August 23-24, 2015
Operational Period
0600-0600

INCI		11VES (ICS 202)		
1. Incident Name:	2. Operational Perio	d: 0600 - 0600		
GASQUET COMPLEX	Date/Time From	1:	Date/Time To:	
	08/23/2015 060	0 SUN	08/24/2015 0600	MON
3. Objective(s):	<u> </u>			
Management Objectives				
1. First and foremost, provide for firefighter and	oublic safety inclu	ding all assigned resor	irces	
2. Consult with resource and cultural advisors be			1000.	
3. Provide timely, accurate information to the pu			rganization and the fore	ests that are
threatened	., ,	•	ŭ	
4. Manage costs by planning strategies commer	surate with values	s protected, without co	mpromising efforts to m	inimize
risk/exposure to incident personnel.				
5. Utilize 6 "Rights" to limit firefighters exposure;	Right Plan, Right	Place, Right Time, Rig	jht Assets, Right Duratio	on, & Right
Reason.				
Incident Objectives				
Coon Fire: Keep the fire				
North of 16N19 and Haines Flat				
North and East of the South Fork of the Smith I	River			
• South of 17N07				
Bear Fire: Keep the fire				
• East of 17N05 and 16N02				
• South of the 18N07				
 West of Clear Creek Trail Feeder Fire: Keep the fire North and East of the 	"Go-Road"			
Peak Fire: Keep the fire East of DP 42	Oo Noda			
4. Operational Period Command Emphasis:				
UTILIZE SUPPRESSION STRATEGIES COMMENSURATE	WITH VALUES AT RI	SK. IMPLEMENT TACTICS	WHICH INCREASE THE PR	OBABLITIES OF
SUCCESS WHILE HOLDING EXISTING CONTAINMENT.				
General Situational Awareness:			<u>, , , , , , , , , , , , , , , , , , , </u>	
FIREFIGHTING ORDER #3 - BASE ALL ACTIONS OF	CURRENT AND EXI	PECTED BEHAVIOR OF TH	IE FIRE.	
WATCHOUT SITUATION #11 - UNBURNED FUEL BE				
 STAY ALERT TO CHANGING CONDITIONS. 				
5. Site Safety Plan Required? Yes No 🗓 Approved Site Safety Plan(s) Located at:				
6. Incident Action Plan (the items checked below are in	cluded in this Incident	Action Plan):

INCIDENT Weather Forecast

FORECAST NO: 12 NAME OF FIRE: Gasquet Complex

PREDICTION FOR: Day Shift

SHIFT DATE: 8/23/2015 SIGNED: Kaulul Colle

TIME AND DATE Rachel Cobb

FORECAST ISSUED: 1900 8/22/2015 Incident Meteorologist

WEATHER DISCUSSION: The high pressure ridge will shift eastward today and the area will be under a southwest flow aloft. This will bring cooler and slightly moister conditions due to an increased marine influence. A weak disturbance will move through during the evening, but precipitation is not expected. The biggest impact will be a lifting of the inversion during the late afternoon. On Monday, another weak disturbance will move through the area. Precipitation is still not expected, but increased vertical mixing should help the inversion lift earlier.

WEATHER FORECAST for Sunday:

WEATHER: Partly cloudy and smoky.

MAXIMUM TEMPERATURES: 72 – 80 degrees.

RELATIVE HUMIDITY: 25 – 40 percent.

20 FT WINDS:

RIDGETOP – Southeast 2 to 4 mph shifting westerly 3 to 8 mph in the afternoon.

SLOPE/VALLEY - Downslope/downvalley 2 to 4 mph becoming upslope/upvalley 3 to 8 mph.

HAINES INDEX: 4 (low).

STABILITY/INVERSION: Inversion lifting in the late afternoon. Mixing heights will be 3000 feet msl over the Coon Fire, 6000 feet msl over the Feeder and Peak fires, and 7500 feet msl over the Bear Fire.

<u>OUTLOOK for Sunday Night:</u> Partly cloudy and smoky. Low temperatures 56 – 62 degrees and maximum relative humidity 50 – 85%. Downslope winds 2 to 4 mph. Haines Index: 3. Thermal belt 2500 - 4500 feet

OUTLOOK for Monday: Mostly clear but smoky. Highs temperatures 70 – 80 degrees and minimum

relative humidity 25 – 40%. West-southwest winds 3 to 7 mph. Inversion lifting around 1100. Mixing heights: 3000 - 7000 feet msl. Haines Index: 4.

