

INCIDENT ACTION PLAN

FORK COMPLEX FIRE

CA – SHF 002067

CA - SHU 007337

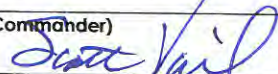

P5J0HS 0514

DAY SHIFT

Sunday, August 9, 2015

0600 – 1800 Hours

INCIDENT OBJECTIVES	1. Incident Name Fork Complex	2. Date 8/8/2015	3. Time 2015									
4. Operational Period 8/09/2015 0600 – 1800 DAY OPERATION												
5. General Control Objectives for the Incident (include alternatives) OBJECTIVES <ul style="list-style-type: none"> • Provide for the safety of all responders and the public by utilizing national Risk Management Standards. • Provide initial attack response for new starts within the delegated area. • Reduce firefighter exposure by only engaging fires with the highest probability of success. • Engage cooperators and stakeholders to jointly provide for the defense of communities and infrastructure. • Utilize local resource specialists to identify and protect sensitive sites when possible. • Maintain and enhance community and stakeholder relationships through accurate and timely dissemination of Information updates. • Manage costs commensurate with values at risk. 												
6. Weather Forecast for Period See attached forecast												
7. General Safety Message Reduce firefighter exposure by only engaging fires with the highest probability of success. The long term drought in California has produced the potential for extreme fire behavior. The need for maintaining the most current situational awareness is paramount. Expect the unexpected fire behavior! See attached safety message

Fork Complex Fire Weather Forecast

FORECAST NO: 13
PREDICTION FOR: Sunday Day Shift
SHIFT DATE: Aug 9, 2015
TIME AND DATE
FORECAST ISSUED: Aug 8, 2015 @ 2000 PDT

NAME OF FIRE: Fork Complex
UNIT: Shasta-Trinity National Forest
SIGNED: Alex Hoon
Incident Meteorologist

WEATHER DISCUSSION:

Low pressure system will deepen off the California coast today with increasing Southwest flow aloft. Winds will increase from the West to Southwest today becoming breezy. Some clearing may occur today with increased flow and instability. Under sunny conditions the atmosphere will become very unstable.

Forecast for Sunday: ...**INCREASING WEST WINDS AND INSTABILITY... HAINES 5...**

Weather: Sunny. Smokey with some clearing.

High Temperature... 72-82°F (little change)

Min RH..... 22-30% (little change)

20-FOOT WINDS:

Ridgetop..... Southwest 4-8 mph in the morning, becoming West-Southwest 7-12 mph after 1300.
Gusts to 18 mph in the afternoon.

Slope/Valley..... Upslope/upcanyon 4-8 mph. Gusts up to 18 mph in E-W drainages.

Forecast for Sunday Night: ...**STEADY NORTHWEST RIDGE WINDS...UNSTABLE RIDGES...**

Weather: Clear and smokey.

Low Temperature... 60° above 3500 feet.....50° valley bottom

Max RH..... 40% above 3500 feet.....80% valley bottom

20-FOOT WINDS:

Ridgetop..... Northwest 8-12 mph. Southwest on highest peaks.

Slope/Valley..... Downslope/Downcanyon 2-4 mph.

Outlook for Monday: ...**BREEZY WEST WINDS AND UNSTABLE... HAINES 6...**

Weather: Mostly sunny with a few clouds in the afternoon. Smokey.

High Temperature... 72-82°F

Min RH..... 22-30%

20-FOOT WINDS:

Ridgetop..... Southeast 4-8 mph in the morning, becoming South to Southwest 7-12 mph
With gusts to 18 mph after 1300.

Slope/Valley..... Upslope/upcanyon 4-8 mph

Outlook for Monday Night: ...**STEADY NORTHWEST RIDGE WINDS...UNSTABLE RIDGES...**

Weather: Partly cloudy. Smokey.

Low Temperature... 60° above 3500 feet.....50° valley bottom

Max RH..... 50% above 3500 feet.....80% valley bottom

20-FOOT WINDS:

Ridgetop..... Northwest 8-12 mph. South on highest ridges.

