INCIDENT Weather Forecast

FORECAST NO: 13 NAME OF FIRE: Gasquet Complex

PREDICTION FOR: Day Shift

SHIFT DATE: 8/24/2015 SIGNED: Rachel Call

TIME AND DATE Rachel Cobb

FORECAST ISSUED: 1900 8/23/2015 Incident Meteorologist

<u>WEATHER DISCUSSION:</u> Southwest flow will continue to bring marine air inland with mild temperatures and moderate relative humidity. A weak disturbance will move through the area this afternoon, which could provide enough lift to break the inversion. Similar conditions are expected Tuesday.

WEATHER FORECAST for Monday:

WEATHER: Partly cloudy and smoky.

MAXIMUM TEMPERATURES: 69 - 78 degrees.

RELATIVE HUMIDITY: 25 - 40 percent.

20 FT WINDS:

RIDGETOP - South-southeast 3 to 9 mph shifting westerly 6 to 11 mph in the afternoon. Gusts around 18 mph.

SLOPE/VALLEY - Downslope/downvalley 2 to 5 mph becoming upslope/upvalley 3 to 8 mph.

HAINES INDEX: 3 (low).

STABILITY/INVERSION: Inversion lifting in the late afternoon. Mixing heights will be 3000 feet msl over the Coon Fire, 5500 feet msl over the Feeder and Peak fires, and 7000 feet msl over the Bear Fire.

WEATHER FORECAST for Monday Night:

WEATHER: Partly cloudy and smoky.

MINIMUM TEMPERATURES: 55-60 degrees.

RELATIVE HUMIDITY: 50 percent ridges...80 percent valleys.

20 FT WINDS:

RIDGETOP - Southeast 3 to 8 mph with gusts around 15 mph.

SLOPE/VALLEY - Downslope/downvalley 2 to 5 mph.

HAINES INDEX: 3 (low).

STABILITY/INVERSION: Inversion with a thermal belt 2000 to 5000 feet msl.

<u>OUTLOOK for Tuesday:</u> Partly cloudy and smoky. Highs temperatures 70 – 80 degrees and minimum relative humidity 25 – 40%. Westerly winds 3 to 8 mph with gusts around 15 mph. Inversion lifting in the afternoon. Mixing heights: 3500 - 9000 feet msl. Haines Index: 3.

EXTENDED FORECAST: Southwest flow will remain over the area through the week, and possibly provide better mixing to lift inversions and disperse smoke. Thursday through Saturday will be cooler with higher humidity, but winds will also be breezy with a chance of rain.

FIRE BEHAVIOR FORECAST FORECAST NUMBER: 21 FIRE NAME: Gasquet Complex DATE ISSUED: 8/23/15 UNIT: SRF, Smith River NRA FIRE BEHAVIOR FORECAST TYPE OF FIRE: Wildfire OPERATIONAL PERIOD: 8/24-25/15 0600-0600 TIME ISSUED: 1800 hrs SIGNED: Richard Gonzales, FBAN INPUTS

WEATHER SUMMARY:

See Weather Forecast for specific information

Sky: Partly Cloudy and Smoky ... Temps near 75° ...RH around 30%....

Winds (20')... Valley/Slope: upslope/upvalley 3-8 mph... Ridge: Afternoon W 6-11 mph

LAL 1... Haines 3

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The Fires main influence has been fuel and topography dominated...driven by dead and down fuels. Fuels burning consist of Shrubs, Timber Litter and Heavy Dead/Down (FM 4, 9, 10). Large dense stands of mixed Conifer are dominant throughout. Live Fuel Moisture is estimated @ 90%. 1000 hr fuels are @ 10%. Headfire has displayed ROS @ 10-16 chains/hr with flame lengths of 8-12 feet. Single/group tree torching has occurred. Short crown fire spread has occurred on the Coon/Bear fire with inversion lifting and a Haines of 5. Heavy fuels are holding large amounts of heat.

ERC is predicted @ 67 today (same) and BI is predicted @ 53 (down 9)

.....Local threshold for large growth: 20' winds over 8 mph, RH less than 33%, Temps over 83*, 1000 hr FM less than 14%, BI/ERC exceeds 41 (refer to Pocket Card in IAP).

