you can help the Team create an atmosphere of **Duty, Respect, and Integrity** as outlined in the Incident Response Pocket Guide (IRPG):

If you Need to Leave the Incident Environment when Off Duty:

Notify your supervisor of destination and estimated time of return in the event you are needed for duty prior to expected time.

Alcohol /Illegal Drugs / Fitness for Duty

Alcohol and illegal drugs are not permitted within the incident environment. Be ready, willing, and able to perform your duties. If you are unable to perform your duties, you may be released from the incident with the home unit or employer being notified of the circumstances.

Work Environment/Human Relations:

Conduct yourselves as professionals and maintain a positive, non-hostile work environment with mutual respect. Sexual harassment, discrimination, acts of reprisal or any inappropriate behavior that violates human rights, the provisions of equal employment opportunity (EEO), or ethics and conduct standards will not be tolerated. If you need clarification of these expectations, contact the Human Resource Specialist.

Your actions in the community outside of the incident environment must also conform to these standards while assigned to this incident. Your integrity is shown by obeying the law and following local rules and ordinances. Non-compliance with these expectations could result in your being released from the incident with the home unit or employer being notified of the circumstances.

Work / Rest Guidelines:

Any shift times over 16 hours require written justification and approval by the appropriate Section Chief on the Crew Time Report, and will be reviewed by the Incident Commander.

Performance Evaluations:

Performance Evaluations will be completed for all trainees and contractors (including ADs). Any unsatisfactory performance will be documented on an evaluation. It is your responsibility to ensure that your supervisor has completed an evaluation.

Use of Social Media on Wildland Fire Assignments:

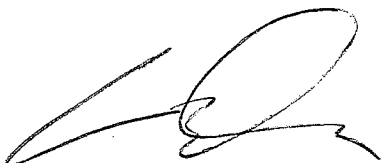

Firefighters and Incident Management Team (IMT) members should be aware that existing agency-specific ethics and conduct regulations and restrictions governing the use of social media by federal employees on fire assignments apply.

Only authorized employees designated by the hosting unit may represent the government on public social media websites. If you choose to post to a social media website you should have a disclaimer that clearly states the views or opinions that you express are yours alone and do not represent the views of your agency or the IMT.

However, anything that you do post regarding wildland firefighting and the agency you work for reflects on that agency, the IMT you are assigned to and all wildland firefighters.

Social media sites are regularly monitored by federal agencies and employees may be held accountable for inappropriate conduct or ethics. When in doubt, don't post!

I hope you have a safe, productive and rewarding experience here. If you have any needs or concerns that cannot be addressed by my Command and General Staff, please feel free to visit with me.

Incident Operations Driving Guidelines

These guidelines document Great Basin Team 2's expectations for driving by personnel assigned to the River Complex. This includes driving while in support, mobilization, and demobilization to an assigned incident.

1. Agency resources assigned to an incident will adhere to the current agency work/rest policy for determining length of duty day.
2. No driver will drive more than 10 hours (behind the wheel) within any duty-day.
3. Multiple drivers in a single vehicle may drive up to the duty-day limitation provided no driver exceeds the individual driving (behind the wheel) time limitation of 10 hours.
4. To manage fatigue, every effort should be made to conduct mobilization and demobilization travel between 0500 hours and 2200 hours.
5. As stated in the current agency work/rest policy, documentation of mitigation measures used to reduce fatigue is required for drivers who exceed 16 hour work shifts. This is required regardless of whether the driver was still compliant with the 10 hour individual (behind the wheel) driving time limitations.
6. A driver shall drive only if they have had at least 8 consecutive hours off-duty before beginning a shift.
7. Drivers should wear seatbelts and operate with headlights on.
8. Utilize a spotter when backing a vehicle.
9. Practice Defensive Driving.

Drivers are responsible to follow these policies and it is the supervisor's responsibility to ensure that employees adhere to the proper driving limitations and monitor employee fatigue.

Great Basin Team 2 Evaluation

1. How would you rate the treatment you/or your crew received on this incident?
__ Excellent __ Good __ Fair __ Poor

Comments:

2. How well did the following items meet your needs?

	Excellent	Good	Fair	Poor
Food	_____	_____	_____	_____
Sleeping Area	_____	_____	_____	_____
Medical	_____	_____	_____	_____
Showers	_____	_____	_____	_____
Sanitation	_____	_____	_____	_____
Time Keeping	_____	_____	_____	_____
Supply	_____	_____	_____	_____
Transportation	_____	_____	_____	_____
Commissary	_____	_____	_____	_____

Comments:

3. How would you rate the suppression tactics used on this assignment?
__ Excellent __ Good __ Fair __ Poor

Comment:

4. How would you rate the knowledge level and performance of your line overhead?
__ Excellent __ Good __ Fair __ Poor

Comments:

5. How would you rate the team's attitude toward your safety?
__ Excellent __ Good __ Fair __ Poor

Comments:

6. Did anything really frustrate you about how this incident was managed? If so, what could this team do to concentrate on improving performance? __No__ Yes Suggestions:
What could we do better?

7. On a scale of 1 to 10, with 10 being best, how would you rate the overall job this team did on the incident?

1__ 2__ 3__ 4__ 5__ 6__ 7__ 8__ 9__ 10__

What could we do better?
