

INCIDENT ACTION PLAN

FORK COMPLEX FIRE

CA – SHF 002067

CA - SHU 007337

P5J0HS 0514

DAY SHIFT

Monday, August 10, 2015

0600 – 1800 Hours

INCIDENT OBJECTIVES	1. Incident Name Fork Complex	2. Date 8/9/2015	3. Time 2057									
4. Operational Period 8/10/2015 0600 – 1800 DAY OPERATION												
5. General Control Objectives for the Incident (include alternatives) OBJECTIVES <ul style="list-style-type: none"> • Provide for the safety of all responders and the public by utilizing national Risk Management Standards. • Provide initial attack response for new starts within the delegated area. • Reduce firefighter exposure by only engaging fires with the highest probability of success. • Engage cooperators and stakeholders to jointly provide for the defense of communities and infrastructure. • Utilize local resource specialists to identify and protect sensitive sites when possible. • Maintain and enhance community and stakeholder relationships through accurate and timely dissemination of Information updates. • Manage costs commensurate with values at risk. 												
6. Weather Forecast for Period See attached forecast												
7. General Safety Message <ul style="list-style-type: none"> • Reduce firefighter exposure by only engaging fires with the highest probability of success. • The long term drought in California has produced the potential for extreme fire behavior. The need for maintaining the most current situational awareness is paramount. Expect the unexpected fire behavior! <p style="text-align: center;">See attached safety message</p>

Fork Complex Fire Weather Forecast

FORECAST NO: 15
PREDICTION FOR: Monday Day Shift
SHIFT DATE: Aug 10, 2015
TIME AND DATE
FORECAST ISSUED: Aug 9, 2015 @ 2000 PDT

NAME OF FIRE: Fork Complex
UNIT: Shasta-Trinity National Forest
SIGNED: Alex Hoon
Incident Meteorologist

WEATHER DISCUSSION: ...LOCAL RED FLAG WARNING FOR GUSTY WINDS AND LOW RH...
Low pressure off the CA coast continues to deepen with increasing south flow today. South to Southwest winds will increase after 1300 on the ridges and in N-S aligned drainages, such as the Hayfork and Salt Creek drainages. Clearing will also occur around mid-day. Very unstable conditions will create a lot of lift in the atmosphere today, with even a slight chance of thunderstorms in the afternoon.

Forecast for Monday: ...INCREASING SOUTH WINDS AND VERY UNSTABLE... HAINES 6...

Weather: Mostly sunny with a few buildups in the afternoon. Smokey with some clearing. Slight chance of thunderstorms late in the afternoon. (10% chance)
High Temperature... 74-84°F (little change)
Min RH..... 18-28% (little change)
20-FOOT WINDS: ...GUSTY OUTFLOWS POSSIBLE IF STORMS DEVELOP...
Ridgetop..... South 4-8 mph in the morning, becoming South to Southwest 8-13 mph
With gusts to 20 mph after 1300.
Slope/Valley..... Upslope/upcanyon 4-8 mph. Gusts up to 20 mph in N-S aligned drainages.

Forecast for Monday Night: ...FIRE WEATHER WATCH TONIGHT...

Weather: Partly cloudy. Smokey.
Low Temperature... 60° above 3500 feet.....50° valley bottom
Max RH..... 40% above 3500 feet.....80% valley bottom
20-FOOT WINDS:
Ridgetop..... Southeast 10-15 mph. Gusts to 20 mph.
Slope/Valley..... Downslope/Downcanyon 2-4 mph.

Outlook for Tuesday: ...FIRE WEATHER WATCH FOR TUESDAY...

Weather: Mostly sunny with a few clouds in the afternoon. Smokey with some clearing.
High Temperature... 70-80°F
Min RH..... 20-27%
20-FOOT WINDS:
Ridgetop..... Southeast 7-12 mph in the morning, becoming South to Southeast 10-15 mph.
Gusts to 25 mph after 1300.
Slope/Valley..... Upslope/upcanyon 4-8 mph. Gusts up to 25 mph in N-S aligned drainages.

