

GAP FIRE

Incident Action Plan

September 14th, 2016
0600 – 1800

Chipping Operations

Ensure JHA's are provided and signed by all involved in the operation.

Only qualified personnel should be feeding the chipper.

Maintain safe distances to avoid being struck by flying debris.

Utilize all appropriate PPE including approved eye protection.

Communication Responsibilities

Briefings – All resources require briefings. If necessary utilize the IRPG Briefing Checklist.

Debrief Actions – Use the AAR format in your IRPG to guide your discussion.

Communicate Hazards to Others

Acknowledge messages

Ask if you do not know – Ask questions to seek clarity.

**KEEP A HIGH LEVEL OF
SITUATIONAL AWARENESS**
Gap Fire: CA-KNF-007501 P5KN0B (0505)
Klamath National Forest

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period: DAY	
GAP	Date/Time From: 09/14/2016 0600 WED	Date/Time To: 09/14/2016 1800 WED
3. Objective(s):		
<p>MANAGEMENT OBJECTIVES</p> <ol style="list-style-type: none"> 1. Utilize strategies and tactics to provide for firefighter and public safety through hazard recognition and application of the risk management process. 2. Utilize Resource Advisors to identify and evaluate suppression repair work. 3. Maintain and improve cooperator, stakeholder, and community relationships. <p>OPERATIONAL OBJECTIVES</p> <ol style="list-style-type: none"> 1. Keep the fire within existing containment lines and implement approved suppression repair plan. 2. Continue implementing fire suppression repair in accordance with the agency approved plan. 		
4. Operational Period Command Emphasis:		
<ul style="list-style-type: none"> • LEADERS INTENT • Continue existing suppression strategies on the Gap fire. • Focus efforts on resource restoration through suppression repair and minimizing negative fire effects from interior burning. 		
General Situational Awareness:		
<p>5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/></p> <p>Approved Site Safety Plan(s) Located at:</p>		
6. Incident Action Plan (the items checked below are included in this Incident Action Plan):

FINAL

②

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 27	TYPE OF FIRE: Wildland Fire
FIRE NAME: Gap Fire	OPERATIONAL PERIOD: 0600 – 1800, Sept. 14, 2016
DATE ISSUED: September 13, 2016	TIME ISSUED: 1900
UNIT: Klamath NF	SIGNED: <i>[Signature]</i> FBAN

WEATHER SUMMARY: ***See attached Fire Weather Forecast***

Discussion: Similar conditions compared to Tuesday. Sunny skies with patchy smoke. Terrain driven winds will affect most of the fire.

Max Temp: 79-83° in the valleys; 64-70° on ridges

Min RH: 12-18% in the valleys; 16-22% on ridges

Winds (20 foot):

Slope/Valley: upslope/upvalley 4-8 mph with gusts to 12 mph

Ridges: Morning northwest 3-6 mph becoming 5-10 mph with gusts to 15 mph in the afternoon.

FIRE BEHAVIOR

GENERAL

Active fire behavior has diminished over the past three shifts and will continue to diminish as the interior fuels consume.

Live fuel moistures are near critical levels with Manzanita at 86-94%, Ceanothus at 78-87%, and 1000-hr fuels are at 5-6%.

Energy Release Component for the west side of the Klamath NF is currently above the 90th percentile

SPECIFIC FIRE BEHAVIOR

Fuels across the fire area will continue to burn out. Minimal fire behavior is anticipated today.

DIVISION H and M: Interior islands will continue to burn out in both Divisions throughout the shift. Scattered fuels adjacent to the line in Division H should no longer be a threat due to reduced windspeed crossing the control line.

Timber fuel types: potential worst-case surface fire spread will be 5-15 chains/hour with flame length 4 to 8 feet. Torching trees and short duration crown runs are possible, with maximum spotting distance to 1/10 of a mile. Backing rate of spread 2-3 chains/hour. Probability of ignition will be 70-80% at the height of the burn period.

Brush areas: potential worst-case surface fire spread will be 15-25 chains/hour with flame length 4 to 8 feet. Occasional short duration crown runs should be anticipated if fire is established with maximum spotting distance to 1/10 mile, which could increase total spread distance significantly.

AIR OPERATIONS

No problems anticipated.

SAFETY

Even though minimal fire behavior is expected and repair operations are ramping up, maintain situational awareness for "what could or might happen" today.

