<b>INCIDENT OBJECTIVES</b>	Incident Name <b>Salmon August Complex</b>	Date <b>09/05/2017</b>	Time <b>2100</b>
----------------------------	---	---------------------------	---------------------

Operational Period  
**Wednesday 09/06/2017 0700 to Thursday 09/07/2017 0700**

General Control Objectives for the Incident (include alternatives)

**LEADERS INTENT:**

The highest priority will be focused on minimizing risk to firefighters and the public, by continually using the risk management process. It is the expectation that every person assigned in any type of leadership role does a risk assessment and provides the appropriate mitigation measures prior to engaging in any activity.

**INCIDENT OBJECTIVES:**

- Adopt decisions and actions that thoughtfully consider firefighter and public safety especially with respect to communications, driving, aviation and mop-up.
- Maintain full integration under unified command ensuring stakeholder concerns are addressed for the complex.
- Coordinate closely with local resources to protect residences and timberlands from potential threat.
- Minimize suppression impacts to the wilderness characteristics of the Klamath National Forest through the use of natural barriers, trails, and existing fire scars.
- Utilize resources to maximize efficiency and minimize cost expenditures.

# FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 18	<b>OPERATIONAL PERIOD:</b> September 06, 2017
<b>FIRE NAME:</b> Salmon August Complex Fire	Wednesday
<b>DATE ISSUED:</b> 9/05/17 2200hrs	
<b>UNIT:</b> CA-KNF-006081	<b>SIGNED:</b> 
	<b>Typed/printed:</b> SITL, K. VanWig

## INPUTS

**WEATHER SUMMARY:** Red Flag Warning in effect through 2200 hours Thursday for abundant lightning and dry fuels.

Mostly cloudy. Chance of showers and thunderstorms. Areas of smoke.

**Max temperature.....**85-90 valleys and 70-75 ridges.

**Min humidity.....**25-35 percent valleys and 35-45 percent ridges.

**20-foot winds.....**

**Day:** Variable 3 to 6 becoming 6 to 10 in the afternoon.

**Evening:** Southwest 4 to 8 becoming variable >6 overnight.

LAL:3 Haines: 3 CWR: 10% ...ERC...75 PBI...70%

## OUTPUTS FIRE BEHAVIOR

### GENERAL:

The fire's main influence is heavy dead and down and steep topography. The fire is burning in pockets of fuel that hasn't seen fire in 60 years. Fuels consist of moderate to heavy stringers of mixed conifer, snowbrush, white thorn and Manzanita. Brush LFMFC at 120%. Conifer 160%. Many large rock scree areas exist. The fire has been dependent upon slope and wind alignment. Group torching to short duration crown transition has developed with headfire. Spotting distance up to 1/4-1/2 mile with crown fire spotting out to 1 mile and rollout potential exists. Surface fire spread 6-12 ch/hr with headfire and around 1-3 ch/hr backing and flanking.

....Flame lengths 3ft .....FDFMC = 3-5% ..1000 hr fuels are at 7%..... PBI=70%

### SPECIFIC:

**Wallow Fire:** Fire will continue to spread and threaten PCT and Etna Summit. Fire will continue to spread Southwest down Crapo and Morehouse drainages toward Forks of Salmon, Quail Flats and Sawyer Bar Road throughout the day. Surface fire to crown transition is likely in many areas. Identify wind and slope alignment for aggressive fire spread.

**BRANCH 1:** Surface fire spread transition to crown has potential. Rollout could still challenge control lines.

**BRANCH 2:** Surface fire spread transition to crown has potential. Rollout could still challenge control lines.

**BRANCH 3:** Fire progression to Snoozers Ridge, Mule Bridge and Tanner Peak. Rollout could still challenge existing control lines.

**BRANCH 5:** Fire will continue to spread toward Forks of Salmon, Quail Flat, Sawyers Bar Road and the North Fork of the Salmon River. Creeping and Backing down slope/canyon expected. Rollout can enhance this fire movement potential when aligned with wind or slope.

**Garden / Grizzly / Mary Fire / Rush Fire:** None to Minimal fire growth is anticipated.

### AIR OPERATIONS:

Smokey conditions and thunderstorms today could limit aircraft use throughout the operational period.

