

INCIDENT ACTION PLAN

FORK COMPLEX FIRE

CA – SHF 002067

CA - SHU 007337

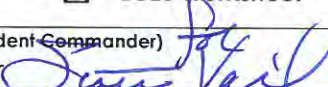

P5J0HS 0514

DAY SHIFT

Tuesday, August 11, 2015

0600 – 1800 Hours

INCIDENT OBJECTIVES	1. Incident Name Fork Complex	2. Date 8/10/2015	3. Time 2018
4. Operational Period 8/11/2015 0600 - 1800 DAY OPERATION			
5. General Control Objectives for the Incident (include alternatives) OBJECTIVES <ul style="list-style-type: none"> • Provide for the safety of all responders and the public by utilizing national Risk Management Standards. • Provide initial attack response for new starts within the delegated area. • Reduce firefighter exposure by only engaging fires with the highest probability of success. • Engage cooperators and stakeholders to jointly provide for the defense of communities, infrastructure and other economic interests. • Utilize local resource specialists to identify and protect sensitive sites when possible. • Maintain and enhance community and stakeholder relationships through accurate and timely dissemination of Information updates. • Manage costs commensurate with values at risk. 			
6. Weather Forecast for Period See attached forecast			
7. General Safety Message <ul style="list-style-type: none"> • Reduce firefighter exposure by only engaging fires with the highest probability of success. • The long term drought in California has produced the potential for extreme fire behavior. The need for maintaining the most current situational awareness is paramount. Expect the unexpected fire behavior! <p style="text-align: center;">See attached safety message</p>

Fork Complex Fire Weather Forecast

FORECAST NO: 17
PREDICTION FOR: Tuesday Day Shift
SHIFT DATE: Aug 11, 2015
TIME AND DATE
FORECAST ISSUED: Aug 10, 2015 @ 2000 PDT

NAME OF FIRE: Fork Complex
UNIT: Shasta-Trinity National Forest
SIGNED: Alex Hoon
Incident Meteorologist

WEATHER DISCUSSION: ...FIRE WEATHER WATCH IN EFFECT TODAY...

Low pressure off the CA coast continues to affect the region. Winds aloft are increasing today and may mix down into the canyons and aligned drainages if we get clearing from the smoke and clear skies. Abundant cloud cover in the morning may inhibit mixing like yesterday, but there is still potential for gusty and erratic canyon winds. Winds will be more southerly for Branch 3, and southeasterly for the rest of the complex.

Forecast for Tuesday: ...BREEZY AND UNSTABLE CONDITIONS POSSIBLE... HAINES 5...

Weather: Mostly cloudy. Slight chance afternoon thunderstorms (10% chance). Smokey w/some clearing.

High Temperature... 70-80°F

Min RH..... 20-28%

20-FOOT WINDS:

Ridgetop..... East to Southeast 5-10 mph in the morning, becoming South to Southeast 9-13 mph. Gusts to 20 mph after 1300.

Slope/Valley..... Upslope/upcanyon 4-8 mph. Gusts up to 20 mph in N-S aligned drainages.

Forecast for Tuesday Night: ...EAST-SOUTHEAST RIDGE WINDS...

Weather: Partly cloudy. Smokey.

Low Temperature... 60° above 3500 feet.....45° valley bottom

Max RH..... 55% above 3500 feet.....80% valley bottom

20-FOOT WINDS:

Ridgetop..... East-Southeast 8-12 mph.

Slope/Valley..... Downslope/Downcanyon 2-4 mph.

Outlook for Wednesday: ...LOCAL FIRE WEATHER WATCH FOR WEDNESDAY...

Weather: Mostly sunny with a few clouds in the afternoon. Smokey with some clearing.

High Temperature... 70-80°F

Min RH..... 20-28%

20-FOOT WINDS:

Ridgetop..... Southeast 5-10 mph in the morning, becoming South to Southeast 9-13 mph. Gusts to 20 mph after 1300.

Slope/Valley..... Upslope/upcanyon 4-8 mph. Gusts up to 20 mph in N-S aligned drainages.

Outlook for Wednesday Night: ...COLD FRONTAL PASSAGE...

