INCIDENT OBJECTIVES	Incident Name Salmon August Complex	Date 9/11/2017	Time 2100
----------------------------	---	--------------------------	---------------------

Operational Period
Tuesday 9/12/2017 0700 to Wednesday 9/13/2017 0700

General Control Objectives for the Incident (include alternatives)

LEADERS INTENT:

The highest priority will be focused on minimizing risk to firefighters and the public, by continually using the risk management process. It is the expectation that every person assigned in any type of leadership role does a risk assessment and provides the appropriate mitigation measures prior to engaging in any activity.

INCIDENT OBJECTIVES:

- Adopt decisions and actions that thoughtfully consider firefighter and public safety especially with respect to communications, driving, aviation and mop-up.
- Maintain full integration under unified command ensuring stakeholder concerns are addressed for the complex.
- Coordinate closely with local resources to protect residences and timberlands from potential threat.
- Minimize suppression impacts to the wilderness characteristics of the Klamath National Forest through the use of natural barriers, trails, and existing fire scars.
- Utilize resources to maximize efficiency and minimize cost expenditures.

Weather Forecast for Period

Android

QR Codes to Fire Weather Calculator App
(for recording and Sharing weather observations)

- Fill out all fields, tap calculate, then send/share observation
- Please email kml and csv to salmonaugustweather@gmail.com
- No signal? The app stores the URL and queues it for transmission when you get a signal

iPhone

Notation: In addition to the fire area included in this incident action plan, the following fires are included in the Salmon August Complex:

- Garden 100% contained, patrol status
- Grizzly 100% contained, patrol status
- Rush 100% contained, patrol status
- Mary 100% contained, patrol status
- Fourth 100% contained, patrol status
- Clair 100% contained, patrol status

Fire Weather Forecast

FORECAST NO: 25

NAME OF FIRE: Salmon August Complex

PREDICTION FOR: 0700 Tue - 0700 Wed

UNIT: CA-KNF

SHIFT DATE: 9/12

SIGNED: *Matt Mehle*

TIME AND DATE

Incident Meteorologist- Matt Mehle

FORECAST ISSUED: 1900 9/11/17

*****Red Flag Warning 1 PM to 8 PM - Abundant Lightning*****

WEATHER DISCUSSION: Sub tropical moisture will stream over the complex today with increasing instability. As a result, thunderstorms are mostly likely during the afternoon. A Red Flag Warning is in effect for dry lightning potential. Developed storms will be capable of dry lightning, gusty winds and brief heavy rain. Temperatures and humidities will moderate today as well with increased cloud cover. Any thunderstorm activity will diminish in the evening.

WEATHER FORECAST FOR TUESDAY:

WEATHER: Partly sunny. Chance for thunderstorms in the afternoon.

TEMPERATURES: Max Lower Elevations....85-90; ridges....76-82F. **24 HR Trend** Down 3-5

HUMIDITY: Min Lower Elevation....20-30%; ridges....25-35%. **24 HR Trend** Little Change

20-FOOT WIND:

SLOPE/VALLEY - Downslope/Downcanyon less than 4 mph in the morning becoming Upcanyon / Upslope 3 to 5 mph gusts to 8 mph.

RIDGETOP- Variable less than 5 mph in the morning becoming North to Northwest 5 to 10 mph in the afternoon. Gusts 15 mph in the afternoon.

HAINES: 3

LAL: 2 in the AM 3 in the PM

Wetting Rain: 10-15%

WEATHER FORECAST FOR TUESDAY NIGHT:

WEATHER: Partly cloudy. Slight chance for thunderstorms in the evening.

TEMPERATURES: Min Lower slopes/valleys 53-57F. Ridges...55-60F **24 HR Trend:** Little change

HUMIDITY: Max Lower slopes...80-90%; Ridges...55-70%. **24 HR Trend:** Up 5%

20-FOOT WIND:

SLOPE/VALLEY - Upslope 2-5 with gusts to 7 mph in the evening...becoming downcanyon/downslope 2 to 5 mph after 2100.

RIDGETOP - Northwest in the evening 5 to 10 mph becoming east to northeast 3 to 6 mph overnight. Gusts up to 15 mph in the evening.

