FIRE BEHAVIOR FORECAST

3	
FORECAST NUMBER: #9	TYPE OF FIRE: Wildland Fire
FIRE NAME: Gasquet Complex	OPERATIONAL PERIOD: August 12, 2015
DATE ISSUED: August 11, 2015	TIME ISSUED: 2000
UNIT: Smith River NRA, Six Rivers NF	SIGNED: /Syrank Kindell
	Typed/printed:/s/ Byron R. Kimball FBAN

INPUTS

WEATHER SUMMARY: Off shore low pressure ridge will be south of the area, only result being partly cloudy skies. Temperature and Relative Humidity will remain near normal, with light winds across the area.

MAX TEMPERATURE.....High 60's to Low 70's.

MIN HUMIDITY......35 - 45%

EYE LEVEL WINDS.....Light and Variable early, Becoming west to southwest 3 to 5 along the ridges in the afternoon.

For more specific information, please see the Spot Weather forecast

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Lower humidities and less cloud cover may lead to more activity. RH below 40% has proven to be a trigger for more energetic burning. Light winds will help dry out the lighter fuels, but fires will be terrain driven if runs get going. Increased air movement may be enough to bring supposedly dead areas back to life. Be sure to keep eyes on all unlined sections of the line.

With line construction in incomplete burns, be positive that you are exposing the black edge and getting all the hot ash and embers inside your line.

SPECIFIC:

Timber Understory: Fire behavior in the Understory models may increase. Drier RH and increased solar heating may increase overall general activity.

ROS: 5 to 10 ch/hr.

FL: 6 to 8 ft.

Timber Litter: Timber Litter fire behavior should be more active. More sunlight coupled with lower RH may lead to more complete consumption with an associated increase in intensity. Stay aware of rollout and upslope runs through incomplete burns.

ROS: 3 to 6 ch/hr.

FL: 2 to 3 ft.

Rollout of heavier fuels continues to present a concern as the fires work into the drainages. Be prepared for a slope reversal run if fire establishes with sufficient heat.

AIR OPERATIONS:

Inversion above 6000 ft all day. May be able to work underneath the inversion but visibility will remain limited.

SAFETY

Be aware of fire in the standing timber and instability of trees and snags. Ash pits and stump holes become more of an issue the longer the fire burns in the fuel bed.

INCIDENT Weather Forecast

FORECAST NO: 1

NAME OF FIRE: Gasquet Complex

PREDICTION FOR: Day Shift

SHIFT DATE: 8/12/2015

SIGNED: Rachal Cobb

Rachel Cobb

Incident Meteorologist

TIME AND DATE

FORECAST ISSUED: 1900 8/11/2015

<u>WEATHER DISCUSSION:</u> An area of low pressure will be southwest of the area on Wednesday, but far enough offshore that the only influence will be partly cloudy skies. Temperatures will be near normal for this time of year, but relative humidity will be slightly below normal. The low will then start to move back to the north on Thursday, and slightly cooler and moister conditions can be expected, with a possible light rain shower. Winds will generally be light and terrain driven both Wednesday and Thursday.

WEATHER FORECAST for Wednesday:

WEATHER: Partly cloudy and smoky.

MAXIMUM TEMPERATURES: 70 – 75 degrees valleys...65 – 70 degrees ridges.

MINIMUM HUMIDITY: 35 - 45 percent.

20 FT WINDS:

RIDGETOP - Southeast 5 to 10 mph becoming westerly in the afternoon.

SLOPE/VALLEY – Upslope/upvalley 2 to 6 mph.

HAINES INDEX: 4 (low).

STABILITY/INVERSION: Inversion not lifting above 6000 feet msl.

<u>OUTLOOK for Wednesday Night:</u> Partly cloudy and smoky. Low temperatures 50 – 55 degrees and maximum relative humidity 75 – 90%. Ridgetop winds north-northeast 3 to 6 mph. Haines Index: 2.

