CIIMT4 INCIDENT EXPECTATIONS

CONDUCT AND BEHAVIOR

This team is committed to “**ZERO TOLERANCE**” of careless, illegal, inappropriate and unsafe actions.

Alcohol and/or illegal drugs are **NOT** allowed within the incident environment or while actively assigned to the incident. Local Law Enforcement Officials will be called to deal with any suspected illegal activities. Each employee has the responsibility to be ready, willing, and able to perform the duties for which they are qualified.

Sexual Harassment inappropriate actions or comments will not be tolerated. Everyone is expected to act in a professional manner. It is your responsibility to stop inappropriate actions or comments immediately upon becoming aware of such. Sexual Harassment must be reported to the Human Resource Specialist or Incident Commander. When outside of your designated sleeping area, you are required to wear at least a shirt, appropriate shorts, and shoes or sandals. If you need clarification of these expectations contact the Human Resource Specialist or IC.

SAFETY

The commitment to and accountability for safety is a joint responsibility of firefighters, managers and administrators. Individuals must personally be committed and responsible for their own performance and accountability. Everyone assigned to this incident can expect an assignment that follows all safety rules & regulations. Every person is expected to perform his or her duties in compliance with all known safety practices at all times. Anything less is unacceptable.

EMPHASIS AREAS

Work Rest Cycles - The 2: 1 work/rest ratio is mandatory. For every two hours on shift you will be required to rest for one hour. Every effort shall be used to limit work hours to a maximum of 16. If circumstances require you to exceed 16 hours, this needs to be coordinated in advance with your supervisor and the Justification/Mitigation form completed to support the excessive hours prior to submitting for approval by the IC. It is your responsibility to comply with this direction and provide the appropriate documentation to your Supervisor and Finance.

Position Qualifications- Personnel shall only be assigned to positions for which they are qualified. Proof of qualifications shall be approved prior to being assigned to any position. Operational contract equipment must provide proof that they have received the annual fire refresher training. If not, this training must be received prior to going to work on the fire line.

Engagement/Disengagement - The 10 Standard Orders & 18 Watchout Situations will be followed at all times and mitigated as needed. Staying aware of your situation is critical. Follow the Risk Management Process outlined in the Incident Response Pocket Guide.

Debriefing - All Branch Directors/Division/Group Supervisors will report to their Supervisor and Situation Unit at the end of the operational period for debriefing with emphasis on the accomplishment of objectives. All unit logs (ICS 214) will be turned in after the debriefing to Documentation reflecting accomplishment and/or significant incidents that occurred during the operational period.

Crew Time Reports/Shift Tickets - It is your responsibility to ensure all time is properly accounted for and recorded each shift. The records are to be reviewed and signed by the next level supervisor. A finance related, "Rules of Engagement" document may be provided in the IAP explaining further requirements.

Injuries/Claims - Ensure all injuries and potential claims are reported to the Comp/Claims Unit for completion of appropriate paperwork. Contract claims will be reported to the Procurement Unit Leader.

Social Media - It is your responsibility to know and understand guidelines for firefighter photography, video and social media use. California Interagency Incident Management Team 4 goal is simple: to participate online in a respectful, relevant way that protects our incident's professional reputation, does not confuse the public about the incident and follows the letter and spirit of the law. Be mindful that social media postings can be viewed as unprofessional, damage careers and lead to disciplinary actions. For further information, contact the Public Information Officer.

We look forward to working with you as a valuable member of this effort. If you have any questions or feedback, please feel free to contact any Command and General Staff Member.

ROCKY W. OPLIGER
Incident Commander

SCOTT VAIL
Deputy Incident Commander

THANKS FOR YOUR COOPERATION AND GOOD WORK!!

INCIDENT OBJECTIVES	Incident Name RIVER COMPLEX	Date 8/24/2015	Time 2100
Operational Period 8/25/15 0600 - 8/26/15 0600			
General Control Objectives for the Incident (include alternatives) MANAGEMENT OBJECTIVES: <ul style="list-style-type: none"> • Provide for the safety of all responders and the public by utilizing national Risk Management Standards. • Provide initial attack assistance for new starts within the delegated area. • Reduce firefighter exposure by only engaging fires with the highest probability of success. • Engage cooperators and stakeholders to jointly provide for the defense of communities, infrastructure, and other economic interests. • Utilize local resource specialists to identify and protect sensitive sites when possible. • Maintain and enhance community and stakeholder relationships through accurate and timely dissemination of information updates • Manage costs commensurate with values at risk. CONTROL OBJECTIVES: Keep Fire <ul style="list-style-type: none"> -East of Hoopa Valley Indian Reservation and Highway 96 -North of the 299 Corridor -West of The North Fork off the Trinity River -South of the Siskiyou County Line 			
Weather Forecast for Period See attached Forecast			
General Safety Message <ul style="list-style-type: none"> • Reduce firefighter exposure by only engaging fires with the highest probability of success. • The long term drought in California has produced the potential for extreme fire behavior. The need for maintaining the most current situational awareness is paramount. Expect the unexpected fire behavior!

