FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 20	TYPE OF FIRE: Wildfire
FIRE NAME: Pony Fire	OPERATIONAL PERIOD: 25 June 2016
DATE ISSUED: 24 June, 2016	TIME ISSUED: 1800
UNIT: Klamath National Forest Happy Camp Ranger District Karuk Tribe	SIGNED: Chris Church – FBAN 

INPUTS

....WEATHER DISCUSSION: An upper ridge will begin building over our area, and a thermal trough develops along the coast. This will result in a rapid return to warm summertime conditions tomorrow with even hotter conditions on Sunday. We will remain under warm southwest flow aloft through the rest of next week. We will see occasional disturbances in the flow that may touch off thunderstorms over the mountains at times, but no particular day stands out as more likely than others at this point. We'll have to wait and see about the potential for storms, but it is expected to be warm to hot through next week. - Wright

FUELS: Available fuels continue the drying trend with the current weather patterns and are continuing the climb to above the seasonal average. Fuels are generally mixed conifers (mostly red and white fir) and western hemlock in the highest elevations. Mid elevations have Douglas fir, ponderosa and sugar pine with scattered brush including madrone, ceanothus and manzanita along with several oak species. Most elevations contain a heavy dead and down component. Live fuel moistures (LFM) taken 6/23 on the fire averaged 137% LFM in Tan Oak, 165% in manzanita, and 165% in ceanothus for the brush species. Timber samples came in at 166% LFM for Douglas Fir, and 137% for ponderosa pine. The latest ERC data shows the ERC at 51 which is now tied with the seasonal average for this date in time. Expect the ERC to continue to climb to above average with the current warmer and drier weather, and move towards the ERC recorded when the Pony Fire was discovered.

OUTPUTS

.....FIRE BEHAVIOR

GENERAL: High temperature will be around 85 degrees today on the ridgetops, with relative humidity in the lower 20s. Expect mostly low fire behavior again today with the predicted indices, and mostly creeping and smoldering type fire continuing to consume heavy down and dead and other ground fuels.

Fuel Model	ROS (ch/hr)		Flame Length (ft)		PIG	Spot_Dist
	Head	Backing	Head	Backing		
TU5 Timber	6.4	2.4	6.1	3.8	56%	.2 mile
SH2 Brush	1.3	.5	1.2	.8	56%	.2 mile

Fire behavior predictions are for the hottest, driest and windiest part of the burn period.

SPECIFIC

DIV A: Expect continued creeping and smoldering with backing and flanking fire movement. Due to slope and fuels as well as hot temps and Haines 5, expect single tree torching if heavy ground fuels preheat canopy in this division. The possibility of roll out in this division is moderate to high due to topography.

DIV Z: Interior creeping and smoldering will continue to consume pockets of ground fuel in this division. Falling snags and/or rolling material will continue to be a threat to the fireline.

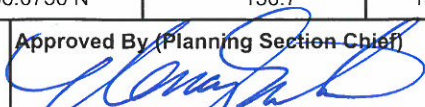

AIR OPERATIONS:

With today's forecasted Haines of 5 (Moderate) and warmer temperatures but light winds (W/NE 2-5 mph) air operations may be a bit bumpy in the afternoon today due to the warmer unstable air. Any drainage smoke inversions should clear by mid morning.

FOR ALL MEDICAL EMERGENCIES: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS/DISPATCH

Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: Provide incident summary and command structure.

Nature of Injury/Illness		Describe the injury (Ex: Broken leg with bleeding)
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)
Incident Commander		Name of IC
Patient Care		Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report.

Number of Patients:	Male / Female	Age:	Weight:
Conscious? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC			
Breathing? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC			
Mechanism of Injury: What caused the injury?