<u>EXTENDED FORECAST:</u> Southwest flow will remain over the area through the week. This will help with smoke dispersal, but will also cause more active fire behavior.

FIRE BEHAVIOR FORECAST FORECAST NUMBER: 20 TYPE OF FIRE: Wildfire FIRE NAME: Gasquet Complex OPERATIONAL PERIOD: 8/23-24/15 0600-0600 DATE ISSUED: 8/22/15 TIME ISSUED: 1800 hrs UNIT: SRF, Smith River NRA SIGNED: Richard Gonzales, FBAN

INPUTS

WEATHER SUMMARY:

See Weather Forecast for specific information

Sky: Partly Cloudy and Smoky ... Temps near 80° ...RH around 25%....

Winds (20°)... Valley/Slope: upslope/upvalley 3-8 mph...Ridge: Afternoon W 3-8 mph

LAL 1... Haines 4

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The Fires main influence has been fuel and topography dominated...driven by dead and down fuels. Fuels burning consist of Shrubs, Timber Litter and Heavy Dead/Down (FM 4, 9, 10). Large dense stands of mixed Conifer are dominant throughout. Live Fuel Moisture is estimated @ 90%. 1000 hr fuels are @ 10%. Headfire has displayed ROS @ 10-16 chains/hr with flame lengths of 8-12 feet. Single/group tree torching has occurred. Short crown fire spread has occurred on the Coon/Bear fire with inversion lifting and a Haines of 5. Heavy fuels are holding large amounts of heat.

ERC is predicted @ 67 today (same) and BI is predicted @ 62 (up 4)

......Local threshold for large growth: 20' winds over 8 mph, RH less than 33%, Temps over 83*, 1000 hr FM less than 14%, BI/ERC exceeds 41 (refer to Pocket Card in IAP).

Scattered Tree Mortality is under 5%.

Probability of Ignition (shaded) will be 70% into receptive fuels for the better part of the operational period.

SPECIFIC

All Divisions:

The Fires will continue to display moderate surface fire intensity with the possibility of single/group torching when inversion lifts and ventilation occurs. The forecasted weather will tread towards cooler temps and higher RH's...heavier fuels have dried and will need multiple days to raise fuel moisture levels. Heavy fuels will continue to hold heat until extinguished or consumed. Roll-out of burning material remains high and has led to the growth of the Fires. The potential for single tree torching will remain a threat due to surface fire that has dried aerial fuels. Increased fire activity will occur in the afternoon as solar heating and lifting of inversion becomes a factor. The Fires will have the ability to make uphill runs as slope and winds become into alignment. Be particularly cautious on South, Southwest and Southeast slopes coupled with any southerly wind component. Direct attack along flanks with hose lines and hand crews are favorable. We could see spotting distance of up to ½ mile at the ridges.

Coon Fire: will continue to back and flank towards the South Fork Smith river/Deer creek...west/south and southeast towards Gordon creek. Heads up on fire stacking up and moving with head fire with slope reversal.

Bear Fire: will continue to back/flank with uphill runs north-westerly towards the 17N05 road, also southerly toward the 16N02 road. Watch out for drainages that align with any easterly winds...upslope runs. ***Heads-up***: if visibility improves and skies clear early...fire activity will increase sooner than yesterday.

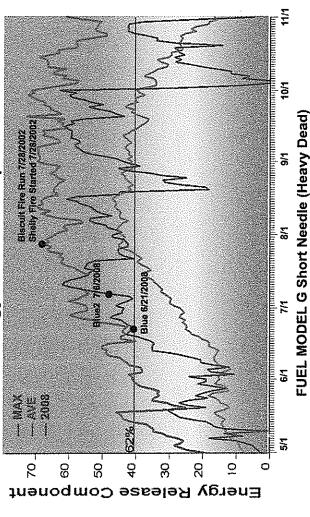

AIR OPERATIONS:

Air support may be limited due to inversion and/or gusty winds.

