MAD RIVER COMPLEX

CA-SRF-001433 IAP

Day Monday 0700-1900 August 24, 2015

Today's discussion is from the Fireline Safety Category.

Mop-up Safety Procedures

- Always maintain an escape route
- Practice LCES & follow standard fire orders and watch out situations
- In some cases, tragedies occur in the mop-up stage
- Rotate personnel to limit exposure to heat related illness
- Wear eye protection when working with water
- Avoid swinging overhead when personnel are < 10' away
- Hand check piles only when no smoke is visible and only use back of hand to feel heat prior to hand checking pile
- Look up, down, around for hazard trees, and possible rolling debris
- Do not work above or below personnel during firing and mop-up operations
- Watch for falling and rolling debris on steep slopes
- · Alert crew personnel of rolling debris by yelling to affected individuals
- Position debris that could roll vertically on slope to limit rolling of object
- Avoid stepping over debris that could roll by walking around object

ICS Form 202 INCIDENT OBJECTIVES

Noute Complex
 Mad River Complex

2. DATE 8/23/15 3. TIME 1300

4. OPERATIONAL PERIOD (DATE/TIME) 8/24/2015 0700-1900

5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)

Management Objectives:

Safety:

We will provide for Firefighter and Public Safety by managing risk based on exposure and probability of success, while protecting private property and other resource values.

Suppression Actions:

We will minimize suppression impacts to Archaeological Sites, Anadromous Fisheries, Water Quality, and spread of Invasive Weeds by implementing suppression tactics that follow Management Guidelines and Best Management Practices. We will utilize Resource Advisors to help identify sensitive sites and develop tactics to minimize/mitigate actions.

Leader's Intent:

I expect the following:

- Treat everyone with respect.
- Maintain and improve public relations with local communities and cooperators
- Ail fires in the complex will be controlled using Full Suppression strategies (e.g. direct attack, indirect attack, point protection), based on safety to firefighters and the public.
- 6. WEATHER FORECAST FOR OPERATIONAL PERIOD See Attached.
- 7. GENERAL SAFETY MESSAGE See Attached.
- 8. ATTACHMENTS

INCIDENT WEATHER FORECAST

FORECAST NO: 16

PREDICTION FOR: DAY SHIFT

SHIFT DATE STARTS: Monday 24, 2015

FORECAST ISSUED: 1800 Sunday August 23, 2015

ROUTE AND MAD RIVER COMPLEXES UNIT: USFS Six Rivers & Shasta T NF

SIGNED: Dan Borsum

Incident Meteorologist

WEATHER DISCUSSION: Increasing ridgetops winds and more unstable

Smoke will be quick to mix out the next three days as the airmass are unstable and upper level winds are increasing. Southwest ridgetop winds will be increasing with gusts of 15 to 18 mph possible in the afternoon. Humidity will continue to fall near 20% each afternoon but overnight recoveries will be good. Expect another strong humidity recovery as southwest flow aloft keeps drier air to the east. Tuesday will be the most unstable day with some cumulus clouds in the afternoon hours.

TODAY: Smoke lifting by 1200 then mostly clear.

TEMPERATURE: Below 3500ft 85-90F

3500-4500ft 83-88F

Abv 4500ft 80-85F

HUMIDITY:

Below 3500ft 18-23%

3500-4500ft 18-23%

Abv 4500ft 20-25%

20 FT WINDS:

SLOPES/VALLEYS:

Upslope/upvalley 4 -8 mph.

RIDGES:

Southwest 10-15 mph gusts to 20 mph.

TRANSPORT WIND:

Southwest 15-20 mph

INVERSION:

Moderate inversion breaking around 1200.

MONDAY NIGHT: Mostly clear. Smoky after midnight.

TEMPERATURE: Below 3500ft 52-56

3500-4500ft 53-57F

Aby 4500ft 59-64F

HUMIDITY:

Below 3500ft 80-85%

3500-4500ft 55-60%

Abv 4500ft 55-60%

20-FOOT WIND:

SLOPE/VALLEY: Downslope 2-4 mph

RIDGETOP:

Southwast 8-12 mph

TRANSPORT WIND:

Southwest 15 mph

TUESDAY: Smoke lifting by 1100 otherwise mostly clear with a few afternoon cumulus

TEMPERATURE: Below 3500ft 88-92F

3500-4500ft 85-90F

Abv 4500ft 80-85F

HUMIDITY:

Below 3500ft 18-23%

3500-4500ft 18-23%

Aby 4500ft 20-25%

20 FT WINDS:

SLOPES/VALLEYS:

Upslope/upvalley 4 -8 mph.