## SAFETY

- **Red Flag Warning in effect through 2200 hours Thursday for abundant lightning and dry fuels.**
- Fuels will remain receptive to fire spread due to low time lag fuels moistures.
- Erratic winds possible as thunderstorms pass through the area.
- Keep situational awareness up for an increase in fire activity and shifting winds.
- STOP = Stop Think Observe Predict.

<b>6. Control Operations/Work Assignments:</b>							
<u><b>DIV V Task/Purpose</b></u>							
* Improve Sawyers Bar Road and improve and connect 40N51 to Sawyers Bar Road and utilize as primary line. Continue to prep structures from Little North Fork to DIV break west of DP70. Construct dozer line from Sawyers Bar Road to Yellow Jacket Ridge to the 40N51 Road. Improvement to road, in combination of indirect line will prevent natural fire spread to south affecting the communities of Sawyers Bar. Construction of dozer line will be utilized as fire breaks that will aid to stopping fire spread.							
<u><b>DIV V Endstate</b></u>							
* Improvements to road and to previously existing lines will aid in preventing fire spread, south into the communities of Sawyers Bar.							
<b>7. Special Instructions:</b>							
<ul style="list-style-type: none"> <li>* Protect rust resistant Sugar Pine Tree's in section 15 on Yellow Jacket Ridge.</li> <li>* <b>Water drafting:</b> utilize fish screens and avoid drafting from cold water tributary confluences from Salmon River. Utilize overhead fill stations when possible.</li> <li>* Consult a READ or ARCH prior to any ground or vegetation disturbance in order to mitigate resource damage and noxious weed transportation. Numerous cultural resources exist in this area, including vegetation associated with historic sites.</li> <li>* GPS all pump locations and provide coordinates to the Situation Unit and READ's.</li> <li>* All leaders and supervisors monitor A/G Command.</li> <li>* All dozers consult with READS before constructing lines and utilize ridges when constructing direct and indirect lines.</li> <li>* Prepare for spike camp at Forks of Salmon.</li> <li>* Avoid ground disturbance, including tree falling, in areas marked with white and orange stripped flagging.</li> </ul>

## Health & Safety Message

**Incident: Salmon August Complex      Date/Op Period: 9/6/17 Day/Night**

### Hazards & Risks

#### Rolling Material, Snags, Travel to and from the Incident:

As this incident continues some hazards remain the same such as snags, steep slopes, rolling material and travel to and from the line. **AVOID COMPLACENCY**, keep up your **SITUATIONAL AWARENESS** and **DRIVE DEFENSIVELY**. Remember drive with your **LIGHTS ON** not so you can see but so others can see you. **Slow down** going through local communities. **Watch for livestock** driving along Sawyers Bar Road near Little North Fork as livestock is migrating away from the fire area.

**Human Factor Barriers to S.A.:** Factors that can impair situational awareness and decision making include:

- Low experience level with local factors
- Distractions from primary task
- Fatigue: Both short term and cumulative
- Stress reactions
- Hazardous attitudes

Take time to do a **SELF-CHECK** to ensure you are not being influenced by one of these factors.

5. UNINFORMED ON STRATEGY, TACTICS AND HAZARDS

**Medical Emergency Plan:** REVIEW IT and know it!!

## Severe Weather Precautions

Predicted fire weather in the next few days may result in severe weather and dry or wet thunderstorms. You may think more about sudden reverses in wind direction, increases in wind speed, and sharp drops in temperature. However don't forget **lightning**! It can be part of the rain, hail and wind observed during a severe weather event. Lightning can strike miles ahead of storm clouds. If lightning is in your area, share that observation and follow the "30/30 rule" that is described below and in your IRPG on page 21.

### What Is The 30/30 Rule?

If you see lightning and hear the thunderclaps within 30 seconds of the flash, that means lightning is dangerously close to you and you should take precautions. Mitigate your personal exposure risk and act to protect facilities, equipment/computers from damage.

Do not resume work in exposed areas until after lightning activity has passed, including ICP. Usually, storms and lightning threat will pass in about ½ hour.

### Thunderstorm/Lightning precaution measures:

- Listen for weather updates and special announcements. Acknowledge them. Share the information. If threatened, take shelter in a vehicle or building if possible.
- If outdoors, find a low spot away from tall trees, metal fences, utility lines and other elevated conductive objects (be mindful of flash flooding).
- If in a uniform wooded area, move to an area with shorter trees.
- Keep your distance from isolated trees, antennae's and towers (stay twice their height away).
- Stay away from ridge tops, open areas, water, ledges or rock screes.
- If in open country, crouch low to minimize your contact with the ground; If you feel your skin tingle or your hair stand up immediately crouch low to the ground with feet together. You can sit on your pack. Never lay flat on the ground.
- Don't group together, stay separated.
- Don't operate land line telephones, computers, machinery or electric motors.
- Don't handle flammable materials in open containers or metal hand tools.