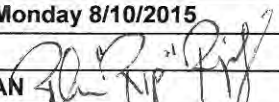

Outlook for Tuesday Night: ...INCREASING RIDGE WINDS...MORE STABLE RIDGES...

Weather: Partly cloudy. Smokey.
Low Temperature... 60° above 3500 feet.....50° valley bottom
Max RH..... 45% above 3500 feet.....80% valley bottom
20-FOOT WINDS:
Ridgetop..... South to Southeast 8-12 mph. Gusts to 20 mph.
Slope/Valley..... Downslope/Downcanyon 2-4 mph.

EXTENDED OUTLOOK for Wednesday through Friday:

Low pressure remains along the Northern California coast keeping breezy conditions from the south-southeast Wednesday and Thursday. Temperatures will drop a bit below average for this time of year with the coolest day on Thursday. Also, there will be increased moisture with a slight chance for showers.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 015	TYPE OF FIRE: Wildland
FIRE NAME: Fork Complex	OPERATIONAL PERIOD: Day Shift Monday 8/10/2015
DATE ISSUED: 08/09/2015	TIME ISSUED: 2230
UNIT: CA-SHF-002067	SIGNED: Brendan "Rip" Ripley, FBAN 

INPUTS

WEATHER SUMMARY: *****RED FLAG WARNING ISSUED FOR GUSTY WINDS AND HAINES 6*****
***** SLIGHT CHANCE OF THUNDERSTORMS IN THE AFTERNOON*****

Weather is the driving force behind fire behavior. The weather conditions forecasted for today have the potential to create extreme fire behavior due to the chance of developing a plume dominated fire.

20' winds: **Ridgetop**.....South 4-8mph in the morning, becoming South-Southwest 8-13mph with Gusts to 20mph after 1300

Slope/Valley...Up-slope/Up-canyon 4-8mph with gusts up to 20mph in the North South Drainages

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Today will be another active fire day! Factors contributing to today's fire behavior include: Critically dry fuels from historic drought conditions, max temperatures in the mid-80s, min relative humidity in the teens, gusting winds (way over the local threshold of 3mph), unstable atmosphere (Haines 6), spotting distance up to 1/2 mile, complex terrain promoting roll out and varying wind directions and speeds.

LOCAL THRESHOLDS – WATCH OUT

Combinations of any of these factors can greatly increase fire behavior:

20' winds over 3 mph **RH** 21% or less **Temp** over 73° **ERC** above 62 **10HR** 5 or less

Forecasted: **20' winds**, Valley 4-8 mph **RH** 18-28%, **Temp** 74-84° **ERC** 54 **10HR** 4-6
Ridges 8-13 mph

Probability of Ignition: Unshaded 60-90% Shaded 40-60%

SPECIFIC: Winds out of the south are new to the fire and align with the Salt Creek, Hayfork and Barker Creek drainages. Evaluate the affects that terrain has on winds out of the south, especially at the ridges.

Branch I: Yesterday the smoke from the fires to the south provided enough shading from smoke to moderate fire activity. Forecasted winds out of the south should create the same conditions today. Winds may test the slop over in the Barker Creek drainage. Due to the higher elevation, Div-S should also anticipate strong afternoon winds out of the south.

Branch II, III, IV: Blue Fire: Winds will test the upper ridges of the fire along Div-A and Div-C. **Peak Fire:** Winds may push up into the Salt Creek drainage and the canyon north of the Philpot campground creating gusty erratic winds.

Rail Fire: The east side of the fire in the Hayfork drainage will most likely be impacted by these winds. **Shiell Fire:** The west side of the fire in the Hayfork Drainage will most likely be affected. Fire in Div-N was the most active yesterday demonstrating the potential affects that a Haines 6 atmosphere can produce. A large developed column was visible throughout the day.

AIR OPERATIONS:

Winds out of the south should provide opportunity for air craft to operate on the southern portions of the fire early. Smokey conditions will most likely limit the use of aircraft in Branch I.