Slope/Valley..... Downslope/Downcanyon 2-4 mph.

EXTENDED OUTLOOK for Tuesday through Thursday:

Low pressure will develop along the Northern California coast next week keeping temperatures a bit below average for this time of year with increasing moisture into the region. This is also a typical setup for afternoon and evening thunderstorm activity in Northwestern CA during August. Best chances for thunderstorms will be on Tuesday and Wednesday. Winds will come from the south on Tuesday and Wed.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 013

TYPE OF FIRE: Wildland

FIRE NAME: Fork Complex

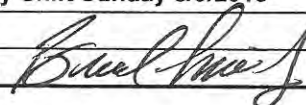

OPERATIONAL PERIOD: Day Shift Sunday 8/9/2015

DATE ISSUED: 08/08/2015

TIME ISSUED: 2130

UNIT: CA-SHF-002067

SIGNED: Brad Smith, FBAN

INPUTS

WEATHER SUMMARY:

Low pressure system will deepen off the California coast today with increasing southwest flow aloft. Winds will increase from the west to southwest today becoming breezy. Some clearing may occur today with increased flow and instability. Under sunny conditions the atmosphere will become very unstable.

(See attached weather forecast)

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Fire behavior increases significantly when clear conditions and instability (Haines index of 5 or 6) are present. Drought mortality has added a significant amount of heavy dead fuel loading to the timber fuels. These heavy dead fuels are increasing fire intensity and generating sustained crown fire when wind and slope align in a clear, unstable environment. Running crown fire and group torching has produced spotting out to 1/3 mile. The same alignment of wind and slope in a clear, unstable environment will also produce active running fire in the mixed brush fuels commonly found in the old burn scars.

Combinations of any of these factors can greatly increase fire behavior:

20' winds over 5 mph, **RH** less than 20%, **Temp** over 73°, **ERC** above 62, **10HR** less than 5

Forecast today **20' winds** SW-NW 6-10 mph **RH** 26-35% **Temp** 72-82° **ERC** 53 **10HR** 5-6

Probability of Ignition: 50- 60% unshaded 30-40% shaded

SPECIFIC:

0800-1300: This time frame brings the best chance for clear, sunny skies over the fire area. Branch III and Branch II are most favored for clear air and it is possible that Branches I and II could see briefer periods of clear skies. The southwest wind direction brings the best chance for clear skies and it also is a direction we have not seen until last night. The southwest wind direction will test parts of the fire.... some of the northeast perimeters, which have yet to be tested.

1300-1800: A transition to more westerly wind direction will bring more smoke into our fire area from fires to our west. Shading from the smoke will reduce sunshine and solar heating which will decrease the unstable conditions. Any active crown fire will transition back to the surface but group and single tree torching will continue.

1800-2100 Northwest winds may appear around shift change and allow some clearing which will produce an uptick in fire behavior before sunset.

AIR OPERATIONS:

There is a chance that there will be enough instability early and late to pull out some of the smoke

SAFETY

When fire behavior increases the margin of error for decision making decreases. Active crown fire and the associated spotting can be very unforgiving of an error in judgement

AIR OPERATIONS SUMMARY

PREPARED BY: Kerry Koskela *Kerry Koskela*

PREPARED DATE/TIME: 08/08/15 2030

1. INCIDENT NAME: Fork Complex

2. OPERATIONAL PERIOD DATE: 08/09/15 START TIME: 0600 END TIME: 1800 SUNRISE: 0617 SUNSET: 2018

NOTE: AIRCRAFT CAN BE SHARED BETWEEN COMPLEXES

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc)
 No aircraft to launch without aerial supervision and adequate communications.
 Watch for wires in river canyon and along Highway 36
 Beware of rapidly changing VFR conditions due to smoke.
 Use approved dip sites and record amount of water pulled.
 Avoid overflight of area below the levee on East Fork Dip.
 No retardant in the Natural Bridge area.