River Complex Fire Weather Forecast

FORECAST NO: 24

NAME OF FIRE: River Complex

PREDICTION FOR: Tuesday Aug 25th

UNIT: SHF/SRF

SHIFT DATE: 0600 Tue-0600 Wed

SIGNED: Brooke Taber

TIME AND DATE

Incident Meteorologist

FORECAST ISSUED: 2100 Mon Aug 24th

WEATHER DISCUSSION:

....Hot and Dry Weather Continues with a Haines of 5 Today....

A hot and dry airmass continues across the River Complex today with increased instability helping to produce a Haines index of 5. Given the good mixing and breezy ridgetop winds, expect any inversion to lift by 1200 on the midslopes and ridgetops. The breezy south to southwest flow will keep most of the southern portion of the fire smoke free again today. Wind will be highly depended upon terrain, aspect, elevation, and canopy with gusts between 15 and 20 mph expected in the exposed midslope and ridgetops after 1400. Much lighter winds are expected in the protected valleys and under the canopy.

WEATHER FORECAST Tuesday:

WEATHER: Areas of smoke, otherwise mostly sunny.

HIGH TEMPERATURES: 88-96 valleys. 78-84 ridgetops.

HUMIDITY: 18-25% elevations below 2000 feet. 25-32% above 4000 feet.

20 FT WINDS:

RIDGETOP – Southeast winds 8 to 14 mph, becoming south 10 to 15 with a few gusts up to 20 mph possible after 1400.

SLOPE/VALLEY - Light until 1200 then up-canyon 4-8mph with gusts to 13 mph after 1400.

HAINES INDEX: 5. **INVERSION:** Lifting by 1200 midslope and ridgetops and partially lifting in the deeper valleys near Denny.

WEATHER FORECAST For Tuesday Night:

WEATHER: Areas of smoke, otherwise mostly clear.

TEMPERATURES: 55 to 61 valleys, 57 to 63 ridgetops and midslopes.

HUMIDITY: Ridgetop and midslope relative humidity 28 to 38%. 80 to 90% lower slopes/valleys.

20 FT WINDS:

RIDGETOP - Southwest winds 5 to 10 mph with a few gusts up to 15 mph.

SLOPE/VALLEY - Evening down-canyon winds 3 to 6 mph.

EXTENDED FORECAST:Cooler temperatures with increase chances for showers by late Friday....

Wednesday and Thursday will continue to be warm and dry with increasing southwest ridgetop winds. Some clouds ahead of a developing trough may produce slightly cooler and higher relative humidities on Thursday, with breezy southwest ridgetop winds. Our next weather system will impact the region with cooler temperatures, more clouds, higher relative humidities and a chance of showers late Friday into Saturday.

FIRE BEHAVIOR FORECAST

PREDICTION FOR: 8/25/15 24hr.

FORECAST NO. 23

NAME OF FIRE: River Complex

SIGNED: /s/ Colt Mortenson 

UNIT: CA-SHF 2066

FIRE BEHAVIOR ANALYST

DATE & TIME ISSUED: 08/24 2030 hr

WEATHER SUMMARY:

Winds: Day, Ridges SE 8-14 mph, then south 10-15 gusting to 20 mph, after 1200.

Slopes/Valley: Light until 1200, then up-canyon 4-8 mph with gust to 12 mph after 1500

Night: Ridges-SE 10-15

Slopes-Evening down canyon 2-5 mph

Min. RH: Day 18-25% below 2000', 25-35% above 4000'.

Night, 38-48% mid-slope/Ridges. 85-95% lower slopes/valleys.

Temperatures: Day, 88-96 Valleys 78-84 Ridgetops.

Night, 55-61 valleys and 57-63 ridgetops/mid-slopes.

