3. Objective(s):			•
Leader's Intent:			
Leader's Intent:			
A full suppression strategy will be implemented for the spread and severity across private timberlands through			trategies. Efforts will be made to minimize fire
Management Objectives:			
Ensure that strategies and tactics provide for firefi	ghter and public safety through	the application of sou	nd risk management principles.
Ensure that all suppression actions are commens			ū
Minimize undesirable suppression impacts by em		highest probability o	f success while minimizing firefighter exposure.
Establish and strengthen cooperator, partner, and	stakeholder relationships.		
Prepare a collaborative suppression repair plan a	nd coordinate implementation.		
4. Operational Period Command Emphasis:			
Keep the fire:			·
North of Highway 96 and evaluate the need for m	op up.		
South of the Siskiyou crest and secure control line	es.		
East of Seiad creek within existing control lines.			
West of the footprint of the 2014 Beaver fire

FIRE WEATHER FORECAST

FORECAST NO: 10D

PREDICTION FOR: 24 hours

SHIFT DATE: Friday, September 9, 2016

TIME AND DATE

FORECAST ISSUED: Thu Sep 8 @ 2000 hours

INCIDENT NAME: Gap

UNIT: Klamath National Forest

SIGNED:

Incident Meteorologist - Andy Gorelow

HOT AND DRY TODAY AND SATURDAY!!!

WEATHER DISCUSSION:

High pressure over the area will lead to the hottest and driest days of the week today and Saturday. Humidity values will drop into the teens over most valley locations with upper teens to mid 20s at the ridges. Offshore flow will bring northeast to east winds overnight and early morning with gusts up to 10 mph at times on the ridges. Poor humidity recoveries expected again tonight with ridges only seeing values into the 30 to 40 percent range. Slightly cooler temperatures and higher humidity values forecast Sunday as an area of low pressure drops southeast out of Washington and Oregon. No precipitation is expected.

WEATHER TODAY (FRIDAY): Sunny. Areas of smoke. Inversions lifting by early afternoon, except in areas under thicker smoke.

MAX TEMPERATURES / MIN RELATIVE HUMIDITY:

Vallevs:

88 to 94 degrees / 14 to 24%

Ridges:

76 to 83 degrees / 18 to 28%

20 FOOT WINDS:

Slope/Valley:

Northeast to east 4 to 7 mph through 1000 then upslope/upvalley 3 to 5 mph through the

afternoon.

Ridges:

East 4 to 7 mph with gusts to 12 mph in the morning. East 3 to 5 mph in the afternoon.

HAINES....4 (Low)

CWR (>=0.10")....0%

LAL...1

WEATHER TONIGHT (FRIDAY NIGHT): Clear. Poor humidity recoveries. Inversions developing by 2200. Thermal belt developing between 3000 and 5000 feet.

MIN TEMPERATURES / MAX RELATIVE HUMIDITY

Valleys: 46 to 53 degrees / 60 to 70% Ridges: 55 to 60 degrees / 30 to 40%

20 FOOT WINDS:

Slope/Valley: Northeast 3 to 6 mph through 2000 then downslope/downvalley 3 to 5 mph.

Ridges:

East 4 to 7 mph with gusts to 12 mph at the ridges...

HAINES....4 (Low)

CWR (>=0.10")....0%

LAL...1

<u>SATURDAY:</u> Sunny. Hot and Dry. Smoke in the valleys. Inversions lifting by early afternoon. Upvalley/upslope 3-5 mph. Ridgetop winds northeast to east 2-4 mph. Highs 80-95. Min RH: 12-22%.

OUTLOOK FOR SUNDAY AND MONDAY:

High pressure will weaken as an area of low pressures moves south along the Pacific NW coast. This will bring cooler temperatures along with increasing RH values. Ridgetop winds will increase slightly Sunday afternoon from the northwest, but gusty northeast to east winds will occur Monday. Mostly sunny. Ridgetop winds Monday NE-E 12-22 mph. Highs: 75-90. Min RH 20-35%

Yesterday Nearby RAWS:	Max/Min T	Max/Min RH	Peak Gust / Time
Collins Baldy 5476'	75 / 58	40 / 25	NW 18 mph @ 1431

UNIT: Klamath NF	SIGNED: Isl Ken Larson, FBAN

INPUTS

WEATHER SUMMARY:

*** See attached Fire Weather Forecast***

Discussion: High pressure over the area will bring the hottest and driest days of the week today and Saturday. Expect poor nighttime humidity recoveries.

Weather: Sunny. Areas of smoke. Inversions lifting by early afternoon. Clear at night, inversions forming by 2200. Daytime: Max Temp: 88-94° in the valleys; 76-83° on ridges Min RH: 14-24% in the valleys; 18-28% on ridges Nighttime: Min Temp: 46-53° in the valleys; 50-60° on ridges Max RH: 60-70% in the valleys; 30-40% on ridges Winds (20 foot):

Slope/Valley: NE to E 4-7 mph through 1000, then upslope/upvalley 3-5 mph through the afternoon. Evening winds NE 3-6 mph through 2000 then downslope/downvalley 3-5 mph.