10. MISSIONS

Fork Complex – Safety Message

“SAFETY is a **CORE VALUE** to be integrated into **ALL** incident activities”

INCIDENT: # CA-SHF-002067

DATE: 08.09.2014 TIME: 0600 - 1800 Day

Operational Leadership

- **Take Charge** of assigned resources.
- **Anticipate** changing conditions and potential emergencies.
- **Motivate** firefighters with a “can do safely” attitude.
- **Demonstrate Initiative** by taking action in the absence of orders.
- **Communicate** by giving specific instructions and asking for feedback!
- **Supervise** at the scene of the action.
- **Follow-Up** with feedback and suggestions for improvement.

Ten Standard Fire Orders

1. Keep informed on **FIRE WEATHER** conditions and forecasts.
2. Know what your **FIRE** is doing at all times. Observe personally; use scouts.
3. Base all actions on current and expected **BEHAVIOR of FIRE**.
4. Have **ESCAPE ROUTES** for everyone and make them known.
5. Post a **LOOKOUT** when there is possible danger.
6. Be **ALERT**, keep **CALM**, **THINK** clearly, and **ACT** decisively.
7. Maintain prompt **COMMUNICATION** with your crew, your boss and adjoining forces.
8. Give **CLEAR INSTRUCTIONS** and be sure they are understood.
9. Maintain **CONTROL** of your people at all times
10. Fight fire aggressively having provided for **SAFETY FIRST**.

Escape Route/Safety Zone Checklist

Escape Routes:

- Designate primary and back-up escape routes.
- Scouted – soils, vegetation, slope
- Timed – slowest person, fatigue, dozer speed
- Marked – flagged for day and night use

Safety Zones:

- Survivable without a shelter
- Natural – clean burn, water, bare soil/rock
- Human-made, constructed sites, roads, etc.
- Scouted for size and hazards
- Close enough considering escape time needed

Remember and Follow:

- The 10 Standard Fire Orders
- The Common Denominators of Fire Behavior on Tragedy Fires
- The Downhill Line Construction Guidelines

Driving

- When driving, keep speed at or below the posted speed limit and your headlights on.
- **Stay as far to the right of the road as is safely possible.**
- During shift change keep your speed at or below the posted speed limit.
- Ensure your vehicle is chocked and the brake is set
- Always fasten your seat belt before the vehicle is set into motion.
- Don't tail gate.
- Slow down, slow down, and slow down.

There are three main types of distracted driving: **Visual**-taking your eyes off the road; **Manual**-taking your hands off the wheel; **Cognitive**-taking your mind away from the task at hand. Don't drive distracted!