LAL 1 Pig 80-90% ERC 72 96th percentile BI 62 Haines 5

FIRE BEHAVIOR FORECAST

GENERAL FIRE BEHAVIOR:

Smoke will be hang over the fire for most of the morning, late morning and afternoon south winds will clear out the smoke. A stronger thermal belt will set up mid-slope at night creating an environment that could produce greater fire activity. Primary fire spread will be where fuels & topography align which could lead to single/group tree torching or more in the higher elevations. Rates of spread will be from 1 to 9 chains per hour with flame lengths 1-9 feet in the timber. Rates of spread will increase on steeper slopes due to roll-out. Most of the active areas of the fire are in a backing alignment outside the wilderness. **Falling snags and rollout will challenge containment lines and will increase the potential for fire spread over barriers that would normally hold the fire.**

Specific:

Branch I: DIV L may experience some surface fire burning in the heavier fuels and interior pockets will continue to burnout. Minimal fire movement in the old Corral Burn has been observed.

Branch II&III: Denny Group can expect burnout of unburned fuels, both on the line and internally, as a result of firing operations. Visibility will be limited due to smoke. In Division T, expect the fire to continue to impact the 5N04 Rd, especially from rollout in steep terrain. Expect flanking fire in heavy fuels and surface litter. Single and group tree torching may be observed. In DIV Q, Fire will continue to spread laterally. In the SE portion of the fire, expect active backing and flanking fire. Single/group tree torching may be observed and rollout will continue to challenge lines. Short range spotting (less than ¼ mile) is also possible. Expect greater rates of spread in the grass found in the old burns.

Air Operations: Smoke will probably hold in the valley in the morning and start to clear by 1100. Smoke from the South Complex may hinder air operations on the southern end of the fire.

Safety: Maintain situation awareness with the uncertainty of atmospheric stability. **Strong inversions will limit visibility until early afternoon.**

River Complex– Safety Message

INCIDENT #CA-SHF-002066

DATE: 08.25-26.15 TIME:0600 – 0600 Day/Night

General Safety Concerns:

- **Driving:** Narrow/dusty roads, others driving faster than we do. **HEADS UP!!!**
- **Risk versus benefit:** Don't get caught up in the moment! Always weigh the risks of tactical operations against the potential benefit. **Especially on steep slopes at night!**
- **Drought conditions:** Use all of the assessment tools; Heads up for fire behavior; Ensure **LCES** is in place; Take extra time to ensure it is safe to engage! Use extra caution all the time.
- **All trees can be dangerous.** They don't have to be leaning, dead, burned, or gnarly. Perform adequate assessments, minimize exposure and risk around all trees.
- **Line Construction:** Use all of the safety protocols concerning line construction. Watch the spacing, footing, and other firefighters below.

“SEE IT.....SAY IT!”

If you see a hazard or a dangerous situation developing,
tell your supervisor and those around you.

Make a Safety Difference

- As a supervisor, provide constant and relentless oversight.
- **Stay focused on the task at hand, all the time!**
- Come up with a safer way to perform a risky assignment.
- Discuss the near miss.
- Never tolerate “Hey, watch this!”
- Discuss the effects of fatigue, and mitigate the effects of fatigue.
- While in the fire zone, wear your hardhat when you leave the vehicle.
- Have a purpose in what you do.
- Don't trust other drivers!

Take Five at Two!

- Around **2:00** in the afternoon is a good time to **stop and reassess** your situation.
- **Take 5** minutes to determine what conditions have changed since you started work.
- Are your original **objectives still valid** considering current weather and fire behavior?
- How should you **adjust your tactics** to accomplish the original leader's intent for the day?
- Are your **objectives still commensurate with values at risk**, including the safety of you and the resources you are responsible for?

Prepared by the Team 4
Safety Group.

