ROUTE COMPLEX CA-SRF-001476

MAD RIVER COMPLEX

CA-SRF-001433 IAP

Day Wednesday 0700-1900 August 26, 2015

Today's discussion is from the Fireline Safety Category.

Different Day- Same Hazards - Have you heard this before?

Let's pay attention to the "Little" stuff.

FOOTING: Rocks, logs, and steep slopes will be especially treacherous. Take your time, plan each step and avoid walking on logs. There is no mystery to it and a little planning and patience will prevent injuries. CONSIDER EACH STEP

Dehydration: Is a continuing concern. Drink water regularly and plentifully.

Snags: As you get deeper into these fires, you're exposed to new nasty snags. Be sure to flag, fall or avoid these silent killers.

<u>Complacency:</u> is something we need to fight off now. Focus on the mission and pay attention to details.

ICS Form 202 INCIDENT OBJECTIVES

Notice Name
 Route Complex
 Mad River Complex

2. DATE 8/25/15 3. TIME 1300

4. OPERATIONAL PERIOD (DATE/TIME) 8/26/2015 0700-1900

5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)

Management Objectives:

Safety:

We will provide for Firefighter and Public Safety by managing risk based on exposure and probability of success, while protecting private property and other resource values.

Suppression Actions:

We will minimize suppression impacts to Archaeological Sites, Anadromous Fisheries, Water Quality, and spread of Invasive Weeds by implementing suppression tactics that follow Management Guidelines and Best Management Practices. We will utilize Resource Advisors to help identify sensitive sites and develop tactics to minimize/mitigate actions.

Leader's Intent:

I expect the following:

- Treat everyone with respect.
- Maintain and improve public relations with local communities and cooperators
- All fires in the complex will be controlled using Full Suppression strategies (e.g. direct attack, indirect attack, point protection), based on safety to firefighters and the public.
- 6. WEATHER FORECAST FOR OPERATIONAL PERIOD See Attached.
- 7. GENERAL SAFETY MESSAGE See Attached.
- 8. ATTACHMENTS

INCIDENT WEATHER FORECAST

FORECAST NO: 20

PREDICTION FOR: DAY SHIFT

SHIFT DATE STARTS: Wednesday August 26, 2015

FORECAST ISSUED: 1800 Tuesday August 25, 2015

ROUTE AND MAD RIVER COMPLEXES UNIT: USFS Six Rivers & Shasta T NF SIGNED: Dan Borsum/Mary Wister (T)

Incident Meteorologist

WEATHER DISCUSSION: Continued southwest winds ridges. Cooling begins Thursday.

A southwest flow aloft will remain over the fire through the end of the week. Very few changes in temperatures, RH's, and winds are anticipated through Wednesday night. A Pacific low pressure system will nudge towards the coast late in the work week, bringing slightly cooler temperatures and higher RH's beginning Thursday. Southwest winds gusting to 20-25 mph will continue along ridgetops. There is a chance for some precipitation late Friday into Saturday.

TODAY: Smoke lifting by 1200 with afternoon cumulus. High thin clouds late.

TEMPERATURE: Below 3500ft 85-90F

3500-4500ft 82-87F

Abv 4500ft 78-83F

HUMIDITY:

Below 3500ft 18-23%

3500-4500ft 18-23%

Aby 4500ft 20-25%

20 FT WINDS:

SLOPES/VALLEYS:

Upslope/upvalley 4 -8 mph.

RIDGES:

Southwest 10-15 mph with gusts to 20 mph.

TRANSPORT WIND:

Southwest 20 mph

INVERSION:

Weak inversion breaking around 1200.

TONIGHT: Partly cloudy. Evening cumulus. Smoky after midnight.

TEMPERATURE: Below 3500ft 55-60F

3500-4500ft 53-58F

Aby 4500ft 56-61F

HUMIDITY:

Below 3500ft 85-90%

3500-4500ft 60-65%

Aby 4500ft 45-50%

20-FOOT WIND:

SLOPE/VALLEY:

Downslope 2-4 mph Southwest 4-7 mph

RIDGETOP: TRANSPORT WIND:

Southwest 10 mph

THURSDAY: Mostly cloudy and smoky.