Weather: Partly cloudy. Smokey.

Low Temperature... 55° above 3500 feet.....45° valley bottom

Max RH..... 55% above 3500 feet.....80% valley bottom

20-FOOT WINDS:

Ridgetop..... Becoming North 4-8 mph around 2000.

Slope/Valley..... Downslope/Downcanyon 2-4 mph.

EXTENDED OUTLOOK for Thursday through Saturday:

Low pressure remains along the Northern California coast with a cold front approaching. Breezy conditions with cooler temperatures and a slight chance for showers on Thursday. Winds will become westerly behind the front on Thursday. Ridge builds back in for the weekend with warming temperatures and light winds.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 017

TYPE OF FIRE: Wildland

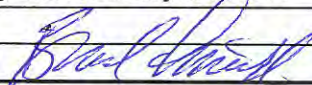

FIRE NAME: Fork Complex

OPERATIONAL PERIOD: Day Shift Tuesday 8/11/2015

DATE ISSUED: 08/11/2015

TIME ISSUED: 2130

UNIT: CA-SHF-002067

SIGNED: Brad Smith, FBAN 

INPUTS

WEATHER SUMMARY:

Fire Weather Watch for SE winds 9-13 Gusts to 20 mph after 1300 and a Haines 5

Wind and instability will be dependent on clear to mostly clear sky conditions. Mostly cloudy skies in the morning could inhibit development of SE winds and instability. Wind direction in Branch III will be more S than the SE experienced by the other branches.

(See attached weather forecast)

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Fire behavior increases significantly when clear conditions and instability (Haines index of 5 or 6) are present. Instability is the vertical movement of air. As air rises it pulls in air laterally from the surface to replace it. This chimney effect ventilates the fire and produces increased fire intensities. Pyrocumulus development has been observed when sustained crown fire occurs in an unstable or high Haines (5 or 6) environment. Drought mortality has added a significant amount of heavy dead fuel loading to the timber fuels. These heavy dead fuels are increasing fire intensity and generating sustained crown fire when wind and slope align in a clear, unstable environment. Running crown fire and group torching in timber fuels have produced spotting out to 1/2 mile. The same alignment of wind and slope in a clear, unstable environment will also produce active running fire in the mixed brush fuels commonly found in the old burn scars.

Combinations of any of these factors can greatly increase fire behavior:

20' winds over 5 mph, **RH** less than 20%, **Temp** over 73°, **ERC** above 62, **10HR** less than 5

Forecast today **20' winds** SE 9-13 **RH** 20-28% **Temp** 70-80° **ERC** 53 **10HR** 4-6

Probability of Ignition: 60- 70% unshaded 40-50% shaded

SPECIFIC:

Branch IV: SE wind will align with up valley wind along Plummer lookout road in Division R. Any ignition outside containment line will align with slope, fuel and wind.

Branch II: SE winds and slope will align with the slopover across the Wildwood road in Division M. Expect active movement upslope in a mix of brush and timber fuel. Spread direction will be NW toward the indirect line connecting Division M and Division I.

Branch III South winds will test containment lines on the upper slope near the Division C/Division E break

AIR OPERATIONS:

There is a chance that there will be enough instability early and late to pull out some of the smoke

SAFETY

The fire environment is a complex collection of weather, fuel and topographic elements that combine to produce fire movement and fire intensity across the landscape. As firefighters we base our tactics and build our tactical plans on expected fire behavior given the forecast weather, fuel conditions and where the fire lays on the land. Changes in the fire environment that differ from those that the tactical plan was built on may require an adjustment in the plan and should at least require an evaluation to validate the current tactical plan.

AIR OPERATIONS SUMMARY

PREPARED BY: Ty Miller AOB(t)

PREPARED DATE/TIME: 08/10/15 2030 Hrs.