Division/Group Assignment List (ICS 204 WF)

1. Incident Name:				3.		
GAP				Branch:		Division/Group: A / C
2. Operational Period: DAY

AIR OPERATIONS SUMMARY

Prepared By: Glenn Dietz

Prepared Date 9/13/2016

Prepared Time: 19:00

1. INCIDENT NAME: Gap Fire	2. OPS PERIOD DATE: 9/14/2016	START TIME: 0700	END TIME: 2000	SUNRISE: 0653	SUNSET: 1926
3. REMARKS (Safety Notes, Hazards, Air Operations, Special Equipment, etc.): * Low wires & cables in river canyon, reference KNF Flight Hazard Map. * Watch for boat cables across river at DP28 and confluence of the Scott River. * Complete thorough high recon before descending. * If dipping from Applegate Lake or Swamp Lake (North of Fire), clean bucket/trank before & after use.			4. READY ALERT AIRCRAFT MEDEVAC: H 502 (Scott Valley) Initial Attack: H-502 (Scott Valley) H-516 (Scott Valley) H-503 (Happy Camp)		5. TFR 6/7004 Surface to 10,000 MSL. Polygon

6. PERSONNEL	NAME	PHONE #	7. FREQUENCIES	AM	FM	8. FIXED-WING- Type/ Make-Model/ N#/ Base
AOBD	Glenn Dietz	530-227-0017	AIR/ AIR FW	127.025		AIRTANKERS - Ordered by ATGS

MEDICAL PLAN (ICS 206 WF)

Medical Incident Report

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS DECLARE: "MEDICAL EMERGENCY" OR "NON-EMERGENCY MEDICAL TRANSPORT"

Ex: "Communications, Div. Alpha. Stand-by for a medical emergency on Div. Alpha" (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: *Provide incident summary and command structure.*

- **Nature of Injury/Illness** *Describe the injury (Ex: Broken leg with bleeding)* _____
- **Incident Name** *Geographic Name + "Medical" (Ex: Trout Meadow Medical)* _____
- **Incident Commander (Division Sup. or designee)** *Name of IC* _____
- **Patient Care** *Name of Care Provider (Ex: EMT Smith)* _____

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each pt. This is only a brief, initial assessment. Provide additional pt. info after completing this report.*

- **Number of Patients:** _____ - **Male / Female:** _____ - **Age:** _____ - **Weight:** _____
- **Conscious?** YES NO = MEDEVAC! - **Breathing?** YES NO = MEDEVAC!
- **Mechanism of Injury** *What caused the injury?* _____
- **Location, Lat/Long** *(Datum WGS84) Ex: N 40° 42.45' x W 123° 03.24'* _____

4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
<input type="checkbox"/> URGENT-RED <i>Life threatening injury or illness.</i> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE.
<input type="checkbox"/> PRIORITY-YELLOW <i>Serious Injury or illness.</i> <i>Ex: Significant trauma, not able to walk, 2° - 3° burns not more than 1-2 palm sizes.</i>	Ambulance or consider air transport if at remote location. Evacuation may be DELAYED.
<input type="checkbox"/> ROUTINE-GREEN <i>Not a life threatening injury or illness. Ex: Sprains, strains, minor heat-related illness.</i>	Non-Emergency. Evacuation considered Route of Convenience.

5. TRANSPORT PLAN:

Air Transport: *(Agency Aircraft Preferred)*

- Helispot Short-haul/Hoist Life Flight Other

Ground Transport:

- Self-Extract Carry-Out Ambulance Other

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

- Paramedic/EMT(s) SKED/Backboard/C-Collar Crew(s) Burn Supplies Oxygen
 Trauma Bag Medication(s) IV/Fluid(s) Cardiac Monitor/AED
 Other (i.e. splints, rope rescue, wheeled litter)

7. COMMUNICATIONS:

- Run Medical Emergency on Command
- Coordinate with air ambulance on CALCORD tone 6

8. EVACUATION LOCATION:

- **Lat/Long** *(Datum WGS84) EX: N 40 42.45' x W 123 03.24'* _____
- **Patient's ETA to Evacuation Location:** _____
- **Helispot/Extraction Size and Hazards:** _____

9. CONTINGENCY: *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...*

REMEMBER: -Confirm ETA's of resources ordered -Act according to your level of training
 - If air or ground ambulance is DELAYED: Package and transport patient to rendezvous with incoming Ambulance.
 Re-route EMS helicopter to rendezvous point as appropriate.

