### South Complex Fire Weather Forecast

FORECAST NO: 37 NAME OF FIRE: South Complex

PREDICTION FOR: Friday Day Shift UNIT: Shasta-Trinity National Forest

040

SHIFT DATE: Aug 21, 2015 SIGNED: David J. Shallenberger Incident Meteorologist

FORECAST ISSUED: Aug 20, 2015 @ 1900 PDT

### **WEATHER DISCUSSION:**

A weak trough moving through will bring some northwest winds to the area. This will blow much of the smoke over the upper levels off to the southeast. With an increase of some instability a partial inversion lift is expected this afternoon with some clearing of the smoke.

### Weather Forecast for Friday:

**Weather:** Smoke and haze with partial clearing after noon.

High Temperature ... 87°-92°

Min RH (Ridgetops/Midslopes).....14-20% Min RH (Valleys).....25-29%

**20-FOOT WINDS:** 

Ridgetop...... Northwest 4 to 8 mph becoming 8-12 mph after noon with gusts to 20 at times.

Slope/Valley..... Upslope 3-6 mph after 1100

Upvalley 8-12 mph with some higher gusts after 1400.

### Weather Forecast for Friday Night:

Weather: Clear with inversion forming after 2200. Smoke in the valleys.

Low Temperature (Ridgetops).....55°-60° Low Temperature (Valleys)......49°-54°

20-FOOT WINDS:

Ridgetop...... North-northwest at 6-10 mph.

Slope/Valley..... Downslope/downvalley 2-4 mph after 2100.

### Weather Forecast for Saturday:

**Weather:** Smoke and haze in the morning with partial inversion lift after 1400.

High Temperature ... 85°-90°

Min RH (Ridgetops)......15-20% Min RH (Valleys)......23-28%

20-FOOT WINDS:

Ridgetop........ Northeast at 4 to 8 mph early, becoming northwest at 8 to 13 mph after noon.

**Slope/Valley.....** Becoming upslope and up-valley at 6 to 10 mph after noon.

### EXTENDED OUTLOOK for Sunday and Monday

East to northeast winds aloft will set up as a high pressure ridge redevelops over the region. Expect slightly warmer and drier conditions. The lack of strong upper level flow and lessened instability will lead to some strengthening in the inversion.

FIRE BEHAVIOR FORECAST									
FORECAST NUMBER: 37	TYPE OF FIRE: Wildland Fire								
FIRE NAME: South Complex	OPERATIONAL PERIOD: 0600-1800, August 21, 2015								
DATE ISSUED: August 20, 2015	TIME ISSUED: 2100								
UNIT: Shasta Trinity N.F.	SIGNED:								
	Sid Hall, FBAN Sid Hall								

#### **WEATHER SUMMARY:**

### \*\*\*\* See attached Fire Weather Forecast in IAP \*\*\*\*

### **Key Weather Factors Influencing Fire Behavior:**

The smoke and overnight humidity recovery could reduce fire behavior in the early part of the day, but the chance for increased winds and clearing in the afternoon will allow for increased fire behavior and fire movement.

ERC: 55 Hayfork RAWS (Trend +1)

### **FUELS:**

Live Fuel Moisture: Greenleaf manzanita (Hayfork Area) 92%

Expected FDFM: 5% Unshaded 7% Shaded

1000 Hr. FM: 10%

Probability of ignition: 70% unshaded, 60% shaded.

#### FIRE BEHAVIOR:

\*\*\*\* Based on the Warmest, Driest, Windiest Conditions Forecasted \*\*\*\*

### YESTERDAY:

Increased winds helped clear out the smoke around 1500 yesterday and fire activity increased significantly with the clear skies. The fire put up a good sized column in Div. Y & W and moved further to the south towards Hayfork Creek. The fire was also very active in Div. M and continued to move downslope towards the South Fork Trinity River.

### **GENERAL**:

\*Expect the fire to become more active in the afternoon or in areas with clearing skies similar to yesterday. \*Fire movement will be predominately backing and flanking, but expect upslope runs if the fire becomes established in the bottom of the drainages or slopes. Be aware of roll-out and potential slope reversals. \*Expect group torching, short crown runs and spotting up to 1/4 mile.

\*Brush/Previously burned areas: Expect head fire spread rates of 15-25 ch/hr with flames lengths 4-6 ft. Backing fire spread rates of 1-2 ch/hr with flame lengths 1-2 ft.

\*Timber Fuel Types: Expect head fire spread rates of 6-10 ch/hr with flames lengths 3-5 ft.

Backing fire spread rates of 1-2 ch/hr with flame lengths 1-3 ft.

#### SPECIFIC:

**Div M:** The fire will continue to back downslope towards the river with occasional roll-out and short upslope runs. Spotting across the river remains the primary concern.

**Div Z:** As the fire moves further down into Olson Creek there is the possibility for upslope runs to the north towards Div. Z or to the south towards the 3N05 road. Short crown runs are possible in areas of tighter canopy cover.