Prepared by:
Team 4 Safety Group

INCIDENT RISK ANALYSIS FORK COMPLEX CA-SHF-002067 (ICS 215a) Day Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> • Conduct thorough assessments before starting work. • Ensure LCES is in place. • Provide additional briefing emphasis on drought related fire behavior. • Increase the level of SA. • Provide additional briefing for new resources and maintain communications.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness (hazards, changes, etc.) with those who also have a need. • Radio Communications may be poor in some areas. Use human repeaters as needed. • Ensure all personnel are familiar with the incident and IA communications plans
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p.22). • Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. • Be especially alert around snags during wind events. Large green trees can also be dangerous.
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Practice "Defensive Driving" techniques. Traffic volume is increasing. • Use spotters when backing. • Always use headlights. • Use warning lights when working on roads or traveling in smoke. • Observe posted speed limits. • Use chock blocks, turn wheels into hill. • Many roads are narrow and mid slope, use caution
ALL	STEEP TERRAIN AND ROLLING DEBRIS	<ul style="list-style-type: none"> • Maintain 8'-10' spacing when working & walking. • Don't work above any personnel. • Evaluate necessity to send personnel in areas with limited access.
ALL	LINE CONSTRUCTION	<ul style="list-style-type: none"> • Follow the line construction protocols and safety precautions for direct and indirect line construction. • Watch footing and spacing between firefighters, especially those working below • Ensure adequate Safety Zones are available, IRPG pg 8. • Make sure LCES is in place. • Follow the "Downhill Line Construction Checklist" on IRPG page 9.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> • Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment. • Use a spotter when backing.
ALL	HEAT RELATED ILLNESS	<ul style="list-style-type: none"> • Drink 2 to 1 water to sports drinks. • Take frequent breaks, minimum of 10 minutes every hour. • Recognize symptoms of HEAT RELATED ILLNESS which include lack of energy, Headaches, dizziness, lack of rest, no hunger, poor eating habits, hot skin, and lack of sweating
ALL	AIR OPERATIONS	<ul style="list-style-type: none"> • Follow "Aviation Watch-Out Situations" on page 44, IRPG. • Don't plan on air resources for medical transport or resupply. • Refer to page 57, IRPG for directing bucket drops. • Ensure positive communication with all air resources.
ALL	STRUCTURE PROTECTION	<ul style="list-style-type: none"> • Review Structure Protection; IRPG pages 12-16. • Do not commit to stay on a structure unless the area around the structure represents an adequate safety zone. • Set trigger points to disengage and allow adequate time to relocate to primary and secondary safety zones. • Look for propane tanks and other hazardous materials.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> • Keep alert for wildlife, cattle, rattlesnakes, insects, and plants. Watch • Footing and hand placement around rocks. • Personal hygiene is #1 when it comes to Poison Oak Prevention.
ALL	MARIJUANA PLANTATIONS	<ul style="list-style-type: none"> • Maintain situational awareness. • Watch for open areas and sign of improvements or irrigation systems. • Be aware of evidence that cultivation has occurred in the area. • If you stumble upon an area with probable cultivation be extremely cautious exit on the same route you arrived and notify your supervisor immediately.

8. MEDICAL EMERGENCY PROCEDURES

LINE MEDICAL EMERGENCY:

- Crew Supervisor contact Division Supervisor/Operations with patient complaint, condition and location.
 Division Supervisor/Operations contacts Communication:
- Division Supervisor/Operations to use "injury or incident communication protocol" on next page
 - Division Supervisor/Operations will run medical emergency on command channel
 - Communications will contact the Medical Unit Leader on Command channel.
 - Medical Unit Leader will:
 1. Have communications dispatch ground/air transport resources
 2. Notify receiving hospital of injury status.
 3. Develop primary and contingency transport plan
 4. Notify Incident Commander, Safety, Logistics and Operations

CAMP MEDICAL EMERGENCY:

- Contact Communications with patient complaint/condition and location, via LOGs Net
- Medical Unit contacts:
 - Safety
 - Logistics
 - Operations
 - Medical Unit Leader will:
 1. Contact Communications to dispatch ground/air transport resources
 2. Notify receiving hospital of injury status
 3. Develop primary and contingency transport plan

206 ICS	9. PREPARED BY: (Medical Unit Leader) Eric Williams (MEDL) John VanMannekes (MEDL)	10. REVIEWED BY: (Safety Officer) John Kraushaar (SOF1) Sam Wilbanks (SOF1)
		

Injury or Incident Communications Protocol

DECLARE: Medical Emergency or Non-emergency Medical transport

Best transport method: (circle) Ambulance Helicopter Vehicle

Location: (Div. & Lat / Long) _____

GPS Format: WGS84 Degrees, Decimal, Minutes

Situation _____

Any special equipment required _____

Number of injured _____ Type of injuries _____

Closest pick up point (DP, Helispot) _____

Level of consciousness _____ Resp. _____ Pulse _____ BP _____ Weight _____
 (alert & oriented x 1-4)