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	MEDICAL EMERGENCIES	<ul style="list-style-type: none"> Review and understand Medical Plan and 9 Line in the IAP. Base all operational activities on these three questions <ol style="list-style-type: none"> What are we going to do if someone gets hurt? How will we get them out of here? How long will it take to get them to a hospital? If the answers are insufficient, stop, reassess and consider alternate strategies and tactics! <p>Review and brief your crews using page 2 in the IRPG.</p>
ALL	DANGER TREES	<ul style="list-style-type: none"> Identify, flag and communicate all high-risk DANGER TREES. Establish lookouts when engaged in falling operations. Re-assess the need to eliminate the hazard by felling if it is feasible. Mitigate using only qualified felling personnel. If unable to mitigate the hazard; flag the area, restrict access and communicate the location to other personnel. Review and brief your crews using pages 22-23 and 79 in the 2014 IRPG.
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> Roads within the burned areas have MANY hazards. Scout prior to committing to travel; roads on the Klamath NF are narrow and often located on steep slopes. Watch-out for false shoulders that will not support the weight of heavy trucks and equipment. Drive defensively! Expect the unexpected around every curve. Drive with your headlights on, use emergency lights as necessary. Look before backing and use backers. On dusty/smoky roads, don't follow too closely behind traffic. Allow time for dust/smoke to clear.
A/C, South Contingency	HEAVY EQUIPMENT OPERATIONS DOZER/EXCAVATOR/CHIPPER	<ul style="list-style-type: none"> Maintain safe working distances; stay 100' in front of and 50' behind the operating equipment. If working in the timber increase these distances 2.5 times the canopy height. Avoid working below equipment, especially on steep slopes. Ensure the use of communications with operators; radio or pre-defined hand signals. Refer to and brief your crew using page 80 in the 2014 IRPG for further precautions for working around heavy equipment. When working with "chippers", conduct thorough safety briefings, review and sign approved JHA, only contract personnel should be feeding the chipper.
A/C, H, M/T, U/Y/Z	MOP-UP	<ul style="list-style-type: none"> Conduct thorough briefings for all personnel (inside the rear cover of IRPG). Use all required PPE for the tasks you are going undertaking. Maintain proper spacing and overhead clearance. Be alert for danger trees, stump holes, ash pits, and rolling debris. Evaluate unburned islands and increase situational awareness.
ALL	HYDRATION & HEAT RELATED ILLNESS	<ul style="list-style-type: none"> Pre-hydrate, Re-hydrate! Dehydration is preventable.....Drink a minimum of 250ml/hour; (¼ of canteen) Drink water & Electrolyte drinks before, during, and after shifts. (2 waters to 1 sports drink). Do NOT mix with water or dilute electrolyte drink. It must be consumed as is for the body to absorb properly. Ensure your crews take an adequate water/electrolyte supply out to assignment and order more as needed. HEAT RELATED EMERGENCY Cool patient as quickly as possible! <ul style="list-style-type: none"> Move patient to a cooler location and provide cold water and sports drink. Actively reduce core temperature through evaporation by fanning patient. Cover head and neck with wet cloth, increase air movement. Heat exhaustion is characterized by: Weakness, Extreme Fatigue, Nausea, Dizziness, Headaches, clammy skin, persistent muscle cramps, decreased urine output. Remove Patient from fireline and seek medical attention.
ALL	AIR OPERATIONS	<ul style="list-style-type: none"> Ensure resources are clear of "Target Area" during bucket or retardant use. Use air-to-ground frequency to communicate with aircraft. Use clear, concise statements when directing aircraft. Use clock directions from pilot's perspective and mirror flashes. Consider risk vs gain Ensure use of trained personnel when involved with longline operations. Keep non-essential personnel away from dip sites (natural and/or man-made)
INCIDENT NAME: GAP ICS 215a		DATE PREPARED: September 13, 2016 OPERATIONAL PERIOD Day Shift 09/14/16 0600-1800 Prepared by: James Courtright ,SOF2(t), Michele Tanzi, SOF2, Jeff Bamhart, SOF2 TIME PREPARED: 1930

ASH PIT HAZARDS

Miscellaneous Fireline Hazards

Ash pits are an inherent and hidden risk to wildland firefighters that can cause severe burns and injuries. Ash pits are created when a ground fire consumes underground fuels creating an empty space that is imperceptible from the surface.

- ◆ Environmental factors that increase the risk of ash pit formation after a wildfire:
 - Extensive root systems of trees and shrubs.
 - Deep duff or peat, the organic layer covering mineral soil.
 - Landscapes that have once been cultivated or manipulated by heavy equipment, old dozer piles, sawmills, timber sale yards or decking areas.
 - Small rodent holes that have become filled with decadent combustible debris, beaver holes near dams and stream beds, badger and coyote dens.
 - White ash is sometimes an indicator of ash pits as are swarms of hovering insects.
 - With the sun behind the suspected ash pit, look for small nearly translucent smokes that dissipate quickly above the ground.
 - Ash pits often give off the smell of incomplete combustion or of creosote burning.

- ◆ Mitigation measures to consider:
 - Identification of high risk landscape.
 - Identify and flag all hazardous discovered ash pits.

TRAINING SPECIALIST MESSAGE

All Trainees:

If as much work as possible has been completed in the position task book, trainees may close their assignment with the Training Specialist prior to the demob process.

BEAT THE RUSH !

Bring the following to the exit interview

- *A completed and signed Performance Evaluation*
 - *Your Task Book, filled in by your trainer*

Forms are available at the Training desk

Training is located in trailer row at the ICP

Dominic Panno / Heather Grove
Training Specialist