1. INCIDENT NAME: Fork Complex

2. OPERATIONAL PERIOD DATE: 08/11/15 **START TIME:** 0600 **END TIME:** 1800 **SUNRISE:** 0619 **SUNSET:** 2016

NOTE: AIRCRAFT CAN BE SHARED BETWEEN COMPLEXES

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc)
 No aircraft to launch without aerial supervision and adequate communications.
 Platina Helibase 40 21.80 X 122 54.704
 Watch for wires in river canyons and along Highway 36
 Beware of rapidly changing VFR conditions due to smoke.
 Use approved dip sites and record amount of water pulled and location.
 Avoid overflight of area below the levee on East Fork Dip.
 Land line phone to Ops / Air Ops: 530-628-4270

Fork Complex – Safety Message

INCIDENT #CA-SHF-002067

DATE: 08/11/15 TIME: 0600-1800 Day Shift

Risk Management

Identify Hazards (Situational Awareness): Gather information; Objectives, communications, who's in charge, previous fire behavior, weather forecast, and local factors.

Asses Hazards: Look up, look down, look around. As conditions change, what other safety hazards are likely to exist?

Develop Controls and Make Decisions: Develop control measures that reduce risk. Consider risk versus gain.

Implement Controls: Ensure controls are in place and being implemented by personnel. Ensure controls are integrated in the operational plan and understood at all levels.

Supervise and Evaluate: Are controls adequately mitigating the hazards. If not, reassess and consider additional or different controls to safely accomplish the mission.

Bears

- Do not approach any bears, especially sows with cubs.
- Pick up all trash on the line to avoid attracting bears into the areas where you are working. **Do not feed the bears!**
- Don't announce your presence if the bear has not seen you.
- You can't outrun a bear so don't even try.
- Retreat slowly, back up slowly and try to put more space between you and the bear.

Driving

- When driving, keep speed at or **below** the posted speed limit.
- Don't use high beams in the smoke.
- **Stay as far to the right of the road as is safely possible.**
- Drive defensively! Expect the unexpected around every curve.
- Watch out for debris and wildlife on the roads.
- Don't tail gate, keep a safe distance between vehicles on dirt roads.
- Always fasten your seat belt before the vehicle is set into motion.
- Use a "Backer" when backing your vehicle. Do a walk around if "Backer" is not available
- Remember, we have to share the road with others.

Weather and Fire Behavior

- Winds increasing and/or changing direction.
- Unfamiliar with weather and local factors influencing fire behavior.
- Getting frequent spot fires across the line.
- **"Keep informed on fire weather conditions and forecast."**
- **"Fight fire aggressively, having provided for SAFETY FIRST."**

Prepared by:

The Team 4 Safety Group.

INCIDENT RISK ANALYSIS FORK COMPLEX CA-SHF-002067 (ICS 215a) Day Shift

DIV/BR	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> • Conduct thorough assessments before starting work. • Ensure LCES is in place. • Provide additional briefing emphasis on drought related fire behavior (IRPG p 3&4.) • Increase the level of SA. • Provide additional briefing for new resources and maintain communications.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Share your Situational Awareness (hazards, changes, etc.) with those who also have a need. • Radio Communications may be poor in some areas. Use human repeaters as needed. • Ensure all personnel are familiar with the incident and IA communications plans.
ALL	HAZARD / DANGER TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p.22.) • Limit number of personnel around snags and their exposure time; fallers must be qualified for the trees being felled. • Be alert around hazard trees during wind events, even large green trees.
ALL	TRAFFIC HAZARDS AND DRIVING	<ul style="list-style-type: none"> • Practice "Defensive Driving" techniques. Traffic volume is increasing. • Use spotters when backing. • Always use headlights. • Use warning lights when working on roads or traveling in smoke. • Observe posted speed limits. • Use chock blocks, turn wheels into hill. • Many roads are narrow and mid slope, use caution. • Be alert for cattle and wildlife.
ALL	STEEP TERRAIN AND ROLLING DEBRIS	<ul style="list-style-type: none"> • Maintain 8'-10' spacing when working & walking. • Don't work above any personnel. • Evaluate necessity to send personnel in areas with limited access.
ALL except A,C,E,S and Y	LINE CONSTRUCTION	<ul style="list-style-type: none"> • Follow the line construction protocols and safety precautions for direct and indirect line construction. • Watch footing and spacing between firefighters, especially those working below you. • Ensure adequate Safety Zones are available, IRPG pg 8. • Make sure LCES is in place.
ALL except: A,M,P	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> • Ensure communications are established with operators. • Use hand signals if other communications are unavailable. • Maintain a 50'-100' exclusion area around equipment. • In timber increase safety distance to 2 ½ times canopy height.
ALL	HEAT RELATED ILLNESS	<ul style="list-style-type: none"> • Drink 2 to 1 water to sports drinks. • Take frequent breaks, minimum of 10 minutes every hour. • Recognize symptoms of HEAT RELATED ILLNESS which include lack of energy, headaches, dizziness, lack of rest, no hunger, poor eating habits, hot skin, and lack of sweating.
ALL	AIR OPERATIONS	<ul style="list-style-type: none"> • Follow "Aviation Watch-Out Situations" on page 44, IRPG. • Don't plan on air resources for tactical support or medical transportation. • Refer to page 57, IRPG for directing bucket drops. • Ensure positive communication with all air resources. • Get out of the area where aircraft are dropping.
ALL	STRUCTURE PROTECTION	<ul style="list-style-type: none"> • Review Structure Protection; IRPG pages 12-16. • Set trigger points to disengage and allow adequate time to relocate to primary and secondary safety zones. • Look for propane tanks and other hazardous materials. • Avoid power lines and underground gas lines in all areas. • Be alert for and avoid guard dogs. • Avoid hostile confrontations with land owners.
ALL	POISONOUS SNAKES AND BEES	<ul style="list-style-type: none"> • Be alert for rattlesnakes. Walk slowly, watch footing and hand placement around rocks. • Determine if any personnel under your control are allergic to bee stings. • Flag and avoid areas around known bee's nests. • Utilize line paramedics at the earliest appearance of allergic reaction.

