# ROUTE COMPLEX CA-SRF-1476 MAD RIVER COMPLEX

CA-SRF-001433

IAP

DAY Saturday 0700-1900 August 22, 2015

Today's discussion is from the First Aid / Health Category.

#### **Fatigue**

Accumulated (Chronic) Fatigue is defined as fatigue from which normal rest does not produce recovery. Accumulated fatigue is often caused by extended periods of activity with inadequate recovery periods, which results in decreased productivity, compromised immune function, and reduced alertness. Fatigued workers perform poorly, behave carelessly, tolerate greater errors and become inattentive.

Extended fire assignments and long fire seasons often lead to abnormal levels of fatigue in fire fighters. Fatigue creates an inability to remain focused and distracts individuals from their assigned duties. Divided attention and the diminished capacity to concentrate is a safety hazard that may put you and others at risk.

Recognizing signs of fatigue is critical to avoiding personal injury, lost workdays, and decreased team efficiency. Supervisors must attempt to recognize, pursue, and mitigate symptoms of fatigue. Some signs of fatigue are:

- Decreased motivation and low morale.
- Increased irritability and depression.
- Confused, poor problem solving.
  - Poor abstract thinking
  - o Poor attention/decisions
  - Poor concentration/memory
- Altered state of alertness.
- A marked increased or decreased awareness of surroundings.

#### ICS Form 202 INCIDENT OBJECTIVES

Noticent Name
 Route Complex
 Mad River Complex

2. DATE 8/21/15 3. TIME 1300

- 4. OPERATIONAL PERIOD (DATE/TIME) 8/22/2015 0700-1900
- 5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)

#### Management Objectives:

#### Safety:

We will provide for Firefighter and Public Safety by managing risk based on exposure and probability of success, while protecting private property and other resource values.

#### Suppression Actions:

We will minimize suppression impacts to Archaeological Sites, Anadromous Fisheries, Water Quality, and spread of Invasive Weeds by implementing suppression tactics that follow Management Guidelines and Best Management Practices. We will utilize Resource Advisors to help identify sensitive sites and develop tactics to minimize/mitigate actions.

#### Leader's Intent:

#### I expect the following:

- Treat everyone with respect.
- Maintain and improve public relations with local communities and cooperators
- All fires in the complex will be controlled using Full Suppression strategies (e.g. direct attack, indirect attack, point protection), based on safety to firefighters and the public.
- 6. WEATHER FORECAST FOR OPERATIONAL PERIOD See Attached.
- 7. GENERAL SAFETY MESSAGE See Attached.

# INCIDENT WEATHER FORECAST

FORECAST NO: 12

PREDICTION FOR: Day SHIFT

SHIFT DATE STARTS: Saturday, August 22, 2015 FORECAST ISSUED: 1400 Friday August 21, 2015

ROUTE AND MAD RIVER COMPLEXES
UNIT: USFS Six Rivers & Shasta T NF

SIGNED: Dan Borsum

Incident Meteorologist

WEATHER DISCUSSION: Warmer with lower RH's Today

It will be warmer with lower RHs today as a thermal trough lingers over the region. Humidity will be critically low over most of the complexes. Upslope winds will dominate the light ridgetop winds this afternoon. The light winds will cause smoke movement to be limited slowing the lift of the inversion. There will be a wind shift along the ridges by this evening with light southerly winds tonight and Sunday. It will be a little more unstable on Sunday with a slight increase in temperatures and but higher RHs.

TODAY: Sunny and smoky. Warmer.

TEMPERATURE: Below 3500ft 90-95F

3500-4500ft 85-90F

Abv 4500ft 83-88F

**HUMIDITY:** 

Below 3500ft 15-20%

3500-4500ft 15-20%

Abv 4500ft 10-15%

20 FT WINDS:

SLOPES/VALLEYS:

Upslope/upvalley 4 -8 mph.

RIDGES:

East 3 to 5 mph in the morning becoming erratic 1-3 mph after

1200.

TRANSPORT WIND:

INVERSION:

Southeast 2-5 mph

Moderate inversion breaking around 1500.