LAL: 2 in the evening becoming 1 overnight.

Wetting Rain: <10%

EXTENDED FORECAST:

WEDNESDAY... Partly cloudy. Max temps...70s and 80s. Min RH 25-40%. Northwest 5 to 15 mph. Strongest over ridges and upper slopes.

REALTIME RAWS INFO for SALMON AUGUST COMPLEX

WEATHER SAFETY MESSAGE:

Moisture returning with dry for thunderstorms.

KNF 95 - Div AA
Quartz Hill - Div AA

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 24	OPERATIONAL PERIOD: September 12, 2017
FIRE NAME: Salmon August Complex Fire	Tuesday
DATE ISSUED: 9/11/17 2200hrs	
UNIT: CA-KNF-006081	SIGNED: <i>K. VanWig</i>
	Typed/printed: SITL, K. VanWig

INPUTS

WEATHER SUMMARY: RED FLAG WARNING IN EFFECT FROM 1300 TO 2000 HOURS FOR ABUNDANT LIGHTNING AND DRY FUELS.

Partly cloudy with chance of thunderstorms.

Max temperature.....85° - 95° valleys, 76° - 82° ridges.

Min humidity.....20-30 % valleys, 25-35% upper ridges.

20-foot winds.....

Slope/Valley...Downslope <4 becoming Upslope 3-5 gusts 8 in the afternoon.

Ridge tops.....Variable becoming North/Northwest 5-10 in the afternoon.

LAL:3 Haines: 3 CWR: 10%, ERC=72 PBI=80% by the afternoon.

OUTPUTS FIRE BEHAVIOR

GENERAL:

The fires main influence is heavy dead and down and steep topography. The fire has burned in pockets of fuel that haven't seen fire in 60 years but is moving into more recent burn scars. Fuels consist of moderate to heavy stringers of mixed conifer, snowbrush, white thorn and Manzanita. Brush LPMC at 120%. Conifer 160%. Many large rock scree areas exist. The fire has been dependent upon slope and wind alignment. Group torching to short duration crown transition has developed with headfire. Spotting distance up to 1/4-1/2 mile with crown fire spotting out to 1 mile. Rollout potential exists. Surface fire spread 6-12 ch/hr with headfire and around 1-3 ch/hr backing and flanking.

Flame lengths 1-3ft, FDFMC=15-20% in the AM, 3-6% by late afternoon, 1000 hr fuels are at 7-9%

SPECIFIC:

Wallow Fire: Limited fire spread potential throughout the day. Potential for erratic winds due to downdrafts from passing thunderstorms. Fire spread will be limited to the Northeast down Patterson Creek drainage. Continued fire spread potential Southwest down Crapo and Morehouse drainages toward Forks of Salmon and Sawyer Bar Road. Surface fire to crown transition is possible in areas exposed to the wind. Identify wind and slope alignment for increased fire spread.

BRANCH 1: Surface fire spread. Rollout could still challenge control lines.

BRANCH 2: Erratic winds could cause the fire to challenge existing control lines as fuels dry out throughout the day. Surface fire spread transition to crown potential when aligned with wind/slope. Rollout could still challenge existing control lines.

BRANCH 3: Winds could challenge control lines at Snoozers Ridge and Etna Mill Creek. Fuels will dry out throughout the day to support fire activity within control lines. Rollout could still challenge existing control lines.

BRANCH 5: Fire could continue spread toward Tanner Peak, Little North Fork, Forks of Salmon, Sawyers Bar Road. Creeping and Backing down slope/canyon expected. Rollout can enhance this fire movement potential when aligned with wind or slope.

Deep Fire (DIV AA): Erratic winds could challenge control lines. Surface fire spread transition to crown possible as sun exposure dries fuels throughout the day.

Garden / Grizzly / Mary / Rush / Clair / Fourth: None to Minimal fire growth is anticipated.

AIR OPERATIONS:

Chance of thunderstorms and abundant lightning throughout the day could affect air resources.

SAFETY

- Red Flag Warning in effect from 1300 to 2000 hours for Abundant Lightning and Dry Fuels.
- Fuels will remain receptive to fire spread due to low 100 hour and 1000 hour time lag fuel moistures.
- Keep situational awareness up for an increase in fire activity as fine dead fuel moistures drop.
- STOP = Stop Think Observe Predict.