TEMPERATURE: Below 3500ft 83-88F

3500-4500ft 80-85F

Abv 4500ft 75-80F

HUMIDITY:

Below 3500ft 20-25%

3500-4500ft 22-27%

Aby 4500ft 23-28%

20 FT WINDS:

SLOPES/VALLEYS:

Upslope/upvalley 4 -8 mph.

RIDGES:

Southwest 10-15 mph with gusts to 20 mph.

TRANSPORT WIND:

Southwest 20 mph

INVERSION:

Weak inversion breaking around 1100.

FIRE BEHAVIOR FORECAST								
FORECAST NUMBER: #20	TYPE OF FIRE: Wildland Fire							
FIRE NAME: Route Complex/Mad River Complex	OPERATIONAL PERIOD: Day 08/26/15							
DATE ISSUED: 08/25/2015	TIME ISSUED: 2100 hours							
UNIT: Six Rivers/Shasta-Trinity National Forest	SIGNED: Tim Metzger, FBAN							
	INPUTS							

WEATHER SUMMARY: See Attached Fire Weather Forecast

OUTPUTS

FIRE BEHAVIOR

Day Shift

Once again the fires will reach a critical fire weather threshold and you can expect the fire to become active by 1000 hours. Surface fire and individual tree/group tree torching can be expected as the fire continues to back into the valley bottoms. Any upslope movement will aggressively seek ridgelines with profuse spotting downwind of any significant column development. Spotting of up to .5 miles can be expected. Areas of concern remain Division B, T, and Y on the Lassic fire, and Division A, W, on the Johnson fire. Interior portions of the fires will continue to increase in activity as the day progresses. Snags will continue to pose problems and cross containment lines.

1000 hour (heavy) fuels are calculated at 8-10%. Live woody is 2/3 cured and is becoming available to burn. Fire will carry through deciduous species when supported by concentrations of ground fuels in exposed areas (except north aspects). Probability of ignition will be near 80% on exposed ridges and southerly aspects. Divisions in patrol status should patrol early and often and can expect increased potential for activity in the interior portions of the fire.

Indicators for Increased Fire Activity

Relative Humidity <19%, Winds >6mph, Temperatures >90F, 1000 fuel moistures <14%,

FIRE BEHAVIOR: Route Complex

Division A: Primarily smoldering and creeping in the pilot creek drainage. Be on the lookout for undetected spots and areas of patchy burning on the interior of the fire. Expect active surface fire and individual group tree torching in the south end of Division A, in the drainage bottoms. Drainage bottoms are sheltered and mays see variable wind speed and direction with the instability in the afternoon. Be on the lookout for undetected spot fires from yesterday's burn.

Division E, C, D: Smoldering and creeping, Interior portions of the fire will increase due to the Low RH. Be on the lookout for spotting. Watchout for fire weakened trees and snag hazards.

Division, W: Smoldering and creeping. Un-burned areas and interior portions and spotting burned areas will progressively become active as the day continues. Be on the lookout for re-burn potential and shifting winds and spotting from column development.

Division N,P F,H: Smoldering and creeping. Be on the lookout for burning snags and fire weakened trees. Interior islands may react and become active with the southerly flow and less shading from the smoke.

LASSIC FIRE:

BRANCH II: Expect to see individual single/group tree torching and short sustained crown runs in the late afternoon when aligned with slope and fuels typically elevations above 3500 ft. Areas below 3500 feet expect aggressive backing fire as the fire backs into the valley bottoms Be on the lookout for slope reversal as the fire continues to back toward the S11 road. Unburned fuels between the fires edge and the road system have a high probability of spotting across the road as downslope winds in the evening will push smoke and embers downslope across the road.

