

Route Complex

CA-SRF-1476
P5J0N7(0510)

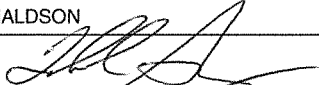

Monday-Tuesday August 10-11, 2015
DAY/NIGHT Operational Period
0600-0600

ICS Form 202 INCIDENT OBJECTIVES		1. INCIDENT NAME Route Complex	2. DATE 8/9/15	3. TIME 2350	
4. OPERATIONAL PERIOD (DATE/TIME) 8/10-11/15 0600 – 0600					
5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)					
Management Objectives Firefighter Safety: <ul style="list-style-type: none"> Use the risk analysis process to manage risk and maintain safety of firefighters. Weigh firefighter exposure with the probability of success when implementing suppression actions. Provide for the safety of the public through a risk assessment process and implementation of actions such as: <ul style="list-style-type: none"> Protect homes, valuable structures and infrastructure from damage or loss. Evacuation of Hyampom and surrounding areas where a threat of the fire to their well-being exists. Road and area closures. Smoke issues - Consider setting up air quality monitors in the town of Hyampom to monitor smoke impacts Pilot Ridge / South Fork Mountain Archaeological Resources: <ul style="list-style-type: none"> Minimize impacts to cultural resources. Assign Line Qualified Archaeologists to Divisions where dozers are working/planned. South Fork Trinity River: <ul style="list-style-type: none"> This is 1 of only 2 rivers with a Spring Run of the listed anadromous species Chinook and is the largest undammed river in the area. Minimize impacts to water quality to the best extent possible. Public Information: <ul style="list-style-type: none"> Provide timely, accurate and appropriate information to the public, partners, cooperators and internal organization. Mitigations and intent will be clear and communicated to the affected public and cooperators and assisting agencies. Minimize the spread of invasive weeds such as spotted knapweed, diffuse knapweed, and yellow starthistle. Knapweed occurrences are not yet widespread on Six Rivers and the South Fork/Pilot Creek (east) is one of the very few areas with occurrences. Occurrence of these within the fire perimeter: <ul style="list-style-type: none"> 2N17 - spotted knapweed (CEMA4), thousands of plants, extends down road. 2N18 - diffuse knapweed (CED1), yellow starthistle (CESO3), spotted knapweed (Route 1); various occurrences. Per Invasive Plant Best Management Practices, when possible: <ul style="list-style-type: none"> Equipment cleaning before coming onto the fire. Avoid use of 2N17 and 2N18. If avoidance is not an option and equipment is slated to work elsewhere in the area, see Forest staff about equipment cleaning. Control Objectives For Blake, Kerlin, Johnson, Hitchcock, Chance Keep Fire: <ul style="list-style-type: none"> East of the Mad River to Board Camp Mountain to Cow Creek North of the Mad River and Sulphur Glade Ridge West of the South Fork of the Trinity River South of Grouse Creek For Buck/Jack, Tierney Keep Fire: <ul style="list-style-type: none"> East of Swayback Ridge North of Shanty Creek South and West of the Van Dusen River

Spot Forecast for Route Complex Fire

National Weather Service Eureka

650 PM PDT Sun Aug 9 2015

IF CONDITIONS BECOME UNREPRESENTATIVE,
CONTACT THE NATIONAL WEATHER SERVICE.

SPOT FORECAST FOR ROUTE COMPLEX...SO CAL TEAM 1
NATIONAL WEATHER SERVICE EUREKA CA
650 PM PDT SUN AUG 9 2015

FORECAST IS BASED ON REQUEST TIME OF 1819 PDT ON AUGUST 09.
IF CONDITIONS BECOME UNREPRESENTATIVE...CONTACT THE NATIONAL WEATHER
SERVICE.

...FIRE WEATHER WATCH IN EFFECT FROM MONDAY EVENING THROUGH
TUESDAY AFTERNOON...