**Div Y:** The fire will continue to move south over Rays Peak and into the Corral Creek drainage. Short crown runs are possible in areas of tighter canopy cover. Be heads up for spotting ahead of the main fire.

**Div. W:** The fire will continue moving south off Pattison Peak and could test the dozer line. Be heads up for spots to the SW of the dozer line. Short crown runs are possible in areas of tighter canopy cover. Be heads up for spotting ahead of the main fire.

### **AIR OPERATIONS:**

Air operations may be limited in the morning due to the poor visibility caused by the smoke.

Sunrise: 0629 Sunset: 2003

### SAFETY:

Pay attention to changing weather condition and the possibility of clearing skies. Fire behavior will dramatically increase in clear air.

Be heads up during mop-up in timber areas. The fire has weakened the root systems of lots of trees and it won't take much wind to bring these trees down.

### SAFETY MESSAGE South Complex

August 21-22, 2015 Night Shift

USE LOOKOUTS, COMMUNICATIONS, ESCAPE ROUTES, SAFETY ZONE LCES IN PLACE EVERY TIME

### Transition Day:

- CIIMT 1 Assuming Command of Fire today.
- Know who you are working for and your chain of command.
- If you are confused about anything, speak up.
- Things might have changed, so make sure you know where you are going to be working.

### Accountability:

- Never work alone at night, always work in pairs.
- Inform your Division or supervisor if you change locations.
- Check IN with the division supervisor on site if not assigned.
- Check OUT with your supervisor at the end of shift.

### In Country not seen in daylight:

- There still are fire weakened trees/snags out there.
- Get SA from resources that have been working that area at night.
- You might be assigned to a new division you are not familiar with.
- Do not over commit when working a new area at night.
- Ask about any known hazards and know where they are at.

### Driving:

- Drive defensively; expect the unexpected around every curve.
- Stay away from soft shoulders on the downhill side of roads.
- Watch out for debris and wildlife in the roadway.
- Increase your following distance between vehicles in dusty or smoky areas, especially at night.

**Prepared by:** Doug McKelvey Safety Officer Date: 8/21/2015 Rich Sonsteng SOF1 (t)

### **INCIDENT SAFETY ANALYSIS 215a**

South Complex Fire - Friday, August 21, 2015

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE Avoidance, Education, etc)
All	Hazard Trees	~ Follow "Hazard Tree Safety" guidelines, IRPG pages 22 & 23     Post lookouts, or use a spotter in mop-up areas with personnel     Don't park vehicles or take breaks in high concentrations of hazard trees     Establish trigger points for disengagement during high wind events
All	Driving & Traffic	<ul> <li>Drive with lights on.</li> <li>Do not use cell phone while driving. Slow down in smoke and congested areas.</li> <li>Check bridge load rating before using for heavy equipment; if in doubt, find another route.</li> <li>Slow down at night - expect animals in the road.</li> <li>Use spotter for backing.</li> <li>Wash windshield.</li> </ul>
All	Line Constructions	<ul> <li>Conduct thorough briefing for all personnel (inside rear cover IRPG).</li> <li>Ensure LCES in place prior to engagement (IRPG p. 7).</li> <li>Establish adequate safety zones (IRPG p.8).</li> <li>Follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4).</li> <li>Utilize Risk Management Process (IRPG p.1).</li> </ul>
All	Structure Protection & HAZMAT	<ul> <li>Review "Wildland Urban Interface" Watch outs, IRPG page 10</li> <li>Use "Structure Assessment" checklist, IRPG pages 12-16</li> <li>Follow "HAZMAT Incident Operations" on pages 34-39 in IRPG</li> </ul>
All	Communications	<ul> <li>Maintain communication with aviation resources, and suppression organization.</li> <li>Ensure all know frequency and protocol for contacting resources</li> <li>Utilize the ICS 205</li> </ul>
All	Mop-up& Rehab	<ul> <li>Do not work above or below personnel during rehab/mop-up operations</li> <li>Alert crew personnel of rolling debris by yelling to affected individuals</li> <li>Position debris that could roll vertically on slope</li> <li>Wear eye protection</li> </ul>
All	Night Operations	<ul> <li>Maitain high visibility in work area and wear vest while in roadway.</li> <li>Use glow sticks to mark hazards.</li> <li>Ensure personnel have a personal light (headlamp)</li> <li>Watch for signs of fatigue</li> <li>Take breaks away from areas of known hazard</li> </ul>
All	Extreme Drought Conditions	<ul> <li>Local and inbound fire personnel need to be aware that fire behavior is exceeding normal expectations for this time of the year.</li> <li>Local briefings need to be thorough and highlight specific fire environment conditions. These include but are not limited to local weather forecasts, Pocket Cards, ERC's, live and dead fuel moistures, and special fuel conditions such as mortality, and frost killed brush, etc.</li> <li>Suppression actions need to be based on good anchor points, escape routes, and safety zones.</li> <li>Remember LCES. Experienced lookouts are essential under these conditions.</li> <li>Base all actions on current and expected behavior of the fire.</li> <li>Augment initial attack resources as incident activity dictates.</li> </ul>
All	Chain Saw Operations	<ul> <li>Follow "Hazard Tree Safety" guidelines, IRPG pages22-23</li> <li>Look up, down around for hazard tree indicators</li> <li>Only fell and buck trees within your expertise, and training</li> <li>Follow "Procedural Felling Operations" on page 79 in IRPG</li> <li>Do not fall trees during high wind events</li> </ul>