Injury _____ Agency (No Names) _____

Medical History/Allergies _____

Air Transportation Triage

	Ground or Air Ambulance to Hosp.	Transport to Med Unit
Mechanism	Hit by a falling tree or large branch Fall of 10' or more Insect bite with shortness of breath Signs of heat stroke (hot, dry, disoriented) Burn Injury greater than 1% body area	Minor dehydration Cut or laceration with bleeding controlled Minor bites and Stings Minor burns
Area Injured	Significant Blunt or Penetrating Trauma to Head, Neck, Chest, Abdomen or pelvis Any Arm or Leg fracture above the Joint	Minor blunt trauma Minor penetrating trauma Extremity sprains and strains Simple fracture below elbow or knee
Symptoms	Disoriented Chest Pain or Shortness of Breath Weak or absent radial pulse Pale, cold and sweating	Alert and oriented No shortness of breath Good pulses

If air or ground ambulance is DELAYED:

Package and transport patient to rendezvous with ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

If Declaring an "Incident within the Incident"

The closest DIVS will respond to manage the incident. They are responsible for giving an accurate size up, ensuring scene safety, setting priorities and initiating an appropriate response.

The closest Safety Officer and Line EMS will respond to the scene to assist the Branch Director or DIVS. Secure site and begin initial investigation when situation is stabilized.

STANDARD OPERATING PROCEDURES—FINANCE SECTION

“How to Earn an Honest Day’s Pay for an Honest Day’s Work”

16 HOURS IS NOT A GUARANTEE – IT IS HOURS WORKED!!

WORK REST CYCLE

IT IS NATIONAL DIRECTION TO MEET A 2 TO 1 WORK/REST RATIO (1 hour of sleep/rest for every 2 hours of work). Every effort shall be made to manage work hours so you don’t exceed the maximum of 16 hrs. Work hours exceeding 16 hrs shall be approved by your supervisor in advance, and a justification/mitigation form completed for review by Section Chief & approved by IC. It is each person’s responsibility to comply with this direction to manage for fatigue and safety.

OPERATIONAL SHIFTS

Pay status for assigned overhead and crews on the fireline will not start prior to the posted briefing time and will terminate on arrival back in camp (except for debriefing—additional hours may be accrued by those required to attend debriefing). Supervisors will be allowed ½ hour prior to briefing and after return to camp to ready crew and equipment.

DUTY STATUS

Division/Group supervisors and Unit Leaders are responsible for establishing on and off duty status. The objective is a 2 to 1 work/rest ratio. Personnel will normally work, travel, and/or be placed on ORDERED standby 8 to 16 hours per day and be off duty 8 hours or more (breaks count towards 8 hrs). Off duty time will be in a non-pay status. Each federal employee is guaranteed **at least 8 hours** of pay status each 24-hour period (midnight to midnight) unless it is the first or last day of an assignment or stated otherwise in a contract or agreement.

PERSONNEL/EQUIPMENT TIME REPORTING

Personnel time will be reported to the Time Unit and daily once they are signed by the next level supervisor. Local Government Resources that are actual hours are required to submit a Crew Time Report daily. OES resources will be monitored by OES Agency Rep (if assigned) for 2/1 Work Rest compliance. Situations entitling you to HAZARD PAY are to be noted in remarks (i.e HP=Uncontrolled Fireline, hovering hookups, low level flights, etc.)

Private Contracted Equipment time must be tracked on a Shift Ticket daily and hours on shift noted even if it is a daily rate. When swapping out operators you need to notify Finance as well as changing from single to double shift and vice versa.

Supervisor’s - If you are responsible for daily tracking of equipment or personnel, please ensure you understand the agreement, and follow the rules provided in this document. Do not sign documents for resources you did not manage unless you have knowledge of their assignment hours.