.DISCUSSION...LOW PRESSURE WILL CONTINUE TO SINK SOUTHWARD ALONG
THE WEST COAST TONIGHT THEN CAUSE A TIGHTENING OF THE PRESSURE
GRADIENT OVER THE ROUTE COMPLEX ON MONDAY. THIS WILL CAUSE RIDGE
TOP WINDS TO INCREASE BY MONDAY AFTERNOON AND EVENING. THIS LOW
WILL ALSO CAUSE A DEEPENING MARINE LAYER...BRINGING MODERATE TO
STRONG RECOVERIES MONDAY NIGHT. THERE IS AN OUTSIDE SHOT OF A FEW
SHOWERS MONDAY NIGHT AS WELL. THE FIRE WEATHER WATCH FOR THE
ROUTE COMPLEX IS CHIEFLY IN PLACE FOR GUSTY WINDS MONDAY LATE
AFTERNOON AND EVENING. THE WATCH MAY BE UPGRADED TO A WARNING IF
THE DIGGING LOW DEEPENS FURTHER.

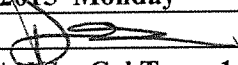

.MONDAY...

SKY/WEATHER.....MOSTLY SUNNY. HAZE AND AREAS OF SMOKE.
MAX TEMPERATURE.....AROUND 70.
MIN HUMIDITY.....33 PERCENT.
EYE LEVEL WINDS.....VARIABLE TO 4 MPH...BECOMING NORTHWEST 5 MPH
IN THE AFTERNOON.
SURROUNDING RIDGE...WEST 4 TO 6 MPH...BECOMING WEST 10 TO 15 MPH
WITH GUSTS TO 20 MPH IN THE LATE AFTERNOON.
WIND (20 FT).....VARIABLE 3 TO 5 MPH...BECOMING NORTHWEST 5 TO 8
MPH WITH GUSTS TO 15 MPH IN THE AFTERNOON.
LAL.....1.
CWR.....0 PERCENT.

.MONDAY NIGHT...

SKY/WEATHER.....PARTLY CLOUDY THEN BECOMING MOSTLY CLOUDY. HAZE
AND AREAS OF SMOKE.
MIN TEMPERATURE.....AROUND 53.
MAX HUMIDITY.....66 PERCENT.
EYE LEVEL WINDS.....WEST WINDS 6 TO 9 MPH WITH GUSTS TO 12 MPH IN
THE EARLY EVENING...BECOMING LIGHT WIND.
SURROUNDING RIDGE...WEST WINDS 12 TO 17 MPH WITH GUSTS TO 22 MPH IN
THE EARLY EVENING...BECOMING LIGHT WIND.
WIND (20 FT).....WEST WINDS 8 TO 11 MPH WITH GUSTS UP TO 17 MPH
IN THE EARLY EVENING...BECOMING LIGHT WIND.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 7	TYPE OF FIRE: Wildland Fire
FIRE NAME: Route Complex	OPERATIONAL PERIOD: Day
DATE / TIME ISSUED: Aug 9, 2015 2000	DATE: Aug 10, 2015 Monday
UNIT: Six Rivers NF / Mad River	SIGNED:  Drew Smith FBAN So. Cal Team 1

INPUTS

WEATHER SUMMARY: *Stronger Southerly winds this afternoon.*

Daytime: Slight inversion in the morning becoming mostly sunny with some haze.

Temps: around 70°

RH: = around 33%.. Eye level Wind = Light drainage in the morning 4 mph.... becoming Northwest 5 mph with some stronger gusts to 25 mph on the ridgelines from the West late afternoon.

ERC = 54*Fire Weather Watch is in Effect for this operational period due to strong winds*

GENERAL:

The fire is burning timber Fuels with some brush and grass intermix. Manzanita, Mixed Pine, Cedar and Douglas Fir are throughout. Live Fuel Moisture = Timber 150% Shrubs 80%. There is mortality in the aerial fuels that will contribute to torching. Rollout has been a significant factor in fire progression.