<u>OUTLOOK for Thursday:</u> Partly cloudy and smoky. A slight chance of showers. Highs 60 - 70 degrees and relative humidity 40 - 50%. Ridgetop winds westerly 5 to 10 mph. Mixing height: 6000 feet msl. Haines Index: 2.

EXTENDED FORECAST: The low will move away from the area on Friday, and high pressure will return Saturday. Therefore, a warming and drying trend can be expected Friday through at least Sunday.

Human Resource Message

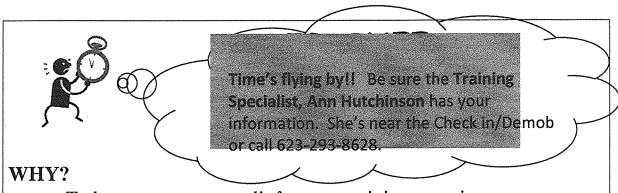

Human Resource Specialist Trainee has arrived to the Gasquet Complex –

Please welcome HRSP(t) Andrea Cabida. Andrea is an HR Specialist for USFS Fire and Aviation Management in the Pacific Southwest Regional Office in Vallejo, CA.

There have been no Civil Rights issues on the Incident.

Thx for your mutual respect.

- ⇒To be sure you get credit for your training experience.
- ⇒ To be sure the incident has an accurate training report.

What to bring to Training Specialist (TNSP):

- 1. Taskbook with information recorded for incident.
- 2. Trainee's Personnel Performance Rating form ICS 225 completed
- 3. Incident Trainee Interview (provided by TNSP)

Have a safe.....and learning assignment!!!

Health & Safety Message

Incident: Gasquet Complex Date/Op Period: 8/12-13/15 0600-0600

CA-SRF-001488

Hazards & Risks

<u>Weather/Visibility:</u> Restricted visibility due to haze and smoke limits the ability of FOBS, Lookouts & Aircraft to see you or fire activity on the ground. Monitor weather trends and post lookouts with these limitations in mind. Adjust tactics accordingly with the expectation that aviation support may be severely limited.

<u>Emergency Medical</u>: Review and brief the medical treatment and evacuation plan on the ICS 206 Medical Plan. The Gasquet area has extended response and transport times for EMS so get medical responders going early in your incident.

REALIZE THAT AIRCRAFT EVACUATIONS MAY BE SEVERELY LIMITED DUE TO RESTRICTED VISIBILTY. HAVE A GROUND TRANSPORT CONTINGENCY PLAN FOR YOUR DIVISIONS

<u>Steep Terrain and Rolling Stuff!</u>: With very steep terrain in all Divisions comes rolling rocks, logs, and humans. Watch your footing and avoid working below other personnel and equipment working above you. Stagger yourselves as you hike up and down the fireline and watch your spacing.

<u>Vehicle Operation</u>: Respect the local traffic laws and use extra caution when driving along forest roads in your areas of operation. Establish a traffic flow plan in areas that require it. Use emergency lighting as needed, especially when working along public roadways. Drive carefully through downtown Gasquet.

