Day Tuesday 0700-1900 August 25, 2015

**Today's discussion is from
the Fireline Safety Category.**

FALLING SNAGS

Falling snags (dead, standing trees without leaves or needles in the crowns or trees with burned off roots) present a significant hazard to wildland firefighters. Often times entire groves of trees will be at risk.

The risk of injuries from falling snags increases during the night operational period when visibility is greatly reduced.

While the cooler, nighttime period is generally a more effective time to gain control of wildfires, the increased risk from unseen falling snags may limit the widespread use of crews at night in burned off areas.

Environmental conditions that increase risk from falling snags:

- Strong winds
- Night operations
- Steep slopes

Things to consider when assessing the potential hazards of both snags and green trees:

- Trees have been burning for an extended period.
- High-risk tree species (those that are known for rot and shallow root systems) are in the area.
- Numerous downed trees
- Dead or broken tips and limbs overhead
- Accumulation of downed limbs
- Absence of needles, bark or limbs
- Leaning or hung-up trees

Mitigation measures to take:

- Identify and flag all high-risk snags and green trees.
- Keep personnel out of the high-risk areas until the hazard has been removed.
- Establish lookouts.
- Maintain personnel vigilance.
- Pull out if winds exceed 15 mph.

ICS Form 202 INCIDENT OBJECTIVES		1. INCIDENT NAME Route Complex Mad River Complex	2. DATE 8/24/15	3. TIME 1300
4. OPERATIONAL PERIOD (DATE/TIME) 8/25/2015 0700-1900				
5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)				
<u>Management Objectives:</u>				
Safety:				
We will provide for Firefighter and Public Safety by managing risk based on exposure and probability of success, while protecting private property and other resource values.				
Suppression Actions:				
We will minimize suppression impacts to Archaeological Sites, Anadromous Fisheries, Water Quality, and spread of Invasive Weeds by implementing suppression tactics that follow Management Guidelines and Best Management Practices. We will utilize Resource Advisors to help identify sensitive sites and develop tactics to minimize/mitigate actions.				
<u>Leader's Intent:</u>				
<i>I expect the following:</i>				
<ul style="list-style-type: none"> • Treat everyone with respect. • Maintain and improve public relations with local communities and cooperators • All fires in the complex will be controlled using Full Suppression strategies (e.g. direct attack, indirect attack, point protection), based on safety to firefighters and the public. 				
6. WEATHER FORECAST FOR OPERATIONAL PERIOD - See Attached.				
7. GENERAL SAFETY MESSAGE - See Attached.

INCIDENT WEATHER FORECAST

FORECAST NO: 18
 PREDICTION FOR: DAY SHIFT
 SHIFT DATE STARTS: Tuesday August 25, 2015
 FORECAST ISSUED: 1800 Monday August 24, 2015

ROUTE AND MAD RIVER COMPLEXES
 UNIT: USFS Six Rivers & Shasta T NF
 SIGNED: Dan Borsum
 Incident Meteorologist 

WEATHER DISCUSSION: Dry and Breezy with continued Unstable

A combination of low humidity, gusty winds and unstable conditions will be over the fire today. Expect humidity in the teens and south southwest ridgetop wind gusts to 25 mph. The unstable airmass and strong sunshine will allow for stronger upslope and upvalley winds especially on south aspects. The atmosphere will mix even better than Monday with inversions lifting by 10 am. The increased instability will allow a few cumulus to develop in the afternoon. Wednesday will see this weather pattern continue with a bit more high clouds in the afternoon.

TODAY: Smoke lifting by 1100 otherwise mostly clear with a few afternoon cumulus

TEMPERATURE:	Below 3500ft 88-92F	3500-4500ft 85-90F	Abv 4500ft 80-85F
HUMIDITY:	Below 3500ft 16-20%	3500-4500ft 14-18%	Abv 4500ft 12-16%

20 FT WINDS:

SLOPES/VALLEYS: Upslope/upvalley 8 -12 mph.
 RIDGES: South southwest 13-18 mph with gusts to 25 mph.

TRANSPORT WIND: Southwest 25 mph
 INVERSION: Weak inversion breaking around 1000.

TUESDAY NIGHT: Mostly clear. Smoky after midnight.

TEMPERATURE:	Below 3500ft 53-57F	3500-4500ft 53-58F	Abv 4500ft 56-61F
HUMIDITY:	Below 3500ft 83-88%	3500-4500ft 55-60%	Abv 4500ft 35-40%

20-FOOT WIND:

SLOPE/VALLEY: Downslope 2-4 mph
 RIDGETOP: South 3-5 mph

TRANSPORT WIND: Southwest 8 mph

WEDNESDAY: Smoke lifting by 1100 with afternoon cumulus. High thin clouds late.

