South Complex Fire Weather Forecast

FORECAST NO: 27 NAME OF FIRE: South Complex

Sunday Day Shift Shasta-Trinity National Forest UNIT: PREDICTION FOR:

David J. Shallenberger Aug 16, 2015 SIGNED: SHIFT DATE: Incident Meteorologist (T) TIME AND DATE

FORECAST ISSUED: Aug 15, 2015 @ 1900 PDT

<u>WEATHER DISCUSSION:</u><u>Continued Hot and Dry...</u>
A benign upper level pattern in place will allow for little upper winds influencing the incident area. Expect winds to impact the area to be mainly upslope and upvalley during the afternoon each day. This can be further compounded due to fire activity that generates enough smoke to hang over the area and keep the inversion from breaking the next day. Therefore, local effects from the terrain and fire will be the main drivers to weather.

Weather Forecast for Sunday:

Weather: Sunny with smoke and haze. Dense smoke and haze in the morning.

High Temperature... 85°-97°

Min RH...... 16-26% (Best timing will be around midday on the ridges)

20-FOOT WINDS:

Ridgetop..... Northwest-northeast winds 3-6 mph in the morning, becoming 6-10 mph in the

afternoon.

Slope/Valley..... Upslope/upvalley 4-8 mph, with a northwest wind 6-10 mph with gusts to 12 mph

developing in the major Trinity and South Trinity drainages around mid-afternoon.

LAL....1 (No Lightning) CWR (>=0.10")....0%

Weather Forecast for Sunday Night:

Weather: Clear. Smoke and haze in the valleys.

Low Temperature... 50°-55°

Max RH (Ridges)..... Poor Recovery: 40-55% Max RH (Valleys)..... Fair Recovery: 50-65%

20-FOOT WINDS:

Ridgetop..... North 4-8 mph early this evening, becoming 2-4 mph after midnight.

Slope/Valley..... Northwest wind 4-8 mph early in the evening up the Trinity and South Trinity

drainages, becoming light and variable after midnight.

CWR (>=0.10").... 0% LAL.... 1 (No Lightning)

Weather Forecast for Monday:

Weather: Sunny with smoke and haze. Dense haze and smoke in the morning.

High Temperature... 84°-94°

Min RH...... 19-29% (Best timing will be around midday on the ridges)

20-FOOT WINDS:

Ridgetop..... Northeast wind 3-6 mph early, then shifting to the northwest and gusting up to 8-12 mph in the afternoon.

Slope/Valley..... Upslope/upvalley 4-8 mph, becoming more northwest winds in the afternoon with winds reaching 8 to 12 mph.

CWR (>=0.10")....0% LAL....1 (No Lightning)

EXTENDED OUTLOOK for Tuesday through Thursday:

A benign upper level flow will keep the main changers to weather with the terrain and fire activity. After this. on Wednesday and Thursday, a trough moving through from the northwest will keep a northwest to northerly flow over the South Complex. This dry front will produce slightly stronger winds across the area, especially over the northwest aligned valleys.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 27	TYPE OF FIRE: Wildland Fire
FIRE NAME: South Complex	OPERATIONAL PERIOD: 0600 - 1800, August 16, 2015
DATE ISSUED: AUGUST 15, 2015	TIME ISSUED: 2100
UNIT: Shasta-Trinity NF	SIGNED: /s/ Ken Larson, FBAN

INPUTS

WEATHER SUMMARY:

*** See attached Fire Weather Forecast***

Discussion: Winds will be mainly upslope and upvalley during the afternoon. The inversion will be persistent and likely to impact the fire area most of the day.

Weather: Sunny with smoke and haze. Dense smoke in the morning.

Max Temp: 85-97° Min RH: 16 - 26%

Winds (20 foot): Ridgetop: NW-NE winds 3-6 mph in the morning, becoming 6-10 mph in the afternoon.

Slope/Valley: Upslope/upvalley 4-8 mph, with a NW wind 6-10 mph gusts to 12 in the afternoon in the

Trinity River Drainages.