The fire to date has been primarily topography driven. The predominant factor of fire spread has been consistently surface fire spread backing, flanking transitioning to head fire alignment. Torching and short duration crown fire runs may develop with slope and wind alignment. Low dead fuel moisture contents are the driver behind continuous fuel consumption. Past significant runs were with slope and wind alignment .Sustained crown fire runs were dependent upon the surface fire and slope alignment. Recent fire activity has increased 1100 hrs – 1800 hrs.

Rates of spread: head fire = 3-8ch/hr with backing 1-3 ch/hr.

With strong winds ROS of 25-40 ch/hr with head fire with crown involvement.

Spotting ½ mile...PIG = 80%

DFM = 10 hr = 5%100hr and 1000hr =10%

SPECIFIC:

All Divisions:

- Increased surface temperature of fuels will allow the fire to be more aggressive today...
- Understory surface fire spread with backing and flanking fire is within the threshold of control to go direct.
- Tree torching will occur today, heads up with wind and sun exposed in the crown.
- **Slope reversal** look for the fire to transition to headfire alignment .*Headfire runs will develop today*
- South slope wind and sun exposure will enable the fire to move to the North today...Heads up after 1400hrs.
- Spotting from rollout can re align this fire to move rapidly with slope..
- ½-1 mile spotting from wind and plume generated fire dynamics
- Watch identify your fire getting aggressive with increased winds. *The Fire has a higher potential to move today.*

AIR OPERATIONS

May be limited due to smoke and haze.

Sunrise= 0618 Hrs and Sunset 2019 Hrs.

SAFETY

Validate your time to safety zones.... so know what you fire is doing at all times....

Identify when your fire has the ability re-position itself to run upslope with headfire.

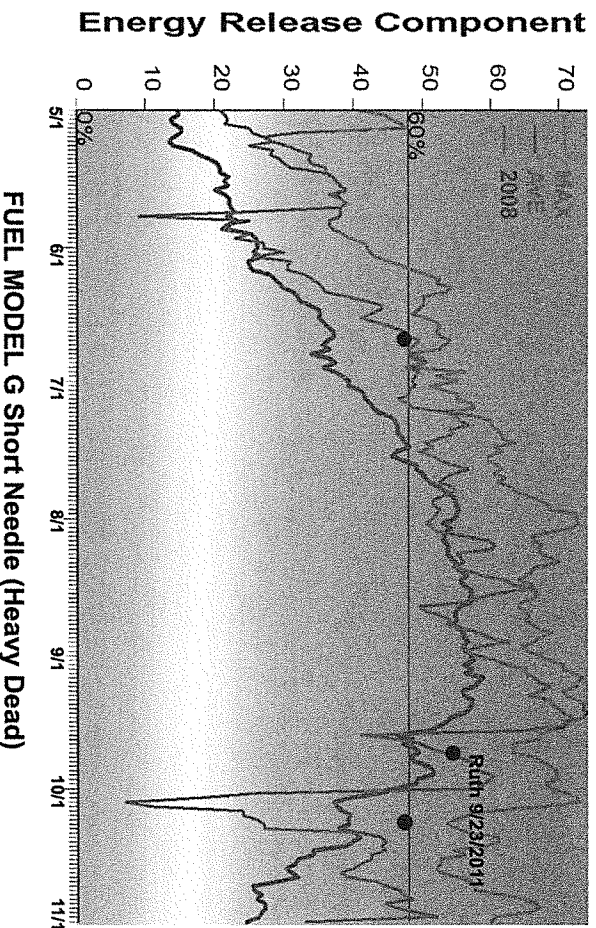

Monitor fire activity tree torching and ember cast can be more prevalent today

STOP.....Stop Think Observe and Predict...

Keep P.A.C.E in you engagement tool kit.. **P**rimary Plan, **A**lternative Plan, **C**ontingency Plan, **E**mergency Plan.

Time your escape routes...validate as the fire moves.