6. Control Operations/Work Assignments:						
<u>DIV M Task/Purpose</u>						
* Continue to improve existing dozer lines from Whiskey Butte north on the ridge into Sec 12 towards DP12. Go direct on spot fires when conditions allow.						
<u>DIV M Endstate</u>						
* To prevent fire spread to the east affecting the communities in and around Etna.						
7. Special Instructions:						
* Any prep on Pacific Crest Trail - see PCT guidelines.						
* ALL TRASH NEEDS TO BE REMOVED DAILY BY ALL RESOURCES. PACK IT IN, PACK IT OUT.						
* Be cognizant of archeological, heritage, and cultural sites. If found, leave undisturbed, flag, and notify the DIVS and READ.						
* GPS all pump locations and provide coordinates to the Situation Unit and READs.						
* All leaders and supervisors monitor A/G Command.						
* All dozers consult with READs before constructing lines and utilize ridges when constructing lines.						
* Maintain flexibility to support IA responsibilities, operations will make the determination of availability based on requests and current situation.

6. Control Operations/Work Assignments:						
DIV T Task/Purpose						
* Construct direct dozer line north east from Sawyers Bar Road up Jackass Ridge to Tanners Peak, continue east to Robinson Gulch. Prep from 40N41 Road to 40N51 Junction northeast to previous handline in northwest corner of Sec 7.						
* Re-establish previous handlines from 40N41 connecting to 40N42, continue to construct handline to Sec 9 continuing along fires edge to wilderness boundary in Sec 34 to DP2. Prep 40N47 Road from DP2 to DIV T / DIV S break.						
* Utilize direct lines with road prep to prevent natural fire spread south to Sawyers Bar Road to previously constructed primary handlines.						
DIV T Endstate						
* Construction of direct handline and dozer line will be utilized to prevent natural fire spread south of fire and north of Sawyers Bar Communities.						
7. Special Instructions:						
* ALL TRASH NEEDS TO BE REMOVED DAILY BY ALL RESOURCES. PACK IT IN, PACK IT OUT.						
* Be cognizant of archeological, heritage, and cultural sites; including vegetation associated with historic sites. If found, leave undisturbed, flag, and notify the DIVS and READ.						
* Water drafting: utilize fish screens and avoid drafting from cold water tributary confluences from Salmon River. Utilize overhead fill stations when possible.						
* Water tenders fill at DP 41 using the 12 hour high volume pump.						
* Consult a READ or ARCH prior to any ground or vegetation disturbance in order to mitigate resource damage and noxious weed transportation.						
* GPS all pump locations and provide coordinates to the Situation Unit and READs.						
* All leaders and supervisors monitor A/G Command.						
* All dozers consult with READs before constructing lines and utilize ridges when constructing direct lines.						
* Avoid ground disturbance, including tree falling, in areas marked with white and orange stripped flagging.						
* Maintain flexibility to support IA responsibilities, operations will make the determination of availability based on requests and current situation.

6. Control Operations/Work Assignments:						
<p><u>DIV V / Y Task/Purpose</u></p> <p>* Improve Sawyers Bar Road and improve and connect 40N51 to Sawyers Bar Road and utilize as primary line. Continue to prep structures from Little North Fork to DIV break west of DP70. Construct dozer line from Sawyers Bar Road to Yellow Jacket Ridge to the 40N51 Road. Improvement to road, in combination with direct line will prevent natural fire spread to south affecting the communities of Sawyers Bar. Construction of dozer line will be utilized as fire breaks that will aid in stopping fire spread.</p> <p>* Continue structure prep along Sawyers Bar Road including the town of Forks of Salmon. Scout road and connect DP70 road to 40N51 northwest toward DP75 to the 2B01 road for community defense. Continue to prep DP75 to DP70 on Sawyers Bar Road as primary line to keep fire northeast of South Fork Road.</p> <p><u>DIV V / Y End State</u></p> <p>* Improvements to road and to previously existing lines will aid in preventing fire spread, south into the communities of Sawyers Bar.</p> <p>* Direct lines will aid in preventing continued fire spread west, affecting the community of Forks of Salmon.</p>						
7. Special Instructions:						
<p>* Protect rust resistant Sugar Pine Tree's in section 15 on Yellow Jacket Ridge.</p> <p>* Water drafting: utilize fish screens and avoid drafting from cold water tributary confluences from Salmon River. Utilize overhead fill stations when possible.</p> <p>* Consult a READ or ARCH prior to any ground or vegetation disturbance in order to mitigate resource damage and noxious weed transportation. Numerous cultural resources exist in this area, including vegetation associated with historic sites.</p> <p>* GPS all pump locations and provide coordinates to the Situation Unit and READs.</p> <p>* All leaders and supervisors monitor A/G Command.</p> <p>* All dozers consult with READs before constructing lines and utilize ridges when constructing direct lines.</p> <p>* Avoid ground disturbance, including tree falling, in areas marked with white and orange stripped flagging.</p> <p>* Maintain flexibility to support IA responsibilities, operations will make the determination of availability based on requests and current situation.</p>