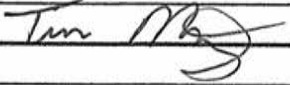

TEMPERATURE:	Below 3500ft 85-90F	3500-4500ft 82-87F	Abv 4500ft 78-83F
HUMIDITY:	Below 3500ft 18-23%	3500-4500ft 18-23%	Abv 4500ft 20-25%

20 FT WINDS:

SLOPES/VALLEYS: Upslope/upvalley 4 -8 mph.
 RIDGES: Southwest 10-15 mph with gusts to 20 mph.

TRANSPORT WIND: Southwest 20 mph
 INVERSION: Weak inversion breaking around 1100.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #18	TYPE OF FIRE: Wildland Fire
FIRE NAME: Route Complex/Mad River Complex	OPERATIONAL PERIOD: Day 08/25/15
DATE ISSUED: 08/24/2015	TIME ISSUED: 2100 hours
UNIT: Six Rivers/Shasta-Trinity National Forest	SIGNED: Tim Metzger, FBAN 

INPUTS

WEATHER SUMMARY: See Attached Fire Weather Forecast

OUTPUTS

FIRE BEHAVIOR

Day Shift

Today we will have reached a critical fire weather threshold expect the fire to become active by 1000 hours. Surface fire and individual tree/group tree torching can be expected as the fire continues to back into the valley bottoms. Any upslope movement will aggressively seek ridgelines with profuse spotting downwind of any significant column development. Spotting of up to .75 miles can be expected. Areas of concern remain Division B, T, and Y on the Lassic fire, and Division A, W, on the Johnson fire. Interior portions of the fire will continue to increase in activity as the day progresses. Snags will continue to pose problems and cross containment lines.

1000 hour (heavy) fuels are calculated at 8-10%. Live woody is 2/3 cured and is becoming available to burn. Fire will carry through deciduous species when supported by concentrations of ground fuels in exposed areas (except north aspects). **Probability of ignition will be near 80% on exposed ridges and southerly aspects. Divisions in patrol status should patrol early and often and can expect increased activity in the interior portions of the fire.**

Indicators for Increased Fire Activity

Relative Humidity <19%, Winds >6mph, Temperatures >90F, 1000 fuel moistures <14%,

FIRE BEHAVIOR: Route Complex

Division A,C,D, Primarily smoldering and creeping in the pilot creek drainage. Be on the lookout for undetected spots and areas of patchy burning on the interior of the fire. Burn out operations should take advantage of downslope winds in the late afternoon evening hours as fuels are at the lowest moistures and humidity's are on the rise. Winds will be southerly will dominate the upslope/up valley winds on the ridgetops. Expect active surface fire and individual group tree torching in the south end of Division A, in the drainage bottoms. Drainage bottoms are sheltered and may see variable wind speed and direction with the instability in the afternoon

Division E: Smoldering and creeping, Interior portions of the fire will increase in activity with the warmer and drier weather. Be on the lookout for spotting. Watch-out for fire weakened trees and snag hazards.

Division, W: Smoldering and creeping. Un-burned areas and interior portions and spotting burned areas will progressively become active as the day continues. Be on the lookout for re-burn potential and shifting winds.

Division N,P F,H: Smoldering and creeping. Be on the lookout for burning snags and fire weakened trees. Interior islands may react and become active with the southerly flow and less shading from the smoke.

LASSIC FIRE:

BRANCH II: The eastern portion will continue to aggressively back down slope into the Van Duzen creek drainage toward the containment lines near the Y, B break. Expect aggressive backing fire under 3500 ft <2 ch/hr. The upper elevations will see individual single/group tree torching and short sustained crown runs in the late afternoon when aligned with slope and fuels typically elevations above 3500 ft. Be on the lookout for rolling material on the steep slopes and the potential for a slope reversal.

The southern portion of Branch II will see the greatest spread. Expect individual tree torching and short sustained crown runs on the exposed slopes and ridges. Fire will progress down ridgelines due to the extremely low RH and slop over into the valleys Rollout and slope reversal can be expected.

BRANCH I: Little van dozen creek area, the fire will continue to back into the drainage. Be on the lookout for any fire that gets established on the western portion of the creek. Expect aggressive upslope spread toward containment lines characterized by short duration crown fire and individual group tree torching. Spotting of up to .75 miles can be expected. Division Y, T. Division Y should see favorable winds today with southerly push and maybe un-favorable for Division T. Expect single and group tree torching and short intense crown runs where fuels and slope align. Winds will be favorable for firing operations for Division Y, but may pose problems for Division Z.

Division L

Remain in communications and keep appraised of potentially threatened areas.