SAFETY

The forecasted weather conditions have the potential to create active – extreme fire behavior. It is imperative that you carry out the Fire Behavior Fire Orders (1-3) in addition to the remaining 7 and watch out 18s too:

1. **Keep informed on fire weather conditions and forecasts.** Know today's forecast. Take note of the estimated times change is scheduled to occur (wind velocity direction and elevation changes could occur). Take your own weather and calculate Probability of Ignition throughout the day.
2. **Know what your fire is doing.** Keep track of the rates of spread. Watch for roll out and spotting. Establish trigger points.
3. **Base all actions on current and expected fire behavior.** Evaluate the current conditions of the fire in your area and other areas of the fire. Monitor radio traffic, it tells a story of current conditions.

With the slight chance of thunderstorms in the afternoon review the Thunderstorm Safety protocol listed on page 21 in your IRPG.

AIR OPERATIONS SUMMARY

PREPARED BY: Kerry Koskela

Kerry Koskela

PREPARED DATE/TIME: 08/09/15 2030

1. INCIDENT NAME: Fork Complex

2. OPERATIONAL PERIOD DATE: 08/10/15

START TIME: 0600 END TIME: 1800 SUNRISE: 0618 SUNSET: 2017

NOTE: AIRCRAFT CAN BE SHARED BETWEEN COMPLEXES

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc)

No aircraft to launch without aerial supervision and adequate communications.

Watch for wires in river canyons and along Highway 36

Beware of rapidly changing VFR conditions due to smoke.

Use approved dip sites and record amount of water pulled and location.

Avoid overflight of area below the levee on East Fork Dip.

No retardant in the Natural Bridge area.

Land line phone to Ops / Air Ops: 530-628-4270

4. MEDEVAC A/C: Guard 825

Fork Complex – Safety Message

INCIDENT #CA-SHF-002067

DATE: 08/10/15 TIME: 0600-1800 Day Shift

Hazard Trees

Situational Awareness: Survey your work area for hazard trees (green or black) early in the shift. The longer an area has been burned, increases probability for undermined trees.

Flag, Avoid and Notify: Flag any identified hazard trees and notify your supervisor and any potentially impacted fire personnel.

Post Lookouts to help secure high risk areas.

Be alert for changing conditions: Wind increases the hazard. Be aware of winds that are predicted. Avoid working under burned trees if winds increase appreciably.

Make a plan: Make your plan to reposition to a more secure area if wind conditions dictate **PRIOR** to the need arising. Don't wait until the last minute to execute the plan.

Indirect Line Construction

- Keep good Situational Awareness while engaged in indirect line construction.
- Post lookouts and make sure to stay in contact with someone who can see the main fire.
- Ensure all personnel are familiar with the plan.
- Make sure all personal know their escape routes and safety zones.
- Remember there is **"Unburned fuel between you and the fire."**

Driving

- When driving, keep speed at or **below** the posted speed limit.
- Don't use high beams in the smoke.
- **Stay as far to the right of the road as is safely possible.**
- Drive defensively! Expect the unexpected around every curve.
- Watch for and anticipate civilian traffic.
- Watch out for debris and wildlife on the roads.
- Don't tail gate.
- Always fasten your seat belt before the vehicle is set into motion.
- Use a "Backer" when backing your vehicle.
- **Slow down, slow down, and slow down!**

Weather and Fire Behavior

- Be aware of changing weather conditions.
- Watchout for increasing winds and instability (Haines 6.)
- Anticipate increased fire behavior conditions.
- Communicate any observed changes in weather and fire behavior.
- **"Base all actions on current and expected behavior of the fire."**

Prepared by:

the Team 4 Safety Group.