**OUTLOOK FOR TONIGHT:** Partly cloudy and continued smoky

TEMPERATURE: Below 3500ft 55-60F

3500-4500ft 58-63F

Abv 4500ft 60-65F

**HUMIDITY:** 

Below 3500ft 70-75%

3500-4500ft 35-40%

Aby 4500ft 18-23%

20-FOOT WIND:

SLOPE/VALLEY:

Downslope 3-5 mph

RIDGETOP:

Becoming Southeast 3-6 mph

TRANSPORT WIND:

East-southeast 4-7 mph

OUTLOOK FOR SUNDAY: Partly cloudy.

TEMPERATURE: Below 3500ft 92-97F

3500-4500ft 87-92F

Aby 4500ft 84-89F

HUMIDITY;

Below 3500ft 15-20%

3500-4500ft 15-20%

Abv 4500ft 15-20%

20 FT WINDS:

SLOPES/VALLEYS:

Upslope/upvalley 3 -7 mph

RIDGES:

South 4-8 mph

TRANSPORT WIND:

South 5-10 mph

INVERSION:

Weak inversion breaking around 1300

FIRE BEHAVIOR FORECAST							
FORECAST NUMBER: #11	TYPE OF FIRE: Wildland Fire						
FIRE NAME: Route Complex/Mad River Complex	OPERATIONAL PERIOD: Day 08/22/15						
DATE ISSUED: 08/21/2015	TIME ISSUED: 2100 hours						
UNIT: Six Rivers/Shasta-Trinity National Forest	SIGNED: Tim Metzger, FBAN						
INPUTS							

WEATHER SUMMARY: See Attached Fire Weather Forecast

OUTPUTS

#### FIRE BEHAVIOR

#### Day Shift

Active fire behavior can be expected upon arrival to your divisions due to very low relative humidity and poor recoveries. A warming and drying trend will be over the fire area today. The biggest change today will be the wind direction. Surface fire and individual tree/group tree torching can be expected as the fire continues to back into the valley bottoms below 3500 ft. Areas of concern remain the south east and south west portions of the Lassic fire, and Division A, C, D on the Johnson fire. Interior portions of the fire will continue to increase in activity as the day progresses and will increase in activity from what we experienced over the last couple of days. Snags continue to pose problems and cross containment lines. The fires are burning primarily in a fuel model 2, 8 9, 10, and generally, there will be a high probability of spotting outside of control lines where slope and fuels align (upslope spread) or downwind of any significant column development(spotting of .6 miles). Spotting of up to .75 miles has been observed on the Johnson fire with slightly lower humidity. Pay attention to the winds today as portions of the fire will be exposed to a change in the wind direction especially with low forecasted humidity's.

1000 hour (heavy) fuels are calculated at 8-10%. Live woody is 2/3 cured and is becoming available to burn. Fire will carry through deciduous species when supported by concentrations of ground fuels in exposed areas (except north aspects). Probability of ignition will be near 80% on exposed ridges and southerly aspects. Divisions in patrol status should patrol early and often with the change in wind direction.

Indicators for Increased Fire Activity

Relative Humidity <19%, Winds >6mph, Temperatures >90F, 1000 fuel moistures <14%,

#### FIRE BEHAVIOR: Route Complex

**Division A,C,D**, Expect active backing fire again today and be on the look-out for slope reversal below the control line in the pilot Creek drainage. Expect any upslope spread to aggressively seek ridgelines. Burn out operations should take advantage of downslope winds in the late afternoon evening hours as fuels are at the lowest moistures and humidity's are on the rise. Modeling indicates that spotting 0.6 miles is possible in the afternoon. Patchy burned areas in the interior of the fire have the potential to become active. Winds will shift and come out east in the afternoon and maybe problematic for burn out operations.

**Division E:** Smoldering and creeping, Interior portions of the fire will increase in activity with the warmer and drier weather. Be on the lookout for spotting. Watch-out for fire weakened trees and snag hazards.

Division, W:. Smoldering and creeping. Un-burned areas and interior portions have the potential to become more active than the previous two day. Division N,P F,H: Smoldering and creeping. Be on the lookout for burning snags and fire weakened trees.

#### LASSIC FIRE:

BRANCH II The eastern portion of the fire will progressively back down slope into the Van Duzen creek drainage. Expect active backing under 3500 ft <2 ch/hr. The upper elevations will see individual tree torching and short sustained crown runs in the late afternoon when aligned with slope and fuels typically elevations above 3500 ft. Be on the lookout for rolling material on the steep slopes and the potential for a slope reversal. Firing operations should take advantage of upslope upvalley winds as the general and ridge top winds may pose problems.