HEALTH AND SAFETY MESSAGE

SAFETY starts with ***YOU***

We are **ALL** accountable for **SAFE** behavior

INCIDENT: Salmon August Complex

DATE: 9-12-2017 Thru 9-13-2017

TIME: 07:00-07:00

Major Hazards and Risks: Vehicle Operations. Drive with headlights on and obey speed limits. Steep terrain and Snags. Be aware of fatigue and dehydration. Watch for wildlife and livestock on roadways.

Fire Order of the Day – Be alert. Keep calm. Think clearly. Act decisively.

Narrative:

Steep terrain, Snags and rolling material pose a great threat to firefighters. Go slow and stay aware of your surroundings. Drink plenty of water! Remember if you feel thirsty it is too late your already dehydrated. While driving to and from the incident keep to the right and watch speeds. Review the Medical Plan. Be alert for any changes in weather and fire behavior adjusting your tactics and strategy accordingly.

Watch Out Situation of the Day

4. UNFAMILIAR WITH WEATHER AND LOCAL FACTORS INFLUENCING FIRE BEHAVIOR

- **Maintain Situational Awareness**
- **Communicate any weather changes**
- **Monitor your crew**
- **Utilize good communication skills**

L. Lookouts C. Communications E. Escape Routes S. Safety Zones

Incident Safety Officer: James Aragon

Severe Weather Precautions

Predicted fire weather in the next few days may result in severe weather and dry or wet thunderstorms. You may think more about sudden reverses in wind direction, increases in wind speed, and sharp drops in temperature. However don't forget **lightning!** It can be part of the rain, hail and wind observed during a severe weather event. Lightning can strike miles ahead of storm clouds. If lightning is in your area, share that observation and follow the "30/30 rule" that is described below and in your IRPG on page 21.

What Is The 30/30 Rule?

If you see lightning and hear the thunderclaps within 30 seconds of the flash, that means lightning is dangerously close to you and you should take precautions. Mitigate your personal exposure risk and act to protect facilities, equipment/computers from damage.

Do not resume work in exposed areas until after lightning activity has passed, including ICP. Usually, storms and lightning threat will pass in about ½ hour.

Thunderstorm/Lightning precaution measures:

- Listen for weather updates and special announcements. Acknowledge them. Share the information. If threatened, take shelter in a vehicle or building if possible.
- If outdoors, find a low spot away from tall trees, metal fences, utility lines and other elevated conductive objects (be mindful of flash flooding).
- If in a uniform wooded area, move to an area with shorter trees.
- Keep your distance from isolated trees, antennae's and towers (stay twice their height away).
- Stay away from ridge tops, open areas, water, ledges or rock screes.
- If in open country, crouch low to minimize your contact with the ground;
If you feel your skin tingle or your hair stand up immediately crouch low to the ground with feet together. You can sit on your pack. Never lay flat on the ground.
- Don't group together, stay separated.
- Don't operate land line telephones, computers, machinery or electric motors.
- Don't handle flammable materials in open containers or metal hand tools.

