FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 55	TYPE OF FIRE: Wildland Fire
FIRE NAME: South Complex	OPERATIONAL PERIOD: 0600-1800, August 31
DATE ISSUED: August 30, 2015	TIME ISSUED: 2000
UNIT: Shasta Trinity N.F.	SIGNED: Bob Patton FBAN

WEATHER SUMMARY:

**** See attached Fire Weather Forecast in IAP ****

Bushman

Key Weather Factors Influencing Fire Behavior:

Unseasonably cool temperatures and high relative humidity is preventing fuel to dry out and become available to burn on multiple aspects and elevations. Fine fuels southerly aspects that face the sun could become available to burn in the afternoon. Dead needlecast is falling within the burn, but is not continuous enough to spread.

FUELS:

Live Fuel Moisture: Greenleaf manzanita 92% (Hayfork Area)

Expected FDFM: 12% (Under the canopy moisture of extinction for grass fuel model) 7% in the sun

1000 Hr. FM: 12%

FIRE BEHAVIOR:

**** Based on the Warmest, Driest, Windiest Conditions Forecasted ****

YESTERDAY:

The fire behavior yesterday was limited to stump holes and heavy fuels burning out within the perimeter. No fire movement outside the perimeter was observed.

GENERAL Day and Night:

The dead fuels under the canopy from the recent precipitation are generally wet or moist. Cooler temperatures with higher humidity are in the forecast for the next few days and nights. With cooler temperatures, higher humidity, it could take time for the dead fuel moistures to drop especially in shaded areas. The fire behavior today will be limited to heavy fuels and stump holes continuing to burn out. Surface fuels in alignment with the sun could become available to burn if adjacent to a heat source.

ROSS: 0-.25

SPECIFIC:

All Divisions: Minimal fire activity is anticipated.

AIR OPERATIONS:

Forecast calls for clear skies. No problems anticipated.

SAFETY:

Watch your vehicle speed on dirt surface and main forest roads.

Local thresholds for increased fire behavior: Temps > 75, RH < 20%, 20' winds > 15 mph, 1000 hr. < 10%

SAFETY MESSAGE

South Complex

August 31th

LOOKOUTS, COMMUNICATIONS, ESCAPE ROUTES, SAFETY ZONES

Chippers- Be alert when working around chippers. Brief your crews and have them review and sign the Job Hazard Analysis!

Heavy Equipment- As suppression repair continues, maintain your situational awareness. Be aware that the operator of the heavy equipment may not be able to see you. Learn the hazards associated with the equipment you may be working around.

GET HOME SAFE!!

The **End State** for this incident is everyone goes home safe. Part of your response to the **South Fire** includes the return home.

Carefully plan your demob process.

- Ensure the driver/operator is well rested and ready for the return trip.
- Equipment checks are essential. In addition to your inspection, you should be following your agency's policy for daily apparatus/equipment checks.
- Slow down when driving in and around camp. It is easy to get in a hurry at this point and let your guard down.
- Do not exceed maximum allowable driving limitations. 10 hrs behind the wheel for a single driver. Documentation of mitigation measures used to reduce fatigue is required for drivers that exceed their 16 hr work shifts.
- Pre plan breaks in your trip. This helps to prevent you from driving too long without a rest.