Fire Danger Rating Area 130 Energy Release Component

Fire Danger Rating Area 130 Burning Index

- Fire Danger Areas 130
- * Mad River Ranger District
- * Six Rivers National Forest
- * NW CA - Region 5

Weather Stations Used (NWCG Standards):

- * 040507 Mad River
- * 040508 Ruth

Local Thresholds - WATCHOUT:

Combinations of any of these factors can greatly increase fire behavior: 20' Windspeed over 6 mph; RH less than 19%; Temperature over 90; 1000-hour Fuel Moisture less than 14. Large fires become more frequent when BI exceeds 46 and when ERC exceeds 48.

Graph Interpretation, Energy Release Component:
 Maximum = Highest ERC by day for 2003-2014
 Average = Shows Peak Fire Season
 60% = 60th Percentile means 40% of days studied had an ERC above 48.

PAST EXPERIENCE I LOCAL KNOWLEDGE:

Wildfires become a problem @ 50 acres on the Six Rivers NF due to topography, fuels, and accessibility ('Large fires'= 50 acres). Large fires become more frequent when 1000 hour fuel moistures drop below 14, when BI exceeds 46, and when ERC exceeds 48 (large fires can and do occur at lower indices)

Afternoon winds W/NW along Ruth Lake Corridor greatly influence direction of fire spread in the area.
 South Fork Mountain affects weather in the area: Funnels the wind and influences thunderstorm development and movement.

Other Watchouts not related to weather and indices; dangers associated with marijuana gardens and arson fires.

Graph Interpretation, Burning Index:
 Maximum = Highest BI by day for 2003-2014
 Average = Shows Peak Fire Season
 60% = 60th Percentile means 40% of all days studied had a BI above 46

AIR OPERATIONS SUMMARY

PREPARED BY: JoAnn Overacker

PREPARED DATE/TIME: 08/09/2015 2200

1. INCIDENT NAME: Route Complex	2. OPERATIONAL PERIOD DATE: 08/10/15	START TIME: 0600	END TIME: 2000	SUNRISE: 0547	SUNSET: 2053
3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment,, etc.): TFR Changed! Operational priorities: Rotor wing – 1. To drop in Div D to keep from crossing Pilot creek and keep the fire south of Potato Hill. 2. Division A to keep north of the contingency line. Use Line dip site, the water is treated with a Gel additive to suppress fire and is eco-friendly. Fixed wing – Use as needed					
4. MEDEVAC A/C: See medical plan		5. TFR: # 5/0100 Altitude: <u>9000'</u> = MSL Check TFR website for latest info.

Route Complex – Safety Message

INCIDENT: # CA-SRF-1476	DATE: 08/10/2015	TIME: 0600 – 0600
	Day/night	

Danger Tree Felling

- Use saw teams and Falling Bosses.
- Post lookouts concentrating on snags.
- All sawyers assure themselves a quick and safe escape route from the tree they are falling.
- Do not turn your back on a falling snag.
- Snag fire access routes as necessary – roads, trails, and drop points.
- Keep crews spread out – Don't bunch up.
- Two sets of eyes are better than one.
- Heads up for erratic winds from storm cells.
- Stay well clear of all air operations including cargo drops, water drops, slurry drops, low level flights, arrivals and departures at helispots, etc.
- Consider the domino effect when determining safe distances from danger trees.
- If a crew doesn't have a qualified sawyer with them to mitigate danger trees, they should stay entirely clear.
- Watch for burned out root systems on snags and green trees as well, especially several days into the incident – a sound snag or tree today may not be tomorrow.

Did You Know?

- Do not dilute Gatorade type drinks. They lose their electrolyte efficiency
- 3 Stripes Your Out, Three parallel stripes = Life Safety Hazard- Do Not Cross
- Hazard Trees are now referred to as Danger Trees
- New air channels: Air to ground Command, and Air to ground Tactical.
- Last page of the new IRPG has a list of all the pages that were dropped from the last issue.
- If it's hot out and someone you work with stumbles, this may be an indication of decreased mental status, and early onset of heat related illness. Ask them to count backwards from 10 to evaluate their situation.