INCIDENT RISK ANALYSIS RIVER COMPLEX CA-SHF-002066 (ICS 215a) Day/Night Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Many roads are narrow and mid-slope, with soft shoulders. Allow heavy vehicles to pass on uphill side. Use spotters when backing, or turning around. • Practice "Defensive Driving" techniques. Assume other drivers are fatigued and complacent. • 5mph speed limit in and around ICP, keep your speed down in all areas. • Use warning lights when working on roads or traveling in smoke. • Drive at or below posted speed limits. • Use chock blocks, turn wheels into hill. • Be alert for cattle and wildlife.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p.22.) • Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. • Be alert around hazard trees during wind events, even green trees. • The hazard zone extends a minimum of 2½ tree lengths. • Do not park vehicles or take breaks under or near hazard trees.
ALL	STEEP TERRAIN AND ROLLING DEBRIS	<ul style="list-style-type: none"> • Maintain 8'-10' spacing when working & walking. • Be alert for rolling rocks, debris, or burning material. • Evaluate necessity to send personnel in areas with limited access. • Post lookouts where feasible.
ALL	FATIGUE/COMPLACENCY	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. • Maintain 2:1 work/rest ratio. • Monitor ALL resources for level of fatigue. • Repeated assignments in the same area can lead to complacency making personnel more vulnerable to accidents. • Take steps to maintain situational awareness for the duration of the incident.
A/D/W/Z, L/M, Denny Grp	MOP-UP OPERATIONS	<ul style="list-style-type: none"> • Balance the risk of exposure to hazards against the mop up objective potentially achieved. • Evaluate areas for hazard trees and locate stump holes for avoidance. • Monitor fatigue; take breaks to increase rest where appropriate. • Follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4).
L,Q,T,M	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> • Ensure communications are established with operators. • Avoid working downslope from heavy equipment. • Maintain a 50'-150' exclusion area around equipment. • In timber increase safety distance to 2 ½ times canopy height.
Denny Rd	ROAD CLEARING OPERATIONS	<ul style="list-style-type: none"> • Ensure close coordination between suppression operations and road clearing operations. • Road clearing operational resources must be fully briefed and "embedded" with affected Division resources.
Night Grp.	NIGHT OPERATIONS	<ul style="list-style-type: none"> • Have a purpose for where you drive and what you do. Don't rush into assignments. • Use caution where you park or stage, especially in steep timbered areas. • When dealing with stop-overs, balance the risk of exposure to hazards against the suppression objective potentially achieved. • Increase SA by trying to see the work area during daylight hours. • Use glow sticks to mark hazards, and ensure personnel have headlamps.
ALL	CHAIN SAW OPERATIONS	<ul style="list-style-type: none"> • Only fell and buck trees within your expertise and training. • Follow "Procedural Felling Operations" on page 79 in IRPG. • Suspend felling operations in excessively windy conditions. • Ensure proper use of all required PPE.
ALL	HEAT RELATED ILLNESS	<ul style="list-style-type: none"> • Drink 2 to 1 water to sports drinks. • Take frequent breaks, minimum of 10 minutes every hour. • Recognize symptoms of HEAT RELATED ILLNESS which include low energy, headaches, dizziness, poor rest, poor eating habits, hot skin, and lack of sweating.
ALL	AIR OPERATIONS	<ul style="list-style-type: none"> • Follow "Aviation Watch-Out Situations" on page 44, IRPG. • Don't plan on air resources for tactical support or medical transportation. • Refer to page 57, IRPG for directing bucket drops. • Ensure positive communication with all air resources.

8. MEDICAL EMERGENCY PROCEDURES

LINE MEDICAL EMERGENCY:

Crew Supervisor contact Division Supervisor/Operations with patient complaint, condition and location.

Division Supervisor/Operations contacts Communication:

- Division Supervisor/Operations to use "injury or incident communication protocol" on next page
- Division Supervisor/Operations will run medical emergency on command channel
- Communications will contact the Medical Unit Leader on Command channel.
- Medical Unit Leader will:
 1. Have communications dispatch ground/air transport resources
 2. Notify receiving hospital of injury status.
 3. Develop primary and contingency transport plan
 4. Notify Incident Commander, Safety, Logistics and Operations

CAMP MEDICAL EMERGENCY:

Contact Communications with patient complaint/condition and location, via LOGs Net

- Medical Unit contacts:
 - Safety
 - Logistics
 - Operations
- Medical Unit Leader will:
 1. Contact Communications to dispatch ground/air transport resources
 2. Notify receiving hospital of injury status
 3. Develop primary and contingency transport plan

Injury or Incident Communications Protocol

DECLARE: Medical Emergency or Non-emergency Medical transport

Best transport method: (circle) Ambulance Helicopter Vehicle

Location: (Div. & Lat / Long) _____

GPS Format: WGS84 Degrees, Decimal, Minutes

Situation _____

Any special equipment required _____

Number of injured _____ Type of injuries _____

Closest pick up point (DP, Helispot) _____

Level of consciousness _____ Resp. _____ Pulse _____ BP _____ Weight _____
(alert & oriented x 1-4)

