**Day Friday 0700-1900 August 28, 2015**

**TRANSFER OF COMMAND**

Risks to fireline personnel increase significantly during transfer of command periods regardless of the size or complexity of the incident. There is a high potential for fatalities, serious injuries, or incidents with potential during transfer of command periods (some have occurred in the past). Be proactive in mitigating the risks by proper implementation of LCES—Lookout, Communications, Escape Routes, and Safety Zones.

Factors for increased risks to fireline personnel during transition periods include:

- No, or poor, briefing of incoming personnel
- Lack of fire weather and behavior information, both forecast and observed
- Communications; face-to-face briefings may not be possible and radio frequencies may be overextended and/or changing due to the increased demands on the system.
- Initial attack resources may not have checked-in and the Incident Commander may not be aware of the number, type and location of all resources.
- Location of safety zones and escape routes may not be known and communicated to all resources.
- Not all Resources know who is in command.

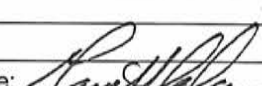

Mitigation actions to take:

- Lookouts: Post and maintain your own lookouts.
- Communications: Maintain existing communications with your own and adjacent resources, as well as your original supervisor, while you are developing communications with incoming adjacent resources and your new supervisor.
- Escape routes and safety zones: Identify escape routes and assure incoming resources are aware of their locations; be aware that your original escape routes and safety zones may no longer be accessible due to changing fire behavior or your increased distance from them.
- Transition at the morning briefing
- Utilize the Incident Response Pocket Guide transition checklist

<b>ICS Form 202 INCIDENT OBJECTIVES</b>		1. INCIDENT NAME Route Complex Mad River Complex	2. DATE 8/27/15	3. TIME 1300	
4. OPERATIONAL PERIOD (DATE/TIME) 8/28/2015 0700-1900					
5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)					
<b>Management Objectives:</b>					
<b>Safety:</b>					
We will provide for Firefighter and Public Safety by managing risk based on exposure and probability of success, while protecting private property and other resource values.					
<b>Suppression Actions:</b>					
We will minimize suppression impacts to Archaeological Sites, Anadromous Fisheries, Water Quality, and spread of Invasive Weeds by implementing suppression tactics that follow Management Guidelines and Best Management Practices. We will utilize Resource Advisors to help identify sensitive sites and develop tactics to minimize/mitigate actions.					
<b>Leader's Intent:</b>					
<i>I expect the following:</i>					
<ul style="list-style-type: none"> <li>• Treat everyone with respect.</li> <li>• Maintain and improve public relations with local communities and cooperators</li> <li>• All fires in the complex will be controlled using Full Suppression strategies (e.g. direct attack, indirect attack, point protection), based on safety to firefighters and the public.</li> </ul>					
6. WEATHER FORECAST FOR OPERATIONAL PERIOD - See Attached.					
7. GENERAL SAFETY MESSAGE - See Attached.

# INCIDENT WEATHER FORECAST

FORECAST NO: 24  
 PREDICTION FOR: DAY SHIFT  
 SHIFT DATE STARTS: Friday, August 28, 2015  
 FORECAST ISSUED: 1800 Thursday, August 27, 2015

ROUTE AND MAD RIVER COMPLEXES  
 UNIT: USFS Six Rivers & Shasta T NF  
 SIGNED: Scott Weishaar/Mary Wister (T)  
 Incident Meteorologist 

**WEATHER DISCUSSION: Rain tonight through Saturday morning**

A Pacific frontal system will move across northwest California tonight. It will be mostly cloudy today with cooler temperatures and higher RH's. The front will spread precipitation across the fire tonight through Saturday morning. Rainfall amounts of 0.1" to 0.25" can be expected. The strong southwest flow aloft will occasionally mix down along the ridgetops with gusts to 25-30 mph.

**TODAY:** Mostly cloudy. Cooler with higher RH.

**TEMPERATURE:** Below 3500ft 80-85F      Abv 3500ft 73-80F

**HUMIDITY:**      Below 3500ft 25-30%      Abv 3500ft 30-40%

**20 FT WINDS:**

**SLOPES/VALLEYS:** Upslope/upvalley 3-6 mph.

**RIDGES:** Southwest 10-20 mph with afternoon gusts to 30 mph.

**TRANSPORT WIND:** South-southwest 15 mph

**INVERSION:** Shallow inversion in the early morning.

**TONIGHT:** Cloudy. Rain likely after midnight.

**TEMPERATURE:** 55-62F

**HUMIDITY:**      Below 3500ft 90-95%      Abv 3500ft 75-80%

**20-FOOT WIND:**

**SLOPE/VALLEY:** Downslope 2-7 mph

**RIDGETOP:** South 10-15 mph. Gusts to 25 mph along exposed ridges.

**TRANSPORT WIND:** South 15 mph

**CHANCE OF WETTING RAIN (>= 0.10"): 70 percent**

**OUTLOOK FOR SATURDAY:** Mostly cloudy. A chance of rain in the morning. A slight chance of afternoon showers. **Low clouds and reduced visibility due to rain.**