AIR OPERATIONS:

Moderate inversion will affect air operations, but should begin to dissipate around 1200.

SAFETY: The potential is there for large fire growth. DO NOT be caught by surprise! Conditions are such that rapid fire growth can develop with wind alignment/slope coupled with current fuel conditions. Monitor and communicate fire behavior at all times and do not let your guard down.

Fire Danger Rating Area 130 Energy Release Component

FUEL MODEL G Short Needle (Heavy Dead)

Fire Danger Rating Area 130 Burning Index

FUEL MODEL G Short Needle (Heavy Dead)

- Fire Danger Areas 130
- * Mad River Ranger District
- * Six Rivers National Forest
- * NW CA - Region 5

Weather Stations Used (NWCG Standards):

- * 040507 Mad River
- * 040508 Ruth

Local Thresholds - WATCHOUT:

Combinations of any of these factors can greatly increase fire behavior: 20' Windspeed over 6 mph; RH less than 19%; Temperature over 90; 1000-hour Fuel Moisture less than 14. Large fires become more frequent when BI exceeds 46 and when ERC exceeds 48.

Graph Interpretation, Energy Release Component:

Maximum = Highest ERC by day for 2003-2014
Average = Shows Peak Fire Season
60% = 60th Percentile means 40% of days studied had an ERC above 48.

PAST EXPERIENCE | LOCAL KNOWLEDGE:

Wildfires become a problem @ 50 acres on the Six Rivers NF due to topography, fuels, and accessibility ("Large fires" = 50 acres). Large fires become more frequent when 1000 hour fuel moistures drop below 14, when BI exceeds 46, and when ERC exceeds 48 (large fires can and do occur at lower indices)

Afternoon winds W/NW along Ruth Lake Corridor greatly influence direction of fire spread in the area.
South Fork Mountain affects weather in the area: Funnels the wind and influences thunderstorm development and movement.

Other Watchouts not related to weather and indices; dangers associated with marijuana gardens and arson fires.

Graph Interpretation, Burning Index:

Maximum = Highest BI by day for 2003-2014
Average = Shows Peak Fire Season
60% = 60th Percentile means 40% of all days studied had a BI above 46

SAFETY MESSAGE

Route Complex - Mad River Complex

Tuesday 25 August, 2015

Major Hazards

- Duration of incident and continuing burning periods.
- Driving and Backing
- Lack of resources - maintaining productivity.

Changed or Changing Conditions

- As burning periods continue to accumulate and wind has shifted, the potential increases for different areas of the line and unburned islands to become active.
- Familiar hazards remain, the changed conditions is our gaining familiarity, sense of comfort and potential for complacency.
- Resources are spread thin (fewer people spread over larger area). Final objective remains the same.

Mitigations

- As burning periods accumulate and organic material burns out that has been propping up and supporting logs, rocks trees and any perched material, these materials become available to roll out,, what I call Gravity Hazards. Its simple physics and its properties are unchanging, inflexible and unforgiving. We must maintain Situational Awareness for these potential "rollers" and "watch out" for their existence.
- We continue to receive reports of excessive speed, inattentive, and distracted driving. Slow Down! Eliminate distractions when behind the wheel. No cell phone use while driving. It is recommended to not use hands free devices as well. All these impair our cognitive ability to focus on driving.
- As we continue to experience personnel and equipment timing out and being pulled, and receiving fewer resources assigned to relieve those exiting, we must recognize what we can do,, know our limits . We will accomplish our assigned task, but it may take longer than previously planned. Slower may be the fastest way to success.

AIR OPERATIONS SUMMARY

PREPARED BY: Dean Bitterman/Lori Clark

PREPARED DATE/TIME: 08/24/2015 2000

1. INCIDENT NAME: Route/Mad River Complex

2. OPERATIONAL PERIOD DATE:08/25/15

START TIME: 0800

END TIME: 2000

SUNRISE: 0635 SUNSET:1959

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.):
NOTE: Shared TFR and shared aircraft with the South/Fork complex.

OPERATIONS ALONG THE SHARED BORDER PROCEDURES: Utilize the South Complex RW victor for Route Complex aerial operations on the East side of the Fire.

Terminate aerial operations at sunset unless risk assessment justifies operations into dusk conditions.

4. MEDEVAC A/C: (critical):See medical plan (non-critical): (T3/T2 heli, 1st AV)

Missions and ordering process: Bucket work as requested. Recon as smoke conditions allow. Utilize HLCO and Air Attack to assess smoke conditions for aerial operations. Order all aerial services through Aerial Supervision (if up); if no Aerial Supervision order all helicopters through Dinsmore Helibase, regardless of aircraft location (Mad, Rohnerville, or Dinsmore). (Helibase will call Air Operations for any unplanned operations or for borrowing of aerial resources by other fires.