Injury _____ Agency (No Names) _____

Medical History/Allergies _____

Air Transportation Triage

	<i>Ground or Air Ambulance to Hosp.</i>	<i>Transport to Med Unit</i>
<i>Mechanism</i>	<i>Hit by a falling tree or large branch Fall of 10' or more Insect bite with shortness of breath Signs of heat stroke (hot, dry, disoriented) Burn Injury greater than 1% body area</i>	<i>Minor dehydration Cut or laceration with bleeding controlled Minor bites and Stings Minor burns</i>
<i>Area Injured</i>	<i>Significant Blunt or Penetrating Trauma to Head, Neck, Chest, Abdomen or pelvis Any Arm or Leg fracture above the Joint</i>	<i>Minor blunt trauma Minor penetrating trauma Extremity sprains and strains Simple fracture below elbow or knee</i>
<i>Symptoms</i>	<i>Disoriented Chest Pain or Shortness of Breath Weak or absent radial pulse Pale, cold and sweating</i>	<i>Alert and oriented No shortness of breath Good pulses</i>

If air or ground ambulance is DELAYED:

Package and transport patient to rendezvous with ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

If Declaring an "Incident within the Incident"

The closest DIVS will respond to manage the incident. They are responsible for giving an accurate size up, ensuring scene safety, setting priorities and initiating an appropriate response.

The closest Safety Officer and Line EMS will respond to the scene to assist the Branch Director or DIVS. Secure site and begin initial investigation when situation is stabilized.

MESSAGE FROM YOUR HUMAN RESOURCE SPECIALIST

Teamwork:

“Winning isn't everything, but wanting to win is”.

Cooperation:

“Success is the sum of small efforts, repeated day in and day out”.

Respect:

“You must look into people as well as at them”

