# River Complex Fire Weather Forecast

**FORECAST NO:** 26

**NAME OF FIRE:** River Complex

**PREDICTION FOR:** Thursday Aug 27th

**UNIT:** SHF/SRF

**SHIFT DATE:** 0600 Thu-0600 Fri

**SIGNED:** Brooke Taber

**TIME AND DATE**

**Incident Meteorologist**

**FORECAST ISSUED:** 2100 Wed Aug 26th

## WEATHER DISCUSSION:

**....Warm and dry weather continues today with breezy ridgetop winds....**

A warm and dry pattern continues today with breezy mid and ridgetop winds developing after 1400. A few gusts up to 20 mph will be possible in the exposed and aligned southwest to northeast canyons. Much lighter winds will occur under the canopy and protected deeper valleys. Relative humidities will remain low again today with temperatures ranging from the upper 70s ridgetops to lower 90s warmer valleys with a few high clouds and fair weather cumulus clouds over the mountains .

## WEATHER FORECAST Thursday:

**WEATHER:** Areas of smoke in the morning, becoming mostly sunny.

**HIGH TEMPERATURES:** 87-94 valleys. 76-82 ridgetops.

**HUMIDITY:** 18-25% elevations below 2000 feet. 25-32% above 4000 feet.

### **20 FT WINDS:**

**RIDGETOP** – Southwest winds 5 to 10 mph, becoming 8 to 14 with a few gusts up to 20 mph possible after 1500.

**SLOPE/VALLEY** - Light until 1200 then up-canyon 5-10mph with gusts to 15 mph after 1500.

**HAINES INDEX:** 5. **INVERSION:** Lifting by 1500 midslope and ridgetops and partially lifting in the deeper valleys near Denny.

## WEATHER FORECAST For Thursday Night:

**WEATHER:** Becoming partly cloudy with areas of smoke.

**TEMPERATURES:** 57 to 63 valleys, 58 to 64 ridgetops and midslopes.

**HUMIDITY:** Ridgetop and midslope relative humidity 45 to 55%. 86 to 96% lower slopes/valleys.

### **20 FT WINDS:**

**RIDGETOP** - Southwest winds 12 to 16 mph with a few gusts up to 22 mph.

**SLOPE/VALLEY** - Evening down-canyon winds 3 to 6 mph.

## EXTENDED FORECAST: ....Wetting Rainfall Likely Friday Night into Saturday....

A major pattern change will result in increasing clouds on Friday with slightly cooler temperatures and higher relative humidity values. Ridgetop wind gusts to 25 mph will be possible. A developing trough will produce a period of light rain after midnight Friday into mid-morning Saturday. Expected rainfall will range between a tenth and quarter of an inch, with highest amounts in elevations above 3000 feet. Much cooler temperatures and higher elevation humidities will prevail over the weekend with summits obscured in low clouds on Saturday.

### FIRE BEHAVIOR FORECAST

#### GENERAL FIRE BEHAVIOR:

Smoke will be hang over the fire for most of the morning, late morning and afternoon southwest winds will clear out the smoke. A strong thermal belt will set up mid-slope at night creating an environment that could produce greater fire activity. Primary fire spread will be where fuels & topography align which could lead to single/group tree torching or more in the higher elevations. Rates of spread will be from 1 to 9 chains per hour with flame lengths 1-9 feet<sup>2</sup> in the timber. Rates of spread will increase on steeper slopes due to roll-out. Most of the active areas of the fire are in a backing alignment outside the wilderness. **Falling snags and rollout will challenge containment lines and will increase the potential for fire spread over barriers that would normally hold the fire.**

#### Specific:

**Branch I:** DIV L may experience some surface fire burning in the heavier fuels and interior pockets will continue to burnout. Minimal fire movement in the old Corral burn has been observed.

**Branch II&III:** Denny Group can expect burnout of unburned fuels, both on the line and internally, as a result of firing operations. Visibility will be limited due to smoke. In Division T, expect the fire to continue to impact the 5N04 Rd, especially from rollout in steep terrain. Expect flanking and backing fire in heavy fuels and surface litter. Single and group tree torching may be observed. In DIV Q, Fire will continue to spread laterally. In the SE portion of the fire, expect active backing and flanking fire. Single/group tree torching may be observed and rollout will continue to challenge lines. Short range spotting (less than ¼ mile) is also possible. Expect greater rates of spread in the grass found in the old burns.

**Air Operations:** Smoke will probably hold in the valley in the morning and start to clear by 1100. Smoke from the South Complex may hinder air operations on the southern end of the fire.

**Safety:** Maintain situation awareness with the uncertainty of atmospheric stability. **Strong inversions will limit visibility until early afternoon.**

# Happy Camp Complex – Safety Message

INCIDENT: CA-SHF-002066

DATE: 08.27-28.15

TIME: 0600 – 0600

## SAFETY ALERT!

# DRIVING!

A critical issue on all roads, all the time! Highway 299 is dangerous with the volume of large logging and chip trucks, narrow roads, steep drop-offs, aggressive drivers, and especially near Drop Point 14 at shift change. The forest roads are also very challenging with narrow, rough, and dusty conditions with the potential for large trees to come down.

## Fight Complacency

- One common reason for firefighter injury in the latter stages of a fire is when the firefighter throws her/his mind into neutral and doesn't think about the work they are doing. They are not thinking about how to do the job right, but just how to get the job done so we can just get home. Couple this with fatigue, and you really have a "WATCHOUT."
- There's a difference in between **just** getting the job done, versus getting the job done when **MENTALLY ENGAGED**.
- So with that, keep your mind engaged and attentive to the task. Continually ask yourself if you are doing the job safely, the way you were trained. Keep an eye on your co-workers too. If you see them doing something that is unsafe, **YOU NEED TO SAY SOMETHING** immediately about the unsafe act.

## CIRCLE OF SAFETY:

- Walk around the vehicle.
- Check the windshield, wipers, and wiper fluid level.
- Keep windows, mirrors, and lights clean to better see and be seen.
- Check headlights, turn signals, tail lights, reflectors and running lights.
- Adjust mirrors.
- Check front and back tires (including wheels and lug nuts).
- Under the hood, check all fluid levels and especially the Air Filter.

## SNAGS AND HAZARD TREES:

All trees, especially large trees are potentially dangerous.

- Trees don't tell when they are going to fall, they just do. Be heads up!
- Minimize your exposure time and resources around hazard trees.
- How often do we have a conversation under large trees?
- How often do we get out of our vehicle without putting our hardhat on.

## DEHYDRATION:

If you're thirsty, you've waited too long to drink water. You need to drink a minimum of 32 ounces of water per hour during the day shift.
