ROUTE COMPLEX CA-SRF-1476 IAP

DAY Monday 0700-1900 August 17, 2015 NIGHT Monday/Tuesday 1900-0700 August 17/18, 2015

Today's discussion is from the LCES (Lookouts, Communication, Escape Routes, Safety Zones) Category.

EXTREME FIRE BEHAVIOR

Extreme fire behavior has always been present in cases of shelter deployment. It is critical for firefighters to maintain situational awareness of live and dead fuel moisture conditions as well as predicted and current weather conditions. As fire behavior changes, it is critical to act decisively to the changing situation.

- Discuss the following indicators of extreme fire behavior:
 - Relative humidity less than 20%
 - 1-hour fuel moisture less than 5%
 - 1000 hour fuel less than 10%
 - Live fuel moisture less than 75%
 - Trees crowning inside the fireline
 - Smoldering fires that exist in the early part of the day are beginning to burn very actively as the day progresses.
 - · Approaching thunderheads with dark clouds beneath
 - Presence of dust devils indicating an unstable atmosphere
 - Increased spotting
 - Sudden calm
 - · High clouds moving fast in direction different from surface wind

ICS Form 202 INCIDENT OBJECTIVES

1. INCIDENT NAME Route Complex 2. DATE 8/16/15 3. TIME 2100

 OPERATIONAL PERIOD (DATE/TIME) 8/17-18/15 0700-0700

5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)

Management Objectives:

Safety:

We will provide for Firefighter and Public Safety by managing risk based on exposure and probability of success, while protecting private property and other resource values.

Suppression Actions:

We will minimize suppression impacts to Archaeological Sites, Anadromous Fisheries, Water Quality, and spread of Invasive Weeds by implementing suppression tactics that follow Management Guidelines and Best Management Practices. We will utilize Resource Advisors to help identify sensitive sites and develop tactics to minimize/mitigate actions.

Leader's Intent:

I expect the following:

- Treat everyone with respect.
- Maintain and improve public relations with local communities and cooperators
- All fires in the complex will be controlled using Full Suppression strategies (e.g. direct attack, indirect attack, point protection), based on safety to firefighters and the public.
- Manage Team transitions to minimize safety issues and stress to firefighters, the public, and cooperators.
- 6. WEATHER FORECAST FOR OPERATIONAL PERIOD See Attached.
- 7. GENERAL SAFETY MESSAGE See Attached.

INCIDENT Weather Forecast

FORECAST NO: 3

PREDICTION FOR: DAY SHIFT - NIGHT SHIFT

SHIFT DATE: Monday, August 17 2015

NAME OF INCIDENT: Route Complex

UNIT: USFS Six Rivers NF

SIGNED:

Dan Borsum

Incident Meteorologist

FORECAST ISSUED: 2000 Sunday, August 16, 2015

WEATHER DISCUSSION: Continued Hot and Dry!

Another dry start to the morning will support another day with humidity reaching the teens in the afternoon. Temperatures will again approach 90 with thermal slope and valley winds. Ridgetop winds will be northeast in the morning trending northwest by afternoon. The airmass will be a bit more stable and winds aloft are weaker so smoke lift will be slower in the morning. Tuesday will see similar conditions to today but Wednesday will be a bit cooler.

FORECAST FOR TODAY: Sunny...smoky and hot

Temperature:

Valley Bottom

90-95

Ridgetop

84-88

Humidity:

Valley Bottom

14-18%

Ridgetop

13-17%

20 FT WINDS:

SLOPES/VALLEYS:

Upslope/upvalley 4 to 6 mph. Gusts to 10 mph afternoon hours

RIDGES:

Northeast 3 to 6 mph becoming northwest by afternoon.

TRANSPORT WIND:

Northeast 5 mph becoming northwest

INVERSION:

Moderate inversion breaking around 1200 PDT

OUTLOOK FOR TONIGHT: Clear and smoky

Temperature:

Valley bottom

55-60F

Ridgetop

62-66

HUMIDITY:

Valley bottom

55-60%

Ridgetop

35-40%.

20-FOOT WIND:

SLOPE/VALLEY: RIDGETOP:

Downslope 3-5 mph East winds 5 mph

TRANSPORT WIND:

Northeast 10 mph

OUTLOOK FOR TUESDAY: Sunny...smoky and hot

Temperature:

Valley Bottom

92-96

Ridgetop

86-90

Humidity:

Valley Bottom

14-18%

Ridgetop

13-17%

20 FT WINDS:

SLOPES/VALLEYS:

Upslope/upvalley 6 to 12 mph. Gusts to 15 mph afternoon hours

RIDGES:

Northeast 4 to 8 mph becoming light

TRANSPORT WIND:

Northwest 5 mph becoming light.