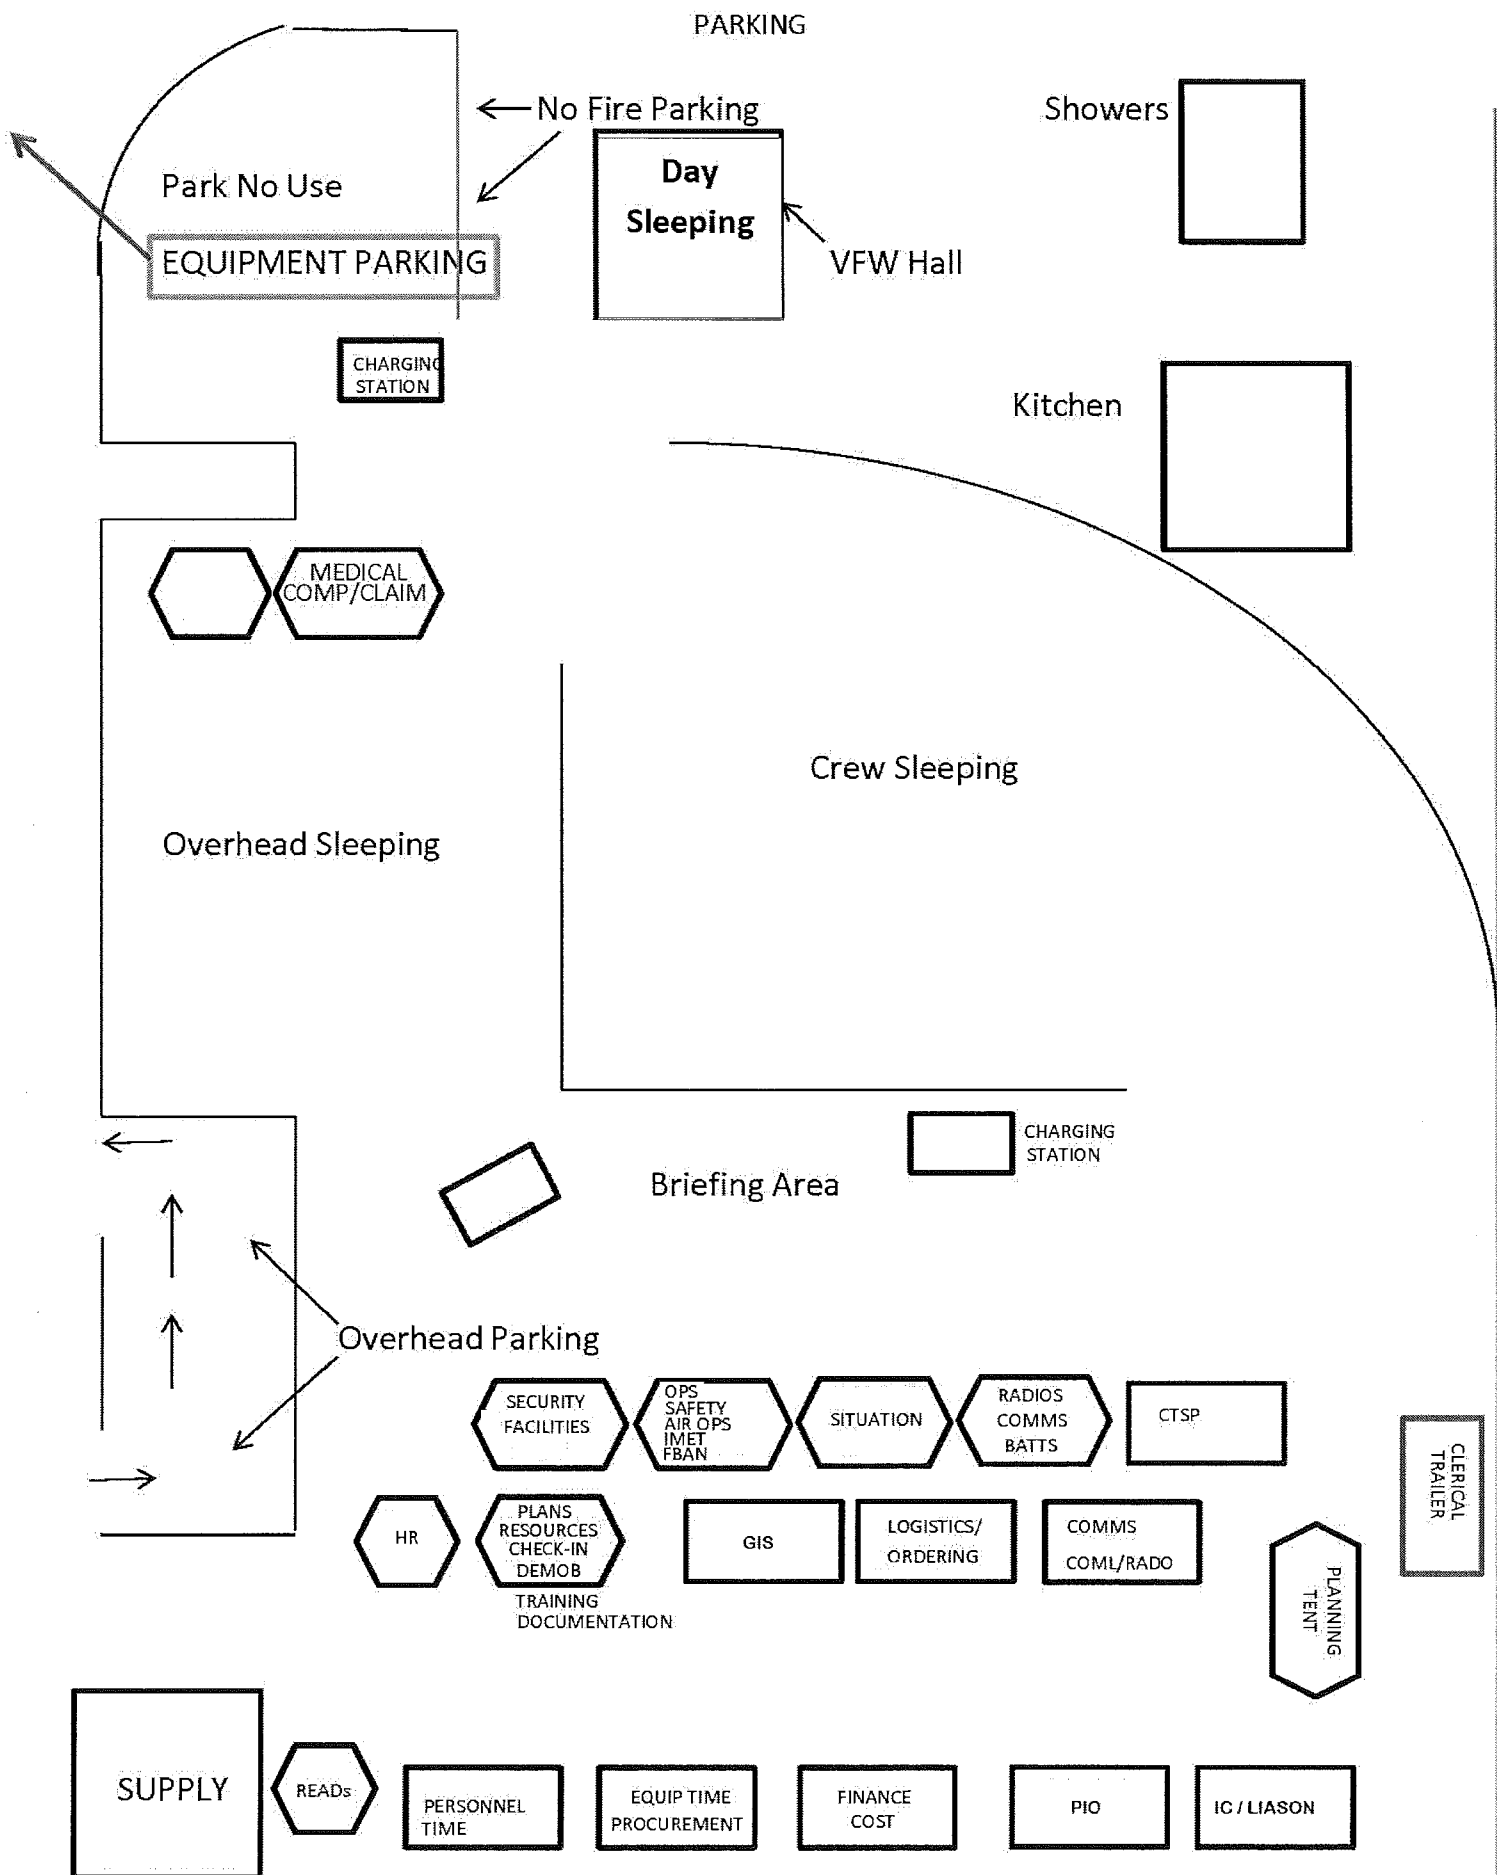

Team work, cooperation and respect are KEY issues on this or any other incident.

This incident needs your efforts in maintaining a positive work environment. If I can be of any assistance please don't hesitate to come by and visit with me.