Plan for severe weather – React to protect yourself and incident resources – Return to work

INCIDENT SAFETY ANALYSIS 215a

Salmon August Complex - Tuesday, September 12, 2017

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
M,T,V,Y	Structure Protection & HAZMAT	Review "Wildland Urban Interface" Watch outs in the IRPG. Use "Structure Assessment" checklist in your IRPG. Follow "HAZMAT Incident Operations" in the IRPG.
ALL	Extreme Fire Behavior	Share weather observations with all personnel assigned to division. Establish "Trigger Points" to withdraw. Use "Risk Management" process prior to engaging in suppression actions found in the IRPG.
ALL	Hazard Trees	Follow "Hazard Tree Safety" guidelines in the IRPG. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
ALL	Air Operations	Follow "Aviation Watch-Out Situations" found in the IRPG. Don't plan on air resources for medical transport or resupply. Refer to IRPG for directing bucket drops. Ensure positive communication with all air resources.
AA, A/D	Spike Camp/Coyote	Keep a clean camp. Ensure communications are in place. Review and observe "Line Spike" considerations found in the IRPG.
ALL	Indirect Fireline	Post lookouts, identify escape routes and safety zones. Review "Strategy/Indirect Attack" found in the IRPG.
ALL	Steep Terrain & Rolling Debris	Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access. Post lookouts maintain LCES.
ALL	Spot Fires	Size up prior to engagement. Watch for multiple spot fires. Ensure LCES is in place. Maintain situational awareness at all times.
ALL	Communications	Maintain communication with aviation resources, and suppression organization. Ensure all know frequency and protocol for contacting resources. Utilize the ICS 205. Utilize human repeaters when working in dead spots.
ALL	Heavy Equipment Operations	Establish communications with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. Use a spotter when backing. Avoid working below heavy equipment.
ALL	Fatigue & Over Exertion	Drink 1 quart of water each hour during and after work. Rotate crews out of smoky areas. Set a reasonable work pace and allow adequate rest breaks while on the project. Stagger work crews start time to limit fatigue. Use buddy system to monitor personnel of heat related and fatigue issues. Follow work / rest guidelines.

INCIDENT SAFETY ANALYSIS 215a

ALL	Heat Related Illness (HRI)& Dehydration	<p>Drink fluids throughout operational period (6-8 qts/shift). Maintain water/electrolyte ratio of 3 to 1. Carry extra water on line and cache water at drop points. Take frequent breaks, minimum of 10 minutes every hour. Allow out of area resources time to acclimatize before expecting peak performance. Recognize symptoms of HEAT RELATED ILLNESS which include:</p> <ul style="list-style-type: none"> o Lack of energy o Headaches, dizziness o Lack of rest o No hunger, poor eating habits o Hot skin, and lack of sweating
ALL	Environmental Hazards	<p>Be alert for rattlesnakes, watch footing and hand placement around rocks. Check yourself for ticks. Watch for biting and stinging insects. Be alert for bears, cougars and other wildlife. Be aware of poison oak, seek treatment at the medical trailer if exposed.</p>
ALL	Firing Operations & Devices	<p>A written guideline shall be prepared and approved for major burning operations. Conduct thorough briefing for all personnel. Qualified personnel for all firing operation assignments. Utilize Risk Mgmt. Process. Establish LCES prior to implementing burning operations. Assign an over-all Firing Boss to coordinate ignitions when simultaneous burning operations are planned for multiple locations.</p>
A,D	Pack Train Operations	<p>Do's, when pack mules are approaching you, move the crews preferably to the downhill side of the road. Do's, take all tools to the same side of the road as the crews. Don't, sneak up from behind a mule, make it known you are approaching the pack mule line. Don't move up to quickly to the mules, mules startle easily. Don't confront, feed or approach mules without permission from one of the mule team members</p>
All	Chipper Operations	<p>Ensure JHA is provided and signed by operators. Only qualified personnel will feed the chipper. Ensure appropriate PPE is used including eye and hearing protection.</p>
All	UTV Operations	<p>Assure an ATV/UTV is the best tool for the job. Use only Agency approved and inspected vehicle All personnel are in required PPE. Use restraints provided. Check for brush debris buildup inside/outside ATV and remove if present. Use proper tie downs (4 per load) and discuss load management to not overload vehicles. Be sure fire extinguishers and first aid kit present. Have a way to fix a flat.</p>
All	Driving	<p>Drive slowly, watch for livestock and wildlife. Utilize slow speeds when experiencing poor visibility due to smoky conditions. Slow down when driving through local communities. Watch for deteriorating road conditions.</p>
A,D,H, K,M	Mop-up & Repair	<p>Do not work above or below personnel during rehab/mop-up operations. Alert crew personnel of rolling debris by yelling to affected individuals. Position debris that could roll vertically on slope. Wear eye protection.</p>
All	Thunderstorms and Lightning activity	<p>Take shelter in a vehicle. Move to an area with shorter trees. Don't stay on ridgetops. Don't group together. Review Thunderstorms Safety in the IRPG.</p>