RIDGES:

Southwest 10-15 mph with gusts to 20 mph.

TRANSPORT WIND:

Southwest 20 mph

INVERSION:

Weak inversion breaking around 1100.

FIRE BEHAVIOR FORECAST									
FORECAST NUMBER: #16	TYPE OF FIRE: Wildland Fire								
FIRE NAME: Route Complex/Mad River Complex	OPERATIONAL PERIOD: Day 08/24/15								
DATE ISSUED: 8/23/15	TIME ISSUED: 2100 hours								
UNIT: Six Rivers/Shasta-Trinity National Forest	SIGNED: Tim Metzger, FBAN								
	INPUTS								

WEATHER SUMMARY: See Attached Fire Weather Forecast

OUTPUTS

FIRE BEHAVIOR

Day Shift

Expect very similar conditions to what was experienced yesterday and expect a little more in stability The southern flow may begin to dominate the slope and valley winds and will increase as the week progresses. Surface fire and individual tree/group tree torching can be expected as the fire continues to back into the valley bottoms. Areas of concern remain the south east and south west portions of the Lassic fire, and Division A, W, on the Johnson fire. Interior portions of the fire will continue to increase in activity as the day progresses and expect humidity's to remain low and begin to recover in the late evening. Pay attention to lifting of smoke and the scouring of valleys as the persistent smoke has tended to keep RH's higher and temps down. Snags will continue to pose problems and cross containment lines. There will be a high probability of spotting outside of control lines where slope and fuels align (upslope spread) or downwind of any significant column development (spotting of .5 miles). Pay attention to the winds today as portions of the fire will be exposed to the southerly flow.

1000 hour (heavy) fuels are calculated at 8-10%. Live woody is 2/3 cured and is becoming available to burn. Fire will carry through deciduous species when supported by concentrations of ground fuels in exposed areas (except north aspects). **Probability of ignition will be near 70%** on exposed ridges and southerly aspects. Divisions in patrol status should patrol early and often.

Indicators for Increased Fire Activity

Relative Humidity <19%, Winds >6mph, Temperatures >90F, 1000 fuel moistures <14%,

FIRE BEHAVIOR: Route Complex

Division A,C,D, Primarily smoldering and creeping in the pilot creek drainage. Be on the lookout for undetected spots and areas of patchy burning on the interior of the fire. Burn out operations should take advantage of downslope winds in the late afternoon evening hours as fuels are at the lowest moistures and humidity's are on the rise. Winds will be southerly and may dominate the upslope/up valley winds on the ridgetops. Expect active surface fire and individual group tree torching in the south end of Division A, in the drainage bottoms. Drainage bottoms are sheltered and mays see variable wind speed and direction with the instability in the afternoon

Division E: Smoldering and creeping, Interior portions of the fire will increase in activity with the warmer and drier weather. Be on the lookout for spotting. Watch-out for fire weakened trees and snag hazards.

Division, W:. Smoldering and creeping. Un-burned areas and interior portions have the potential to become more active than the previous two day. Be on the lookout for re-burn potential and patchy burned areas.

Division N,P F,H: Smoldering and creeping. Be on the lookout for burning snags and fire weakened trees. Interior islands may react and become active with the southerly flow and less shading from the smoke.

LASSIC FIRE:

BRANCH II The eastern portion of the fire will progressively back down slope into the Van Duzen creek drainage. Expect active backing under 3500 ft <2 ch/hr. The upper elevations will see individual tree torching and short sustained crown runs in the late afternoon when aligned with slope and fuels typically elevations above 3500 ft. Be on the lookout for rolling material on the steep slopes and the potential for a slope reversal. The southern portion of Branch II will see the greatest spread. Expect individual tree torching and short sustained crown runs on the exposed slopes and ridges. Fire will progress down ridgelines due to the extremely low RH and slop over into the valleys.

BRANCH I Little van dozen creek area, the fire will continue to back into the drainage. Be on the lookout for any fire that gets established on the western portion of the creek. Expect aggressive upslope spread toward containment lines characterized by short duration crown fire and individual group tree torching. Spotting of up to .5 miles can be expected. Division Y should see favorable winds today with southerly push, Expect single and group tree torching and short intense crown runs where fuels and slope align. Winds will be favorable for firing operations for Division Y, but may pose problems for Division Z.