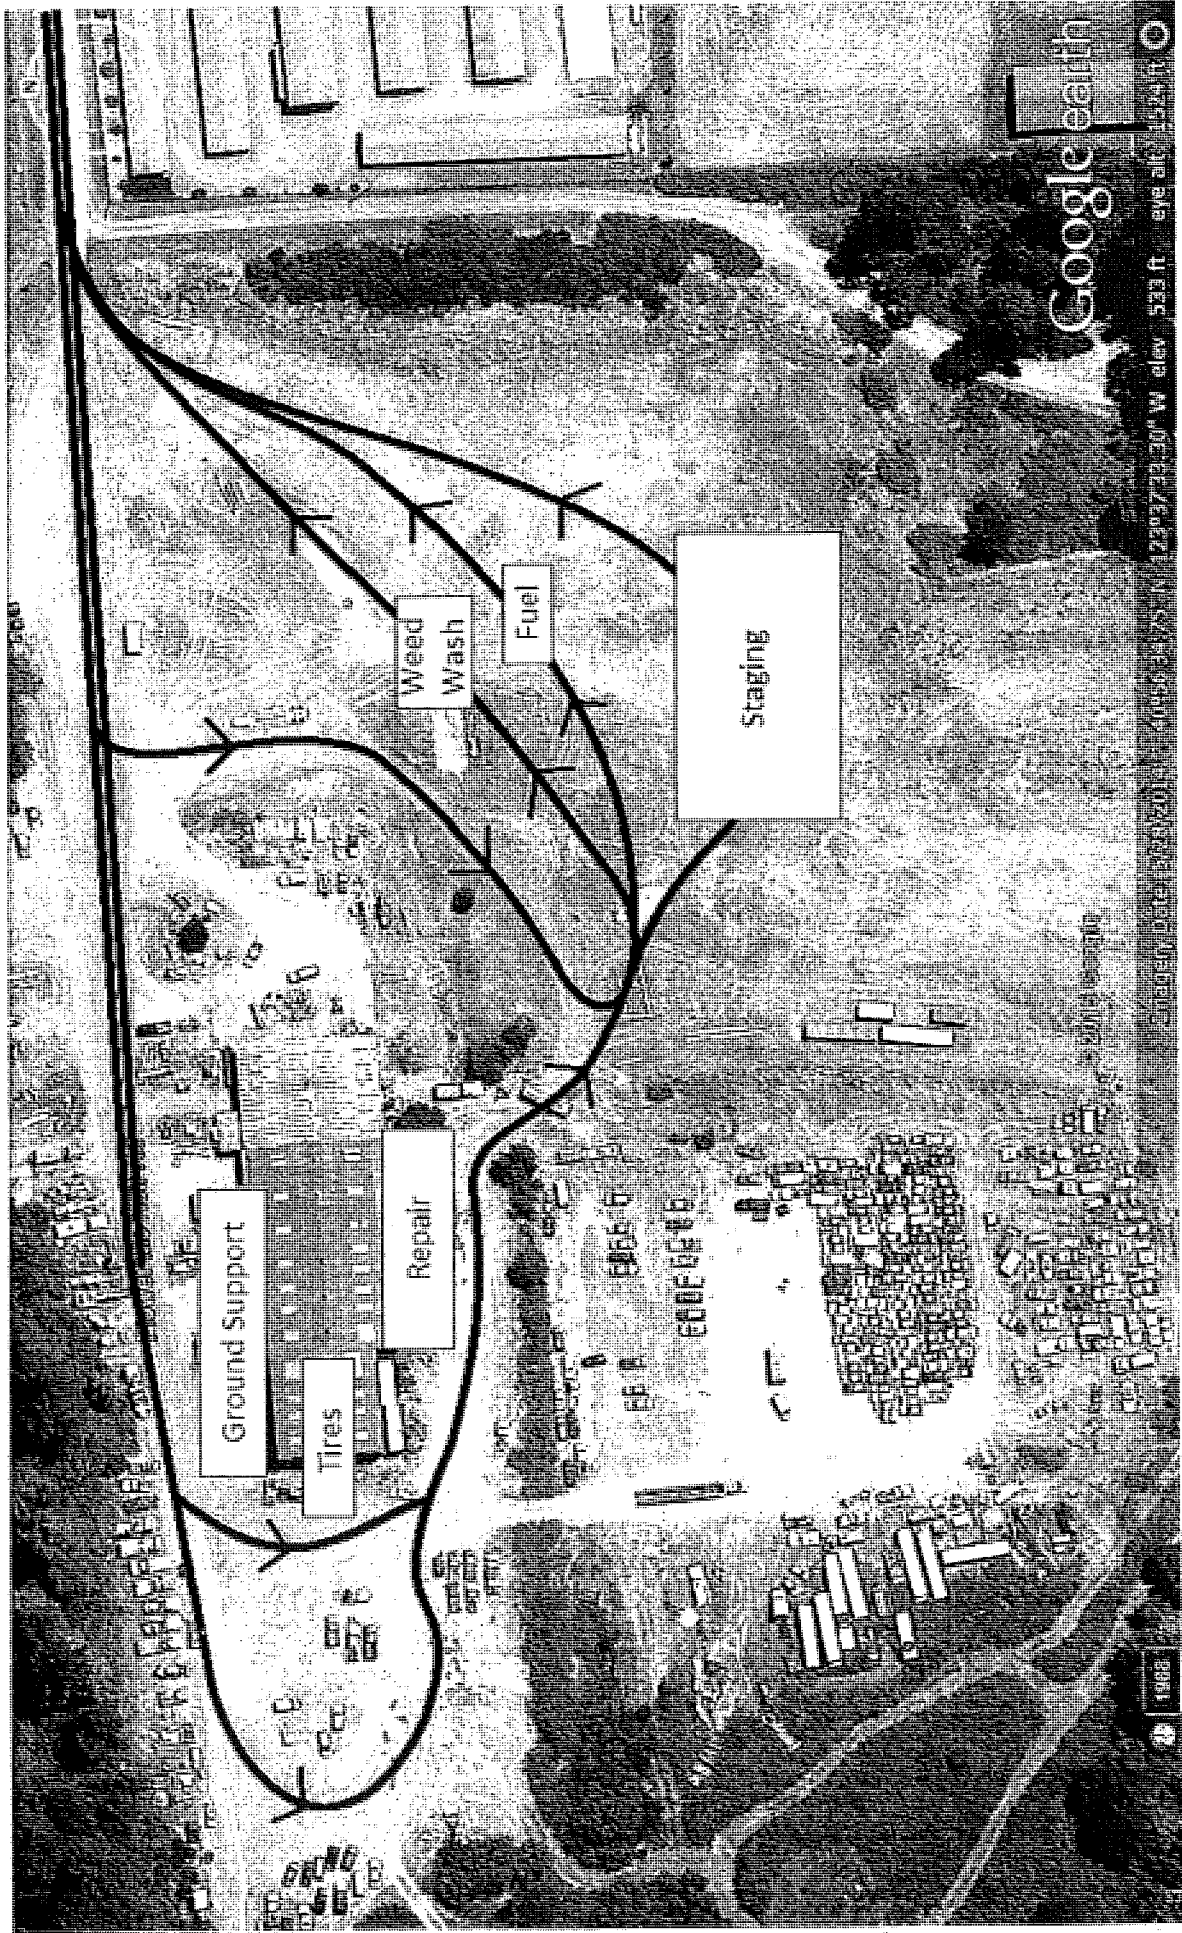

**Your Human Resource Specialist,
Daniel Gonzalez**