Scattered Tree Mortality is around 10%.

Probability of Ignition (shaded) will be 70% into receptive fuels for the better part of the operational period.

SPECIFIC

All Divisions:

The Fires will continue to display low/moderate surface fire intensity with the possibility of single/group torching when inversion lifts and ventilation occurs. The forecasted weather will tread towards cooler temps and higher RH's…heavier fuels have dried and will need multiple days to raise fuel moisture levels. Cloud/Smoke cover will shade fuels and decrease solar radiation…shortening burn period…good opportunity to improve and hold lines. Heavy fuels will continue to hold heat until extinguished or consumed. Roll-out of burning material remains high and has led to the growth of the Fires. The potential for single tree torching will remain a threat due to surface fire that has dried aerial fuels. The Fires will have the ability to make uphill runs as slope and winds become into alignment. Be particularly cautious on South, Southwest and Southeast slopes coupled with any southerly wind component. Direct attack along flanks with hose lines and hand crews are favorable. We could see spotting distance of up to ¼ mile at the ridges.

Coon Fire: will continue to back and flank towards the South Fork Smith river/Deer creek...west/south and southeast towards Gordon creek. Heads up on fire stacking up and moving with head fire with slope reversal.

Bear Fire: will continue to back/flank with uphill runs north-westerly towards the 17N05 road, also southerly toward the 16N02 road.

Heads-up: if visibility improves and skies clear early...fire activity will increase sooner than yesterday.

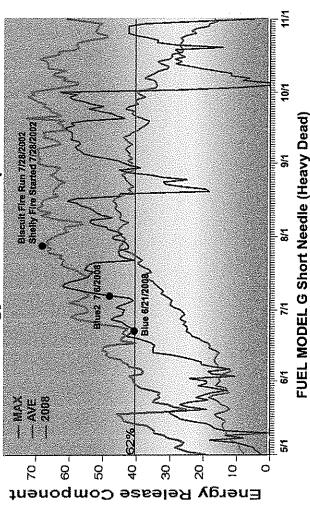

AIR OPERATIONS:

Air support may be limited due to inversion and/or gusty winds.

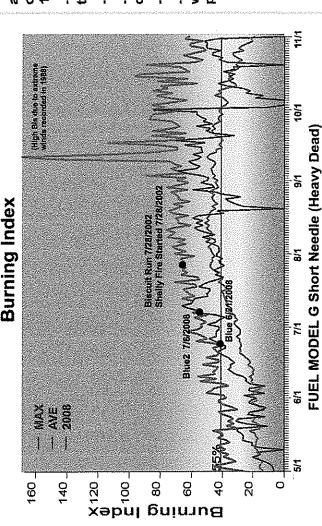

SAFETY

- Consider the potential for re-burning of available fuels
- Evaluate the Fire's potential for upslope runs
- STOP...Stop Think Observe and Predict

Fire Danger Rating Area 110 Energy Release Component

Fire Danger Rating Area 110

Fire Danger Area 110:

- * Smith River National Recreation Area
 - Six Rivers National Forest
- NW CA Region 5

Weather Stations Used:

- * 040101 Camp Six (NFDRS)
 - * 040102 Gasquet (NFDRS)
- * 040105 Ship Mountain (NFDRS)

Local Thresholds - WATCHOUT:

Combinations of any of these factors can greatly increase fire behavior: 20' Windspeed over 8 mph; RH less than 33%; Temperature over 83; 1000-hour Fuel Moisture less than 14. Large fires become more frequent when BI exceeds 41 and when ERC exceeds 41.

Graph Interpretation, Energy Release Component:
Maximum = Highest ERC by day for 1979-2010
Average = Shows Peak Fire Season
62% = 62nd Percentile means 62% of all days observed had an ERC below 41.