**TEMPERATURE:** 70-80F

**HUMIDITY:**      35-45%

**20 FT WINDS:**

**SLOPES/VALLEYS:** Upslope/upvalley 4-7 mph.

**RIDGES:** Southwest 12-22 mph with gusts to 35 mph.

**TRANSPORT WIND:** South-southwest 15-20 mph

**CHANCE OF WETTING RAIN (>= 0.10"): 30 percent**

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> #24	<b>TYPE OF FIRE:</b> Wildland Fire
<b>FIRE NAME:</b> Route Complex/Mad River Complex	<b>OPERATIONAL PERIOD:</b> Day 08/28/15
<b>DATE ISSUED:</b> 08/27/2015	<b>TIME ISSUED:</b> 2100 hours
<b>UNIT:</b> Six Rivers/Shasta-Trinity National Forest	<b>SIGNED:</b> Tim Metzger, FBAN 

### INPUTS

**WEATHER SUMMARY:** See Attached Fire Weather Forecast

### OUTPUTS

#### FIRE BEHAVIOR

##### Day Shift

Mostly cloudy with higher humidity's and cooler temps with gusty winds. Expect active surface fire and individual tree/group tree torching due to the critically low fuel moistures. Higher humidity's will slightly moderate fire behavior from what we experienced yesterday and you can expect that any upslope movement will aggressively seek ridgelines with spotting downwind of any significant column development. Spotting of up to .2 miles can be expected. Areas of concern remain Division B,T, on the Lassic fire, and Division W, on the Johnson fire. Be on the lookout for increased activity in the interior portions of the fire that may compromise control lines with the gusty southwest winds. Critically low fuel moistures are contributing to persistent burning and complete consumption of large woody fuels.

Forecasted ERC's are 60, and BI is 48. 1000 hour (heavy) fuels are calculated at 8-10%. Live woody is 2/3 cured and is becoming available to burn. Fire will carry through deciduous species when supported by concentrations of ground fuels in exposed areas (except north aspects).

##### Indicators for Increased Fire Activity

**Relative Humidity <19%, Winds >6mph, Temperatures >90F, 1000 fuel moistures <14%,**

#### FIRE BEHAVIOR:

##### Route Complex

**Division A:** Primarily smoldering and creeping. Be on the lookout for undetected spots and areas of patchy burning on SE portion of the division.

**Division F:** Smoldering and creeping. Watch-out for fire weakened trees and snag hazards.

**Division, W:** Smoldering and creeping. Un-burned areas and interior portions and patchy burned areas will progressively become active as the day continues. Pay close attention to the handline where it ties into the trinity river for undetected spots.

**Division N,P,H:** Smoldering and creeping. Be on the lookout for burning snags and fire weakened trees. Interior islands may react and become active with the southerly flow.

#### LASSIC FIRE:

**BRANCH II:** Smoldering and creeping (**Division A**). In **Division B**, expect to see **active surface fire with an occasional individual/group tree torching** but higher forecasted humidity's should begin to moderate fire behavior by early afternoon. Be on the lookout for any slope reversal that could occur as fire will still aggressively seek ridgelines due to the extremely low fuel moistures. Unburned fuels between the fires edge and the road system have a high probability of spotting across the road as downslope winds in the evening will push smoke and embers downslope across the road. Variable winds and eddying will pose challenges to firing operations and ability to keep fire upslope of the 11 road. Fuel moistures are critically low and very receptive to spotting.

**BRANCH I:** Division Y, Z, expect smoldering and creeping and be on the lookout for increased activity in the interior portions of the fire with the forecasted gusty winds. In Division T, there is the potential for single and group tree torching and short duration crown runs below the containment lines. Be on the lookout for un-detected spot fires. Ridgetop locations are favorable for rapid fire growth due to the persistent drying of fuels from the poor nighttime humidity recoveries and low daytime humidity's that have been occurring. Be on the lookout for increased activity in the interior portions of the fire.

##### Division L

Remain in communications and keep appraised of potentially threatened areas.

#### AIR OPERATIONS:

Weak inversion will affect air operations, but should begin to dissipate around 1100.

