OUTPUTS

FIRE BEHAVIOR

GENERAL:

The fire's fuel profile is becoming more available. Expect more activity as more fuel dries out and becomes involved. Areas of incomplete consumption could lead to reburns as heat builds up and ignites fuels previously dried. Single/group tree torching has occurred.

Live Fuel Moisture is estimated @ 90%. 100 hr fuels are @ 13 % and 1000 hr fuels are @ 14%.

ERC is predicted @ 49 today (no change) and BI is predicted @ 54 (down 13)

Local threshold for large growth: 20' winds over 8 mph, RH less than 33%, Temps over 83°, 1000 hr FM less than 14%, BI/ERC exceeds 41 (refer to Pocket Card in IAP).

Probability of Ignition will be 70% into receptive fuels for the better part of the operational period.

SPECIFIC

All Divisions:

Fuels continue to dry out and warm up. Activity has increased with lowering RH. Expect more activity as RH drops towards 20%. Steeper slopes may respond more quickly as they receive more solar radiation. Be prepared for areas that were quiet to have smokes and need attention. Increased smoke production may lead to a return of Smoke inversions early in the day, lifting out by midafternoon.

Fuel Type	Head ROS	Head Flame Length	Backing ROS	Backing Flame Length
Cover<50%	25-30 ch/hr	6-8 ft	1-2 ch/hr	1-2 ft
Cover>50%	10-15 ch/hr	7-9 ft	1 ch/hr	1-2 ft
Litter	6-10 ch/hr	3-4 ft	1 ch/hr	1 ft

Fire has potential to run upslope when factors align. Be prepared if your line is above the fire. Roll out and run up are a common occurrence. Spotting may occur as fire tops out and is exposed to stronger Ridgetop winds. Up to ¼ mile has been observed.

Bear Fire: will continue to back/flank north up towards Wounded Knee and Broken Rib, east down Twin Peak/Doe Creek and south toward the South Fork Smith River...heads-up on head-fire runs on south facing slopes across the Siskiyou Fork towards Wounded Knee and Broken Rib.

Peak Fire: will continue to back/flank into Eight Mile creek. Limited activity except on the north side.

AIR OPERATIONS:

Air support will have early opportunity...depending upon smoke conditions.

SAFETY

- Be prepared for increased activity in areas that were quiet.
- Be aware of fire below you with unburned fuel between you and the fire.

Fire Danger Rating Area 110 Energy Release Component

Fire Danger Rating Area 110 Burning Index

Fire Danger Area 110:

- * Smith River National Recreation Area
- * Six Rivers National Forest
- * NW CA - Region 5

Weather Stations Used:

- * 040101 Camp Six (NFDRS)
- * 040102 Gasquet (NFDRS)
- * 040105 Ship Mountain (NFDRS)

Local Thresholds - WATCHOUT:

Combinations of any of these factors can greatly increase fire behavior: 20' Windspeed over 8 mph; RH less than 33%; Temperature over 83; 1000-hour Fuel Moisture less than 14. Large fires become more frequent when BI exceeds 41 and when ERC exceeds 41.

Graph Interpretation, Energy Release Component:

Maximum = Highest ERC by day for 1979-2010

Average = Shows Peak Fire Season

62% = 62nd Percentile means 62% of all days observed had an ERC below 41.

PAST EXPERIENCE / LOCAL KNOWLEDGE:

- On July 27, 2002, the Sour Biscuit fire doubled in size to approx. 7,000 ac and burned onto the SRF. On July 28 it doubled again to 15000+ ac. Also, on July 28th, the Shelley fire started. On that day ERC = 68, BI = 63, and 1000FM = 11.

- Wildfires become a problem @ 50 acres on the Six Rivers NF due to topography, fuels, and accessibility ("Large fires" = 50 acres).

- This area is ocean-influenced, expect abrupt changes in weather.

- Watch out for East wind events which greatly influence fire activity and are a common contributor to large fires.

- Average slope is 65-70%, Fires are topography-driven.

- Other Watchouts not related to weather: Heavy brush component; small fires will offer high resistance to control and exhaust crews quickly. Poison Oak prevalent in area.

Graph Interpretation, Burning Index:

Maximum = Highest BI by day for 1979-2009

Average = Shows Peak Fire Season

55% = 55th Percentile means 55% of all days observed had a BI below 41.

Accident / Incident Within the Incident Action Plan

When the scope or complexity of the emergency exceeds division resource needs

This plan is designed to identify the initial actions that should be taken by the first arriving personnel on a serious accident. This person may be a single resource, engine boss, or a crew boss. Accidents or incidents within an incident happen rapidly and require sound, calm initial decisions to handle the problem, while still focusing on the main incident. The following checklist provides some key thoughts and actions.

The first arriving person to any accident should notify their Division Supervisor, or the Div Sup assigned to that location.

Advise of the critical information needed:

- **Accident scene safety assessment and advise incoming personnel**
- **Number of injuries and their severity**
- **Special equipment needs (extrication, low/high angle rescue, fire protection or suppression)**
- **Assist the injured as necessary without endangering yourself or other personnel**
- **Do not move trauma victims unless their safety is in jeopardy**
- **Utilize PINK pages of the Incident Response Pocket Guide (IRPG) for patient assessment/medical procedures**

Remain aware of surroundings and delegate personnel to monitor the main fire

The Division Supervisor will assume command of the accident/incident scene upon arrival. The following list outlines the general duties and tasks that should be completed on most accidents/incidents.

1. Delegate division oversight to another Division Supervisor or other qualified person.
2. Request a clear frequency from Communications. Incident Comm will notify the MEDL who will initiate the medical plan for injuries.
3. Order resources appropriate for the accident/incident (crew EMT's, Line EMT's or Line Medics)
4. Notify Operations Section Chief and Safety Officer on all accidents/incidents.
5. Begin to document the event accurately and completely. Use ICS form 201 if the event is large or complex.
6. Protect the scene for Investigators

Hazards & Risks

Hunting season: Hunting season is in full swing. Be aware of none fire personnel on your divisions that maybe hunting. If there are issues or concerns, contact your division with information.

Traveling to and from your assignments: Please remember, we are guests in this area and owe it to the community to drive with caution through town and on surface streets. Always give right away to residents, watch for pedestrian traffic and drive the posted speed limit. *Drive the posted speed limits!*

Medical emergencies: What medical capabilities do your engines have? While in your divisional breaks outs, identify who has FEMP's or FEMT's on board. Read the medical plan as well as the Incident With-In an Incident procedure so you are ready for any emergencies.

Personal Hygiene: Tring to minimize camp crud is difficult at times. How can we do our part as fire fighters? "Utilize wash stations after restroom use and before entering the food lines". That's the easy part of our jobs.

Fire Behavior:

- Wind increasing and/ or changes direction.
- Weather becoming hotter and drier.
- Getting frequent spot fires across the line.
- Terrain and fuels make escape to safety zones difficulty

Does this sound familiar????