BRANCH I: West Fork Little Van Dozen creek area, the fire will continue to back into the drainage. Expect aggressive backing fire and individual group tree torching. Spotting of up to .5 miles can be expected where wind slope and fuels align in. Division Y, T. Division Y should see favorable winds today with southerly push and maybe un-favorable for Division T. Expect single and group tree torching and short intense crown runs where fuels and slope align. Winds will be favorable for firing operations for Division Y and T, but may pose problems for Division Z.

Division L

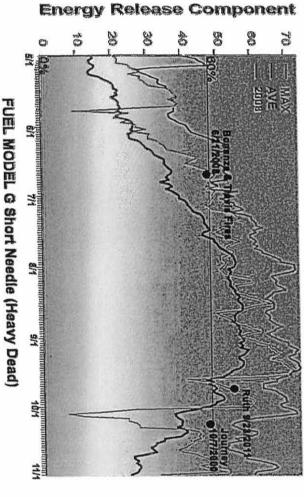

Remain in communications and keep appraised of potentially threatened areas.

AIR OPERATIONS:

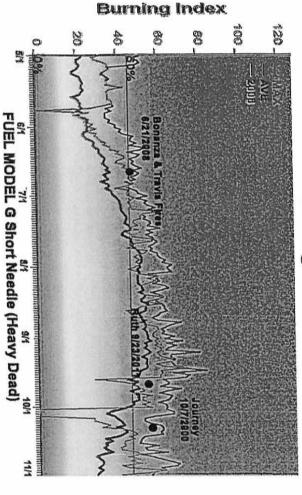

Weak inversion will affect air operations, but should begin to dissipate around 1200.

SAFETY: The fires are winding down and the potential fire behavior within the perimeter is decreasing across much of the divisions. Remember fuels are dry and potential in fuels adjacent to the perimeter is HIGH!

Fire Danger Rating Area 130 Energy Release Component

Fire Danger Rating Area 130 Burning Index

Fire Danger Areas 130

- * Mad River Ranger District
- Six Rivers National Forest
- NW CA Region 5

Weather Stations Used (NWCG Standards):

- * 040507 Mad River
- 040508 Ruth

Local Thresholds - WATCHOUT:

Combinations of any of these factors can greatly increase fire behavior: 20' Windspeed over 6 mph; RH less than 19%; Temperature over 90; 1000-hour Fuel Moisture less than 14. Large fires become more frequent when BI exceeds 46 and when ERC exceeds 48.

Graph Interpretation, Energy Release Component:
Maximum = Highest ERC by day for 2003-2014
Average = Shows Peak Fire Season
60% = 60th Percentile means 40% of days studied had
an ERC above 48.

PAST EXPERIENCE I LOCAL KNOWLEDGE:
Wildfires become a problem @ 50 acres on the Six Rivers NF due to topography, fuels, and accessibility ('Large fires'= 50 acres).

topography, fuels, and accessibility ("Large fires" = 50 acres). Large fires become more frequent when 1000 hour fuel moistures drop below 14, when BI exceeds 46, and when ERC exceeds 48 (large fires can and do occur at lower indices)

Afternoon winds W/NW along Ruth Lake Corridor greatly influence direction of fire spread in the area.

South Fork Mountain affects weather in the area: Funnels the wind and influences thunderstorm development and movement.

Other Watchouts not related to weather and indices; dangers associated with marijuana gardens and arson fires.

Graph Interpretation, Burning Index:
Maximum = Highest BI by day for 2003-2014
Average = Shows Peak Fire Season
60% = 60th Percentile means 40% of all days studied had a
BI above 46

SAFETY MESSAGE Route Complex - Mad River Complex Day Operational Shift

Wednesday August 26, 2015

Major Hazards

- Steep terrain.
- Rocky slopes and loose soils.
- · Dead and down debris making travel difficult.

Changed or Changing Conditions

- As suppression strategy changes from firing out dozer lines and existing roads to direct attack, foot travel is becoming more difficult.
- Steepness of slope is increasing the risk of rolling debris.
- Travel time for emergency egress may require more planning and increased travel times.