Division L

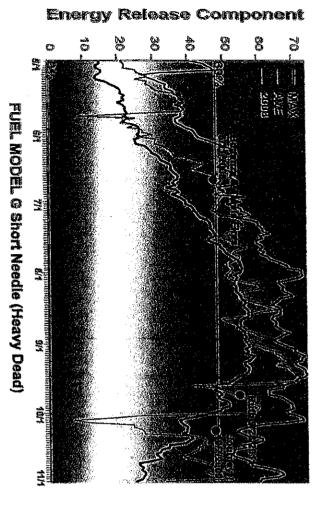

Remain in communications and keep appraised of potentially threatened areas.

AIR OPERATIONS:

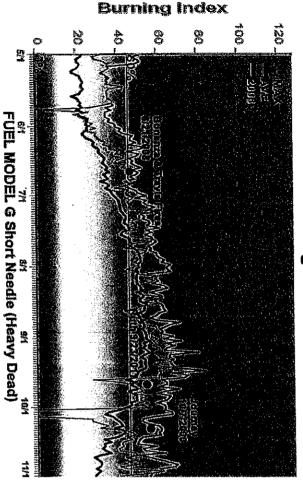

Moderate inversion will affect air operations, but should begin to dissipate around 1200.

SAFETY: DO NOT be caught by surprise! Closely observe the fuels in the area where you're working. Remember that fine, flashy fuels respond very quickly to changes in environmental conditions.

Fire Danger Rating Area 130 Energy Release Component

Fire Danger Rating Area 130 Burning Index

Fire Danger Areas 130

- Mad River Ranger District
- Six Rivers National Forest
- NW CA Region 5

Weather Stations Used (NWCG Standards):

- * 040507 Mad River
- 040508 Ruth

Local Thresholds - WATCHOUT:

Combinations of any of these factors can greatly increase fire behavior: 20' Windspeed over 6 mph; RH less than 19%; Temperature over 90; 1000-hour Fuel Moisture less than 14. Large fires become more frequent when BI exceeds 46 and when ERC exceeds 48.

PAST EXPERIENCE I LOCAL KNOWLEDGE:

Wildfires become a problem @ 50 acres on the Six Rivers NF due to topography, fuels, and accessibility ("Large fires'= 50 acres).

Large fires become more frequent when 1000 hour fuel moistures drop below 14, when BI exceeds 46, and when ERC exceeds 48

Afternoon winds W/NW along Ruth Lake Corridor greatly influence direction of fire spread in the area.

South Fork Mountain affects weather in the area: Funnels the wind and

influences thunderstorm development and movement

(large fires can and do occur at lower indices)

Other Watchouts not related to weather and indices; dangers associated with marijuana gardens and arson fires.

Safety Message

Route Complex Mad River Complex

Monday, August 24, 2015

Safety: It is up to you.

Safety is about prevention. Accident prevention is a personal decision for you. To be safe is an attitude you choose to prevent accidents for you and others. If you see a mistake and don't do anything about it, it becomes your mistake. Don't rely on luck because luck runs out. The difference between a near miss and an actual accident is pure luck. Here are some safety tips that can help you:

- 1. Begin each work shift both mentally and physically prepared for the rigors of wildland firefighting. Getting adequate sleep, maintaining a healthy diet, and proactively participating in physical training are the foundation of "My Safety".
- 2. **Utilization of personal protective equipment**. Wear your PPE without being told. Each individual is responsible for performing their own risk assessments. If a hazard is identified PPE can be a mitigation.
- 3. **Follow safe work practices.** Using a spotter when backing up vehicles is the prudent and professional course of action. If you are unsure of how to perform a job task safely, your supervisor or experienced coworker.
- 4. Ensure instructions are **clearly understood**. Communication is a basic responsibility for all personnel. Ask appropriate questions to clarify uncertain issues. Speak up when you see hazards that may place yourself or others at risk.
- 5. Maintain situational **awareness at all times. Awareness** is a vital component of my safety. Pay attention to what is happening around your area of operations. Always display an awareness of what is happening around you by asking questions or making comments.

Take it upon yourself to be responsible for "Your Safety." Take care

Dan LeCrone

Tim Benedict

Bruce Martinek

Missions and ordering process: Bucket work as requested. Recon as smoke conditions allow. Utilize HLCO and Air Attack to assess smoke conditions for aerial operations. Order all aerial services through Aerial Supervision (if up); if no Aerial Supervision order all helicopters through Dinsmore Helibase, regardless of aircraft location (Mad, Rohnerville, or Dinsmore). (Helibase will call Air Operations for any unplanned operations or for borrowing of aerial resources by other fires.