Medical Stuff

- The Pink pages of the IRPG are where you can find medical information.
- Pages 108 & 109 have the Medical Incident Report- Referred to as 9-Points "New Addition to the IRPG".
- Have you reviewed and briefed your crews on the Medical Plan 206?
- Do you understand the procedures to activate the EMS system?
- Radio Terminology:

"Medivac" is for Life Threatening injuries only
"Medical Transport" is for non-threatening injuries

Team Safety Officer : Tom Sherman

SoCal Team 1 Medical Radio Report

-----Initial Radio Report-----

Your Identifier & Division _____

DECLARE: Medical Emergency (Clear Frequency) or Non-emergency Medical transport

Age _____ Sex _____ Status: Mild / Moderate / Acute Type: Medical / Trauma

------(Break)-----

Location _____

Situation / Mechanism _____

Any special equipment required _____

Number of injured _____ Type of injuries _____

Best transport method: Ground Ambulance Helicopter Vehicle

Closest pick up point (DP, Helispot, GPS) _____

Loss of Con: Y / N Resp. _____ Pulse _____ BP _____ Weight _____

Injury _____ Agency (No Names) _____

Medical History/Allergies _____

Air Transportation Triage

	Ground or Air Ambulance to Hosp.	Transport to Med Unit
Mechanism	Hit by a falling tree or large branch Fall of 10' or more Insect bite with shortness of breath Signs of heat stroke (hot, dry, disoriented) Burn Injury greater than 1% body area	Minor dehydration Cut or laceration with bleeding controlled Minor bites and Stings Minor burns
Area Injured	Significant Blunt or Penetrating Trauma to Head, Neck, Chest, Abdomen or pelvis Any Arm or Leg fracture above the Joint	Minor blunt trauma Minor penetrating trauma Extremity sprains and strains Simple fracture below elbow or knee
Symptoms	Disoriented Chest Pain or Shortness of Breath Weak or absent radial pulse Pale, cold and sweating	Alert and oriented No shortness of breath Good pulses

If air or ground ambulance is DELAYED:

Transport patient to rendezvous with Ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

If Declaring an "Incident within the Incident"

The closest DIVS or designee respond to manage the incident and will be the POC. They are responsible for giving an accurate size up, ensuring scene safety, setting priorities and initiating an appropriate response. The closest Safety Officer and Line EMS will respond to the scene to assist the Branch Director or DIVS. Secure site and begin initial investigation when situation is stabilized.

Human Resource Message**

Rights and Responsibilities While On Assignment

You have a right to:

- A safe work environment
- Adequate information, food, sleep, equipment, and transportation
- Answers to your questions

But, it's not one-sided. Your help, cooperation and commitment are needed. In order for all fire personnel to be effective, here is an outline of your responsibilities:

❖ **Promote and Maintain Good Communications**

Adequate and accurate communications and information flow are essential for efficient fire suppression efforts and effective interpersonal relations.

❖ **Maintain an Attitude of Respect and Concern for your Colleagues.**

Fire suppression efforts can only be accomplished by accessing the skills and abilities of a wide variety of people. An attitude of **mutual respect** and **appropriate behavior** is essential for all personnel. Civil Rights violations will be dealt with promptly. If you have a concern, please report it to the Human Resource Specialist, your supervisor, or any member of the Management Team.

Fire camp will be a Drug and Alcohol Free workplace. Here are the rules:

**From the Fire line Handbook, Chapter 6 – Common Responsibilities:
Non-prescription unlawful drugs and alcohol are not permitted at the incident. Possession or use of these substances may result in disciplinary action.**

Remember, **YOU** are responsible for your conduct and behavior.

Janine Summy, Human Resource Specialist

“It is rather for us here dedicated to the great task remaining before us, that from these honored dead we take increased devotion to that cause for which they gave the last full measure of devotion.”

Abraham Lincoln
