Trinity Area Command is established between the Six Rivers National Forest & the Shasta Trinity National Forest. Assigned complexes include the **Mad River Complex, River Complex, South Complex, Route Complex, Nickowitz Fire** and **Fork Complex**.

Objectives

- Prioritize incidents for resource allocation
- Communicate with AA's and IMT's
- Make decisions and recommend actions in transparent manner
- Re-allocate resources on a task- specific, time-sensitive basis
- Understand, support, and address AA issues and concerns
- Continue to focus attention on success and risk management

Common Operating Picture

- Significant open line and continuous growth
- New ignitions likely and emerging fires
- Issues in other GACCs
- Resources timing out and replacement unlikely
- Long duration events (6+ weeks), increasing fatigue & exposure to risk

Value Priorities

- People
- Cultural/Historical values
- Critical Infrastructure and transportation routes
- Private land/ownership values
- Municipal watersheds and T&E species habitat
- Forest improvements and other lands

Operational Approach

- Do not get in the way of IMT's: run interference, do not trip-up
- Communicate
- Make decisions where and when needed: avoid making decisions when not required to do so.

Aviation Expectations

1. Clear and frequent communications are critical to aviation and ground safety. A daily conference call is conducted between IMT's and Area Command to facilitate communications, situational updates, Resource Status, (use & needs), Risk Management/Safecomms, issues and Demobilization are topics covered during the call.
2. If a team is considering ordering any unusual aviation asset, or is considering conducting large/complex aerial ignition operations, or large or sustained crew shuttle operations, the team will inform Area Command Aviation, in advance.
3. All filled aircraft orders and potential demob of aircraft will be communicated by Dispatch to the Area Command Aviation Coordinator, in the event of a change in incident priorities or redistribution of aircraft.

Success - safely achieving reasonable objectives with the least firefighter exposure necessary, while enhancing stakeholder support for our management efforts. Fundamental principles include:

- Everyone, every day, returns home safely.
- Safety is not just a consideration in how we do our work; it is the essence of how we make decisions.
- We assess, analyze, communicate, and share risk before, during, and after incidents.
- We do not accept unnecessary risk or transfer it to our partners or future generations.
- Every fire is managed with strategy and tactical decisions driven by the probability of success to meet reasonable objectives, and receives a safe, effective, and efficient response.
- Before, during, and after every fire, we enhance relationships.
- We create a respectful work environment for everyone involved in fire.
- We learn from every experience and use that knowledge to improve.

Standards for Managing Risk - Wildfire Response Protocol

The **WHAT**: complete, continually reassess, and revise as needed

- ❖ Incident Risk Assessment – values at risk, prioritization, mitigation
- ❖ Risk Analysis – alternatives, exposure, probability of success
- ❖ Two Way Risk Sharing Communication/Dialogue – engagement of all to share risk picture, gain understanding, develop support for likely decision
- ❖ Make the Decision – develop timeframe for review
- ❖ Document – as appropriate
- ❖ Monitor & Adjust – as necessary

The **HOW**: to limit unnecessary exposure and expenditure

- ❖ The Right Plan
- ❖ The Right Place
- ❖ The Right Time
- ❖ The Right Assets
- ❖ The Right Duration

IMT's are reminded to undertake and apply the Protocol

ACT will do so by:

Providing a Common Operating Picture

Reviewing IAP's & 209's

Engaging w/IC's and C&G staff during conference calls and site visits

Analyzing WFDSS outputs

Continuing discussions with AA's

Reassigning resources as needed

Notes: The Medical Plan 206 WF and instructions are available on the Area Command Website.

TRINITY TASK FORCE MANAGEMENT

Three Task Forces - Beta, Omega and Trinity IA are assigned to Area Command to be used by individual complexes to accomplish specific objectives. Upon arrival at the incident/complex the task force will report to the team, but will not go through the formal check-in process. They will remain on the ONC resource order during their entire detail. The IMT will provide all logistical support needs for the task force, ie. meals, fuel, supplies, etc. Time will be documented and kept on file by the Task Force DIVS on a crew time report until their assignment is over. Upon the end of the assignment the Task Force will then close out their time with Anna Dillard at the Shasta 530-227-1475. That office will enter the necessary documentation into ISUITE to track costs and prepare necessary documents for their pay. The respective DIVS will document Task Force time spent on each complex.

Each Task Force has been issued a tactical frequency to be used only while travelling to a new assignment. Once assigned to an Incident/Complex, the Task Force will use the Communication Plan of the Incident/Complex for operational communications. These Task Forces will be managed as a single entity to facilitate the ease of reassignment.

The Trinity Task Force - **Initial Attack Task Force** can be utilized by the incident, but must remain available for **Initial Attack** throughout North Ops area.

Demobilization Strategy

- Resources (aircraft and modules) will be released from incidents only when authorized by Area Command.
- Resources ordered as “A” orders will be demobilized through Shasta Trinity Dispatch Aircraft Desk for Fork, South, and River and through Fortuna Dispatch for Mad River and Route in coordination with Area Command.
- All “O” number resources (CWN Helicopter Modules/Single Resources), must demob through Expanded Dispatch Overhead Desk in Shasta Trinity or Fortuna Dispatch depending on incident. Individual resources with “O” numbers can be transferred between dispatch centers through expanded dispatch by; receiving dispatch center ordering the specific resource from releasing dispatch center. The Aircraft Desk in Dispatch will coordinate with Expanded Dispatch Overhead to ensure married up units are not separated until reassignment orders are evaluated.

Guidelines for Demobilization

- Prepare and provide Area Command with a ramp down schedule.
- Notification period of 24 hours is required for tentative releases on aircraft and single resource modules to Area Command, Aviation. Final notification of firm release orders will be sent to Area Command 12 hours prior to release.
- Standard **IHOG Demob Information Sheet** will be submitted with each confirmed release through team demob unit.

Release Priority

- Local IA Aircraft
- In-area Exclusive Use helicopters to home units for initial attack
- Out-of-area exclusive use initial attack helicopters needed by home unit
- Out-of-area CWN helicopters
- In-area CWN helicopters

Demobilization Criteria

- Cost
- Effectiveness for meeting projected incident mission parameters
- Projected maintenance schedules
- Availability for reassignment based on 14 day policies