Medical Emergency Procedures

Upon occurrence of a "Major Medical" or accident involving significant injury on the fire line, the closest DIVS should respond directly to the scene to take control of the situation and direct necessary actions. If the DIVS is unavailable, the nearest fire line supervisor or leader needs to take charge.

1. Route Communications will clear all radio traffic on the Incident Command Channel-use to coordinate response as needed. Do Not Use Names. Identify: 1) The on-scene Point Of Contact (i.e. TFLD Smith); 2) Describe the nature of the accident/illness.
2. Obtain and facilitate nearest Medical Care Provider to the scene. On Scene IC is in charge of the scene. Identify to Communications the name of the On Scene Point of Contact and Medical Care Provider on site.
3. Check nature of the problem, # of patients, status, vitals, mechanism of injury & location. (GPS if possible) Request additional resources if needed.
4. Report the Severity of the Injury/Illness: Red, Yellow, Green.
5. Coordinate and facilitate appropriate transportation for patient(s) according to severity. Medical Care Provider in charge of patient(s).
6. Request additional resources / equipment as needed.
7. Inform Communications of any changes on scene for Point Of Contact / Medical Care Providers.
8. Identify the evacuation location. Remove all unnecessary personnel from the scene. Secure scene, identify witnesses for later investigation. Keep a log.

LIFE SAFETY IS THE NUMBER 1 PRIORITY ON THIS INCIDENT

The term "Medivac" is for Emergency Medical Evacuations Only

9. Prepared by Medical Unit Leader <i>Rodney Schmidt</i> Rodney Schmidt 916.591.9006	10. Reviewed by (Safety Officer) <i>Dan LeCrone Bruce A. Martinek</i> Dan LeCrone

MEDICAL EMERGENCY COMMUNICATION PROCEDURE FOR THE INCIDENT WITHIN AN INCIDENT

MEDIVAC INFORMATION

Contact Communications on the Command Channel. Communications will contact Command & General Staff.

Declare the nature of the emergency: Traumatic Injury _____ Medical Illness _____

Is the injury/illness:

URGENT-RED Life Threatening _____ PRIORITY-YELLOW Serious _____ ROUTINE-GREEN Minor _____

If Life Threatening request that the designated frequency be cleared for emergency traffic.

Communications will broadcast on Command Radio the channel is for Emergency Traffic Only;

Identify the on-scene Incident Name: _____

Identify the on-scene Incident Commander: _____

Identify the on-scene Care Provider: _____

Identify the number of injured/ill: _____ Identify the nature of the injury/illness: _____

Is the patient conscious? Yes _____ No _____

Is the patient experiencing any difficulty breathing? Yes _____ No _____

What is the mechanism of injury/illness? _____

Specific location of the patient (nearest DP / Helispot): _____

Is a helicopter needed for evacuation? Yes _____ No _____

Pick-up point, route for ground transportation: _____

Are additional EMTs needed? Yes _____ No _____

Any additional equipment or resources that are needed? _____

Identify any changes in the on-scene IC or medical personnel as they occur.

Contact Communications when the Emergency has ended and the radio channel can be cleared for normal traffic. Communications will broadcast on Command Radio channel resumption of normal radio traffic.

HUMAN RESOURCE MESSAGE

Route and Mad River Complex(s) – 08/25/2015
HR Specialist - Chuck Sandau – Contact # (406) 698-6122

Good Communication benefits the whole team

- think “we” rather than “I versus you.”
- Separate the individual from the issue.
- Treat everyone – even those with whom you’re having a problem – with respect.

Effects of Inappropriate Behavior

- Divisive, Disruptive, Damaging to the mutual goal of getting the fire controlled and out
- Counter productive to teamwork
- Dangerous, especially on incidents where a lack of clear communication and cooperation could result in accidents.
- Costly; Formal complaints can cost an Agency in excess of \$10,000 to investigate.

Think before you speak: *“We don’t necessarily discriminate, we simply exclude certain types of people.”* – Colonel Gerald Wellman - ROTC

INCIDENT TRAINING MESSAGE

**All trainees on the incident need to check in with
the Training Specialist (TNSP)**

- Training Specialist is located on “Main Street” at the ICP
- Blank forms and a “drop box” for registering your assignment are located in the Training Trailer across from Check In and next to Documentation.

**DEMOBING trainees need to close out with the
Training Specialist in order to receive
documented credit for your assignment**

- Bring a completed and signed ICS 225 or 226
Performance Evaluation
- A completed Exit Interview Form
- Position Task Book

ALL forms available at the training trailer

**Trainers if you leave the incident before your trainee you will
need to complete a Performance Evaluation for the time your
trainee *was* assigned to you.**