PAST EXPERIENCE / LOCAL KNOWLEDGE:

- On July 27, 2002, the Sour Biscuit fire doubled in size to approx. 7,000 ac and burned onto the SRF. On July 28 it doubled again to 15000+ ac. Also, on July 28th, the Shelley fire started. On that day ERC = 68, BI = 63, and 1000FM =11.
- Wildfires become a problem @ 50 acres on the Six Rivers NF due to topography, fuels, and accessibility ('Large fires'= 50 acres).
- This area is ocean-influenced, expect abrupt changes in weather.
- Watch out for East wind events which greatly influence fire activity and are a common contributor to large fires.
- Average slope is 65-70%, Fires are topography-driven.
- Other Watchouts not related to weather: Heavy brush component; small fires will offer high resistance to control and exhaust crews quickly. Poison Oak prevalent in area.

Graph Interpretation, Burning Index:
Maximum = Highest BI by day for 1979-2009
Average = Shows Peak Fire Season
55% = 55th Percentile means 55% of all days observed had a BI below 41

GASQUET COMPLEX-SAFETY MESSAGE

Take 5 at 2 and train with 6 Minutes for Safety

MONDAY AUGUST 24/25, 2015

0600-0600

MAJOR HAZARDS:

- Cumulative fatigue (get your sleep...the only cure for fatigue is sleep.).
- Driving:
- Long drive to work assignment on narrow windy roads. WT working French Hill road to DP 24.
- ✓ Keep speeds down: in camp, in town, on Hwy 199 and on roads to/from the fire line.
- ✓ Don't be a distracted driver! ("distraction proof" your vehicle).
- Snags continue to be a major hazard, identify them and have fallers mitigate them.
- Dehydration (whether on fire line or in camp). Dehydration is preventable. Limit caffeine drinks.
- Night shift...working/driving at night, hiking in rough, steep terrain/rollout and burning ops.

Bear Safety Tips

- Do not feed bears. A fed bear is a dead bear. This makes them comfortable around humans and can lead to bear attacks and injury/death to both humans and bears.
- Do not take any food into your tents. Bears have a strong sense of smell and can pick up the slightest scent. As a result of this drought, bears are having difficulties finding food and water. They will look for food anywhere they can, even your tent.
- While most black bear are timid of humans and normally try to avoid them, like most animals, a mother bear will protect her cubs. As cute as the cubs appear, keep your distance, because the mother bear will protect her cubs and is capable of attacking if she feels that her cubs are being threatened. If you find a cub and suspect that it is orphaned or abandoned, contact your division supervisor so that Fish and Wildlife can be notified.
- If you come across a bear, back away slowly and leave ample space between you and the bear so that the bear can get away. If it feels cornered, it will attack.
- If a bear does attack, fight back. Make yourself look bigger by waving your arms over your head and making loud noises. Throw rocks or any item that may be available and, if need be, strike the bear with branches. Never run as this will stimulate the bear's instinct to chase.

Miscellaneous Safety Issues from Others:

(as told to your incident safety officer)

- Per Frontline Medical, more poison oak cases are coming in for treatment. Decon before getting into vehicles if possible. Don't spread it around camp and please don't share it with us in the dining area.
- Per Facilities, there has been a mama and baby bear hanging out around base camp. One of the neighbors has some fruit trees that they like to visit, when spooked their escape route is through base camp. See bear notes above.
- Per Night Division on the Feeder and Peak, there have been multiple bear sightings on Div. W.
- CHP giving tickets to drivers going over posted speed limit on HWY 199. #&+\$\@#*&

Driving Safety:

- Roads with potentially unstable shoulders due to excessive driving of fire equipment.
- Watch speeds on roads, there are tight turns, and steep drop offs and fire traffic.
- Utilize a traffic pattern as needed.
- Start the day with a clean windshield and side mirrors. Drive with your lights and seatbelts on.
- Stay alert of your surroundings; take note of turn outs and possible safety zones.
- Fast citizen vehicles on Hwy 199.

