INPUTS

WEATHER SUMMARY: LOW PRESSURE MOVING TO THE EAST ACROSS CENTRAL CALIFORNIA WILL MAINTAIN EASTERLY FLOW OVER THE GASQUET COMPLEX INTO FRIDAY. RECOVERIES OVERNIGHT WILL BE MODEST DUE TO THE OFFSHORE FLOW.

MAX TEMPERATURE.....73-81.

MIN HUMIDITY.....33-40 PERCENT.

EYE LEVEL WINDS.....EAST WINDS 7 MPH WITH GUSTS TO 11 MPH BECOMING NORTH IN THE AFTERNOON.

For more specific information, please see the Spot Weather forecast

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Lower temps and increasing RH will lead to less fire activity this burning period. West and South edges present some concerns due to the winds. Have now had continuous presence of fire in timber fuels for 4+ days. STAY AWARE. Continue to monitor for spots and rollout.

SPECIFIC:

Timber Understory: Fire behavior in the Understory models should decrease. ROS and Flame Length will be more modest and have a reduced intensity.

ROS: 5 to 10 ch/hr.

FL: 6 to 8 ft.

Timber Litter: Timber Litter fire behavior is also decreasing. Dirty burns and incomplete consumption could lead to less distinct fire edges.

ROS: 3 to 6 ch/hr.

FL: 2 to 3 ft.

Rollout of heavier fuels continues to present a concern as the fires work into the drainages. Be prepared for a slope reversal run if fire establishes with sufficient heat.

AIR OPERATIONS:

Marine Layer comes back into play as the Low Pressure pulls moist air into the fire area. Clearing by late morning back to the coast.

SAFETY

Be heads up for unstable trees and snags due to instability in the root structures from the consumption of securing material. Increased wind may be just enough to knock over.

Incident within an Incident Action Plan

When the scope or complexity of the emergency exceeds division resource needs

This plan is designed to identify the initial actions that should be taken by the first arriving personnel on a serious accident. This person may be a single resource, engine boss, or a crew boss. Accidents or incidents within an incident happen rapidly and require sound, calm initial decisions to handle the problem, while still focusing on the main incident. The following checklist provides some key thoughts and actions.

The first arriving person to any accident should notify their Division Supervisor, or the Div Sup assigned to that location.

Advise of the critical information needed:

- Accident scene safety assessment and advise incoming personnel
- Number of injuries and their severity
- Special equipment needs (extrication, low/high angle rescue, fire protection or suppression)
- Assist the injured as necessary without endangering yourself or other personnel
- Do not move trauma victims unless their safety is in jeopardy
- Utilize PINK pages of the Incident Response Pocket Guide (IRPG) for patient assessment/medical procedures

Remain aware of surroundings and delegate personnel to monitor the main fire

The Division Supervisor will assume command of the accident/incident scene upon arrival. The following list outlines the general duties and tasks that should be completed on most accidents/incidents.

1. Delegate division oversight to another Division Supervisor or other qualified person.
2. Request a clear frequency from Comm and consider switching to designated Emergency Tactical (Incident Comm will notify the MEDL who will initiate the medical plan for injuries)
3. Order/delegate resources appropriate for the accident/incident (crew EMT's, Line EMT's or Line Medics, rescue equipment, patient transport needs, manpower)
4. Notify Operations Section Chief and Safety Officer on all accidents/incidents.
5. Begin to document the event accurately and completely. Use ICS form 201 if the event is large or complex.
6. Protect the scene for Investigators

Hazards & Risks

Hazards:

Hazards on the fire line and roadways continue to be a topic and difficult to deal with.

Unfamiliar Topographer, Steep Terrain, Debris on the road ways, and poor footing are a big concern on the divisions.

Hazard trees are also a concern on all divisions. Refer to **IRPG pg.22** for hazard tree common risks that may be encountered.

Heavy equipment, Now that the incident is growing, you will start seeing heavy equipment showing up on some divisions. Refer to **IRPG pg. 80** for information needed when working around heavy equipment.

Dehydration = Heat related injuries:

Heat illness continues to be a big concern continuous hydration could contribute to a yourself and your crews to ensure they are

this year. The lack of loss of energy. Monitor hydrating all day.

Escape Routes and Safety Zones:

Do you have your escape route and safety zones identified? In the areas we're working, it could be difficult to identify them. Take the extra minute out of your day to identify those safety zone, and more importantly make them known to all.

Driving:

When driving to and from your divisions and through the community, follow the posted speed limits. We are all visitors in this community, being respectful and friendly will ensure the forest continues their great relationship with the community.

Narrow roadways in the fire area could be a situation that shouts watch out. Driving defensively, with head lights on, and watch your speeds while rounding tight corners.

Emergencies on the divisions: Refer to Team 2, Incident With-In an Incident in the IAP. During your tail board briefings, discuss this with your crews.
