## INPUTS

**WEATHER SUMMARY:** \*\*\*See attached Fire Weather Forecast\*\*\*

**Discussion:** High pressure will start to build over the area leading to dry conditions and gradually warming temperature.

**Weather:** Mostly sunny. Areas of smoke. Inversions lifting by early afternoon except in areas under thicker smoke.

**Max Temp:** 84-89° in the valleys; 70-75° on ridges

**Winds (20 foot):**

Slope/Valley: North 3-5 mph through 0900, then upslope/upvalley 3-7 mph through the afternoon. West up to 10 mph near the Klamath River in the afternoon.

Ridges: Northeast 5-10 mph in the morning; becoming north 5-10 mph with gusts up to 15 mph in the afternoon.

## FIRE BEHAVIOR

### GENERAL

Seasonal temperatures and relative humidity, along with light winds, will reduce the potential for extreme fire behavior.

Energy Release Components are at very high levels for this time of year. September 6 ERC was 73.

### SPECIFIC FIRE BEHAVIOR

Expect the fire behavior to be low to moderate until mid to late afternoon. Fire spread will be primarily backing and flanking with occasional individual and group tree torching during the early portion of the operational period. Expect the possibility of moderate fire behavior late afternoon into the evening, especially in the northern portion of the fire.

Timber fuel types: potential worst-case surface fire spread will be 5-10 chains/hour with flame length 4 to 6 feet. Torching trees and short duration crown runs are possible, with maximum spotting distance to 2/10 of a mile which can increase spread distances significantly. Backing rate of spread 2-3 chains/hour. Probability of ignition will be 60-70% at the height of the burn period.

Brush areas: potential worst-case surface fire spread will be 20-30 chains/hour with flame length 4 to 8 feet. Occasional short duration crown runs should be expected with maximum spotting distance to 2/10 mile which could increase total spread distance significantly. Probability of ignition 60-70%.

The primary areas of concern is the southern fire perimeter located on the north side of the Klamath River (Division Y); and the northwestern fire perimeter and interior (Division H), especially in regards to fire intensity and tree mortality.

## AIR OPERATIONS

Air operations may be limited much of the day due to poor visibility caused by smoke, especially on the south side.

Sunrise: 06:45

Sunset: 19:35

## SAFETY

Fire behavior early today should minimal but there is a potential for torching and upslope runs in the afternoon in the northerly portion of the fire (Division H). Pay attention to changes in windspeed and direction. Ensure lookouts are posted to monitor fire behavior.
