WEATHER SUMMARY: *** See attached Fire Weather Forecast***

Discussion: Cloudy skies and widespread wetting rain is expected over the entire fire complex area today.

Weather: Mostly cloudy with rain in the morning/rain showers in the afternoon.

Max Temp: 58-62° at 1000 feet; 53-57° at 4-5000 feet

Min RH: 55-60% at 1000 feet; 60-70% at 4-5000 feet

Winds (20 foot): Slopes SW 8-12 mph becoming 12-16 mph
Ridgetop: SW 15-20 mph gusting to 35 mph

FIRE BEHAVIOR

GENERAL

Expect the fire behavior to be minimal today due to precipitation. Fire may still spread in the understory in sheltered locations with low flame lengths but in most instances will be smoldering and exhibit no movement. The amount and duration of the rainfall will have a large impact on fire behavior. Ship Mtn. ERC for September 15 was 45, predicted for September 16 is 27.

SPECIFIC FIRE BEHAVIOR

Open timber with understory: potential worst-case surface fire spread (wind/slope alignment) will be less than 4 chains/hour with flame length to 2 feet. Backing fire rate of spread less than 1 chain/hour. Spotting is unlikely. Probability of ignition will be 10-20%.

Closed Timber with litter understory: potential worst-case surface fire spread will be 2-3 chains/hour with flame length 2-3 feet. Backing fire to 1 chain/hour. Spotting unlikely. Probability of ignition will be 10-20%.

Bear Fire: the fire will continue to burn at low spread rates in the Doe Flat/Devils Punchbowl area in Division I until significant precipitation affects the area.

Peak Fire: fire movement will include continued backing into Eightmile Creek and into Buck Creek in Division L until significant precipitation affects the area.

AIR OPERATIONS

Air operations may be limited the entire day due to poor visibility caused by rain and clouds.

Sunrise: 06:56

Sunset: 19:24

SAFETY

Windy conditions during the day may bring down trees/snags. Keep up your situational awareness when working in timbered areas. Road conditions will be poor with slick roadways and debris.

REDUCING RISK WHILE DRIVING

- Keep your seat belts on, Keep your eyes on the road, Keep your speed down.
- Drive defensively, anticipate traffic where you have poor sight lines.
- Expect to see locals and non-fire traffic on the roads traveling fast.
- In inclement weather, reduce speeds, check road systems for traction and braking with a small vehicle before allowing engines, water tenders, and heavier vehicles to proceed, especially on uphill and downhill sections of non-paved roads.
- Use headlights and warning lights when in poor visibility conditions.
- Watch for debris and road hazards where rolling material impacts roads.

Be sure all elements of your safety plan are in place prior to engagement

<u>Briefing Protocol</u> Brief your personnel using the IRPG checklist prior to engagement Re-brief anytime your plan changes, unexpected changes compromise the plan or your safety, or anytime essential information becomes known and needs to be communicated Ask questions to be sure essential content is understood	<u>Complacency</u> Don't let boredom lead to complacency. Remain focused on the task at hand and alert at all times for changing conditions. It is easy to fall into a routine and lose sight of all that is around us.

- Do **NOT** treat water used with retardant

Dozer Use:

Please stay on roads or already disturbed sites

Do not drive in meadows

Limit snag falling, unless needed for safety or line protection.