FIRE BEHAVIOR FORECAST							
FORECAST NUMBER: #3	TYPE OF FIRE: Wildland Fire						
FIRE NAME: Route Complex	OPERATIONAL PERIOD: Day 08/17/13						
DATE ISSUED: 08/16/2015	TIME ISSUED: 2100 hours						
UNIT: Six Rivers/Shasta-Trinity National Forest	SIGNED: Tim Metzger, FBAN						
	INPUTS						

WEATHER SUMMARY: See Attached Fire Weather Forecast

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Day Shift

Today will see low humidity in the teens (14-18% valleys, ridges13-17%) with unstable conditions and a very weak overnight recovery. Temps will be the same as the previous day (valley bottom 90-95) (ridgetops 84-88) Tuesday will see very similiar conditions with continuing hot temperatures and similar humidity. Winds generally light to moderate upslope upvalley 4-6, with gusts to 10 out of the NE transitioning to the NW. Surface fire and individual tree/group tree torching can be expected as the fire continues to back into the valley bottoms. Continued consumption of subsurface fuels on all divisions resulting in deep holes and possible ash pits. The fire is burning primarily in a fuel model 2, 8 and 10, and generally, there will be a high probability of spotting outside of control lines where slope and fuels align (upslope spread) or downwind of any significant column development. (spotting of .2 miles)

Night Shift All Divisions:

Expect active burning through the nightime hours as poor humidity recovery will enable active spread. Spread rates low <1 ch/hr, and flame lengths will be low <2 feet. Closely monitor the pilot creek drainage

Energy Release Component (ERC) is 57 and around the 80th percentile, 1000 hour (heavy) fuels are calculated at 8-10%. Live woody is 2/3 cured and is becoming available to burn. Fire will carry through deciduous species when supported by concentrations of ground fuels in exposed areas (except north aspects). **Probability of ignition will be near 88%**

Indicators for Increased Fire Activity

Relative Humidity <19%, Winds >6mph, Temperatures >90F, 1000 fuel moistures <14%,

FIRE BEHAVIOR

Day shift

Division A, Expect an increase in backing fire spread and be on the look-out for slope reversal in the lower part of the drainage as fire will increase in activity than what has previously been occurring. Expect any upslope spread to aggressively seek ridgelines. Burn out operations should take advantage of downslope winds in the late afternoon evening hours as fuels are at the lowest moistures and humidity's are on the rise. Expect some short range spotting 0.1 miles

Division C,D E: Expect continued backing fire into the Pilot Creek drainage. Post lookouts and pay attention as any fire established below the dozer line along the division will aggressively seek ridgelines and you can expect intense surface fire, individual group tree torching and short duration crown runs. Pay particular attention Happy Jack Springs, holm buttes, and Salt Ground areas as modeling indicates that these are the areas that have the highest potential to be impacted.

Division F,H,W: Persistent burning in the heavies and deep duff will hamper mop-up operations. Continued burning of snags will present control problems if trees fall across the lines. Un-detected spot fires should become evident due to the low humidity and hot temps. In Division W, Northeast and Northwest winds will increase the probability of spotting across the division if interior portions of the fire increase in activity. Pay particular attention to unburned areas between the control lines and the fires edge.

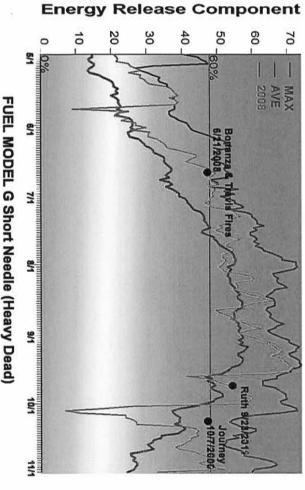

Division N,P: Smoldering and creeping in all areas across the divisions as the day progresses. Persistent burning due to the low fuel moistures and heavy fuels may present control problems. Interior portions of the fire will see an increase in fire activity.

AIR OPERATIONS:

Moderate inversion will affect air operations, but should begin to dissipate around 1200. Smokey conditions will hamper air operations and will be more apparent than yesterday.

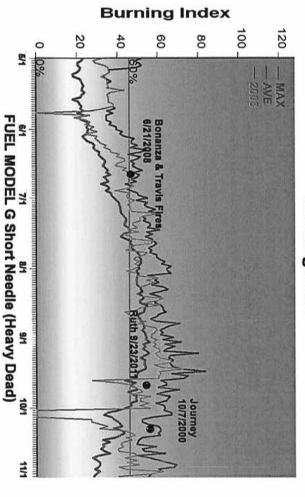

SAFETY DO NOT GET COMPLACENT, Stay alert and know your surroundings. Closely monitor and track the changing weather conditions and the impact that could have on your operational assignment.