SAFETY

- Identify your vulnerability on an advancing fire front when working hotspots
- Consider the potential for re-burning of available fuels
- Evaluate the Fire's potential for upslope runs
- STOP...Stop Think Observe and Predict

Fire Danger Rating Area 110 Energy Release Component

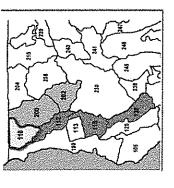

Fire Danger Area 110:

- * Smith River National Recreation Area
 - * Six Rivers National Forest
- NW CA Region 5

Weather Stations Used:

- * 040101 Camp Six (NFDRS)
 - * 040102 Gasquet (NFDRS)
- * 040105 Ship Mountain (NFDRS)

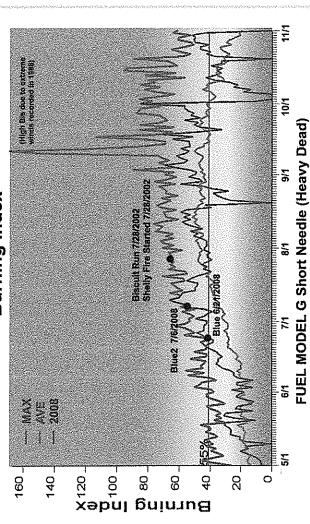

Local Thresholds - WATCHOUT

Combinations of any of these factors can greatly increase fire behavior: 20' Windspeed over 8 mph; RH less than 33%; Temperature over 83; 1000-hour Fuel Moisture less than 14. Large fires become more frequent when BI exceeds 41 and when ERC exceeds 41.

Graph Interpretation, Energy Release Component:
Maximum = Highest ERC by day for 1979-2010
Average = Shows Peak Fire Season
62% = 62nd Percentile means 62% of all days observed had an ERC below 41.

Fire Danger Rating Area 110 Burning Index

PAST EXPERIENCE / LOCAL KNOWLEDGE:

- On July 27, 2002, the Sour Biscuit fire doubled in size to approx. 7,000 ac
 and burned onto the SRF. On July 28 it doubled again to 15000+ ac. Also,
 on July 28th, the Shelley fire started. On that day ERC = 68, Bl = 63, and
 1000FM =11.
- -Wildfires become a problem @ 50 acres on the Six Rivers NF due to topography, fuels, and accessibility ('Large fires'= 50 acres).
- This area is ocean-influenced, expect abrupt changes in weather.
- Watch out for East wind events which greatly influence fire activity and are a common contributor to large fires,
- Average slope is 65-70%, Fires are topography-driven.
- Other Watchouts not related to weather: Heavy brush component; small fires will offer high resistance to control and exhaust crews quickly. Poison Oak prevalent in area.

Graph Interpretation, Burning Index:
Maximum = Highest BI by day for 1979-2009
Average = Shows Peak Fire Season
55% = 55th Percentile means 55% of all days observed had

GASQUET COMPLEX-SAFETY MESSAGE

We are ALL Accountable and Responsible for SAFE behaviors

SUNDAY AUGUST 23/24, 2015

0600-0600

MAJOR HAZARDS:

- Cumulative fatigue (get your sleep...the only cure for fatigue is sleep.).
- Driving:
- ✓ Long drive to work assignment on narrow windy roads. Roads to Coon Fire are dusty too.
- ✓ Keep speeds down: in camp, in town, on Hwy 199 and on roads to/from the fire line.
- ✓ Don't be a distracted driver! ("distraction proof" your vehicle).
- ✓ Fresh retardant on steep paved roads in the Bear and Feeder fire areas.
- Snags continue to be a major hazard, identify them and have fallers mitigate them.
- Dehydration (whether on fire line or in camp). Dehydration is preventable. Limit caffeine drinks.
- If on night shift...working/driving at night, hiking in rough, steep terrain/rollout and burning ops.

Fire Order of the Day -Keep informed on fire weather conditions and forecasts!

- Brief your crews on the weather and fire behavior forecasts in the IAP.
- Snags Maintain situational awareness when working in heavily timbered areas. Post lookouts where needed and conduct risk analysis when engaging in these types of situations.
- Check your People Ensure crews are staying rested and hydrated, drink 3 to 1 ratio of water to sports drink. Take plenty of water and Gatorade with you.
- Post Lookouts: Steep, rugged terrain with lots of timber. Vantage points may be difficult to obtain. Post multiple look outs and establish <u>TRIGGER POINTS</u>.