FIRE BEHAVIOR

GENERAL

Expect the fire behavior to be minimal until early-mid afternoon. Fire spread will be primarily upslope/up canyon with some wind-driven flanking. Expect upslope runs in the afternoon. Backing fire and roll-out will contribute to spread. Moderate fire behavior should be anticipated after the inversion lifts. Hayfork ERC for August 15 was 55.

SPECIFIC FIRE BEHAVIOR

Brush/previous burn areas: potential worst-case surface fire spread will be 20-30 chains/hour with flame length 5-7 feet. Backing fire rate of spread to 4 chains/hour. Potential for sustained crown runs in brush and live oak. Maximum spotting distance up to ¼ mile. Probability of ignition at the peak of the burning period will be 70-80%.

Timber fuel types: potential worst-case surface fire spread will be 6-10 chains/hour with flame length 4 to 6 feet. Backing fire to 2 chains/hour. Individual and group-tree torching and short-duration crown runs should be expected. Spotting distance to ¼ mile. Probability of ignition will be 70-80%.

Areas of Concern:

Division L, M: upvalley winds will spread fire toward the indirect line between the 60 Road and East Garrett Rd. Expect backing and flanking along the east side of the South Fork Trinity River. Spotting is the biggest containment issue in these Divisions.

Divisions Q, S, U, Z: spotting across containment lines and fire movement toward indirect lines are the concerns for these Divisions.

AIR OPERATIONS

Air operations may be limited due to poor visibility caused by smoke.

Sunrise: 06:24

Sunset: 20:10

SAFETY

Smokey conditions during the day, especially early morning, may result in hazardous conditions: spots may not be readily observed until a considerable size due to reduced visibility; vehicle operation can be hazardous during the day, especially early morning.

South Complex

Operation Period: 08/16/2015 Day Shift

SAFETY MESSAGE

Your Brain is the most important tool you bring to the fire

- Firefighting is a mental as well as a physical activity.
- Personnel responsible for the safety of others should spend the majority of their time on the mental side of firefighting.
- Those mental activities include; planning, ensuring effective communication, monitoring the fire environment, anticipating problems, and forecasting future needs.

MAJOR HAZARDS AND RISKS

STEEP TERRAIN	ROLLING MATERIAL	HEAVY EQUIPMENT
FATIGUE	DEHYDRATION	HAZARD TREES
SPOT FIRES	BUCKET DROPS	COMPLACENCY

Be sure all elements of your safety plan are in place prior to engagement

Before beginning burnout OPS ensure that:

- Lookouts are posted.
- Communications are established between firing and holding teams.
- Escape routes are established and will not be compromised by firing.
- Firing does not out pace holders.
- Critical points such as bends in the fireline and saddles may require extra holding forces.

WUI Watch Outs

- Wooden construction and wood shake roofs
- Poor access and narrow one-way roads
- Inadequate water supply
- Natural fuels 30 feet or closer to structures
- Extreme fire behavior
- Strong winds & changes in direction
- Evacuation of public
- Bridge load limits
- Traffic along roads and highways

Nor Cal Team 2 Safety Officers Terry O'Connell, Steve Davis SOF2

FINAL

TRAINING SPECIALIST MESSAGE

If you are arriving on the South Complex:

An Incident Training Specialist available on the South Complex to assist with facilitation and documentation of your training assignment.

All Federal, State, and Local Government Trainees will need to register their training assignment with the TNSP in order to receive proper incident credit for your assignment.

The TNSP is located in the ICP with Safety.

A Training Assignment Registration Form is attached. Bring the completed form to the TNSP Desk to register your assignment.