INCIDENT RISK ANALYSIS FORK COMPLEX CA-SHF-002067 (ICS 215a) Day Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> • Conduct thorough assessments before starting work. • Ensure LCES is in place. • Provide additional briefing emphasis on drought related fire behavior. • Increase the level of SA. • Provide additional briefing for new resources and maintain communications.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness (hazards, changes, etc.) with those who also have a need. • Radio Communications may be poor in some areas. Use human repeaters as needed. • Ensure all personnel are familiar with the incident and IA communications plans.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p.22). • Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. • Be especially alert around snags during wind events. Large green trees can also be dangerous.
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Practice "Defensive Driving" techniques. Traffic volume is increasing. • Use spotters when backing. • Always use headlights. • Use warning lights when working on roads or traveling in smoke. • Observe posted speed limits. • Use chock blocks, turn wheels into hill. • Many roads are narrow and mid slope, use caution. • Be alert for cattle and wildlife.
ALL	STEEP TERRAIN AND ROLLING DEBRIS	<ul style="list-style-type: none"> • Maintain 8'-10' spacing when working & walking. • Don't work above any personnel. • Evaluate necessity to send personnel in areas with limited access.
ALL except A,C,J,T, and Y	LINE CONSTRUCTION	<ul style="list-style-type: none"> • Follow the line construction protocols and safety precautions for direct and indirect line construction. • Watch footing and spacing between firefighters, especially those working below you. • Ensure adequate Safety Zones are available, IRPG pg 8. • Make sure LCES is in place.
ALL except: A,C,J,T, and Y	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> • Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment. • Use a spotter when backing.
ALL	HEAT RELATED ILLNESS	<ul style="list-style-type: none"> • Drink 2 to 1 water to sports drinks. • Take frequent breaks, minimum of 10 minutes every hour. • Recognize symptoms of HEAT RELATED ILLNESS which include lack of energy, headaches, dizziness, lack of rest, no hunger, poor eating habits, hot skin, and lack of sweating.
ALL	AIR OPERATIONS	<ul style="list-style-type: none"> • Follow "Aviation Watch-Out Situations" on page 44, IRPG. • Don't plan on air resources for medical transport or resupply. • Refer to page 57, IRPG for directing bucket drops. • Ensure positive communication with all air resources.
ALL	STRUCTURE PROTECTION	<ul style="list-style-type: none"> • Review Structure Protection; IRPG pages 12-16. • Set trigger points to disengage and allow adequate time to relocate to primary and secondary safety zones. • Look for propane tanks and other hazardous materials. • Avoid power lines and underground gas lines. • Be alert for and avoid guard dogs. • Avoid hostile confrontations with land owners.
ALL	POISONOUS SNAKES AND BEES	<ul style="list-style-type: none"> • Be alert for rattlesnakes. Walk slowly, watch footing and hand placement around rocks. • Determine if any personnel under your control are allergic to bee stings. • Flag and avoid areas around known bee's nests. • Utilize line paramedics at the earliest appearance of allergic reaction.

Injury or Incident Communications Protocol

DECLARE: Medical Emergency or Non-emergency Medical transport

Best transport method: (circle) Ambulance Helicopter Vehicle

Location: (Div. & Lat / Long) _____

GPS Format: WGS84 Degrees, Decimal, Minutes

Situation _____

Any special equipment required _____

Number of injured _____ Type of injuries _____

Closest pick up point (DP, Helispot) _____

Level of consciousness _____ Resp. _____ Pulse _____ BP _____ Weight _____
 (alert & oriented x 1-4)

Injury _____ Agency (No Names) _____

Medical History/Allergies _____

Air Transportation Triage

	Ground or Air Ambulance to Hosp.	Transport to Med Unit
Mechanism	Hit by a falling tree or large branch Fall of 10' or more Insect bite with shortness of breath Signs of heat stroke (hot, dry, disoriented) Burn Injury greater than 1% body area	Minor dehydration Cut or laceration with bleeding controlled Minor bites and Stings Minor burns
Area Injured	Significant Blunt or Penetrating Trauma to Head, Neck, Chest, Abdomen or pelvis Any Arm or Leg fracture above the Joint	Minor blunt trauma Minor penetrating trauma Extremity sprains and strains Simple fracture below elbow or knee
Symptoms	Disoriented Chest Pain <u>or</u> Shortness of Breath Weak or absent radial pulse Pale, cold and sweating	Alert and oriented No shortness of breath Good pulses

If air or ground ambulance is DELAYED:

Package and transport patient to rendezvous with ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

If Declaring an "Incident within the Incident"

The closest DIVS will respond to manage the incident. They are responsible for giving an accurate size up, ensuring scene safety, setting priorities and initiating an appropriate response.