Prepared By: Paul Tompkins SOFR2

INCIDENT SAFETY ANALYSIS 215a

Gasquet Complex - Wednesday, August 12, 2015

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
All	Hazard Trees	 Follow "Hazard Tree Safety" guidelines, IRPG pages 22 & 23 Post lookouts, or use a spotter in mop-up areas with personnel Don't park vehicles or take breaks in high concentrations of hazard trees Establish trigger points for disengagement during high wind events
All	Air Operations	~Follow " Aviation Watch-Out Situations" on page 44, IRPG ~Don't plan on air resources for medical transport or resupply. ~Refer to page 57, IRPG for directing bucket drops. ~Ensure positive communication with all air resources.
All	Chain Saw Operations	 Follow "Hazard Tree Safety" guidelines, IRPG pages 22 & 23 Look up, down around for hazard tree indicators Only fell and buck trees within your expertise, and training Follow "Procedural Felling Operations" on page 79 in IRPG Do not fall trees during high wind events
All	Steep Terrain & Rolling Debris	 Maintain 8'-10' spacing when working & walking Don't work above any personnel Evaluate necessity to send personnel in areas with limited access
All	Driving & Traffic	~ Practice "Defensive Driving" techniques traveling on all roads and city streets, mitigation strategy includes: ~ Use spotters when backing ~ Honk horn to alert personnel when backing ~ Always use headlights ~ Yield to pedestrians and bicycles ~ Observe posted speed limits ~ Follow 3 second rule of following distance when driving ~ Use chock blocks, turn wheels into hill
All	Firing Operations & Devices	 Only personnel trained in the use of each device will be authorized to use firing equipment. Ensure all personnel are aware of firing operation that may affect them. Wear appropriate PPE. Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed.
All	Injury & Medical Emergency	∼ Assist injured employee appropriate medical care ∼ Use EMT's on Division for initial care ∼ Follow medical protocol as outlined in ICS-206
All	Bees,Ticks, Mosquitoes	 Be aware of crew members with sting allergies. Ensure crew members have medication pens if needed. Perform daily self inspection Use repellant as necessary
All	Poisonous Plants	∼ Identify and Avoid hazard areas ∼ Launder clothing ∼ Shower frequently

Incident within an Incident Action Plan

Position Assignment Supportive Actions

Division Supervisor

- See items 1-6 on page one
- If unable to access accident/incident location, delegate command to a closer qualified resource

Medical Unit Leader

- Respond to Comm Unit as soon as possible
- Coordinate with Division Supervisor to ensure proper resources are rapidly ordered
- Assign a MEDL to the scene and other positions to support the response as needed
- Monitor condition updates of patient(s) and coordinate response with Operations

Communications Unit Leader

- Maintain clear radio traffic and monitor communications to support response
- Recommend appropriate security and investigative process
- Assess the need for critical Incident Stress Response

Safety Officer

- Provide for Safety personnel on scene as needed
- Recommend appropriate security and investigative process
- Assess the need for critical Incident Stress Response

Air Attack Supervisor

- Obtain coordinates of the emergency location
- Coordinate air-medical response
- Assist and support the designated Point of Contact with communications and coordination of the emergency response as necessary

IC. Command & General Staff

- Manage the emergency and direct specific responsibilities to individual positions to provide an appropriate response
- Notify the host unit and host dispatch center of the size-up information
- Constantly monitor and assess the appropriate response and adapt direction as needed
- Submit all documentation pertaining to the emergency to the Plans Chief

Incident within an Incident Action Plan

When the scope or complexity of the emergency exceeds division resource needs

This plan is designed to identify the <u>initial</u> actions that should be taken by the first arriving personnel on a serious accident. This person may be a single resource, engine boss, or a crew boss. Accidents or incidents within an incident happen rapidly and require sound, calm initial decisions to handle the problem, while still focusing on the main incident. The following checklist provides some key thoughts and actions.

The first arriving person to any accident should notify their Division Supervisor, or the Div Sup assigned to that location.