Medical Emergency Procedures

Upon occurrence of a "Major Medical" or accident involving significant injury on the fire line, the closest DIVS should respond directly to the scene to take control of the situation and direct necessary actions. If the DIVS is unavailable, the nearest fire line supervisor or leader needs to take charge.

- 1. Route Communications will clear all radio traffic on the Incident Command Channel-use to coordinate response as needed. Do Not Use Names. Identify: 1) The on-scene Point Of Contact (i.e. TFLD Smith); 2)Describe the nature of the accident/illness.
- 2. Obtain and facilitate nearest Medical Care Provider to the scene. On Scene IC is in charge of the scene. Identify to Communications the name of the On Scene Point of Contact and Medical Care Provider on site.
- 3. Check nature of the problem, # of patients, status, vitals, mechanism of injury & location. (GPS if possible) Request additional resources if needed.
- 4. Report the Severity of the Injury/Illness: Red, Yellow, Green.

WH DIMMOST

5. Coordinate and facilitate appropriate transportation for patient(s) according to severity. Medical Care Provider in charge of patient(s).

Redding, CA

Kneeland, CA

707.726.1280

530.226.2400 Shasta Trinity ECC

Request additional resources / equipment as needed.

Guard 825 (Hoist)

CAL FIRE H102 (Day Hoist)

Day/Night Hoist

- 7. Inform Communications of any changes on scene for Point Of Contact / Medical Care Providers.
- 8. Identify the evacuation location. Remove all unnecessary personnel from the scene. Secure scene, identify witnesses for later investigation. Keep a log.

LIFE SAFETY IS THE NUMBER 1 PRIORITY ON THIS INCIDENT

The term "Medivac" is for Emergency Medical Evacuations Only

	ine term "wedivac" is for	Emergency Medical

MEDICAL EMERGENCY COMMUNICATION PROCEDURE FOR THE INCIDENT WITHIN AN INCIDENT

MEDIVAC INFORMATION

Contact Communications on the Command Channel. Communications will contact Command & General Staff.
Declare the nature of the emergency: Traumatic Injury Medical Illness
Is the injury/illness:
URGENT-RED Life Threatening PRIORITY-YELLOW Serious ROUTINE-GREEN Minor
If Life Threatening request that the designated frequency be cleared for emergency traffic. Communications will broadcast on Command Radio the channel is for Emergency Traffic Only;
Identify the on-scene Incident Name:
Identify the on-scene Incident Commander:
Identify the on-scene Care Provider:
Identify the number of injured/ill: Identify the nature of the injury/illness:
Is the patient conscious? Yes No
Is the patient experiencing any difficulty breathing? YesNo
What is the mechanism of injury/illness?
Specific location of the patient (nearest DP / Helispot):
Is a helicopter needed for evacuation? Yes No
Pick-up point, route for ground transportation:
Are additional EMTs needed? Yes No
Any additional equipment or resources that are needed?
Identify any changes in the on-scene IC or medical personnel as they occur.

Contact Communications when the Emergency has ended and the radio channel can be cleared for normal traffic. Communications will broadcast on Command Radio channel resumption of normal radio traffic.

HUMAN RESOURCE MESSAGE

Route and Mad River Complex(s) – 08/24/2015 HR Specialist - Chuck Sandau – Contact # (406) 698-6122

Tolerance & Respect:

Most people know Ted Williams the baseball player. He played 19 years for the Boston Red Sox and was nicknamed "The Greatest Hitter Who Ever Lived". Williams is often regarded as one of the greatest hitters/baseball players in baseball history. He was a two-time American League MVP, sixtime batting champion, 17-time All-Star, and two-time Triple Crown winner (batting average, RBI's, and home runs). He finished his career with a .344 batting average (better than a lot of player's best year), 521 home runs, and a .482 on-base percentage, the highest of all time. He was inducted into the Baseball Hall of Fame in 1966, his first year of eligibility.

But, most people don't remember Ted Williams the baseball manager. Williams only managed for a short period of time and wasn't nearly as successful as he had been as a player. 'Williams the manager' seemed to hold all of his players to his lofty performance standards - standards they most often couldn't meet.

'Ted Williams the manager' didn't succeed because he failed to **tolerate** the lesser abilities of his players and **respect** their different talents. While it's indisputable that Williams was a great player, his inability to get his players to play as a cohesive team undoubtedly resulted in less production and wins than the teams could/should have accomplished with such a great player leading them.

<u>Teamwork</u> = the ability to make the team greater than just the sum of its parts. It takes *tolerance* and *respect*, and we're all responsible for it.
