INPUTS

WEATHER SUMMARY: ***See attached Fire Weather Forecast***

Discussion: A deep marine layer will bring high humidity values overnight with readings generally above 80%.

Weather: Partly cloudy. Areas of smoke. Inversions developing by 2200.

Min Temp: 45 - 50° in the valleys; 43 - 50° on the ridges

Max RH: 85 - 95% in the valleys; 75 - 90% on the ridges

Winds (20 foot):

Ridges: Northwest to north 4 – 7 mph with gusts to 10 mph.

FIRE BEHAVIOR

GENERAL

Seasonal temperatures and above average relative humidity, along with light winds, will reduce chances for extreme fire behavior this evening and through the night.

Energy Release Components are at very high levels for this time of year. September 5 ERC was 74.

SPECIFIC FIRE BEHAVIOR

Expect the fire behavior to be moderate late afternoon into the evening. Fire behavior will diminish after dark with backing and flanking spread, occasional torching, and short-range spotting.

Timber fuel types: potential worst-case surface fire spread will be 5-10 chains/hour with flame length 4 to 6 feet. Torching trees and short duration crown runs are possible, with maximum spotting distance to 2/10 of a mile which can increase spread distances significantly. Probability of ignition will be 50-60% early in the shift.

Brush areas: potential worst-case surface fire spread will be 20-30 chains/hour with flame length 4 to 8 feet. Occasional short duration crown runs should be expected with maximum spotting to 2/10 mile which could increase total spread distance significantly. Probability of ignition 50-60% early in the shift..

Overnight fire behavior (both Timber and Brush) will become backing, flanking, with occasional torching with spread rates less than 5 chains/hour and flame length to 4 feet. Spotting distance less than 1/10 mile, probability of ignition 20-30%.

The primary area of concern is the northwestern fire perimeter (Division H).

AIR OPERATIONS

Air operations may be limited due to poor visibility caused by smoke, especially on the south side of the fire.

Sunset: 19:37

Sunrise: 06:45

SAFETY

Fire behavior tonight should minimal but there is still a potential for torching and upslope runs early in the evening in the northerly portion of the fire (Division H). Ensure lookouts are posted to monitor fire behavior.
