INCIDENT Weather Forecast

FORECAST NO:

7

NAME OF FIRE: Gasquet Complex

PREDICTION FOR: Day Shift

SHIFT DATE: 8/18/2015

SIGNED: Pachel Cobb

Rachel Cobb

TIME AND DATE

FORECAST ISSUED: 1900 8/17/2015

Incident Meteorologist

WEATHER DISCUSSION: High pressure will persist over California and the eastern Pacific on Tuesday and will keep the thermal trough over the area. This will cause continued hot and dry conditions. Skies will be cloud free, but smoky. There will be an inversion that around 3000 feet that is not likely to break. Therefore, although Haines Index will be 5, this is not expected to affect the fire.

WEATHER FORECAST for Tuesday:

WEATHER: Clear, but smoky.

MAXIMUM TEMPERATURES: 86 - 92 degrees mid-slopes/valleys...80 - 85 degrees ridges.

MINIMUM HUMIDITY: 15 - 25 percent.

20 FT WINDS:

RIDGETOP – Easterly 5 to 10 mph with gusts to 20 mph in the morning becoming westerly 4 to 9 mph with gusts to 15 mph in the afternoon.

SLOPE/VALLEY - Downvalley 10 to 15 mph with gusts to 25 mph becoming upslope/upvalley 3 to 8 mph.

HAINES INDEX: 5 (moderate).

STABILITY/INVERSION: Mixing height 3000 feet msl. Inversion may not break.

<u>OUTLOOK for Tuesday Night:</u> Clear, but smoky. Low temperatures 62 – 73 degrees and maximum relative humidity 30 – 60%. East winds 8 to 15 mph with gusts to 25 mph. Haines Index: 5. Thermal belt 3000 – 4000 feet msl.

OUTLOOK for Wednesday: Clear, but smoky. Highs temperatures 77-90 degrees and minimum relative humidity 20-30%. Easterly winds 4 to 8 mph in the early morning, shifting westerly by afternoon. Mixing height: 3000 feet msl. Haines Index: 5.

EXTENDED FORECAST: Warm and dry conditions will persist through next weekend. However, a low pressure trough to the north will bring better onshore flow Wednesday through Friday, bringing slightly cooler temperatures and higher humidity. High pressure will rebuild Saturday and Sunday.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: #15	TYPE OF FIRE: Wildland Fire
FIRE NAME: Gasquet Complex	OPERATIONAL PERIOD: August 18, 2015
DATE ISSUED: August 17, 2015	TIME ISSUED: 1800
UNIT: Smith River NRA, Six Rivers NF	SIGNED: Richard Gonzales
	Typed/printed: Richard Gonzales, FBAN

INPUTS

WEATHER SUMMARY: High Pressure persists resulting in Clear skies. Hot and dry,

MAX TEMPERATURE.....Valleys 88-92, Ridges 80-85.

MIN HUMIDITY......15-25%

EYE LEVEL WINDS.....Upslope/Upvalley 3-5, Ridge: West 4 to 9,

For more specific information, please see the Incident Weather forecast

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Continued warming and drying brings excellent burning conditions. Inversion may delay the start to the burn period. Expect low to moderate activity under the inversion. Be aware of indicators that the inversion is lifting...air becoming clear and fire activity increasing. Once the inversion lifts, conditions are present to allow for a significant increase in activity. Steepening slopes above 35% will also provide an uptick in activity due to convection. Spotting becomes a concern as brush understory becomes involved.

With line construction in incomplete burns, be positive that you are exposing the black edge and getting all the hot ash and embers inside your line.

SPECIFIC:

Timber Understory: Fire behavior in the Understory models could begin early. Warmer and drier conditions will expand the burn window, once the inversion lifts. Expect more involvement of the understory brush and shrubs with increased intensity.

ROS: 10-16 ch/hr.

FL: 8-11 ft.

Timber Litter: Timber Litter fire behavior may be active early. Increased consumption of heavier fuels and understory may provide additional material for spots and roll out. Stay aware of rollout and upslope runs through incomplete burns.

ROS: 7-13 ch/hr.

FL: 4-5 ft.

Spotting becomes a concern with improved burn conditions. Know where your smoke is going and check for fallout.

ERC- 62

BI- 58

Refer to Pocket Card in IAP for local thresholds

AIR OPERATIONS:

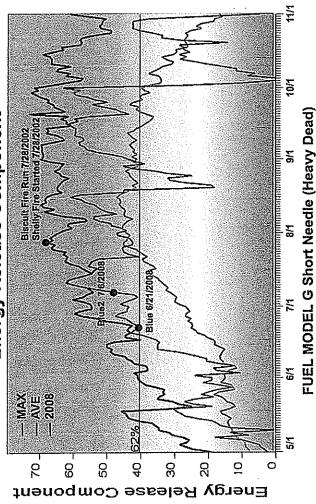

Strong winds early may hamper aircraft. Strong winds may limit effectiveness of aerial assets.