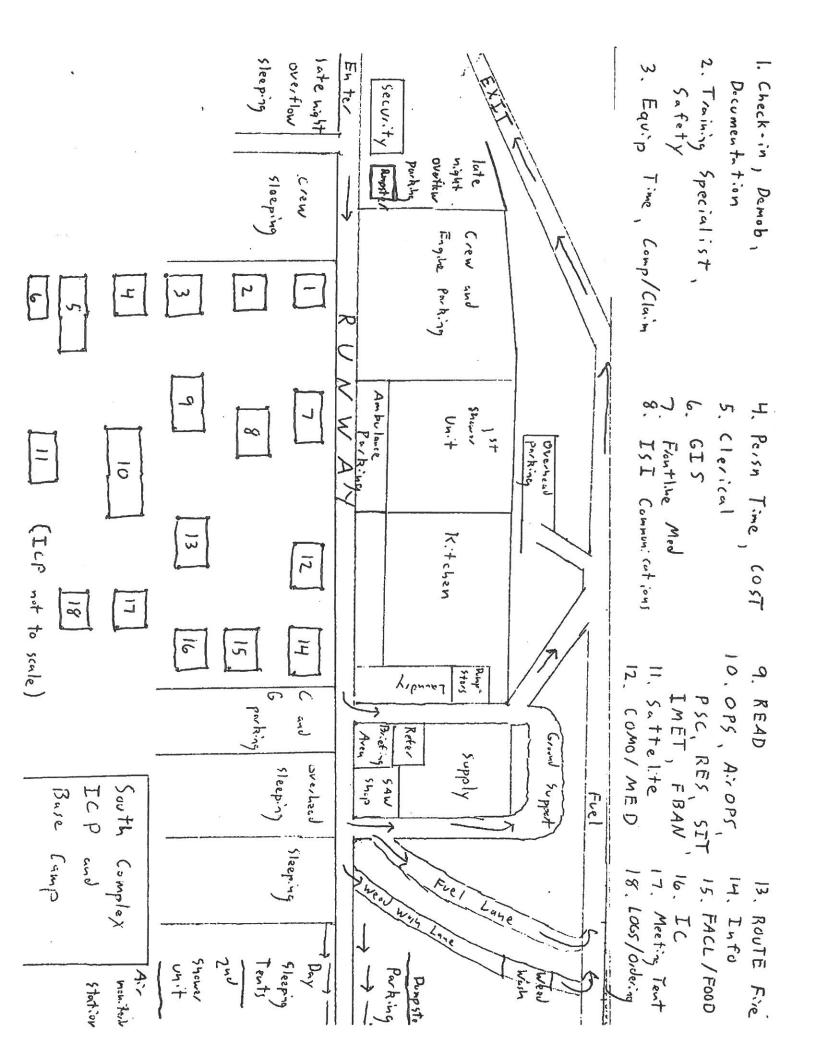

Brad Smith - TNSP Sean Wolf - TNSP(t)

INCIDENT TRAINEE REGISTRATION FORM

Complete <u>ALL</u> fields and return to Training Specialist or DROP BOX for entry into database.

Remember to close out training packets with the Training Specialist before DEMOB.

MEDICAL INCIDENT PLAN

FOR ALL MEDICAL EMERGENCIES: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS/DISPATCH

Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)

Nature of Injury/Illness		Desc	ribe the injury
National Strategies (Section 2018)			n leg with bleeding)
Incident Name			c Name + "Medical" † Meadow Medical)
Incident Commander		N	lame of IC
Patient Care		l	of Care Provider EMT Smith)
3. INITIAL PATIENT ASSESSMENT: Comp	plete this section for each patient. This is only a brief		
Number of Patients: Male / F	Female Age:.	Weight:.	
Conscious? ☐ YES	□NO = MEDEVAC!		
Breathing? ☐ YES	□ NO = MEDEVAC!		
Mechanism of Injury: What caused the injury? Lat/Long (Datum WGS84)			
Ex: N 40° 42.45' x W 123° 03.24' 4. SEVERITY OF EMERGENCY, TRANSPO	ORT PRIORITY		
	SEVERITY	TRANSPORT PRI	
□ URGENT-RED Life threatening injury Ex: Unconscious, difficulty breathing, bleedin heat stroke, disoriented.	or illness. g severely, 2° – 3° burns more than 4 palm sizes	Ambulance or MEDEVAC he need is IMMEDIATE.	licopter. Evacuation
□ PRIORITY-YELLOW Serious Injury or Ex: Significant trauma, not able to walk, 2° –		Ambulance or consider air tra Evacuation may be DELAY i	
□ ROUTINE-GREEN	buille not more than 1-2 paint sizes.	Non-Emergency. Evacuation	
Not a life threatening injury or illness. Ex: Sprains, strains, minor heat-related illnes	S.	Routine of Convenience	
5. TRANSPORT PLAN:		•	
Air Transport: (Agency Aircraft Preferred)