**SAFETY:** Benign fire behavior leads to complacency. LCES, and good situational awareness is the key to your safety

## Fire Danger Rating Area 130 Energy Release Component

FUEL MODEL G Short Needle (Heavy Dead)

## Fire Danger Rating Area 130 Burning Index

FUEL MODEL G Short Needle (Heavy Dead)

### Fire Danger Areas 130

- \* Mad River Ranger District
- \* Six Rivers National Forest
- \* NW CA - Region 5

### Weather Stations Used (NWCG Standards):

- \* 040507 Mad River
- \* 040508 Ruth

### Local Thresholds - WATCHOUT:

Combinations of any of these factors can greatly increase fire behavior: 20' Windspeed over 6 mph; RH less than 19%; Temperature over 90; 1000-hour Fuel Moisture less than 14. Large fires become more frequent when BI exceeds 46 and when ERC exceeds 48.

### Graph Interpretation, Energy Release Component:

Maximum = Highest ERC by day for 2003-2014  
Average = Shows Peak Fire Season  
60% = 60th Percentile means 40% of days studied had an ERC above 48.

### PAST EXPERIENCE | LOCAL KNOWLEDGE:

Wildfires become a problem @ 50 acres on the Six Rivers NF due to topography, fuels, and accessibility (\*Large fires = 50 acres). Large fires become more frequent when 1000 hour fuel moistures drop below 14, when BI exceeds 46, and when ERC exceeds 48 (large fires can and do occur at lower indices)

Afternoon winds W/NW along Ruth Lake Corridor greatly influence direction of fire spread in the area.  
South Fork Mountain affects weather in the area: Funnel the wind and influences thunderstorm development and movement.

Other Watchouts not related to weather and indices; dangers associated with marijuana gardens and arson fires.

### Graph Interpretation, Burning Index:

Maximum = Highest BI by day for 2003-2014  
Average = Shows Peak Fire Season  
60% = 60th Percentile means 40% of all days studied had a BI above 46

# ***SAFETY MESSAGE***

## ***Route Complex - Mad River Complex***

Thursday 28 August, 2015

### **Major Hazards**

- Steep terrain.
- Rocky slopes and loose soils.
- Dead and down debris making travel difficult.
- Lack of Focus

### **Changed or Changing Conditions**

- Transition with new team
- *New resources coming on incident*- Orientation to work environment, organization, communications.

### **Mitigations**

- Determine the length of time needed to utilize escape routes and adjust trigger points accordingly. Base retreat times on the slowest member of the crew.
- New arrivals - get briefing - ask questions - ensure your mission is clear and understood before you begin work.
- Assess every work site---every work situation---as if it were your first time there! Keep our collective "head in the game" ... a LOT of hard work remains!
- Identify IAP supervisors and verify assignment, location, supervisors/contacts and communication frequencies.

\* IRPG - Risk Management - Page 1 of Green Section. \*

# AIR OPERATIONS SUMMARY

PREPARED BY: Dean Bitterman/Lori Clark

PREPARED DATE/TIME: 08/27/2015 2000

1. INCIDENT NAME: Route/Mad River Complex      2. OPERATIONAL PERIOD DATE:08/28/15      START TIME: 0800      END TIME: 2000      SUNRISE: 0638      SUNSET:1954

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.):

NOTE: Rotor wash, water drops and retardant drops can knock over fire weakened trees, and dislodge debris sending it rolling downhill. Ensure the target has been clearly identified, drops zones are clear of personnel, and that people are not in the natural path of the outflow (downhill from the drop).

4. MEDEVAC A/C:      5. MAD/ROUTE TFR 5/8084  
 (critical):See  
 medical plan  
 (non-critical):  
 (T3/T2 heli, 1<sup>st</sup> AV)  
 Freq: 126.450; 9000 ft. MSL

Terminate aerial operations at sunset unless risk assessment justifies operations into dusk conditions.

Missions and ordering process: Water drops (bucket, tanked, or gel) as requested. Utilize HLCO and Air Attack to assess smoke conditions for aerial operations. Order all aerial services through Aerial Supervision (if up); if no Aerial Supervision order all helicopters through Dinsmore Helibase, regardless of aircraft location (Mad, Rohnerville, or Dinsmore). (Helibase will call Air Operations for any unplanned operations or for borrowing of aerial resources by other fires. Sharing of resources will be coordinated with Incident AOBDS.

**Medical Emergency Procedures**

Upon occurrence of a "Major Medical" or accident involving significant injury on the fire line, the closest DIVS should respond directly to the scene to take control of the situation and direct necessary actions. If the DIVS is unavailable, the nearest fire line supervisor or leader needs to take charge.