Direct questions regarding Natural Resources through your Division Supervisor

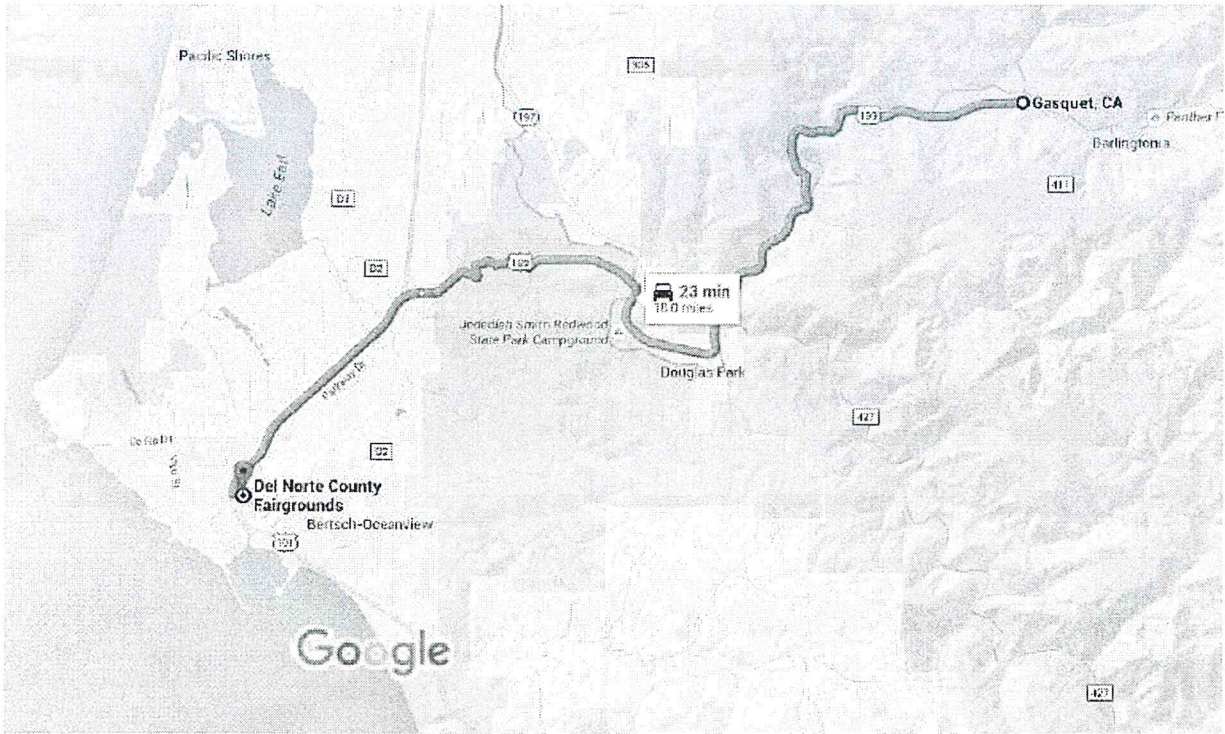

Effective Water Bar Construction

When constructing waterbars, place them the right distance apart, at a diagonal to the fireline. They should divert, discharge and dissipate the energy of the flowing water. Be sure to make them deep enough to be durable and such that soil does not block the outlet.

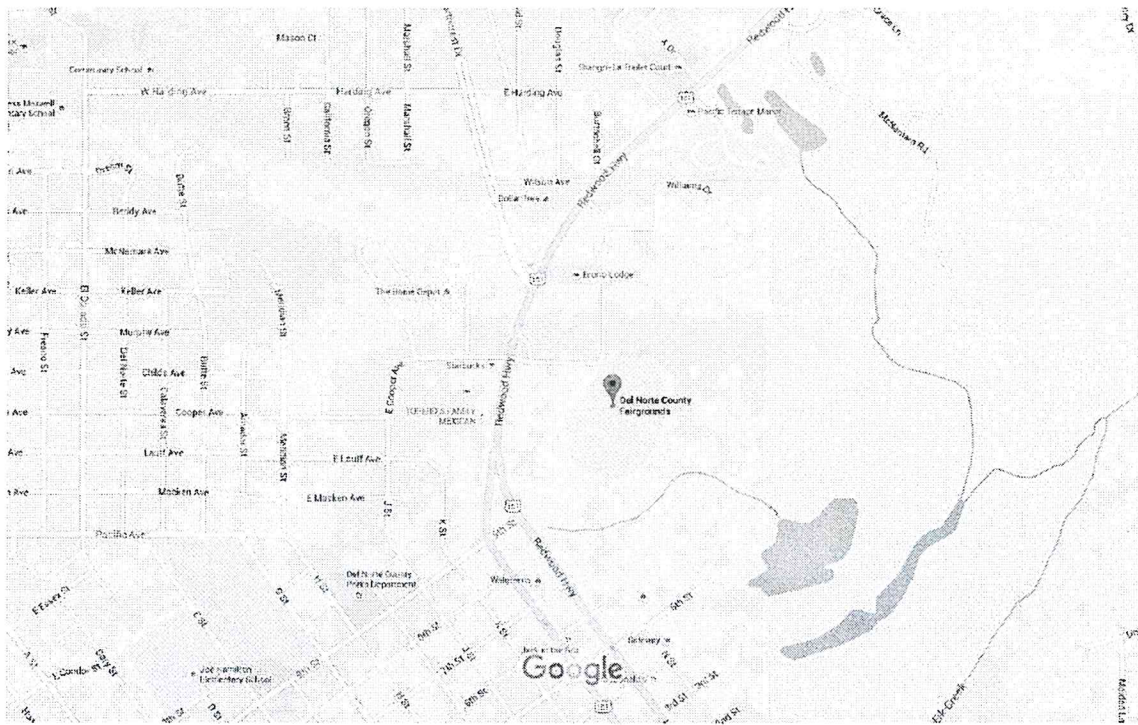

Recommended Spacing for Fireline Waterbars	
Fireline Slope %	Maximum Distance (Feet)
1-5	200
6-20	125
21-40	60
41-60	40
> 60	25

Waterbars may be closer. When in doubt, put in more.
Waterbars should be at least 2 pulaski (4-6") widths wide and 12-24" high for handlines