8. MEDICAL EMERGENCY PROCEDURES

- 9-LINE Medical Incident Report (pages 108-109 of the IRPG)**
- Advise Division on Tac. Division contact **Salmon Communications on Command**. If unable to reach Division go direct to **Salmon Communications on Command**.
 - If life threatening, request frequency be cleared for emergency traffic
 - Incident Status:
 - Nature of injury/illness?
 - Identify on-scene IC/Point of Contact
 - Identify on-scene care provider, request one if needed
 - Initial patient assessment
 - Refer to Injury Reporting Worksheet
 - Determine severity and transport priority
 - Develop transport plan
 - Air/Ground, Need for hoist
 - Determine need for additional resources
 - Confirm Communications
 - Evacuation Location:
 - GPS (WGS84) or landmarks
 - ETA to Evacuation Location
 - Contingency Plan
- In Camp Emergency: FRONTLINE MEDICAL TRAILER or Contact Salmon Communications on Command**

INJURY REPORTING PROCEDURES

NATURE OF INJURY _____

LOCATION OF PATIENT _____

TRANSPORTATION REQUESTED BY: AIR ___ GROUND ___

POINT OF PICKUP _____

LAT _____ LONG _____

PATIENT UNIT ID _____

REMINDER: DO NOT GIVE PT NAME OVER RADIO

IS A EMT WITH PATIENT: YES ___ NO ___

AGE _____

SEX: MALE ___ FEMALE ___

ALL EMERGENCIES---Secure the area and identify witnesses for later investigation. Keep an accurate log of events.

ICS 206 8-78	9. PREPARED BY (MEDICAL UNIT LEADER) Nicolas Y. Stepanian MEDL (t)	10. REVIEWED BY (SAFETY OFFICER) James Aragon/Paul Tompkins SOF2

Don't Forget Where You Came From!

As we promote in our careers, we tend to wear many hats. Those "hats" give you more responsibility and authority. However, as you're switching from hat to hat, never forget that you once wore that same hat that someone else is wearing now therefore, don't ever think that you are in too high of a position to help guide, mentor, or train those below you. You never know what may happen in your career path, you may one day have to wear one of those previous worn hats.

Shawn Holden HRSP 9/12/17

Training Specialist Message

"Let's not panic till we know whether it's coming in or going out,"

DON'T FORGET! Prior to DEMOB all trainees **MUST** close out with the training specialist with a completed individual performance rating (ICS 225) and your task book in hand.