The closest Safety Officer and Line EMS will respond to the scene to assist the Branch Director or DIVS. Secure site and begin initial investigation when situation is stabilized.

STANDARD OPERATING PROCEDURES—FINANCE SECTION
“How to Earn an Honest Day’s Pay for an Honest Day’s Work”
16 HOURS IS NOT A GUARANTEE – IT IS HOURS WORKED!!

WORK REST CYCLE

IT IS NATIONAL DIRECTION TO MEET A 2 TO 1 WORK/REST RATIO (1 hour of sleep/rest for every 2 hours of work). Every effort shall be made to manage work hours so you don’t exceed the maximum of 16 hrs. Work hours exceeding 16 hrs shall be approved by your supervisor in advance, and a justification/mitigation form completed for review by Section Chief & approved by IC. It is each person’s responsibility to comply with this direction to manage for fatigue and safety.

OPERATIONAL SHIFTS

Pay status for assigned overhead and crews on the fireline will not start prior to the posted briefing time and will terminate on arrival back in camp (except for debriefing—additional hours may be accrued by those required to attend debriefing). Supervisors will be allowed ½ hour prior to briefing and after return to camp to ready crew and equipment.

DUTY STATUS

Division/Group supervisors and Unit Leaders are responsible for establishing on and off duty status. The objective is a 2 to 1 work/rest ratio. Personnel will normally work, travel, and/or be placed on ORDERED standby 8 to 16 hours per day and be off duty 8 hours or more (breaks count towards 8 hrs). Off duty time will be in a non-pay status. Each federal employee is guaranteed **at least 8 hours** of pay status each 24-hour period (midnight to midnight) unless it is the first or last day of an assignment or stated otherwise in a contract or agreement.

PERSONNEL/EQUIPMENT TIME REPORTING

Personnel time will be reported to the Time Unit and daily once they are signed by the next level supervisor. Local Government Resources that are actual hours are required to submit a Crew Time Report daily. OES resources will be monitored by OES Agency Rep (if assigned) for 2/1 Work Rest compliance. Situations entitling you to HAZARD PAY are to be noted in remarks (i.e HP=Uncontrolled Fireline, hovering hookups, low level flights, etc.)

Private Contracted Equipment time must be tracked on a Shift Ticket daily and hours on shift noted even if it is a daily rate. When swapping out operators you need to notify Finance as well as changing from single to double shift and vice versa.

Supervisor’s - If you are responsible for daily tracking of equipment or personnel, please ensure you understand the agreement, and follow the rules provided in this document. Do not sign documents for resources you did not manage unless you have knowledge of their assignment hours.

MEAL AND OTHER WORK BREAKS

Compensable meal periods are the exception, not the rule (5 CFR 551.411 © and 29 CFR 785.19(a)). **Until the fire is controlled**, personnel on the fireline **MAY BE** compensated for meal periods if all of the following conditions are met: 1) The fire is not controlled and 2) The Operations Section Chief makes a decision that it is critical to the effort of controlling the fire that personnel remain at their post of duty and continue to work as they eat, and 3) The compensable meal break is approved by the supervisor at the next level and documented on CTR. For personnel in support positions, and fireline personnel **after control** of a fire, a meal period of at least 30 minutes must be ordered and taken for each work shift of eight hours or more. In those situations where personnel cannot be relieved from work and must remain at a post of duty, a meal period may be counted as time worked, which will be compensable. **If breaks are NOT able to be taken, CTR should have a statement in remarks explaining the situation. Kitchen closes @2200 so show dinner break unless you went off clock by 2130.**