The southern portion of Branch II will see the greatest spread. Expect individual tree torching and short sustained crown runs on the exposed slopes and ridges. Fire will progress down ridgelines due to the extremely low RH and slope over into the valleys.

**BRANCH I**, little van dozen creek area, the fire will continue to back into the drainage. Be on the lookout for any fire that gets established on the western portion of the creek. Expect aggressive upslope spread toward containment lines characterized by short duration crown fire and individual group tree torching. Spotting of up to .6 miles can be expected. Division Z and Y should see favorable winds today with the South East winds. Expect single and group tree torching and short intense crown runs where fuels and slope align. Winds will be favorable for firing operations

#### 36 GROUP

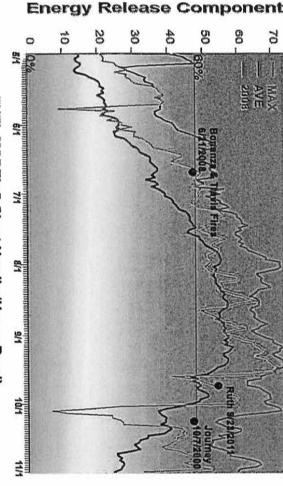

Be on the lookout for Rolling material, snags and fire weakened green trees. Interior creeping and smoldering.

#### AIR OPERATIONS:

Moderate inversion will affect air operations, but should begin to dissipate around 1500.

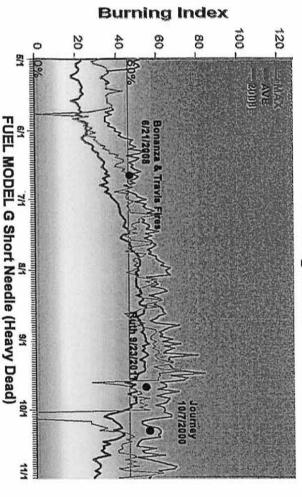

**SAFETY:** There is a great deal of uncontrolled fireline that will react to the changing conditions associated with the drier air mass that has entered the fire area. Track the weather and anticipate these changes!!!

# PAST EXPERIENCE I LOCAL KNOWLEDGE

below 14, when BI exceeds 46, and when ERC exceeds 48 topography, fuels, and accessibility ('Large fires'= 50 acres). Wildfires become a problem @ 50 acres on the Six Rivers NF due to Large fires become more frequent when 1000 hour fuel moistures drop

South Fork Mountain affects weather in the area: Funnels the wind and direction of fire spread in the area. Afternoon winds W/NW along Ruth Lake Corridor greatly influence

influences thunderstorm development and movement

(large fires can and do occur at lower indices)

with marijuana gardens and arson fires. Other Watchouts not related to weather and indices; dangers associated

60% = 60th Percentile means 40% of all days studied had a Average = Shows Peak Fire Season Maximum = Highest BI by day for 2003-2014 Graph Interpretation, Burning Index:

# SAFETY MESSAGE Route Complex Mad River Complex

Saturday 22, 2015

# Major Hazards

- The hazards we've been talking about are still with us. Take no short cuts; rely on your training and experience. Don't let the late stage of this incident allow you to become complacent. Stay focused and keeps your head in the game.
- ERCs are near record high levels. Live and dead fuel moistures are extremely low -Spotting potential is high with Probability of Ignition near 70%. Spotting up to 3 miles possible.
- Driving safety remains as a primary focus of concern. Continue your emphasis on driving safety.

# Changed or Changing Conditions

- Crews/engines are spread thin (fewer people spread over larger area)
- As you work through the day, your progress may render escape routes ineffective.
- Additional burn periods have hidden unseen consequences not readily visible to a casual observance.
- Fatigue

# **Mitigations**

- Change continues as incidents are merged. Anticipate, plan ahead. PL5 means resources are scarce - Contingency, what will you do if orders aren't filled?
- · Monitor weather and fire behavior forecasts. Listen for updates and alerts during your shift. Monitor the sky and local conditions in your work area. Check with observers/lookouts, adjacent forces.
- · Recognize the subtle effects fatigue can have on your performance. Take frequent breaks and pace yourself for the long haul!
- "Slow is fast" --- walking...driving ---take your time (safe practices actually save money and improve production) Continually Assess - Reassess work location, escape routes

Done D Relione Dan LeCrone Tim Benedict Bruce Martinek

#### 6. Control Operations/Work Assignments:

- · Continue prepping along Pilot Ridge Road.
- · Monitor fire edge along Pilot Creek for spots across creek.
- · Hold check line at D/C break near Owl Creek.
- Assess opportunity to go direct from Div. D/C break south around Owl Creek.
- · Begin planning and installing plumbing needs preparing for burnout of indirect line.