- Route Communications will clear all radio traffic on the Incident Command Channel-use to coordinate response as needed. Do Not Use Names. Identify: 1) The on-scene Point Of Contact (i.e. TFLD Smith); 2) Describe the nature of the accident/illness.
- Obtain and facilitate nearest Medical Care Provider to the scene. On Scene IC is in charge of the scene. Identify to Communications the name of the On Scene Point of Contact and Medical Care Provider on site.
- Check nature of the problem, # of patients, status, vitals, mechanism of injury & location. (GPS if possible) Request additional resources if needed.
- Report the Severity of the Injury/Illness: Red, Yellow, Green.
- Coordinate and facilitate appropriate transportation for patient(s) according to severity. Medical Care Provider in charge of patient(s).
- Request additional resources / equipment as needed.
- Inform Communications of any changes on scene for Point Of Contact / Medical Care Providers.
- Identify the evacuation location. Remove all unnecessary personnel from the scene. Secure scene, identify witnesses for later investigation. Keep a log.

**LIFE SAFETY IS THE NUMBER 1 PRIORITY ON THIS INCIDENT**  
The term "Medivac" is for Emergency Medical Evacuations Only

# MEDICAL EMERGENCY COMMUNICATION PROCEDURE FOR THE INCIDENT WITHIN AN INCIDENT

## MEDIVAC INFORMATION

Contact Communications on the Command Channel. Communications will contact Command & General Staff.

Declare the nature of the emergency: Traumatic Injury \_\_\_\_\_ Medical Illness \_\_\_\_\_

Is the injury/illness:

URGENT-RED Life Threatening \_\_\_\_\_ PRIORITY-YELLOW Serious \_\_\_\_\_ ROUTINE-GREEN Minor \_\_\_\_\_

If Life Threatening request that the designated frequency be cleared for emergency traffic.

Communications will broadcast on Command Radio the channel is for Emergency Traffic Only;

Identify the on-scene Incident Name: \_\_\_\_\_

Identify the on-scene Incident Commander: \_\_\_\_\_

Identify the on-scene Care Provider: \_\_\_\_\_

Identify the number of injured/ill: \_\_\_\_\_ Identify the nature of the injury/illness: \_\_\_\_\_

Is the patient conscious? Yes \_\_\_\_\_ No \_\_\_\_\_

Is the patient experiencing any difficulty breathing? Yes \_\_\_\_\_ No \_\_\_\_\_

What is the mechanism of injury/illness? \_\_\_\_\_

Specific location of the patient (nearest DP / Helispot): \_\_\_\_\_

Is a helicopter needed for evacuation? Yes \_\_\_\_\_ No \_\_\_\_\_

Pick-up point, route for ground transportation: \_\_\_\_\_

---

Are additional EMTs needed? Yes \_\_\_\_\_ No \_\_\_\_\_

Any additional equipment or resources that are needed? \_\_\_\_\_

---

Identify any changes in the on-scene IC or medical personnel as they occur.

Contact Communications when the Emergency has ended and the radio channel can be cleared for normal traffic. Communications will broadcast on Command Radio channel resumption of normal radio traffic.

# HUMAN RESOURCE MESSAGE

Route/Mad River Fire Complex(s)– 08/28/2015  
HR Specialist - Chuck Sandau – Contact # (406) 698-6122

## **Question of the Day: What exactly defines the ‘work environment’ on an Incident Fire, and why do I need to know?**

In a wildfire situation, the **work environment** includes all areas in and around the incident base, fire lines, staging areas, R&R facilities, food service areas, vehicles and other modes of transportation ... anywhere employees work or where work-related activities occur, including travel.

*It's important to know what defines the work environment as behavioral expectations of the incident management team and the host agency apply to everyone working on the fire and in the work environment.*

You cannot engage in any behavior or conduct that has the purpose or effect of unreasonably interfering with an individual's work performance or the creation of an offensive or poor work environment. – That could be characterized as a “hostile” work environment ... *and that could get you sent home!*

---

"Today I went on thesaurus.com and searched ninjas. The computer told me 'ninjas could not be found'. Well played, ninjas, well played."

–unknown

# INCIDENT TRAINING MESSAGE

**All trainees on the incident need to check in with  
the Training Specialist (TNSP)**

- Training Specialist is located on “Main Street” at the ICP
- Blank forms and a “drop box” for registering your assignment are located in the Training Trailer across from Check In and next to Documentation.

**DEMOBING trainees need to close out with the  
Training Specialist in order to receive  
documented credit for your assignment**

- Bring a completed and signed ICS 225 or 226  
Performance Evaluation
- A completed Exit Interview Form
- Position Task Book

*ALL forms available at the training trailer*

**Trainers if you leave the incident before your trainee you will  
need to complete a Performance Evaluation for the time your  
trainee *was* assigned to you.**