8. MEDICAL EMERGENCY PROCEDURES

LINE MEDICAL EMERGENCY:

Crew Supervisor contact Division Supervisor/Operations with patient complaint, condition and location.

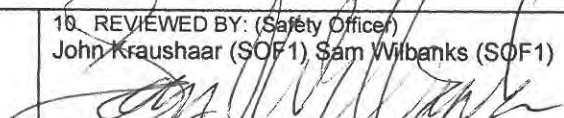

Division Supervisor/Operations contacts Communication:

- Division Supervisor/Operations to use "injury or incident communication protocol" on next page
- Division Supervisor/Operations will run medical emergency on command channel
- Communications will contact the Medical Unit Leader on Command channel.
- Medical Unit Leader will:
 1. Have communications dispatch ground/air transport resources
 2. Notify receiving hospital of injury status.
 3. Develop primary and contingency transport plan
 4. Notify Incident Commander, Safety, Logistics and Operations

CAMP MEDICAL EMERGENCY:

Contact Communications with patient complaint/condition and location, via LOGs Net

- Medical Unit contacts:
 - Safety
 - Logistics
 - Operations
- Medical Unit Leader will:
 1. Contact Communications to dispatch ground/air transport resources
 2. Notify receiving hospital of injury status
 3. Develop primary and contingency transport plan

206 ICS	9. PREPARED BY: (Medical Unit Leader) Eric Williams (MEDL) John VanMannekes (MEDL)	10. REVIEWED BY: (Safety Officer) John Kraushaar (SOF1) Sam Wilbanks (SOF1)
		

Injury or Incident Communications Protocol

DECLARE: Medical Emergency or Non-emergency Medical transport

Best transport method: (circle) Ambulance Helicopter Vehicle

Location: (Div. & Lat / Long) _____

GPS Format: WGS84 Degrees, Decimal, Minutes

Situation _____

Any special equipment required _____

Number of injured _____ Type of injuries _____

Closest pick up point (DP, Helispot) _____

Level of consciousness _____ Resp. _____ Pulse _____ BP _____ Weight _____
 (alert & oriented x 1-4)