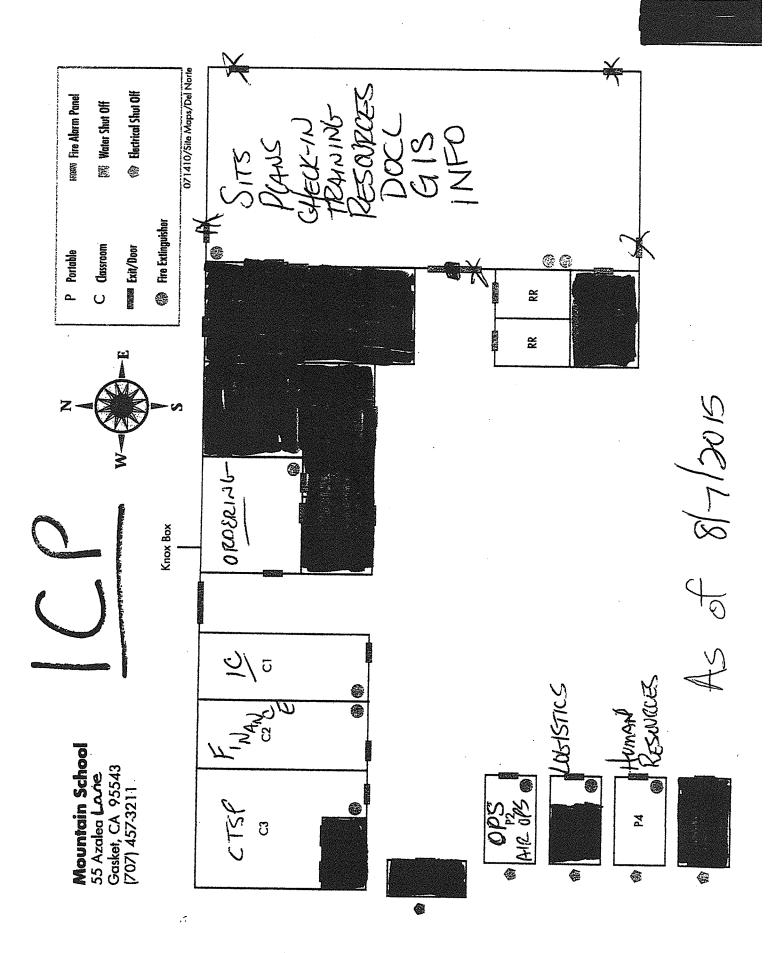

Advise of the critical information needed:

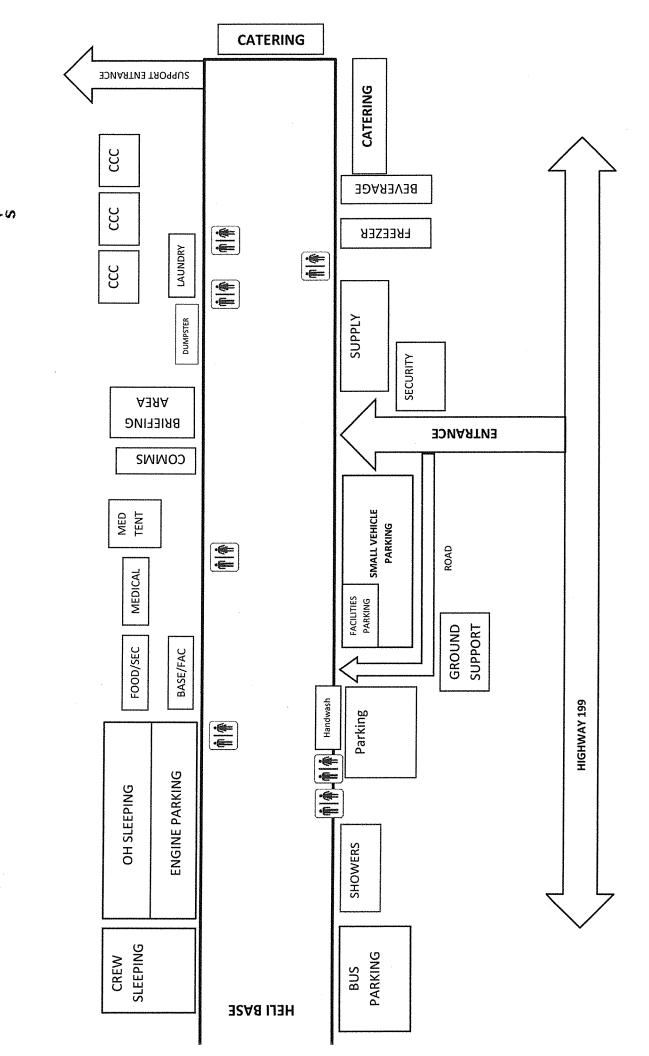

- · Accident scene safety assessment and advise incoming personnel
- · Number of injuries and their severity
- Special equipment needs (extrication, low/high angle rescue, fire protection or suppression)
- Assist the injured as necessary without endangering yourself or other personnel
- Do not move trauma victims unless their safety is in jeopardy
- Utilize PINK pages of the Incident Response Pocket Guide (IRPG) for patient assessment/medical procedures

