TIME AND DATE

FORECAST ISSUED: Aug 21, 2015 @ 1900 PDT

[Handwritten signature] 8-22-15

WEATHER DISCUSSION:

The inversion break is once again the main weather issue today. Confidence is increasing that southerly winds with a little better instability will help to partially break the inversion by mid or late afternoon. Expect similar warm temperatures and relative humidity. General or ridge winds will be a bit stronger from the south-southwest with gusty slope winds after noon.

Weather Forecast for Saturday:

Weather: Smoke and haze. Partial inversion lift after 1500.

High Temperature ... Midslopes/Ridges 88-93 **Low valleys (camp)** 93-97

Min RH (Ridgetops).....18-24%

Min RH (Valleys).....15-20%

20-FOOT WINDS:

Ridgetop..... Southeast to south 6-12 mph with gusts 15-20 mph.

MidSlope..... Upslope 3-7 mph with gusts 8-12 mph.

Valley..... Upvalley 5-9 mph with gusts 12-15 mph.

Weather Forecast for Sunday Night:

Weather: Clear with a smoke inversion and moderate thermal belts.

Low Temperature (Ridgetops).....62-68

Low Temperature (Valleys).....55-60

Max RH (Midslopes/Ridgetops)..... 48-56% after midnight

Max RH (Valleys)..... 80-90%

20-FOOT WINDS:

Ridgetop..... South to Southeast 3-7 mph.

Slope/Valley..... Downdrainage 6-10 mph with a few gusts through 2100 then decreasing.

Downslope 2-4 mph after 2100.

Weather Forecast for Monday:

Weather: Smoke and haze. Partial inversion lift after 1400.

High Temperature ... 87-93 (Midslopes/ridges)

Min RH (Ridgetops).....18-24%

Min RH (Valleys).....15-20%

20-FOOT WINDS:

Ridgetop..... Southeast 8-14 mph with gusts to 20 mph.

Slope/Valley..... Upslope 4-8 mph with gusts up to 12 mph.

EXTENDED OUTLOOK for Tuesday through Wednesday

Little change expected under high pressure. The persistent inversion with late afternoon partial lift will continue under a southwest flow aloft. Little change in RHs or temperatures

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 41	TYPE OF FIRE: Wildland Fire
FIRE NAME: South Complex	OPERATIONAL PERIOD: 0600-1800, August 23, 2015
DATE ISSUED: August 22, 2015	TIME ISSUED: 2000
UNIT: Shasta Trinity N.F.	SIGNED: Sid Hall, FBAN <i>Sid Hall</i>

WEATHER SUMMARY:

**** See attached Fire Weather Forecast in IAP ****

Key Weather Factors Influencing Fire Behavior:

Fair overnight humidity recovery still allowed the fire to remain active through the night. Continued hot, dry and windy conditions will bring active fire behavior and movement.

ERC: 58 Hayfork RAWs (Trend +2) Average for this RAWs

FUELS:

Live Fuel Moisture: Greenleaf manzanita 92% (Hayfork Area)

Expected FDFM: 4% Unshaded 7% Shaded

1000 Hr. FM: 10%

Probability of ignition: 80% unshaded, 70% shaded.

FIRE BEHAVIOR:

**** Based on the Warmest, Driest, Windiest Conditions Forecasted ****

YESTERDAY:

Clear air in the SE corner of the fire in the morning allowed Div Y to conduct burn out down Gates Creek. The fire was active there with short upslope runs and group torching. There was some roll out and short runs in Div M as fire continued working down towards the S. Fork of the Trinity River. In areas where the smoke was heavier the fire behavior was limited to backing and flanking surface fire spread with occasional single/group tree torching during most of the day.

GENERAL:

*Expect the fire to become significantly more active if the inversion lifts and skies clear.

*Fire movement will be predominately backing and flanking, but expect upslope runs if the fire becomes established in the bottom of the drainages or slopes. Be aware of roll-out and potential slope reversals.

*Expect group torching, short crown runs and spotting up to 1/4 mile.

***Brush Fuel Types:** Expect head fire spread rates of 15-25 ch/hr with flames lengths 6-8 ft.

Backing fire spread rates of 1-2 ch/hr with flame lengths 1-2 ft.

***Timber Fuel Types:** Expect head fire spread rates of 6-10 ch/hr with flames lengths 4-6 ft.

Backing fire spread rates of 1-2 ch/hr with flame lengths 2-3 ft.

SPECIFIC:

Div M: The fire will continue to clean out unburned pockets of fuels. Spotting across the S. Fork of the Trinity River remains the primary concern.

Div Z: The fire is established in the head of Olson Creek and continues to work downslope. Firing operations are started along the 4N18 road and this fire should start working its way downslope to the south. Short crown runs are possible in areas of tighter canopy cover.

Div Y: The fire will continue to move south over Rays Peak and firing operations have brought fire down towards the Div. X/Y break. Short crown runs are possible in areas of tighter canopy cover. Be heads up for spotting across Hayfork Creek.

East side of the fire: The fire doesn't seem too want to burn in the brush and surface fuels from the 2008 Miners fire, but be heads up for spots into dry punky logs on the east side of the dozer line.

AIR OPERATIONS:

Air operations may be limited due to the poor visibility caused by the smoke.

Sunrise: 0630 Sunset: 2000

SAFETY:

Pay attention to changing weather condition and the possibility of clearing skies. Fire behavior will dramatically increase in clear air.

Be heads up during mop-up in timber areas. The fire has weakened the root systems of lots of trees and it won't take much wind to bring these trees down.

Local thresholds for increased fire behavior: Temps > 75, RH < 20%, 20' winds > 15 mph, 1000 hr. < 10%

USE **L**OOKOUTS, **C**OMMUNICATIONS, **E**SCAPE ROUTES, **S**AFETY ZONES

Transportation:

- 60 Road maybe impacted by operations from time to time. Use road guards to control traffic during operations on the road.
- Road 301 may become impacted by the fire. Be prepared to control traffic if the fire crosses the creek.
- 60 Road maybe impacted by operations from time to time. Be ready for road closures.
- **CAMP** - Runway 32 is both a large cross walk and the main road through camp. Drive very slow and watch for traffic and pedestrians. Drivers and walkers alike need to make this work.
- There are still plenty of locals driving around the area too fast.
- Keep your own speed down. It takes work to deliberately drive slow. Keep at it.

Fireline:

- Only mop up as deep as needed to secure the line.
- Very steep terrain. Watch footing and choose path carefully
- Watch for rolling material. Post lookouts and call out rocks
- Gloves and eye protection must during mop-up.
- Air operations - Smoke has limited aircraft so don't count on it.
- PG&E lines with active fire beneath will arc in smoke. Keep distance.

Environment

- Poison Oak
 - *This is poison oak country; it's all over*
 - *Wash hands before touching face or body to avoid spread*
 - *Change out nomex at supply if overly exposed during shift*
- Fatigue due to smoky conditions likely to increase. Keep an eye on your crews and have them evaluated earlier rather than waiting to see if they improve.