Injury _____ Agency (No Names) _____

Medical History/Allergies _____

Air Transportation Triage

	Ground or Air Ambulance to Hosp.	Transport to Med Unit
Mechanism	Hit by a falling tree or large branch Fall of 10' or more Insect bite with shortness of breath Signs of heat stroke (hot, dry, disoriented) Burn Injury greater than 1% body area	Minor dehydration Cut or laceration with bleeding controlled Minor bites and Stings Minor burns
Area Injured	Significant Blunt or Penetrating Trauma to Head, Neck, Chest, Abdomen or pelvis Any Arm or Leg fracture above the Joint	Minor blunt trauma Minor penetrating trauma Extremity sprains and strains Simple fracture below elbow or knee
Symptoms	Disoriented Chest Pain or Shortness of Breath Weak or absent radial pulse Pale, cold and sweating	Alert and oriented No shortness of breath Good pulses

If air or ground ambulance is DELAYED:

Package and transport patient to rendezvous with ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

If Declaring an "Incident within the Incident"

The closest DIVS will respond to manage the incident. They are responsible for giving an accurate size up, ensuring scene safety, setting priorities and initiating an appropriate response.

The closest Safety Officer and Line EMS will respond to the scene to assist the Branch Director or DIVS. Secure site and begin initial investigation when situation is stabilized.

STANDARD OPERATING PROCEDURES—FINANCE SECTION

“How to Earn an Honest Day’s Pay for an Honest Day’s Work”

16 HOURS IS NOT A GUARANTEE – IT IS HOURS WORKED!!

WORK REST CYCLE

IT IS NATIONAL DIRECTION TO MEET A 2 TO 1 WORK/REST RATIO (1 hour of sleep/rest for every 2 hours of work). Every effort shall be made to manage work hours so you don’t exceed the maximum of 16 hrs. Work hours exceeding 16 hrs shall be approved by your supervisor in advance, and a justification/mitigation form completed for review by Section Chief & approved by IC. It is each person’s responsibility to comply with this direction to manage for fatigue and safety.

OPERATIONAL SHIFTS

Pay status for assigned overhead and crews on the fireline will not start prior to the posted briefing time and will terminate on arrival back in camp (except for debriefing—additional hours may be accrued by those required to attend debriefing). Supervisors will be allowed ½ hour prior to briefing and after return to camp to ready crew and equipment.

DUTY STATUS

Division/Group supervisors and Unit Leaders are responsible for establishing on and off duty status. The objective is a 2 to 1 work/rest ratio. Personnel will normally work, travel, and/or be placed on ORDERED standby 8 to 16 hours per day and be off duty 8 hours or more (breaks count towards 8 hrs). Off duty time will be in a non-pay status. Each federal employee is guaranteed **at least 8 hours** of pay status each 24-hour period (midnight to midnight) unless it is the first or last day of an assignment or stated otherwise in a contract or agreement.

PERSONNEL/EQUIPMENT TIME REPORTING

Personnel time will be reported to the Time Unit and daily once they are signed by the next level supervisor. Local Government Resources that are actual hours are required to submit a Crew Time Report daily. OES resources will be monitored by OES Agency Rep (if assigned) for 2/1 Work Rest compliance. Situations entitling you to HAZARD PAY are to be noted in remarks (i.e HP=Uncontrolled Fireline, hovering hookups, low level flights, etc.)

Private Contracted Equipment time must be tracked on a Shift Ticket daily and hours on shift noted even if it is a daily rate. When swapping out operators you need to notify Finance as well as changing from single to double shift and vice versa.

Supervisor’s - If you are responsible for daily tracking of equipment or personnel, please ensure you understand the agreement, and follow the rules provided in this document. Do not sign documents for resources you did not manage unless you have knowledge of their assignment hours.

MEAL AND OTHER WORK BREAKS

Compensable meal periods are the exception, not the rule (5 CFR 551.411 © and 29 CFR 785.19(a)). **Until the fire is controlled**, personnel on the fireline MAY BE compensated for meal periods if all of the following conditions are met: 1) The fire is not controlled and 2) The Operations Section Chief makes a decision that it is critical to the effort of controlling the fire that personnel remain at their post of duty and continue to work as they eat, and 3) The compensable meal break is approved by the supervisor at the next level and documented on CTR. For personnel in support positions, and fireline personnel **after control** of a fire, a meal period of at least 30 minutes must be ordered and taken for each work shift of eight hours or more. In those situations where personnel cannot be relieved from work and must remain at a post of duty, a meal period may be counted as time worked, which will be compensable. **If breaks are NOT able to be taken, CTR should have a statement in remarks explaining the situation. Kitchen closes @2200 so show dinner break unless you went off clock by 2130.**

