FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 51	TYPE OF FIRE: Wildland Fire
FIRE NAME: South Complex	OPERATIONAL PERIOD: 0600-1800, August 28, 2015
DATE ISSUED: August 27, 2015	TIME ISSUED: 2000
UNIT: Shasta Trinity N.F.	SIGNED: Bob Patton FBAN 

WEATHER SUMMARY:

**** See attached Fire Weather Forecast in IAP ****

Key Weather Factors Influencing Fire Behavior:

Continued hot, dry today will accelerate fuels to burn out within the perimeter.

ERC: 55 Hayfork RAWS

FUELS:

Live Fuel Moisture: Greenleaf manzanita 92% (Hayfork Area)

Expected FDFM: 4% Unshaded 7% Shaded (lower elevation) 6% unshaded 9% shaded (higher elevation)

1000 Hr. FM: 10%

Probability of ignition: 80% unshaded, 60% shaded cloudy (low elevation) 60% unshaded 40% shaded or cloudy (high elevation)

FIRE BEHAVIOR:

**** Based on the Warmest, Driest, Windiest Conditions Forecasted ****

YESTERDAY:

Fire activity yesterday was minimal. There was torching and uphill runs as a result from yesterdays burn operation in Division Y. Division M reported a few hotspots in the vicinity of the line that were suppressed, There is surface fire and burning snags in Div W that are moving slowly into the 2008 Miners burn scar. The fire activity overall is within the perimeter as islands and available fuel continue to burn out.

GENERAL:

Expect the fire activity to increase if the inversion lifts and skies clear around 1400.

Fire movement will be predominately be inside the perimeter, Expect backing and flanking, and upslope runs if the fire becomes established in the bottom of the drainages or slopes. Be alert for rollout and potential slope reversals.

If torching, group torching, short crown runs occur expect spotting up to 1/4 mile.

There will be a 6000' cap on instability, reducing the potential for large column build.

ROS: 0-25 ch/hr

ROS Backing: 0-2 ch/hr

SPECIFIC:

Div M: There could be residual heat in the masticated fuels from two days ago. Otherwise, minimal fire behavior is anticipated.

Div H/Z: Fuels will continue to burn out.

Div Y: Firing operations should be complete and down to Hayfork Creek. Watchout for spotting across the creek to the south in the afternoon as upvalley winds become stronger. There could be eddying near bends in the creek.

Div W: Fire will persistently move east and downhill if left unchecked at a low ROS.

AIR OPERATIONS:

Air operations may be limited due to the poor visibility caused by the smoke.

SAFETY:

Do not become complacent as the weather changes. It is still hot and dry today. Keep you head in the game and be safe.

Local thresholds for increased fire behavior: Temps > 75, RH <20%, 20' winds >15 mph, 1000 hr. < 10%

Change in Weather

- Anticipate wind shifts as the storm system approaches. **L.C.E.S**
- Rain slick roads are possible by the end of shift. Continue to drive carefully and slowly.
- Muddy terrain poses a slipping/ falling hazard. Be alert to the potential in your work area. Evaluate the need to be there if precipitation occurs.

Road 60

- Due to fire and smoke conditions, we will continue to enforce a hard closure on road 60 between DP62 & DP63.
- Snags will continue to fall in the closure area where the recent firing operations took place. Be especially alert in areas that still have heat.

Key Points for leadership to create a safe work environment;

Lead by example! You cannot expect your subordinates to do the right thing if you don't do it yourself.

Emphasize Safety! Use the tools available to you like the IRPG, Safety Message and Fireline Hand Book. Take time and formulate discussion topics to review with your crew.

Remember! If you make safety a priority you will foster a culture of safety in your people. This is accomplished by your actions not just words alone.