Incident Safety Officer: Tom Zeulner 805-440-5252 or 213-503-4286

INCIDENT SAFETY ANALYSIS 215a

Gasquet CA-SRF-001488 - Monday, August 24, 2015

Barana and a same and a same and a same	ousquet e	A-SRF-001488 - Monday, August 24, 2015
8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
All	Hazard Trees	 Follow "Hazard Tree Safety" guidelines, IRPG page 22, Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
All	Air Operations	 Follow " Aviation Watch-Out Situations" on page 44, IRPG. Don't plan on air resources for medical transport or resupply. Refer to page 57, IRPG for directing bucket drops. Ensure positive communication with all air resources. Beware of retardant on paved roads in fire area.
All	Chain Saw Operations	~ Follow "Hazard Tree Safety" guidelines, IRPG page 22
Ali	Steep Terrain & Rolling Debris	 Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access. Post lookouts (IRPG pg 6).
All	Driving & Traffic	 ∼ Practice "Defensive Driving" techniques traveling on all roads and city streets. ∼ Use spotters when backing. ∼ Honk horn to alert personnel when backing. ∼ Keep clutter off dash and inside cab. ∼ Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts. ∼ Always use headlights. ∼ Yield to pedestrians and bicycles. ∼ Observe posted speed limits. ∼ Use the 3 second rule for following distance when driving. ∼ Use chock blocks, turn wheels into hill. ∼ Avoid distractions (eating, cell phones, radio). ∼ Ensure that windshields are kept clean of dust and bugs.
All	Firing Operations & Devices	 Only personnel trained in the use of each device will be authorized to use firing equipment. Ensure all personnel are aware of firing operation that may affect them. Wear appropriate PPE. Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed.
All	Injury & Medical Emergency	∼ Assist injured employee appropriate medical care. ∼ Use EMT's on Division for initial care. ∼ Follow medical protocol as outlined in ICS-206 & IRPG Pgs 99-108
All	Bees, Ticks, Mosquitoes	 Canvas crew members for those with known allergic reactions to stings. Ensure crew members have medication pens if needed. Perform daily self inspection. Use repellent as necessary. Advanced Life Support, multi-dose epi and airway protection. Keep affected area clean and bandaged. Be extra careful when eating and/or drinking to avoid stings to mouth and throat.
All	Poisonous Plants	~ Identify and Avoid hazard areas. ~ Launder clothing. ~ Shower frequently.
ALL	Heavy Equipment Operations	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. Use a spotter when backing. Avoid working below heavy equipment.
All	Fatigue & Over Exertion	 Drink 1 quart of water each hour during and after work. Rotate crews out of smoky areas. Set a reasonable work pace and allow adequate rest breaks while on the project. Stagger work crews start time to limit fatigue. Use buddy system to monitor personnel of heat related and fatigue issues. Follow work / rest guidelines.

In Today's Medical Minute

Care for your feet:

Jungle rot is a foot disease causing cracking, swollen, sore, peeling feet. It's from your feet being constantly moist. You get moist/sweaty feet from walking a lot but rarely taking off your shoes. The disease is usually caused by fungi, bacteria or it can be triggered by a minor trauma, the sharing of clothes -- especially socks – or from person to person by contact. The condition usually affects the lower limbs, but it can affect any exposed part of the body too. When the condition is not treated in time, it can extend to the tendons and muscles to the extent of reaching the bones

Use anti-fungal creams. These can be applied in the early stages of jungle rot. The affected area should be cleaned and dried well and then the cream should be applied on top of the skin. The cream should be applied twice a day. The treatment should be continued for one month or at least one week after the symptoms have cleared. If not, it's time to visit your doctor for further care...

Take a look at the following preventative tips to assist you in caring for *your* feet.

- Wear shoes made of material that allow your feet to breath, like leather, or cloth instead of vinyl or rubber.
- Wear cotton socks. Clean dry socks prevent jungle rot.
- Baby powder or talc sprinkled on feet reduces moisture.
- Antiperspirant (not just deodorant) can help prevent sweating.
- Hand Sanitizers rubbed on the feet and in between the toes can reduce moisture and prevent infections.

Just so you know...

Thank you!

CAN YOU FIND THE 9 DIFFERENCES between these Two Examples?