FORK COMPLEX
Incident Trainee/Trainer Data Form

Training Specialist: Greg White 951-317-0698

- All Incident trainees, including those on Firefighting Modules at your earliest opportunity complete this form and see the Training Specialist in trailers on main street row.
- Prior to or as you process through DEMOB, remember to close your training package. To close your training package bring: 1) A performance rating from your trainer. (ICS 225)
2) Your task book that has as many entries as possible by your Trainer.

Trainee Data

Trainee Name: _____ ICS Trainee Position: _____

Request # (A,C,E, or O): _____ Agency Designator (MACS ID Ex. CA-ANF): _____

Ordered as Trainee? Y N _____ R5 or R8 Priority Trainee _____ FS-FPM Trainee _____ IFPM Trainee

Date Assigned: _____ Cell / Contact # While on Incident: _____

Training Records Mailed To: (Fire Chief, Training Officer):

Name: _____ Title _____

Name of Agency/Unit: _____

Agency/Unit Address: _____

City: _____ State: _____ Zip Code: _____ Phone: _____

Trainer/Evaluator Data

Trainer / Evaluator Name: _____ ICS position on fire: _____

Home Unit: _____ Agency Designator (MACS ID Ex. CA-ANF): _____

Work Address: _____

City: _____ State: _____ Zip Code: _____

Cell / Contact While on Incident: _____

Human Resource Specialist Message:

This is another reminder that Sexual Harassment at work - including emergency incidents - occurs whenever unwelcome conduct on the basis of gender adversely affects a person's ability to do their job, and contributes to a hostile work environment.

Inappropriate behavior is harassment including sexual and racial harassment and shall not be tolerated."

(Fireline Handbook, Chapter 6, Common Responsibilities)

