FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 2	TYPE OF FIRE: Wildland Fire
FIRE NAME: Pony & Dillon Fires	OPERATIONAL PERIOD: 0600 – 1800, June 10, 2016
DATE ISSUED: June 9, 2016	TIME ISSUED: 2000
UNIT: Happy Camp R.D. Klamath N.F.	SIGNED: <i>Isi Teresa Riesenhuber</i> , FBAN-t

INPUTS

WEATHER SUMMARY: *** See attached Spot Weather Forecasts ***

Discussion: The upper level trough continues to bring a cooler air mass into Friday with good overnight humidity recovery (70-90%). Pony Fire daytime humidity up about 5-10% and temperatures down about 10° from Thursday. Dillon Fire little change in humidity but temps drop about 5°.

Weather: Partly cloudy, slight chance of showers

Max Temp: 55 – 57°

Min RH: 37 – 42%

Winds (20 foot): NW 1-3 mph increasing to 4-7 with gusts to 10 mph

Live Fuel Moisture (manzanita): 150% **1000 hr fuels:** 9%

FIRE BEHAVIOR

GENERAL

Higher humidity and lower daytime temperatures will continue to moderate fire behavior thru Friday compared to earlier this week. Expect the fire to lay low until late morning/early afternoon when the winds pick up and inversion lifts. Primary fire spread for the Pony Fire is backing with occasional roll-out and short upslope runs on the west side of Swillup Creek. Heavies will continue to burn down and preheat the live fuels.

Dutch Indy RAWS ERC for June 8 = 60.

POI 50%, **Flame lengths** 2 – 7 feet, **Rate of Spread** 4 – 10 ch/hr, **Spotting Potential** 1/10 mile

SPECIFIC FIRE BEHAVIOR

Division A: The fire will continue to flank and roll-out into Elliot Creek. Predicted NW winds in the afternoon should keep smoke and embers from crossing the fireline.

Division C: Once the fire crosses Swillup Creek there could be alignment with winds and slope, combined with dense brush and regeneration conifers intermixed with heavy slash.

Division B, D, H: Fire not expected to reach your division today.

Dillion: High RH and low temps should enhance containment and mop-up efforts.

AIR OPERATIONS

Air operations may be limited until mid-morning due to smoke settling in valleys and canyons. Expect the inversions to burn off mid-morning.

Sunrise: 05:38

Sunset: 20:48

SAFETY

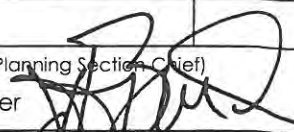

Post or relocate lookouts in multiple locations as the fire grows and moves into new terrain. The Pony Fire has been backing downslope for several days, some parts of the main fire are moving more quickly than others. Changes in slope could change fire behavior and spread direction. Know where you are in relation to the fire and have a plan for escape should the need arise.

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	HAZARD TREES	<ul style="list-style-type: none"> Follow Hazard Tree Safety Guidelines (IRPG p. 22). Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being fallen. Be especially alert around snags during wind events or changing wind direction. Check for hazard trees & "widow-makers" in sleeping areas prior to using. Maintain Situational Awareness.
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> Review "Severe Fire Behavior Potential" (IRPG p.68). Monitor current weather conditions and forecasts. Make sure all personnel receive thorough briefings every shift. Be observant for formation and passage of thunder cells through or close to fire area and alert all personnel. Maintain adequate escape routes and safety zones. Advise all personnel if these are compromised or changed. Set trigger points when appropriate. Adhere to 10 Std Orders, mitigate 18 situations. Maintain Situational Awareness.
ALL	HYDRATION	<ul style="list-style-type: none"> Drinking water before, during and after shifts, up to 1.5 gal. per shift. Be alert for signs of heat disorder in yourself and others.
ALL	AIRCRAFT OPERATIONS	<ul style="list-style-type: none"> Wear all required PPE when being transported by helicopter. Follow all helitack instructions when approaching, loading, and unloading from the aircraft. Use qualified personnel for long-line operations. Keep others clear of the operation. Keep personnel out of drop zones when bucket work in progress. Use air-to-ground frequency to communicate with aircraft. Use clear, concise statements when directing aircraft. Use clock directions from pilot's perspective.
ALL	INDIRECT LINE CONSTRUCTION	<ul style="list-style-type: none"> Establish and maintain LCES. Locate line in favorable location, lighter fuels and gentler topography when possible. Utilize natural or existing barriers. If possible burn out or backfire as line construction progresses.
ALL	POISONOUS INSECTS, SNAKES	<ul style="list-style-type: none"> Identify, avoid, and get treatment for any bites or stings. Use caution (for bees, wasps, etc.) when drinking from opened cans. Watch your footing.

ALL	SAFETY ZONES	<ul style="list-style-type: none"> Follow safety zone guidelines (IRPG p. 8) Carefully evaluate burned areas before designation as safety zones due to spotty burning in numerous areas. When safety zones are distant from work site, set trigger points to allowing personnel to reach them in a timely manner.
ALL	MARIJUANA PLANTATIONS	<ul style="list-style-type: none"> Maintain situational awareness. Watch for open areas and sign of improvements or irrigation systems. Be aware of evidence that cultivation has occurred in the area. If you stumble upon an area with probable cultivation be extremely cautious, exit on the same route you arrived and notify supervisor immediately.
ALL	HEAVY EQUIPMENT/DOZERS	<ul style="list-style-type: none"> Utilize appropriate PPE and other equipment safety mechanisms. Maintain safe working distances. Utilize observer or spotter. Ensure the use of effective communication (radio, hand signals). Identify hazards.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> Share your Situational Awareness (hazards, changes, etc.) to those who also have a need. Answer questions when asked by others. Ask for intel if and when you don't know the plan. Ensure all personnel are familiar with the incident and IA communications plans.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> Keep alert for wildlife, insects, and plants. Watch footing and hand placement around rocks. Keep food out of tents and from around sleeping areas to prevent wildlife night visits. Personal hygiene is #1 when it comes to Poison Oak Prevention.