Incident Trainee/Trainer Data Form

Training Specialist: Greg White 951-317-0698

- All Incident trainees, including those on Firefighting Modules at your earliest opportunity complete this form and see the Training Specialist.
- If you are at the High School Base Camp, you may drop off this form off at the trainee drop box at Check-in.
- Prior to or as you process through DEMOB, remember to close your training package. To close your training package bring: 1) A performance rating from your trainer. (ICS 225)
2) Your task book that has as many entries as possible by your Trainer.

Trainee Data

Trainee Name: _____ ICS Trainee Position: _____

Request # (A,C,E, or O): _____ Agency Designator (MACS ID Ex. CA-ANF): _____

Ordered as Trainee? Y N _____ R5 or R8 Priority Trainee _____ FS-FPM Trainee _____ IFPM Trainee

Date Assigned: _____ Cell / Contact # While on Incident: _____

Training Records Mailed To: (Fire Chief, Training Officer):

Name: _____ Title _____

Name of Agency/Unit: _____

Agency/Unit Address: _____

City: _____ State: _____ Zip Code: _____ Phone: _____

Trainee Prerequisites

1. Possesses valid Red Card or agency certification card? _____ Yes _____ No

2. Trainee has current position task book issued by home unit? _____ Yes _____ No

Current Task Book Progress (Circle) 0% 25% 50% 75% 90%

Priority Open Task in PTB (What do you need to accomplish on this incident?)

Trainer/Evaluator Data

Trainer / Evaluator Name: _____ ICS position on fire: _____

Home Unit: _____ Agency Designator (MACS ID Ex. CA-ANF): _____

Work Address: _____

City: _____ State: _____ Zip Code: _____

Cell / Contact While on Incident: _____

Human Resource Specialist MESSAGE

ZERO TOLERANCE

This Incident Management Team supports the laws, regulations and regional policies regarding discrimination, harassment, hazing, and other inappropriate behavior, and will not tolerate misconduct of this kind in any form.

Everyone assigned to this Incident is entitled to a safe work assignment.

If you have questions please come by and visit.

Your Human Resource Specialist,
Daniel Gonzalez

Coho Salmon (*Oncorhynchus kisutch*)

- Size:** An adult coho may measure more than **2 feet in length** and can weigh **up to 35 pounds**. However, the average weight of adult coho is 8 pounds.
- Look:** Dark metallic blue or greenish backs with silver sides and a light belly and there are small black spots on the back and upper lobe of the tail while in the ocean.
- Diet:** Coho feed on plankton and insects in freshwater and switch to a diet of small fishes while in the ocean.
- Life:** Coho salmonids make their way downstream to the ocean. After several (1-8) years, adults migrate from a marine environment into the freshwater streams and rivers **of their birth**; they spawn only once and then they die.

Salmon live in the ocean but are born and spawn in freshwater rivers and streams. They're extremely sensitive to a variety of natural and manmade stressors, on land as well as in the ocean. Changes in ocean and climatic conditions, habitat loss from the construction of dams and urban development, and degraded water quality from agricultural and logging practices are just a few of the factors that have taken a toll on wild salmon populations, especially in the Pacific Northwest. With salmon, managing impacts to habitat is just as important as managing salmon harvests. The two are very closely related - the quality and quantity of salmon habitat impact the abundance of salmon, and the abundance of salmon determines how much salmon may be harvested by commercial, recreational, and subsistence fishermen. NOAA Fisheries and partners constantly monitor salmon abundance and manage harvests accordingly, and also work to restore and maintain healthy habitat to support these resources and fisheries.

Salmonid species on the west coast of the United States have experienced dramatic declines in populations during the past several decades as a result of various human-induced and natural factors. There is no single factor solely responsible for this decline, given the complexity of the salmon species life history and the ecosystem in which they reside.