### **INCIDENT SAFETY ANALYSIS 215a**

All	Extreme Fire Behavior	<ul> <li>Share weather observations with all personnel assigned to division. Review "Severe Fire Behavior Potential" (IRPG p.68).</li> <li>Monitor current weather conditions and forecasts. Make sure all personnel receive thorough briefings every shift.</li> <li>Maintain adequate escape routes and safety zones. Advise all personnel if these are compromised or changed. Set trigger points when appropriate.</li> <li>Adhere to 10 Std Orders, mitigate 18 situations.</li> <li>Maintain Situational Awareness</li> </ul>
All	Air Opperations	<ul> <li>Insure that the mission is necessary.</li> <li>Observe weather minimums.</li> <li>Assign appropriate aircraft for the mission.</li> <li>Maintain good communications. Use ground contacts.</li> <li>Proper flight following.</li> <li>Use aerial supervision (air attack, Helco)</li> </ul>
All	Heavy Equipment Operations	<ul> <li>Ensure communications are established with operators</li> <li>Make positive contact with operator before approaching.</li> <li>Use hand signals if other communications are unavailable</li> <li>Maintain a 50'-100' exclusion area around equipment</li> <li>Use a spotter when backingQualified operators and appropriate overhead.</li> <li>Close roads or trails if necessary for public safety.</li> <li>PPE including hearing protection.</li> <li>Maintain safe working distance from equipment</li> </ul>
all	Steep Terrain & Rolling Debris	Determine if the mission is necessary.     Limit exposure by avoiding whenever possible.     Use the proper resource.     Post lookouts. Footing situational awareness
All	Heat Related Illness (HRI)& Dehydration	~Drink Fluids throughout operational period, up to 1.5 gallons per shift.
All	Bears	∼Backhaul trash ∼Do not leave any food in vehicles or tents ∼Do not leave and ice chests visible from the outside, bears associate ice chests with food.
All	Injury & Medical Emergency	∼ Assist injured employee appropriate medical care ∼ Use EMT's on Division for initial care ∼ Follow medical protocol as outlined in ICS-206

## SOUTH COMPLEX Incident Trainee/Trainer Data Form

Training Specialist: Robert Rivelle 707-498-1761

- All Incident trainees, including those on Firefighting Modules at your earliest opportunity complete this data form and place it in the drop box inside the training tent. Data forms will be sent daily to your Training Specialist at the fairgrounds in Hayfork.
- > Trainees on the South Complex will close training packages at the fairgrounds in Hayfork. Pull into the main parking lot at the fairground and follow the signs to the training trailer. To close your training package bring:

1) A performance rating from your trainer. (ICS 225)

2) Your task book that has as many entries as possible by your Trainer.

### Medivac Sites

Disoriented

Chest Pain or Shortness of Breath

Weak or absent radial pulse

Pale, cold and sweating

**Symptoms** 

Simple fracture below elbow or knee

Alert and oriented

Good pulses

No shortness of breath

See Map	

### If air or ground ambulance is DELAYED:

Package and transport patient to rendezvous with ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

### If Declaring an "Incident within the Incident"

The closest DIVS will respond to manage the incident. They are responsible for giving an accurate size up, ensuring scene safety, setting priorities and initiating an appropriate response.

The closest Safety Officer and Line EMS will respond to the scene to assist the Branch Director or DIVS. Secure site and begin initial investigation when situation is stabilized.

#### 8. MEDICAL EMERGENCY PROCEDURES

### LINE MEDICAL EMERGENCY:

Crew Supervisor contact Division Supervisor/Operations with patient complaint, condition and location.

\*\*\*Designate a point of contact who shall remain with the patient for direct link information\*\*\*

Division Supervisor/Operations contacts Communication:

- Division Supervisor/Operations to use "injury or incident communication protocol" on next page
- Division Supervisor/Operations will run medical emergency on command channel
- Communications will contact the Medical Unit Leader on LOGs Net, Command Channel or (541)787-4324
- Medical Unit Leader will:
  - 1. Have communications dispatch ground/air transport resources
  - 2. Notify receiving hospital of injury status.
  - 3. Develop primary and contingency transport plan
  - 4. Notify Incident Commander, Safety, Logistics and Operations

#### **CAMP MEDICAL EMERGENCY:**

Contact Communications with patient complaint/condition and location on LOGs Net, Command Channel or (541)787-4324
\*\*\*Designate a point of contact who shall remain with the patient for direct link information\*\*\*

- Medical Unit contacts:
  - Safety
  - Logistics
  - Operations
- Medical Unit Leader will:
  - Contact Communications to dispatch ground/air transport resources
  - Notify receiving hospital of injury status
  - 3. Develop primary and contingency transport plan