Mitigations

- Determine the length of time needed to utilize escape routes and adjust trigger points accordingly. Base retreat times on the slowest member of the crew.
- Be aware of crews working directly uphill/downhill and warn others of rolling debris.
- Fire activity may increase quickly when wind and terrain align. Post lookouts and ensure adequate time is allowed to utilize escape routes or reach safety zones.
- Reassess escape routes as you progress down the fireline.

* IRPG - Risk Management - Page 1 of Green Section. *

6. Control Operations/Work Assignments:

- · Continue to hold fire north and east of 2S08 Rd and north of 2S24 Rd into Big Meadow Creek.
- · Firing if necessary or if opportunities exist to do so.
- · Continue mop up of slopes south of 2S08 Rd
- · Continue to mop up along fireline on 2S24 Rd from 2S08 Rd northeast

7. Special Instructions:

Use caution around snags and flag as needed for safety. Identify snags to be fallen with appropriate tape.

Use caution while driving on all roads due to narrowing and other roadway hazards. Use caution while driving on Highway 36.

DO NOT OPEN RECREATIONAL GATES ON FOREST

Backhaul excess equipment and trash.

Verify status of all accountable property. GPS location when moved or placed and report coordinates to supply.

Utilize spill kits under Mark III pumps.

CalFire to contact on incident command channels.

6. Control Operations/Work Assignments:

- · Continue to secure and mop up a chain in from line from DP10 to Safety Zone at division break
- . Snag as necessary for safety and mop up

7. Special Instructions:

Use caution around snags and flag as needed for safety. Identify snags to be fallen with appropriate tape.

Use caution while driving on all roads due to narrowing and other roadway hazards. Use caution while driving on Highway 36.

DO NOT OPEN RECREATIONAL GATES ON FOREST

Backhaul excess equipment and trash.

Verify status of all accountable property. GPS location when moved or placed and report coordinates to supply.

Utilize spill kits under Mark III pumps.

CalFire to contact on incident command channels.

6. Control Operations/Work Assignments:

- · Construct and reinforce contingency line in Grizzly Mountain area.
- · Division Supervisor continue to coordinate with CalFire contingency group.
- Tenders E-219 and E-259 water 2S08 Rd from DP10 southeast to pavement
- · Use traffic control to allow ONE lane traffic where chippers are in use DP34 north to the dozer line from Gobbler Fire.

7. Special Instructions:

Use caution around snags and flag as needed for safety. Identify snags to be fallen with appropriate tape.

Use caution while driving on all roads due to narrowing and other roadway hazards. Use caution while driving on Highway 36.

DO NOT OPEN RECREATIONAL GATES ON FOREST

Backhaul excess equipment and trash.

Verify status of all accountable property. GPS location when moved or placed and report coordinates to supply. Utilize spill kits under Mark III pumps.

Powerline Road has noxious weeds throughout; equipment is driving through and spreading; areas are flagged for avoidance.

CalFire to contact on incident command channels.

	Notes:	LONGITUDE	LATITUDE	LOCATION:

Missions and ordering process: Water drops (bucket, tanked, or gel) as requested. Utilize HLCO and Air Attack to assess smoke conditions for aerial operations. Order all aerial services through Aerial Supervision (if up); if no Aerial Supervision order all helicopters through Dinsmore Helibase, regardless of aircraft location (Mad, Rohnerville, or Dinsmore). (Helibase will call Air Operations for any unplanned operations or for borrowing of aerial resources by other fires. Sharing of resources will be coordinated with Incident AOBDs.

Upon occurrence of a "Major Medical" or accident involving significant injury on the fire line, the closest DIVS should respond directly to the scene to take control of the situation and direct necessary actions. If the DIVS is unavailable, the nearest fire line supervisor or leader needs to take charge.