SRE BACK

CTR Quiz

1. Crew name: Who are you?

2. Crew Number: E or O listed on ROSS sheet

3. Office Responsible for Fire: SNF

4. Fire Assignment: Gasquet Complex

5. Fire Number: 1488

6. Date: We need to know when you worked

7. Remarks: Be clear what hours are travel (T) or hazard (H)

8. Remarks: Don't be afraid to explain

9. OIC Signature: Finance can no longer sign any CTRs

10.If you recognize the CTR on the right you need to see finance about the above 9 questions

THESE PEOPLE PLEASE SEE FINANCE

*If you have a transport on the incident put the operators name and miles on shift ticket each day in the remarks section.

O-204 - Miller Timber - Need shift ticket

E-127 -We only need one shift ticket for Dozer & transport

E-44 - Shift Tickets 8/10, 8/11, 8/12

E-158 - Signature on shift ticket

A-42 Plumas Helitack need CTR for Nesbitt &

Johnson 8/19 - 8/22

E-12 Shift tickets 8/17 - 8/20

E-160 Signature on shift tickets

E-32 Missing time 8/8,8/9,8/11,8/12

E-91 Transport driver

Finance Message

Due to lack of resources nationwide and the inability to obtain new resources to replace those that are reaching their maximum length of assignment, the following guidelines apply:

HEALTH, READINESS, AND CAPABILITY MUST BE CONSIDERED PRIOR TO ASSIGNING INCIDENT PERSONNEL TO BACK TO BACK ASSIGNMENTS. THE HEALTH AND SAFETY OF INCIDENT PERSONNEL AND RESOURCES WILL NOT BE COMPROMISED UNDER ANY CIRCUMSTANCES.

Federal employees, Local and out of state cooperating agencies

- 1. Obtain written approval from DIVS for extension or crew swap
- 2. Obtain written approval from home unit supervisor
- 3. See Resources Unit at ICP 4-5 days prior to 14th working day
- 4. If approved to extend, obtain extension form from DMOB
 - Extension options:
 - i. Extend to 21 days (exclusive of travel to and from incident. Time spent in staging and preposition status count towards the 21 day assignment.)
 - ii. Extend to 30 days. Inclusive of mandatory days off and exclusive of travel. (must have 2 days R&R between day 15-21)
- 5. For crew swap, bring 213 (general message) to DMOB with Operations signature, method of travel, names of <u>all personnel</u> (as it appears on their driver's license) that are replacing existing crew, and home dispatch unit contact information.
 - Note crew swap on time documents and provide to finance
 - Replacement crew **must** arrive on 14th day of the existing crews work assignment and be available to work the following day

Private contractors

Obtain written approval from Operations on 213 (general message) and bring to Resources Unit.

- After working 14 days you must take at least 2 days R&R unpaid and can return to incident for an additional 14 day assignment.
- At any time between day 1-14 you can swap personnel and provide information of new crew members to Check-In and Finance.

Gasquet Complex

Resource Advisors

Water Treatment for Port Orford Cedar Infection

- Treat water from all water sources as follows:
 - o 1 gal bleach to 1000 gal water
- Do NOT use bleach treated water to make retardant

Dozer Usage

- All new dozer lines or safety zones need to have archeological surveys prior to ground disturbance
- Where possible, dozer lines should use existing roads or skid trails

Please stay on road or already disturbed sites

Do Not drive in meadow areas

Limit snag falling if not needed for safety or line protection

Fish screens need to be used for water withdrawl

Direct any questions regarding Natural Resources through your Division Supervisor.

Human Resource Message

Thought for the Day

Just as accident rates increase when you become a little complacent, so do human resource contacts and complaints of inappropriate behavior, harassment, and discrimination.

- The fire has been going on for awhile
- People are starting to get tired, and some are ready to go home
- People have a little more time to think about things that upset them during a fire
- People are more easily irritated

Be aware of these facts and make the necessary effort to recognize and deal with human resource situations before they become conflicts that are painful and out of control.

Carl shoves Roger, Roger shoves Carl, and tempers rise

The Incident Human Resource Specialist (HRSP) is Alan Seago, (707) 315-6537. He HRSP Trainee is Sunny Santos, (707) 562-8659. HR is located at Base Camp, in a trailer across from the IC.