MEAL AND OTHER WORK BREAKS

Compensable meal periods are the exception, not the rule (5 CFR 551.411 © and 29 CFR 785.19(a)). **Until the fire is controlled**, personnel on the fireline MAY BE compensated for meal periods if all of the following conditions are met: 1) The fire is not controlled and 2) The Operations Section Chief makes a decision that it is critical to the effort of controlling the fire that personnel remain at their post of duty and continue to work as they eat, and 3) The compensable meal break is approved by the supervisor at the next level and documented on CTR. For personnel in support positions, and fireline personnel **after control** of a fire, a meal period of at least 30 minutes must be ordered and taken for each work shift of eight hours or more. In those situations where personnel cannot be relieved from work and must remain at a post of duty, a meal period may be counted as time worked, which will be compensable. **If breaks are NOT able to be taken, CTR should have a statement in remarks explaining the situation. Kitchen closes @2200 so show dinner break unless you went off clock by 2130.**

Incident Trainee/Trainer Data Form

Training Specialist: Greg White 951-317-0698

- All Incident trainees, including those on Firefighting Modules at your earliest opportunity complete this form and see the Training Specialist.
- If you are at the High School Base Camp, you may drop off this form off at the trainee drop box at Check-in.
- Prior to or as you process through DEMOB, remember to close your training package. To close your training package bring: 1) A performance rating from your trainer. (ICS 225)
2) Your task book that has as many entries as possible by your Trainer.

Trainee Data

Trainee Name: _____ ICS Trainee Position: _____

Request # (A,C,E, or O): _____ Agency Designator (MACS ID Ex. CA-ANF): _____

Ordered as Trainee? Y N _____ R5 or R8 Priority Trainee _____ FS-FPM Trainee _____ IFPM Trainee

Date Assigned: _____ Cell / Contact # While on Incident: _____

Training Records Mailed To: (Fire Chief, Training Officer):

Name: _____ Title _____

Name of Agency/Unit: _____

Agency/Unit Address: _____

City: _____ State: _____ Zip Code: _____ Phone: _____

Trainee Prerequisites

1. Possesses valid Red Card or agency certification card? _____Yes _____No

2. Trainee has current position task book issued by home unit? _____Yes _____No

Current Task Book Progress (Circle) 0% 25% 50% 75% 90%

Priority Open Task in PTB (What do you need to accomplish on this incident?)

Trainer/Evaluator Data

Trainer / Evaluator Name: _____ ICS position on fire: _____

Home Unit: _____ Agency Designator (MACS ID Ex. CA-ANF): _____

Work Address: _____

City: _____ State: _____ Zip Code: _____

Cell / Contact While on Incident: _____

MESSAGE FROM YOUR HUMAN RESOURCE SPECIALIST

The overall message of all Human Resource Specialists, generally centers around a policy of Human Respect, Dignity and treating each others as you would like to be treated.

I found a few words of wisdom that I believe encompasses those qualities.

Leadership:

Fireline leadership is the process of influencing fire fighters to accomplish their mission by providing them with purpose, direction and motivation.

Purpose – You must establish priorities, explain the importance of the mission, and focus the fire fighters to the task so they will function safely and effectively.

Direction – Gives fire fighters an orientation to the tasks to be accomplished based on priorities set by the Leader.

Motivation – Gives the fire fighters the drive and desire to do everything they are capable of doing to accomplish a mission.

Principles of the Fire Line Leader:

1. Know yourself and seek improvement.
2. Be technically responsible and take responsibility.
3. Make sound and timely decisions.
4. Set a good example.
5. Know your fire fighters and take care of them.
6. Develop a sense of responsibility in your subordinates.
7. Ensure the task is understood, supervised and accomplished.
8. Use your fire fighters in accordance with their level of training and experience.
9. Build your team.
10. Seek responsibility and take responsibility for your actions.
11. Keep your fire fighters informed.

What are READ's

You have seen us around right, here and there and think what is a READ? Never heard of it son...so what is it? First of all it is not a REED as in plant and it is not a "good READ" as a good book to read. READ stands for Resource Advisor who works for the District Ranger or the Forest Supervisor. They are assigned to the fire and work with Incident Command team to minimize the effect of fire suppression on critical natural resources.

READ's look at the suppression efforts impact on wildlife, fish, sensitive plants, cultural sites, special interest areas, research natural areas, late successional reserves, wilderness, roadless areas, soils, and hydrology. We work with suppression to minimize the impacts on forest resources while allowing the incident management team to suppress the fire.