SAFETY

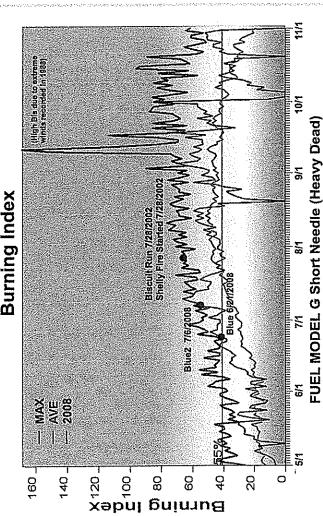

Inversion breaks can lead to sudden increases in fire behavior. Pay attention to weather readings and other indicators that the inversion may be lifting or breaking.

JA-

Fire Danger Rating Area 110 **Energy Release Component**

Fire Danger Rating Area 110

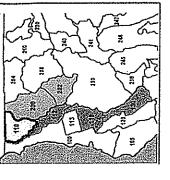

Fire Danger Area 110:

- * Smith River National Recreation Area
 - Six Rivers National Forest
 - NW CA Region 5

Weather Stations Used:

- * 040101 Camp Six (NFDRS)
 - * 040102 Gasquet (NFDRS)
- 040105 Ship Mountain (NFDRS)

Local Thresholds - WATCHOUT:

behavior: 20' Windspeed over 8 mph; RH less than 33%; Temperature over 83; 1000-hour Fuel Moisture less than 14. Large fires become Combinations of any of these factors can greatly increase fire more frequent when BI exceeds 41 and when ERC exceeds 41

62% = 62nd Percentile means 62% of all days observed had Graph Interpretation, Energy Release Component: Maximum = Highest ERC by day for 1979-2010 Average = Shows Peak Fire Season an ERC below 41

PAST EXPERIENCE / LOCAL KNOWLEDGE:

- On July 27, 2002, the Sour Biscuit fire doubled in size to approx. 7,000 ac and burned onto the SRF. On July 28 it doubled again to 15000+ ac. Also, on July 28th, the Shelley fire started. On that day ERC = 68, BI = 63, and 1000FM =11.
- Wildfires become a problem @ 50 acres on the Six Rivers NF due to topography, fuels, and accessibility ('Large fires'= 50 acres)
- This area is ocean-influenced, expect abrupt changes in weather.
- ·Watch out for East wind events which greatly influence fire activity and are a common contributor to large fires,
- Average slope is 65-70%, Fires are topography-driven.
- Other Watchouts not related to weather: Heavy brush component; small fires will offer high resistance to control and exhaust crews quickly. Poison Oak Maximum = Highest BI by day for 1979-2009 Graph Interpretation, Burning Index: Average = Shows Peak Fire Season prevalent in area.

55% = 55th Percentile means 55% of all days observed had a BI below 41.

### **GASQUET COMPLEX SAFETY MESSAGE**

We are **ALL** Accountable and Responsible for **SAFE** behaviors

### Tuesday - August 18th, 2015

### **MAJOR HAZARDS**

- TRANSITION: Central Coast IMT assumes command 0600, ensure clear communication and understanding of objectives
- TRAVEL: Keep speeds low, travel home safely and adhere to travel guidelines
- WEATHER: Hi temperatures, stay hydrated, take extra brakes during the heat of the day. Watch out for you other crew members well being.
- OVEREXERTION Watch your pace, drink plenty of fluids and breaks.
- DRIVING Keep speeds down, do not use mobile devices at any time while driving

Fire Order of the Day -Be alert. Keep calm. Think clearly. Act decisively.

- ❖ Hazard Trees Keep a good situational awareness up when working in heavily timbered areas. Post lookouts where needed and conduct risk analysis when engaging in these types of situations, consult IRPG P22.
- Complacency THE WORD OF THE DAY IS: Transition. There is a new team taking over the incident. Don't take things for granted. If it doesn't look, feel or sound right, ask the question.
- ❖ Travel Windy roads, narrow roads. Keep speeds slow, slow or stop if you encounter poor visibility due to dust. Keep good spacing between vehicles. Watch for weak shoulder on dirt roads.
- ❖ Medical emergencies Ensure at all times that you have adequate communications so you can activate and run a IWI.

### TRANSITION

tran·si·tion

### /tran'ziSHen/

### Noun

The process or a period of changing from one state or condition to another.

### Verb

Undergo or cause to undergo a process or period of transition: "we had to transition to a new set of products".