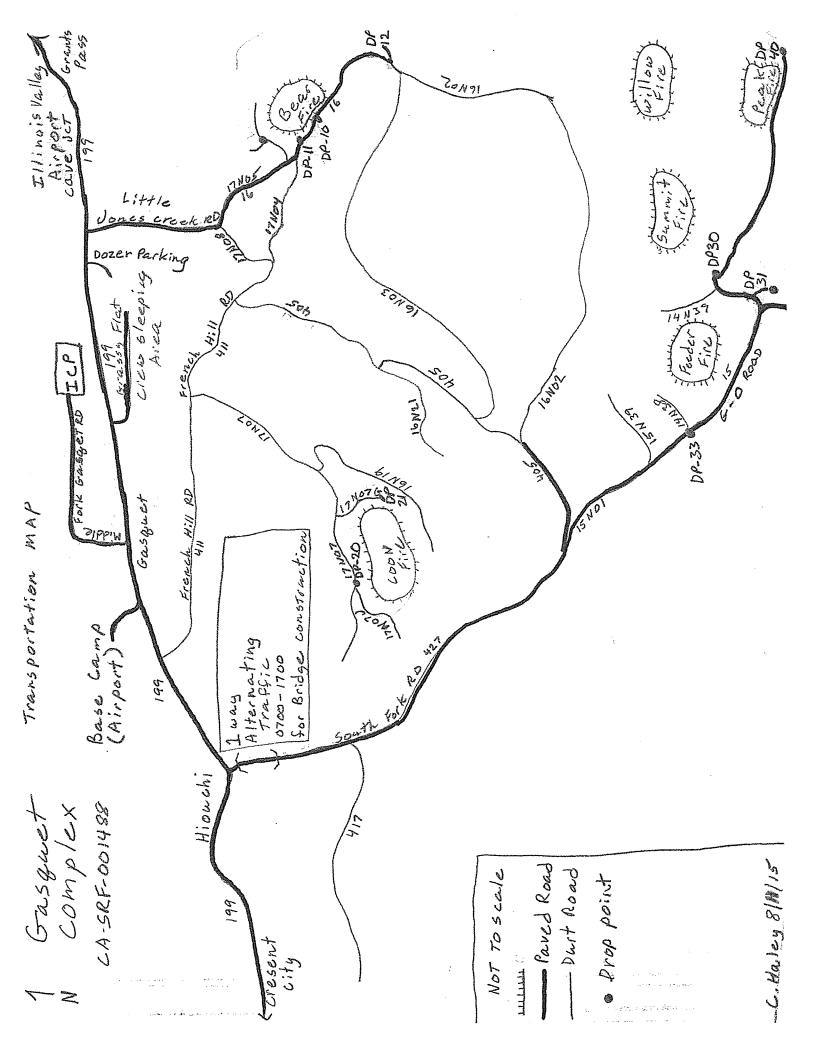

Remain aware of surroundings and delegate personnel to monitor the main fire

The <u>Division Supervisor</u> will assume command of the accident/incident scene upon arrival. The following list outlines the general duties and tasks that should be completed on most accidents/incidents.

- 1. Delegate division oversight to another Division Supervisor or other qualified person.
- 2. Request a clear frequency from Comm and consider switching to designated Emergency Tactical (Incident Comm will notify the MEDL who will initiate the medical plan for injuries)
- 3. Order/delegate resources appropriate for the accident/incident (crew EMT's, Line EMT's or Line Medics, rescue equipment, patient transport needs, manpower)
- 4. Notify Operations Section Chief and Safety Officer on all accidents/incidents.
- 5. Begin to document the event accurately and completely. Use ICS form 201 if the event is large or complex.
- 6. Protect the scene for Investigators