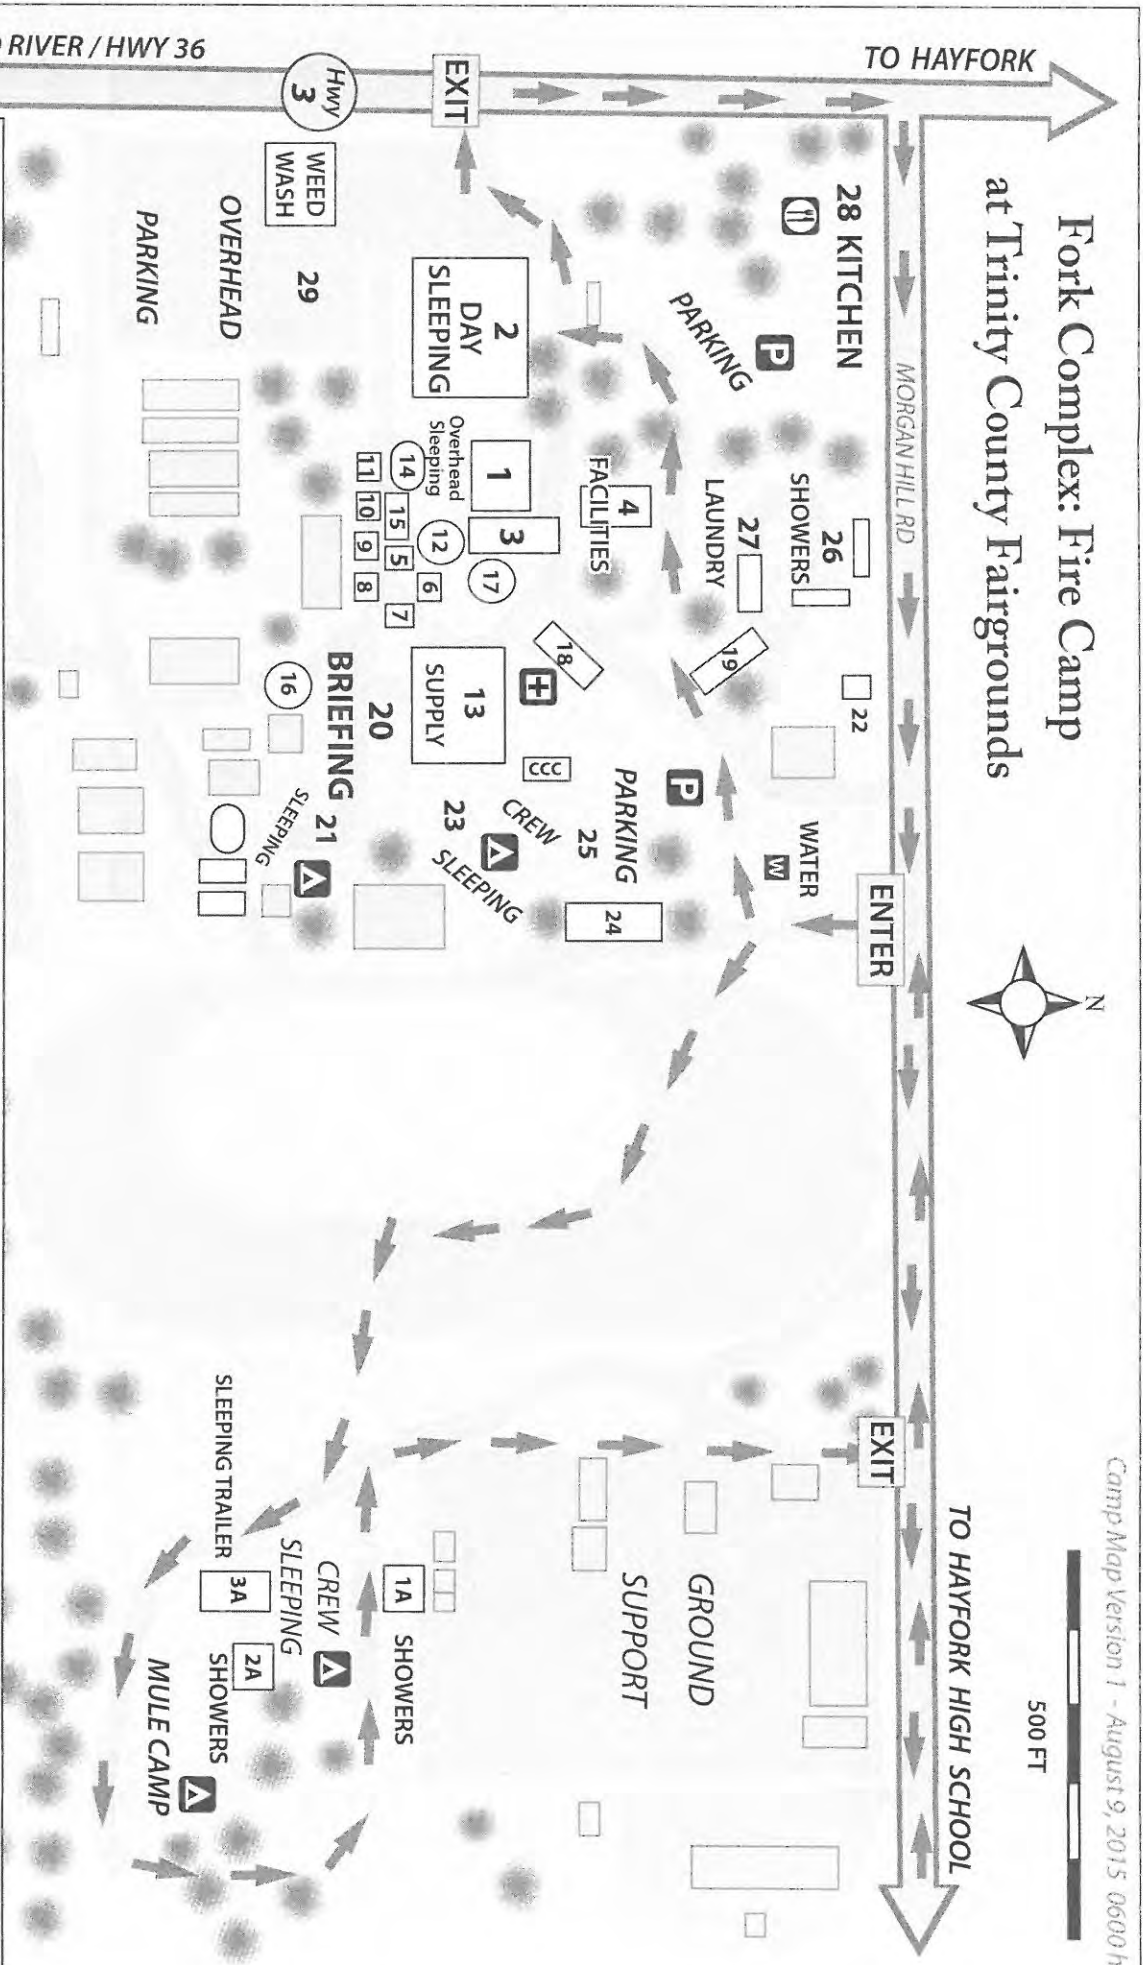

For example: Natural Bridge Special Interest Area and its special significance to the tribes, remember the IAP two days ago where we had a special write-up on it. Well we notified the incident management team and planning and operations worked with us to exclude heavy equipment and retardant that could impact the area. The Wintu tribe wanted the fire to naturally burn through the area without any interference from suppression. As it turned out the fire gently backed down into the Natural Bridge SIA and only burned litter, small down logs, and saplings and brush, exactly as the tribe wanted. The fire cleared out underbrush and thinned the overstory and thus fulfilled the tribes wishes of no suppression disturbance.