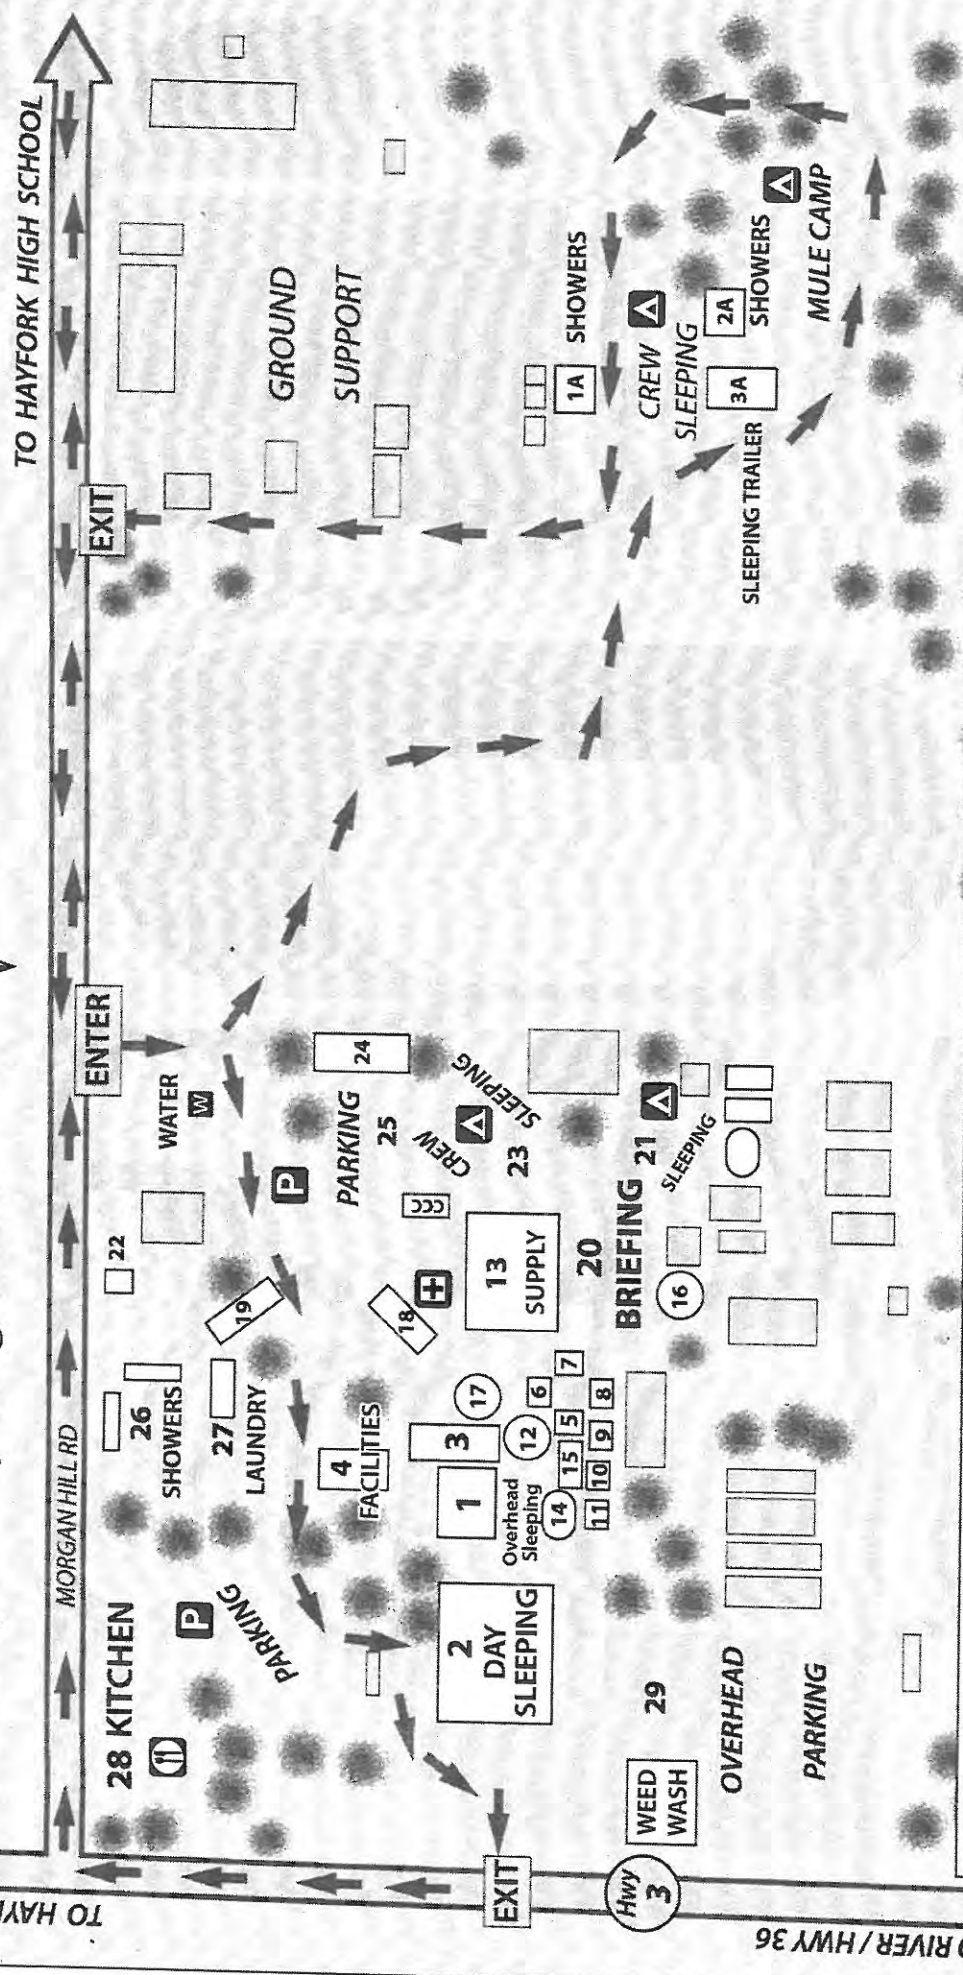

Please let me know if I can help with any issues or concerns

Your Human Resource Specialist,
Daniel Gonzalez