Ridges: E 4-7 mph gusts to 12 in the morning, E 3-5 mph in the afternoon. Nighttime E 4-7, gusts to 12.

FIRE BEHAVIOR

GENERAL

Unless there is a spot fire outside containment lines there should be no fire behavior problems. There is still a potential for torching and spotting near containment lines but the probability is low.

Energy Release Components are at very high levels for this time of year. September 8 ERC was 75 and is expected to increase over the next several days.

SPECIFIC FIRE BEHAVIOR

Timber fuel types: potential worst-case surface fire spread will be 4-8 chains/hour with flame length 4 to 6 feet. Torching trees and short duration crown runs are possible, with maximum spotting distance to 1/10 of a mile. Backing rate of spread 2-3 chains/hour. Probability of ignition will be 70-80% at the height of the burn period.

Brush areas: potential worst-case surface fire spread will be 15-25 chains/hour with flame length 4 to 6 feet. Occasional short duration crown runs should be anticipated if fire gets established with maximum spotting distance to 1/10 mile which could increase total spread distance significantly. Probability of ignition 70-80%.

Overnight fire behavior (both Timber and Brush) will become backing, flanking, with occasional torching with spread rates less than 5 chains/hour and flame length to 4 feet. Spotting distance less than 1/10 mile, probability of ignition 20-30%.

AIR OPERATIONS

Air operations may be limited much of the day due to poor visibility caused by smoke, especially on the south side.

09/09 Sunrise: 06:48

Sunset: 19:32

09/10 Sunrise: 06:49

SAFETY

Keep an eye out for undiscovered spots that may exist near recently burned areas. When moving to new work locations ensure you become familiar with escape routes and safety zones. Obtain a good briefing from those who have worked the area about fire behavior they may have observed at that location.

6. Control Operations/Work Assignments:

- Mop-up to the extent necessary to maintain control lines.
- · Backhaul any equipment / supplies back to I.C.P.
- · Chip excess slash / water bar interior lines.

7. Special Instructions:

- Heritage resources will be flagged for avoidance with orange / white diagonal striped flagging.
- Fish screens may be required at draft sites; report any screening needs to READS. Screens will be made available.
- Initiate stage 1 repair activities.
- · Be prepared to support Initial attack.

SAFETY MESSAGE

COMPLACENY

- Defined= A feeling of being satisfied and not wanting to make it better.
- Your goal is to **NEVER** be satisfied with your safety.
- Keep your edge by asking these 3 questions;
 - 1. What could go wrong?
 - 2. What more can I do to ensure our safety?
 - 3. What may I be unaware of that could compromise our safety?
- Look up, Look down, and Look all around to maintain your awareness.

MAJOR HAZARDS AND RISKS

STEEP TERRAIN	ROLLING MATERIAL	HEAVY EQUIPMENT
FATIGUE	DEHYDRATION	HAZARD TREES
SPOT FIRES	BUCKET DROPS	DRY FUEL CONDITIONS

Be sure all elements of your safety plan are in place prior to engagement

Stay Hydrated

Drink fluids before, during, and after the shifts.

For every 2 bottles of water, drink 1 bottle of Gatorade.

At 2% dehydration, performance will fall off by 10-20% and is the #1 trigger of fatigue.

Working with Heavy Equipment

- When working around heavy equipment stay at least 100 ft. in front and 50 ft. behind the equipment. In timber, distances should be 2 ½ times the canopy height.
- Never approach equipment until you have eye contact with the operator, all implements have been lowered to the ground, and equipment is idled down
- Establish visual and radio communications methods prior to engaging.
- Communicate all hazards to the operator.

Nor Cal Team 2 Safety Officers Terry O'Connell, Shelby Charley, Frank Pingiczer(T)