BI above 46

Safety Message

Route Complex

Monday August 17, 2015

It is easy to get into a routine and not notice hazards in familiar ground or an unawareness of actual dangers. The root cause of most accidents is unsafe acts and choices rather than unsafe conditions. Ninety percent of workplace accidents are the result of unsafe acts. These acts are predictable and therefore preventable.

This result is the inability to recognize change. It's easy to become complacent and rationalize that what we're doing is not dangerous because the risk is low.

Changes that may take place:

- Trees that have had residual, smoldering heat on root system are prone to fall suddenly.
- Trees and rocks falling on roads.
- Poor visibility when driving on narrow and sharp curve roads.

Debris and rock rolling down steep slopes.

Dan Le Crone Tim Benedict Bruce Martinek

Jan Llan Fun Banaded Bruce Martinek

6. Control Operations/Work Assignments:

- Type 1 crew from Division H will complete burnout above Loop Road and subdivision with support from 3 engines.
- . TFLD will manage 3 engines patrolling Division P
- · Dozer is available for IA, line improvements and any new spots

7. Special Instructions:

- · Back haul trash.
- · Track all water use from water points.

Upon occurrence of a "Major Medical" or accident involving significant injury on the fire line, the closest DIVS should respond directly to the scene to take control of the situation and direct necessary actions. If the DIVS is unavailable, the nearest fire line supervisor or leader needs to take charge.

- Route Communications will clear all radio traffic on the Incident Command Channel-use to coordinate response as needed.
 Do Not Use Names. Identify: 1) The on-scene Point Of Contact (i.e. TFLD Smith); 2) Describe the nature of the accident/illness.
- Obtain and facilitate nearest Medical Care Provider to the scene. On Scene IC is in charge of the scene. Identify to Communications the name of the On Scene Point of Contact and Medical Care Provider on site.
- 3. Check nature of the problem, # of patients, status, vitals, mechanism of injury & location. (GPS if possible) Request additional resources if needed.
- 4. Report the Severity of the Injury/Illness: Red, Yellow, Green.
- 5. Coordinate and facilitate appropriate transportation for patient(s) according to severity. Medical Care Provider in charge of patient(s).
- 6. Request additional resources / equipment as needed.
- 7. Inform Communications of any changes on scene for Point Of Contact / Medical Care Providers.
- 8. Identify the evacuation location. Remove all unnecessary personnel from the scene. Secure scene, identify witnesses for later investigation. Keep a log.

LIFE SAFETY IS THE NUMBER 1 PRIORITY ON THIS INCIDENT The term "Medivac" is for Emergency Medical Evacuations Only

MEDICAL EMERGENCY COMMUNICATION PROCEDURE FOR THE INCIDENT WITHIN AN INCIDENT

MEDIVAC INFORMATION

Contact Communications on the Command Channel. Communications will contact Command & General Staff.
Declare the nature of the emergency: Traumatic Injury Medical Illness
Is the injury/illness:
JRGENT-RED Life Threatening PRIORITY-YELLOW Serious ROUTINE-GREEN Minor
If Life Threatening request that the designated frequency be cleared for emergency traffic. Communications will broadcast on Command Radio the channel is for Emergency Traffic Only;
Edentify the on-scene Incident Name:
Edentify the on-scene Incident Commander:
Edentify the on-scene Care Provider:
[dentify the number of injured/ill: Identify the nature of the injury/illness:
Is the patient conscious? Yes No
Is the patient experiencing any difficulty breathing? Yes No
What is the mechanism of injury/illness?
Specific location of the patient (nearest DP / Helispot):
Is a helicopter needed for evacuation? Yes No
Pick-up point, route for ground transportation:
Are additional EMTs needed? Yes No
Any additional equipment or resources that are needed?
Identify any changes in the on-scene IC or medical personnel as they occur.

Contact Communications when the Emergency has ended and the radio channel can be cleared for normal traffic. Communications will broadcast on Command Radio channel resumption of normal radio traffic.

SCHWEDT 1/2014

Human Resource Message

Civility and Respect in the Workplace

<u>To Ensure a Civil and Respectful Workplace</u> that promotes teamwork and continued productivity, please apply these Conduct guidelines:

Guard Your Words and Actions

The safest way to avoid insensitive or unfair treatment based on personal characteristics such as race, color, sex, religion, national origin, disability, age pregnancy and/or genetic information is to remember that comments, jokes and actions pertaining to these characteristics do not belong at work at any time for any reason.

2 Treat Co-workers as Members of the Team

When problems arise, employees should try, when possible, to **Resolve** them together. The process of working out differences ultimately builds **teamwork**, **respect and trust** and can prevent problems from escalating.

3 Speak Up

There may be instances when you are not comfortable discussing workplace issues related to this program's subject matter with co-worker. When that is the case, refer to the organization's policies and complaint procedure sop you will know where to go for help.