#### 7. Special Instructions:

- · Leaving ICP to Line, use Route 1. Return to ICP via 412 Rd. Watch for increased local traffic.
- · Back haul trash.
- · Track all water use from water points. Provide daily weather observations.
- YELLOW AND WHITE STRIPED FLAGGING WITH RED OR PINK FLAGGING FOR VISIBILITY MEAN NO DOZER WORK.

#### 6. Control Operations/Work Assignments:

- · Conduct firing operations in the Little Van Duzen and 2S08 Roads
- · Coordinate with CalFire Firing Group

#### 7. Special Instructions:

Use caution around snags and flag as needed for safety. Identify snags to be fallen with appropriate tape.

Use caution while driving on all roads due to narrowing and other roadway hazards. Use caution while driving on Highway 36.

\*\*DO NOT OPEN RECREATIONAL GATES ON FOREST\*\*

Backhaul excess equipment and trash.

Verify status of all accountable property. GPS location when moved or placed and report coordinates to supply.

Utilize spill kits under Mark III pumps.

CalFire to contact on incident command channels.

Missions and ordering process: Bucket work as requested. Recon as smoke conditions allow. Utilize HLCO and Air Attack to assess smoke conditions for aerial operations. Order all aerial services through Aerial Supervision (if up); if no Aerial Supervision order all helicopters through Dinsmore Helibase, regardless of aircraft location (Mad, Rohnerville, or Dinsmore). (Helibase will call Air Operations for any unplanned operations or for borrowing of aerial resources by other fires.

# MEDICAL EMERGENCY COMMUNICATION PROCEDURE FOR THE INCIDENT WITHIN AN INCIDENT

#### MEDIVAC INFORMATION

Contact Communications on the Command Channel, Communications will contact Command & General Staff.
Declare the nature of the emergency: Traumatic Injury Medical Illness
Is the injury/illness:
URGENT-RED Life ThreateningPRIORITY-YELLOW SeriousROUTINE-GREEN Minor
If Life Threatening request that the designated frequency be cleared for emergency traffic.  Communications will broadcast on Command Radio the channel is for Emergency Traffic Only;
Identify the on-scene Incident Name:
Identify the on-scene Incident Commander:
Identify the on-scene Care Provider:
Identify the number of injured/ill: Identify the nature of the injury/illness:
Is the patient conscious? Yes No
Is the patient experiencing any difficulty breathing? Yes No
What is the mechanism of injury/illness?
Specific location of the patient (nearest DP / Helispot):
Is a helicopter needed for evacuation? Yes No
Pick-up point, route for ground transportation:
Are additional EMTs needed? Yes No
Any additional equipment or resources that are needed?

Identify any changes in the on-scene IC or medical personnel as they occur.

Contact Communications when the Emergency has ended and the radio channel can be cleared for normal traffic. Communications will broadcast on Command Radio channel resumption of normal radio traffic.

# **HUMAN RESOURCE MESSAGE**

Route and Mad River Complex(s) - 08/22/2015

#### **Human Resources**

Human Resources are our most important component to successful fire suppression. Team Work, Cooperation and Mutual Respect are keys to managing this or any incident. This incident needs your efforts in maintaining a productive, harassment free environment.

#### Ain't it true ...

All employees have a *responsibility* to behave in a manner ensuring a work environment where people are treated fairly and respectfully, just as they have a *right* to work in an environment that treats them fairly and with respect.

Failing to exercise your *responsibility* and/or honor another's *right* may result in poor working conditions, failing communications, and creates an unnecessary and undesired <u>Safety Issue</u>. Do the right thing...

HRSP on the Route/Mad River Fire - Chuck Sandau; (406) 698-6122

# Have a good and safe shift.

#### Think before you speak:

"It isn't pollution that's harming the environment. It's the impurities in our air and water that are doing it." - Al Gore; former Vice President.

"We are sorry to announce that Mr. Albert Brown has been quite unwell, owing to his recent death, and is taking a short holiday to recover." – Parish Magazine