GAP INCIDENT DAY/NIGHT SHIFT **INCIDENT RISK ANALYSIS (ICS 215A) HAZARDOUS ACTIONS / CONDITIONS MITIGATIONS / WARNINGS / REMEDIES** DIV Follow "Hazard Tree Safety" guidelines, IRPG pages 22. ALL DANGER TREES Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events". ALL Practice "Defensive Driving" techniques. **TRAFFIC & DRIVING** Use spotters when backing. Always use headlights. Use warning lights when working on roads or traveling in smoke... Many roads are narrow and mid slope, use caution. ALL DRY FUEL CONDITIONS Establish and maintain LCES Anticipate intense burning and rapid rates of spread Watch for spot fires Allow for adequate time to escape routes and safety zones DIVS SPOT FIRES Size up prior to engagement. H, M, Watch for multiple spots. Y,Z Ensure LCES is in place. Maintain Situational Awareness at all times. STRUCTURE PROTECTION Ensure LCES is in place ALL Review Structure Protection; IRPG pages 12-16 Do not commit to stay on a structure unless the area around the structure represents an adequate safety zone Set trigger points to disengage and allow adequate time to relocate to primary and secondary safety zones Look for propane tanks and other hazardous materials DIV FIRING OPERATIONS Maintain situational awareness. H,Y,ZWatch for open areas and sign of improvements or irrigation systems. М Be aware of evidence that cultivation has occurred in the area. If you stumble upon an area with probable cultivation be extremely cautious, exit on the same route you arrived and notify supervisor immediately. ALL **STEEP TERRAIN &** Maintain 8'-10' spacing when working & walking. **ROLLING DEBRIS** Don't work above any personnel. Evaluate necessity to send personnel in areas with limited access. ALL **ENVIRONMENTAL HAZARDS** Keep alert for wildlife, rattlesnakes, insects, and plants. Watch footing and hand placement around rocks. Personal hygiene is #1 when it comes to Poison Oak Prevention. Follow " Aviation" Watch-Out Situations" on page 44, IRPG. ALL **AIR OPERATIONS** Don't plan on air resources for medical transport or resupply. Refer to page 57, IRPG for directing bucket drops. Ensure positive communication with all air resources. DIV Ensure JHA is provided and signed by operators. **CHIPPING OPERATIONS** A.C Only qualified personnel will feed the chipper. Ensure appropriate PPE is used including eye and hearing protection. N.CNT ALL **HEAT RELATED ILLNESS** Drink 2 to 1 water to sports drinks. (HRI) & DEHYDRATION Take frequent breaks, minimum of 10 minutes every hour. Recognize symptoms of HEAT RELATED ILLNESS which include; Lack of energy, Headaches, dizziness, lack of rest, no hunger, poor eating habits, hot skin, and lack of sweating ALL **HEAVY EQUIPMENT OPERATIONS** Ensure communications are established with operators. **REPAIR** Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment. Use a spotter when backing. ALL MOP UP Use all required PPE, including eye protection. Be alert for stump holes and root cavities. Minimize exposure to smoke, and rotate personnel into clean air when practical.

TRAINING SPECIALIST MESSAGE

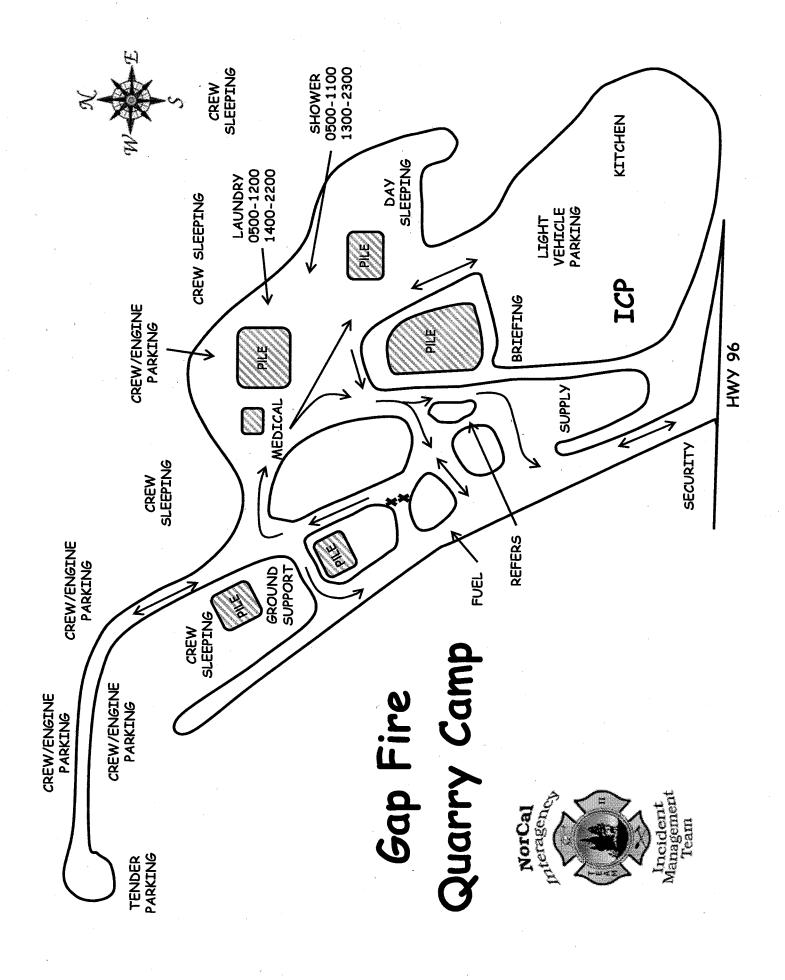

Open training packages will be transferred to the new incoming Type 2 team for you to continue on with your training assignment.

Beat the Rush!!

Trainer / Evaluators: If as much work as possible has been completed in the position task book, you are <u>strongly</u> encouraged to take advantage of your time in camp and conduct the training close-out with the TNSP. It is not necessary to wait until demob!

Brad Smith and Heather Grove Training Specialists