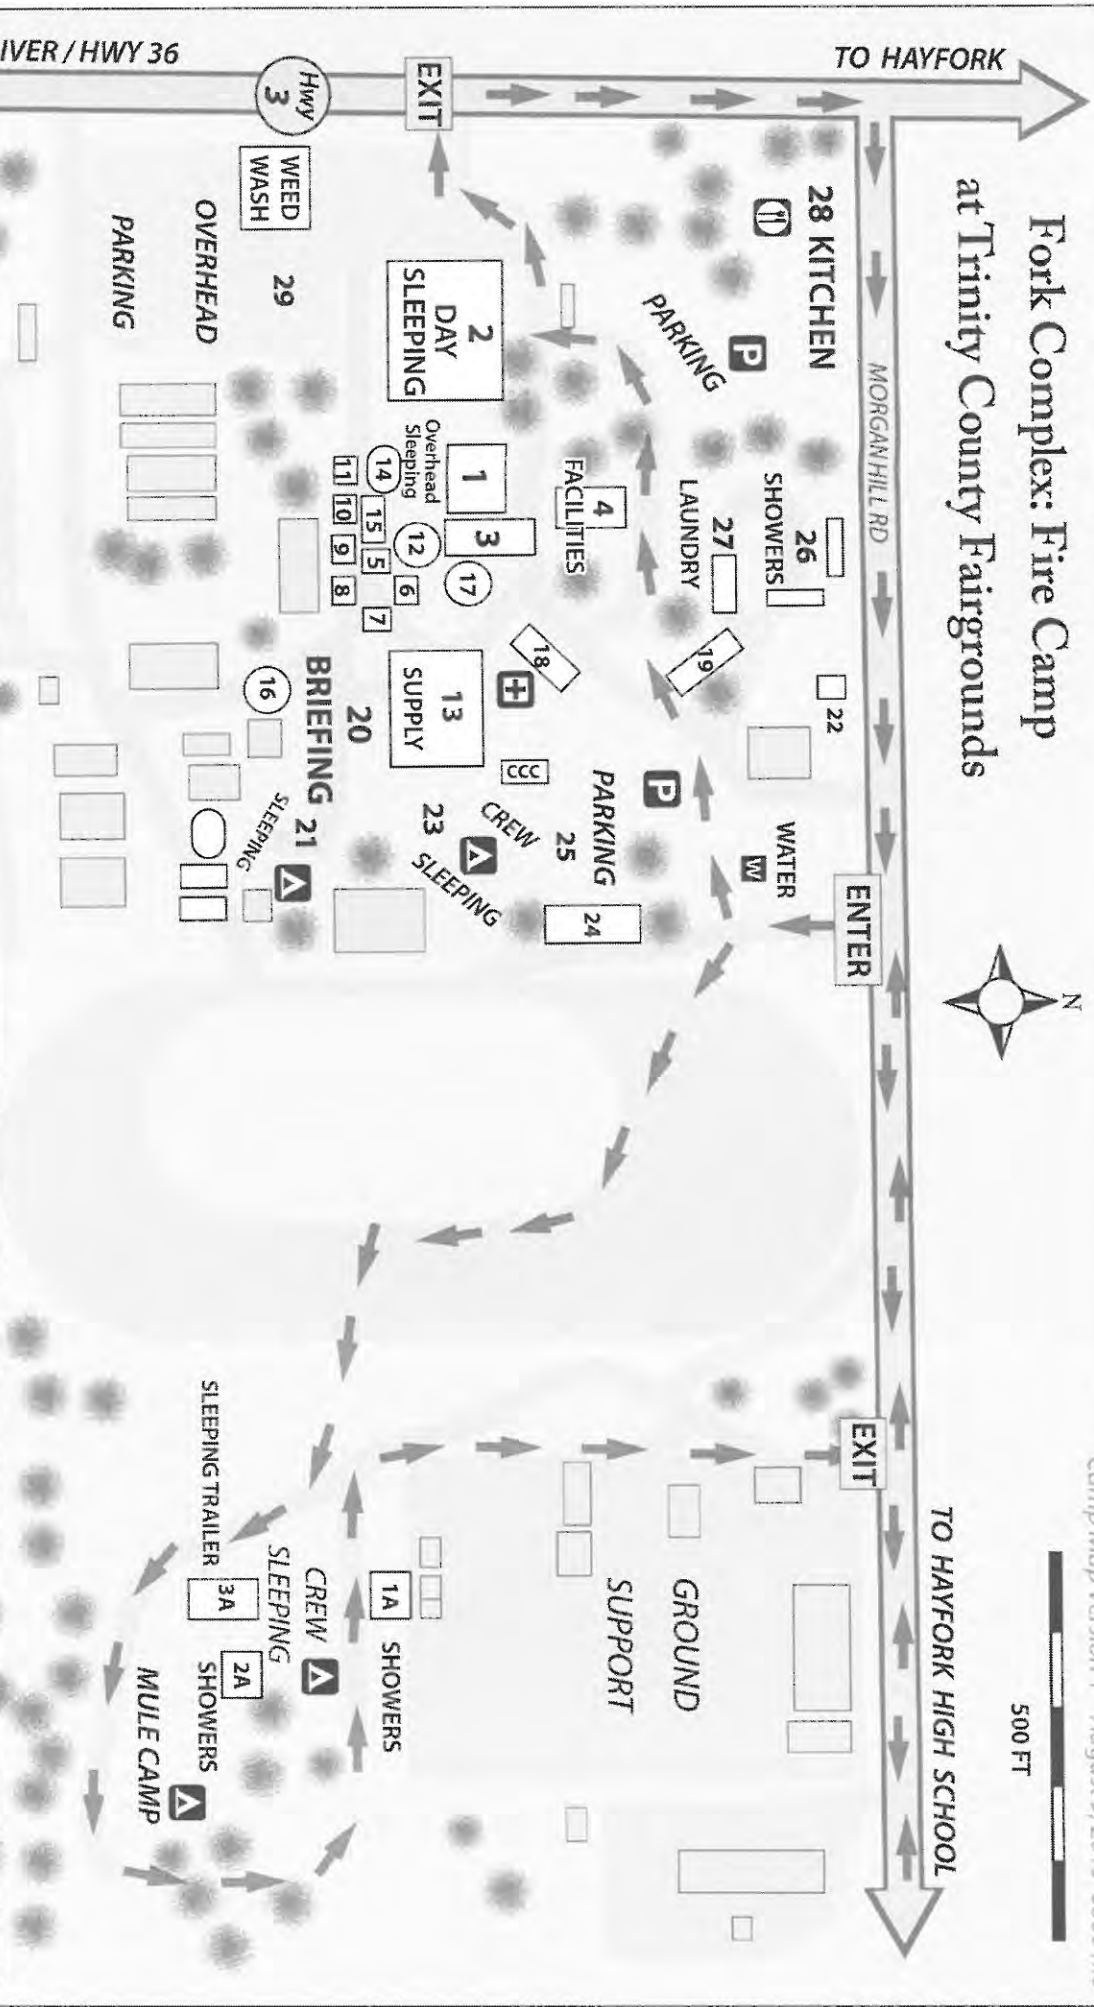

Our local Coho Salmon (Southern Oregon/Northern California Coast) was listed as **Threatened** in 1997. Many of the streams within the Forks Complex are designated Critical Habitat for Coho. Due to the drought, even streams that would normally have plentiful water yields are dried up, further limiting options for salmonid survival. **Please utilize water from fairground hydrants whenever possible.** When hydrant use is not feasible, ensure proper screening is in place when drafting.

A proper screen allows the operator to draw the required water volume demanded **without harming various hatchling salmonids**. If you are using a screen that with holes larger than 1/8" – talk to a READ about getting a fish screen immediately.

If your screen wouldn't hold pasta, it WILL harm fish.