### Synonyms

passage - change - crossing - transit

### Central Coast IMT

Our team is here to provide you with the tools you need to be successful out on the line. Our priority is your safety. There is nothing on this fire that is worth serious injury or death. Adhear to the Fire Orders, Watch Outs and LCES. Make it part of every thought process and NEVER violate them, not even once, for any reason.

A trend in the "safety industry" is what is called "Normalization of Deviance". In short, this practice normalizes the practice of violating safety standards and getting away with it without consequences. As time goes on you subconsciously push the boundaries and get away with it. As time goes on you move farther and farther away from safe practices, fooling yourself that what you are doing is safe. In time the practice catches you, many times with fatal consequences. Please do not do this, NEVER deviate from LCES, Fire Orders or watch outs.

Gasquet CA-SRF-001488 - Tuesday August 18, 2015

8. Location	9, Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
All	Hazard Trees	~ Follow "Hazard Tree Safety" guidelines, IRPG page 22.
Ali	Air Operations	~ Follow " Aviation Watch-Out Situations" on page 44, IRPG. ~ Don't plan on air resources for medical transport or resupply. ~ Refer to page 57, IRPG for directing bucket drops. ~ Ensure positive communication with all air resources.
All	Chain Saw Operations	~ Follow "Hazard Tree Safety" guidelines, IRPG page 22   ~ Look up, Look down, Look around for hazard tree indicators.   ~ Only fell and buck trees within your expertise, and training.   ~ Follow "Procedural Felling Operations" on page 79 in IRPG.   ~ Do not fall trees during high wind events.   ~ Ensure proper use of all required PPE.
All	Steep Terrain & Rolling Debris	<ul> <li>Maintain 8'-10' spacing when working &amp; walking.</li> <li>Don't work above any personnel.</li> <li>Be on the lookout for rolling rocks, debris, or burning material.</li> <li>Evaluate necessity to send personnel in areas with limited access.</li> <li>Post lookouts (IRPG pg 6).</li> </ul>
All	Driving & Traffic	Practice "Defensive Driving" techniques traveling on all roads and city streets.     Use spotters when backing.     Honk horn to alert personnel when backing.     Keep clutter off dash and inside cab.     Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts.     Always use headlights.     Yield to pedestrians and bicycles.     Observe posted speed limits.     Use the 3 second rule for following distance when driving.     Use chock blocks, turn wheels into hill.     Avoid distractions (eating, cell phones, radio).     Ensure that windshields are kept clean of dust and bugs.
Ali	Firing Operations & Devices	<ul> <li>Only personnel trained in the use of each device will be authorized to use firing equipment.</li> <li>Ensure all personnel are aware of firing operation that may affect them.</li> <li>Wear appropriate PPE.</li> <li>Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed.</li> </ul>
Ali	Injury & Medical Emergency	Assist injured employee appropriate medical care.     Use EMT's on Division for initial care.     Follow medical protocol as outlined in ICS-206 & IRPG Pgs 99-108
All	Bees, Ticks, Mosquitoes	<ul> <li>Canvas crew members for those with known allergic reactions to stings.</li> <li>Ensure crew members have medication pens if needed.</li> <li>Perform daily self inspection.</li> <li>Use repellent as necessary.</li> <li>Advanced Life Support, multi-dose epi and airway protection.</li> <li>Keep affected area clean and bandaged.</li> <li>Be extra careful when eating and/or drinking to avoid stings to mouth and-throat.</li> </ul>
All	Poisonous Plants	~ Identify and Avoid hazard areas. ~ Launder clothing.~ Shower frequently.
ALL	Heavy Equipment Operations	~ Ensure communications are established with operators.    ~ Use hand signals if other communications are unavailable.    ~ Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber.    ~ Use a spotter when backing.    ~ Avoid working below heavy equipment.
Ali	Fatigue & Over Exertion	Drink 1 quart of water each hour during and after work.     Rotate crews out of smoky areas.     Set a reasonable work pace and allow adequate rest breaks while on the project.     Stagger work crews start time to limit fatigue.     Use buddy system to monitor personnel of heat related and fatigue issues.     Follow work / rest guidelines.

### Correcting Biased Communication Patterns

With increased diversity there comes a need for increased sensitivity about how we talk to one another. We can offend someone by a slip of the tongue. Becoming more sensitive in our dealings with one another contributes to a better work environment.

The Human Resource Specialist (HRSP) is Alan Seago, located in one of the detached classroom buildings at the Mountain School ICP. The HRSP Trainee is Sandra "Sonny" Santos. Alan's cell phone is (707) 315-6537.

### **Incident Trainee / Trainer Data Worksheet**