- 1. Route Communications will clear all radio traffic on the Incident Command Channel-use to coordinate response as needed. Do Not Use Names. Identify: 1) The on-scene Point Of Contact (i.e. TFLD Smith); 2)Describe the nature of the accident/illness.
- 2. Obtain and facilitate nearest Medical Care Provider to the scene. On Scene IC is in charge of the scene. Identify to Communications the name of the On Scene Point of Contact and Medical Care Provider on site.
- 3. Check nature of the problem, # of patients, status, vitals, mechanism of injury & location. (GPS if possible) Request additional resources if needed.
- 4. Report the Severity of the Injury/Illness: Red, Yellow, Green.
- 5. Coordinate and facilitate appropriate transportation for patient(s) according to severity. Medical Care Provider in charge of patient(s).
- Request additional resources / equipment as needed.

Level | Trauma

Burn Center

- Inform Communications of <u>any</u> changes on scene for Point Of Contact / Medical Care Providers.
- 8. Identify the evacuation location. Remove all unnecessary personnel from the scene. Secure scene, identify witnesses for later investigation. Keep a log.

LIFE SAFETY IS THE NUMBER 1 PRIORITY ON THIS INCIDENT The term "Medivac" is for Emergency Medical Evacuations Only

MEDICAL EMERGENCY COMMUNICATION PROCEDURE FOR THE INCIDENT WITHIN AN INCIDENT

MEDIVAC INFORMATION

Contact Communications on the Command Channel. Communications will contact Command & General Staff.
Declare the nature of the emergency: Traumatic Injury Medical Illness
Is the injury/illness:
URGENT-RED Life Threatening PRIORITY-YELLOW Serious ROUTINE-GREEN Minor
If Life Threatening request that the designated frequency be cleared for emergency traffic. Communications will broadcast on Command Radio the channel is for Emergency Traffic Only;
Identify the on-scene Incident Name:
Identify the on-scene Incident Commander:
Identify the on-scene Care Provider:
Identify the number of injured/ill: Identify the nature of the injury/illness:
Is the patient conscious? Yes No
Is the patient experiencing any difficulty breathing? Yes No
What is the mechanism of injury/illness?
Specific location of the patient (nearest DP / Helispot):
Is a helicopter needed for evacuation? Yes No
Pick-up point, route for ground transportation:
Are additional EMTs needed? Yes No
Any additional equipment or resources that are needed?

Identify any changes in the on-scene ${\bf I}{\bf C}$ or medical personnel as they occur.

Contact Communications when the Emergency has ended and the radio channel can be cleared for normal traffic. Communications will broadcast on Command Radio channel resumption of normal radio traffic.

HUMAN RESOURCE MESSAGE

Route/Mad River Complex - 8/26/2015 HR Specialist Chuck Sandau - contact # (406) 698-6122

Due to your efforts thus far, there have been no major conflicts on this incident. Please continue to display professional behavior, recognizing that many folks have been out on fire assignments for a long period of time.

The IC teams (both the current and the soon-to-be transitioning team) appreciate your cooperation and positive work. Turman's Type 1 IC Team would like to thank all of you who have approached your duties in a professional manner, enabling the team to successfully manage this incident.

Respect: We will treat all firefighters and individuals associated with the incident and affected by the incident with respect.

Thank You

Think before you speak:

"We apologize for the error in last week's paper in which we stated that Mr. Arnold Dogbody was a defective in the police force. We meant, of course, that Mr. Dogbody is a detective in the police farce." — correction in the Ely Standard

INCIDENT TRAINING MESSAGE

All trainees on the incident need to check in with the Training Specialist (TNSP)

- Training Specialist is located on "Main Street" at the ICP
- Blank forms and a "drop box" for registering your assignment are located in the Training Trailer across from Check In and next to Documentation.

DEMOBING trainees need to close out with the Training Specialist in order to receive documented credit for your assignment

- Bring a completed and signed ICS 225 or 226
 Performance Evaluation
- A completed Exit Interview Form
- Position Task Book

ALL forms available at the training trailer

Trainers if you leave the incident before your trainee you will need to complete a <u>Performance Evaluation</u> for the time your trainee was assigned to you.