Plan for severe weather – React to protect yourself and incident resources – Return to work

## INCIDENT SAFETY ANALYSIS 215a

Salmon August Complex - Wednesday , September 6, 2017

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
Kidder V/Y	Structure Protection & HAZMAT	Review "Wildland Urban Interface" Watch outs in the IRPG. Use "Structure Assessment" checklist in your IRPG. Follow "HAZMAT Incident Operations" in the IRPG.
ALL	Extreme Fire Behavior	Share weather observations with all personnel assigned to division. Establish "Trigger Points" to withdraw. Use "Risk Management" process prior to engaging in suppression actions found in the IRPG.
ALL	Hazard Trees	Follow "Hazard Tree Safety" guidelines in the IRPG. <b>Post lookouts, or use a spotter in mop-up areas with personnel.</b> Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
ALL	Air Operations	Follow "Aviation Watch-Out Situations" found in the IRPG. Don't plan on air resources for medical transport or resupply. Refer to IRPG for directing bucket drops. Ensure positive communication with all air resources.
ALL	Spike Camp/Coyote	Keep a clean camp. Ensure communications are in place. Review and observe "Line Spike" considerations found in the IRPG.
ALL	Indirect Fireline	Post lookouts, identify escape routes and safety zones. Review "Strategy/Indirect Attack" found in the IRPG.
ALL	Steep Terrain & Rolling Debris	Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access. Post lookouts maintain LCES.
ALL	Spot Fires	Size up prior to engagement. Watch for multiple spot fires. Ensure LCES is in place. Maintain situational awareness at all times.
ALL	Communications	Maintain communication with aviation resources, and suppression organization. Ensure all know frequency and protocol for contacting resources. Utilize the ICS 205. Utilize human repeaters when working in dead spots.
ALL	Heavy Equipment Operations	Establish communications with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. Use a spotter when backing.
ALL	Fatigue & Over Exertion	Drink 1 quart of water each hour during and after work. Rotate crews out of smoky areas. Set a reasonable work pace and allow adequate rest breaks while on the project. Stagger work crews start time to limit fatigue. Use buddy system to monitor personnel of heat related and fatigue issues. Follow work / rest guidelines.

## INCIDENT SAFETY ANALYSIS 215a

ALL	Heat Related Illness (HRI)& Dehydration	<p>Drink fluids throughout operational period (6-8 qts/shift).            Maintain water/electrolyte ratio of 3 to 1.            Carry extra water on line and cache water at drop points.            Take frequent breaks, minimum of 10 minutes every hour.            Allow out of area resources time to acclimatize before expecting peak performance.            Recognize symptoms of HEAT RELATED ILLNESS which include:</p> <ul style="list-style-type: none"> <li>o Lack of energy</li> <li>o Headaches, dizziness</li> <li>o Lack of rest</li> <li>o No hunger, poor eating habits</li> <li>o Hot skin, and lack of sweating</li> </ul>
ALL	Environmental Hazards	<p>Be alert for rattlesnakes, watch footing and hand placement around rocks.            Check yourself for ticks. Watch for biting and stinging insects.            Be alert for bears, cougars and other wildlife.            Be aware of poison oak, seek treatment at the medical trailer if exposed.</p>
ALL	Firing Operations & Devices	<p>A written guideline shall be prepared and approved for major burning operations.            Conduct thorough briefing for all personnel.            Qualified personnel for all firing operation assignments.            Utilize Risk Mgmt. Process.            Establish LCES prior to implementing burning operations.            Assign an over-all Firing Boss to coordinate ignitions when simultaneous burning operations are planned for multiple locations.</p>
	Pack Train Operations	<p>Do's, when pack mules are approaching you, move the crews preferably to the downhill side of the road.            Do's, take all tools to the same side of the road as the crews.            Don't, sneak up from behind a mule, make it known you are approaching the pack mule line.            Don't move up to quickly to the mules, mules startle easily.            Don't confront, feed or approach mules without permission from one of the mule team members.</p>
All	Chipper Operations	<p>Ensure JHA is provided and signed by operators.            Only qualified personnel will feed the chipper.            Ensure appropriate PPE is used including eye and hearing protection.</p>
All	UTV Operations	<p>Assure an ATV/UTV is the best tool for the job.            Use only Agency approved and inspected vehicle.            All personnel are in required PPE. Use restraints provided.            Check for brush debris buildup inside/outside ATV and remove if present.            Use proper tie downs (4 per load) and discuss load management to not overload vehicles.            Be sure fire extinguishers and first aid kit present. Have a way to fix a flat.</p>
All	Driving	<p>Drive slowly, watch for livestock and wildlife.            Utilize slow speeds when experiencing poor visibility due to smoky conditions.            Slow down when driving through local communities.            Watch for deteriorating road conditions.</p>
A,D,H, K,M	Mop-up & Repair	<p>Do not work above or below personnel during rehab/mop-up operations.            Alert crew personnel of rolling debris by yelling to affected individuals.            Position debris that could roll vertically on slope.  <u>Wear eye protection.</u></p>
All	Thunderstorms and Lightning activity	<p>Take shelter in a vehicle.            Move to an area with shorter trees.            Don't stay on ridgetops.            Don't group together. Review Thunderstorms Safety in the IRPG.</p>