Miscellaneous Safety Issues from Others:

(as told to your incident safety officer)

- People in camp starting to be a little short tempered. (take a deep breath, think before you react)
- People in camp after long shifts looking really, really tired. (no surprise there, get some sleep)
- People sleeping in the parking areas. (fixing that hazard, thanks for cooperating)
- Have your personal tents really secured well so the East wind does not blow it into a parking area with you in it. (super tent stakes and p-cord in supply)

If you have safety concerns, the team is listening!
-Tell me in person, give me a note or call my cell

Driving Safety:

- Watch speeds on roads, there are tight turns, and steep drop offs and fire traffic.
- Roads with potentially unstable shoulders due to excessive driving of fire equipment.
- Fast citizen vehicles on Hwy 199.
- Utilize a traffic pattern as needed.
- Start the day with a clean windshield and side mirrors. Drive with your lights and seatbelts on.
- Stay alert of your surroundings; take note of turn outs and possible safety zones.

2014

Incident Safety Officer: Tom Zeulner 805-440-5252 or 213-503-4286

INCIDENT SAFETY ANALYSIS 215a

Gasquet CA-SRF-001488 - Sunday, August 23, 2015

	AND AND AND SERVICE CONTRACTOR OF THE PROPERTY OF THE PARTY OF THE PAR	CA-SRF-001488 - Sunday, August 23, 2015
8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
All	Hazard Trees	 Follow "Hazard Tree Safety" guidelines, IRPG page 22. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
All	Air Operations	 Follow " Aviation Watch-Out Situations" on page 44, IRPG. Don't plan on air resources for medical transport or resupply. Refer to page 57, IRPG for directing bucket drops. Ensure positive communication with all air resources. Beware of retardant on paved roads in fire area.
Ali	Chain Saw Operations	~ Follow "Hazard Tree Safety" guidelines, IRPG page 22 ~ Look up, Look down, Look around for hazard tree indicators. ~ Only fell and buck trees within your expertise, and training. ~ Follow "Procedural Felling Operations" on page 79 in IRPG. ~ Do not fall trees during high wind events. ~ Ensure proper use of all required PPE.
Ali	Steep Terrain & Rolling Debris	 Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access. Post lookouts (IRPG pg 6).
		- Practice "Defensive Driving" techniques traveling on all roads and city streets Use spotters when backing Honk horn to alert personnel when backing Keep clutter off dash and inside cab Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts.
All	Driving & Traffic	~ Always use headlights, ~ Yield to pedestrians and bicycles. ~ Observe posted speed limits.
		- Use the 3 second rule for following distance when driving. - Use chock blocks, turn wheels into hill. - Avoid distractions (eating, cell phones, radio). - Ensure that windshields are kept clean of dust and bugs.
All	Firing Operations & Devices	Only personnel trained in the use of each device will be authorized to use firing equipment. Ensure all personnel are aware of firing operation that may affect them. Wear appropriate PPE. Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed.
All	Injury & Medical Emergency	 Assist injured employee appropriate medical care. Use EMT's on Division for initial care. Follow medical protocol as outlined in ICS-206 & IRPG Pgs 99-108
Ali	Bees, Ticks, Mosquitoes	 Canvas crew members for those with known allergic reactions to stings. Ensure crew members have medication pens if needed. Perform daily self inspection. Use repellent as necessary. Advanced Life Support, multi-dose epi and airway protection. Keep affected area clean and bandaged. Be extra careful when eating and/or drinking to avoid stings to mouth and throat.
All	Poisonous Plants	∼ Identify and Avoid hazard areas. ∼ Launder clothing. ∼ Shower frequently.
ALL	Heavy Equipment Operations	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. Use a spotter when backing. Avoid working below heavy equipment.
All	Fatigue & Over Exertion	 Drink 1 quart of water each hour during and after work. Rotate crews out of smoky areas. Set a reasonable work pace and allow adequate rest breaks while on the project. Stagger work crews start time to limit fatigue.