## RESOURCE ADVISOR MESSAGE

### PLEASE WATCH OUT FOR:

[https://en.wikipedia.org/wiki/Picea\\_breweriana](https://en.wikipedia.org/wiki/Picea_breweriana)

**Brewers spruce:** Also called weeping spruce, it most closely resembles a very droopy Douglas-fir. This species only occurs in the Klamath-Siskiyou Mountains, between the Trinity and Kalmiopsis wildernesses. It grows in rocky high-elevation sites, typically above 4000' elevation. It is easily killed by fire or excess mechanical damage. Please do not cut down. Limbing of lower branches is acceptable, if necessary.

**Invasive plants:** Species in the area include yellow star thistle, marlahand mustard (dyers woad), spotted knapweed and Scotch Broom. Weedy plants introduced from other countries and continents can take over and change our native ecosystems (think blackberry on the west coast, cheat grass on the east side). Invasive plants will be flagged with orange flagging with "INVASIVE SPECIES" written in black. If you're working around these species, please clean off your clothing and equipment afterward.

### HUMAN WASTE MANAGEMENT ON BACKCOUNTRY DIVISIONS

#### DO's

**On the line** – Find an area at least 50' away from trails and 200' from streams and lakes and dig a hole, known as a cat hole, about 6" deep. Do your business and bury the evidence.

**Spike camps** – Utilize latrines to manage human waste. Dig a trench 18"-24" deep, about a shovel blade wide, and as long as you think you will need. Start at one end and "work" your way to the other. Use minimal dirt to cover your poo so that it lasts as long as possible. You can't make a latrine bigger after it's used, so plan ahead!

**Recommendations for latrines** - Keep a "bathroom key" in plain view, so that others know when it is occupied. Use a piece of pink flagging tied across the access and put it up when you go in. Flag your route to the latrine so you don't spend time looking when you need to go. Keep a couple rolls of TP and hand sanitizer near the latrine. A small tin can or similar is nice to have to scoop a little dirt when you're done. Keep any rocks you excavate during construction and place them on top when you finally backfill your latrine when it is full or your camp or crew moves on. If you are really fancy, take some logs and set up a sitting log or two for comfort.

#### DON'T's!!!

**Don't go number 2 on the surface of the ground. Seriously, It is unsanitary and unprofessional.**

Don't use cat holes around spike camps or other areas that will be impacted for a long time or by a lot of people. You will run out of room at some point, and you won't have a system for letting others know when you have to go.

Don't bury trash or anything other than TP along with your waste.

**Keep it professional and keep our wilderness clean.**

**Thank you!**

## HR Message of the Day

**STAY SAFE AND HAVE A GREAT SHIFT.**

**HRSP SHAWN HOLDEN, HRSP(t) MARK WEISS**

## Training Specialist Message

**Unclear expectations lead to inefficient processes and subpar performance.**

**As a trainee do not be afraid to ask your trainer for clarification.**

Scan the QR code to check in or come by and see TNSP Greg White or Teresa Beuerman (t) for a hard copy ...

**DON'T FORGET ... Prior to DEMOB all trainees MUST close out with the training specialist with a completed individual performance rating (ICS 225) and your task book in hand.**