In Today's Medical Minute

Ripped from the headlines: DailyMail.com

Is facial hair riddled with bacteria and does it promote the spread of germs and trigger infections? Despite the prevalence of facial hair, not much has been said about the health implications. There are a few completed studies that do indicate that facial hair does harbor a significantly higher amount of bacteria than those who are clean shaven. Despite the findings of these few studies, there doesn't seem to be any evidence confirming that increased amounts of harbored bacteria found in the facial hair leads to health problems.

Tips for Beard Hygiene

Although the extra bacteria potentially accumulating in facial hair is likely harmless, it's still worth practicing good hair hygiene. Here are some tips to help keep your beards as clean as possible.

- Shampoo your beard don't use the same bar soap you use on your body, which can dry out your skin. And use a conditioner.
- Trim your beards at least once every two months.
- Use only facial products which won't clog your pores.

Just so you know...

Thank you!

- Speed Limit around base camp 5 mph...SLOW DOWN
- Drive with lights on and watch your speed in residential areas.
- No parking in Sleeping areas.
 - Watch for "PERSONNEL ON FOOT", rocks and ruts while driving in base camp.
 - CHP is watching road speeds and will issue tickets.

Finance Message

Due to lack of resources nationwide and the inability to obtain new resources to replace those that are reaching their maximum length of assignment, the following guidelines apply:

HEALTH, READINESS, AND CAPABILITY MUST BE CONSIDERED PRIOR TO ASSIGNING INCIDENT PERSONNEL TO BACK TO BACK ASSIGNMENTS. THE HEALTH AND SAFETY OF INCIDENT PERSONNEL AND RESOURCES WILL NOT BE COMPROMISED UNDER ANY CIRCUMSTANCES.

Federal employees, Local and out of state cooperating agencies

- 1. Obtain verbal approval from DIVS for extension or crew swap
- 2. Obtain verbal approval from home unit supervisor
- 3. See Resources Unit at ICP 4-5 days prior to 14th working day
- 4. If approved to extend, obtain extension form from DMOB
 - Extension options:
 - i. Extend to 21 days (exclusive of travel to and from incident. Time spent in staging and preposition status count towards the 21 day assignment.)
 - ii. Extend to 30 days. Inclusive of mandatory days off and exclusive of travel. (must have 2 days R&R between day 15-21)
- 5. For crew swap, bring 213 (general message) to DMOB with Operations signature, method of travel, names of <u>all personnel</u> (as it appears on their driver's license) that are replacing existing crew, and home dispatch unit contact information.
 - Note crew swap on time documents and provide to finance
 - Replacement crew must arrive on 14th day of the existing crews work assignment and be available to work the following day

Private contractors

Obtain written approval from Operations on 213 (general message) and bring to Resources Unit.

- After working 14 days you must take at least 2 days R&R unpaid and can return to incident for an additional 14 day assignment.
- At any time between day 1-14 you can swap personnel and provide information of new crew members to Check-In and Finance.

Resource Advisors Message

Gasquet Complex

Water Treatment for Port Orford Cedar Infection

- Treat water from all water sources as follows:
 - o 1 gal bleach to 1000 gal water
- Do NOT use bleach-treated water to make retardant

Dozer Usage

- All new dozer lines or safety zones need to have archeological surveys prior to ground disturbance
- Where possible, dozer lines should use existing roads or skid trails

Please stay on roads or already disturbed sites

Do not drive in meadow areas

Limit snag falling if not needed for safety or line protection

Fish screens need to be used for water withdrawal

Direct any questions regarding Natural Resources through your Division Supervisor.

PREVENT SEXUAL HARASSMENT

SEXUAL HARASSMENT at work, including emergency incidents, occurs when gender-based unwelcome conduct adversely affects a person's ability to do his or her job, and contributes to a hostile work environment. Sexual harassment includes, but is not limited to, the following:

- **↓** Unwelcome sexual advances
- * Requests for sexual favors
- Discussing sexual activities
- Telling off-color jokes
- Lunnecessary and unwelcome touching
- Displaying sexually suggestive pictures
- Using demeaning or inappropriate terms
- Using indecent gestures
- Using crude and offensive language
- & Commenting on physical attributes

"Inappropriate behavior is harassment, including sexual and racial harassment, and shall not be tolerated". Fireline Handbook, Chapter 6, Common Responsibilities.

The HR Specialist is Alan Seago, cell phone is (707) 315-6537. The HR Trainee is Sunny Santos, (707) 562-8659.