CAL FIRE

FINANCE/LOGISTICS MESSAGE

- TIME UNIT AND COMP/CLAIMS UNIT ARE LOCATED HERE AT BASE CAMP ON THE WEST END OF TRAILER ROW. CAL FIRE RESOURCES AS WELL AS ANY HIRED EQUIPMENT ON AN 10,000 SERIES NUMBER CHECK IN WITH TIME IF YOU HAVEN'T TURNED IN ANY DOCUMENTS. ANY CLAIMS ISSUES WILL NEED DOCUMENTATION ON AN ICS-213 AS WELL AS PICTURES.
- ACCOMODATIONS IS LOCATED AT YREKA HQ TRAINING ROOM, 1809 FAIRLANE ROAD, YREKA, CA 96097.
- ALL GOLF STRIKE TEAMS WILL CONTINUE TO FEED AT DEADWOOD CAMP AS WELL AS SACK LUNCH NEEDS. ALL CHARLIE AND LIMA STRIKE TEAMS, AS WELL AS OVERHEAD, WILL CONTINUE TO FEED AT BASE CAMP AS WELL AS SACK LUNCH NEEDS.
- **ALL CAL FIRE RESOURCES ON 24 HOURS OFF SHIFT WILL FEED FOR BREAKFAST AT BASE CAMP, TAKE SACK LUNCHES TO ACCOMODATIONS AND OFF-SITE FEEDING IS AVAILABLE FOR DINNER. FOR 9-12-2017, DINNER WILL BE PROVIDED AT BLACK BEAR & STRINGS. FOR 9-13-2017, DINNER WILL BE PROVIDED AT STRINGS & BRAND N IRON.**
- ALL SUPPLIES FOR GOLF STRIKE TEAMS WILL BE TAKEN CARE OF THROUGH THE YREKA HEADQUARTERS SERVICE CENTER. PLEASE SEE LAST BULLET POINT OF THIS PAGE REGARDING CHAIN SAW PARTS & SUPPLIES.
- ANY E# OR O# WITH A REQUEST NUMBER LESS THAN 9999 WILL RESUPPLY AT ETNA BASE CAMP. IF THAT RESOURCE NEEDS CAL FIRE SPECIFIC SUPPLY ITEMS I.E. YELLOW NOMEX, GLOVES, GOGGLES, ETC., WILL GO TO SUPPLY AT ETNA BASE CAMP WITH THEIR ICS-213. SUPPLY WILL UTF THE CAL FIRE SPECIFIC ITEMS AND ISSUE A FEDERAL S# IN THE 29000 SERIES. ALL ICS-213 FORMS WILL INDICATE "FEDERAL MISSION" OR "CAL FIRE MISSION".
- ANY E# OR O# GREATER THAN 10000 WILL RESUPPLY AT ETNA BASE CAMP. IF THAT RESOURCE THAT NEEDS CAL FIRE SPECIFIC SUPPLY ITEMS I.E. YELLOW NOMEX, GLOVES, GOGGLES, ETC., WILL GO TO SUPPLY AT ETNA BASE CAMP WITH THEIR ICS-213. SUPPLY WILL UTF THE CAL FIRE SPECIFIC ITEMS AND THE RESOURCE WILL THEN TAKE THE FORM TO THE YREKA HEADQUARTERS SERVICE CENTER FOR THOSE SPECIFIC ITEMS. ALL ICS-213 FORMS WILL INDICATE "CAL FIRE MISSION".
- REGARDING CHAINSAWS, ALL RESOURCES WILL GO THROUGH SUPPLY WITH THEIR ICS-213. SUPPLY WILL APPROVE OR DENY REQUEST. IF IT IS APPROVED, THE RESOURCE WILL SUBMIT THE ICS-213 TO THE CHAINSAW REPAIR VENDOR. ALL ICS-213 FORMS WILL INDICATE "FEDERAL MISSION" OR "CAL FIRE MISSION" REGARDLESS OF REQUEST NUMBER. CHAIN SAW SUPPLIES (OIL, CHAPS, ETC.) FOR GOLF STRIKE TEAMS WILL GO THROUGH YREKA HEADQUARTERS SERVICE CENTER.

Salmon August Complex – 17KNF006081

CAL FIRE Fire Suppression Repair Plan

I. Objectives

The objective of Fire Suppression Repair is to mitigate possible adverse effects to resources resulting from fire suppression activities during the Salmon August Complex *in a manner that shall not compromise the safety of those involved in repair activities*. CAL FIRE will consult with agency cooperators and other stakeholders as needed. A repair specialist (RESP) or their designee will be assigned to ensure that work is done as required and according to the Plan. Repair Specialists will ensure that work is completed in an efficient and cost-effective manner. Resources will be released and/or reassigned promptly upon completion of Fire Suppression Repair activities.

II. General Repair Guidelines

A. Helispots/Staging Areas/Safety Zones/TRA's

- 1) Re-contour to the original slope as requested by the Repair Specialist or monitor.
- 2) Remove soil and/or breach berms so that runoff can be dissipated. Cross drain these areas to effectively dissipate water runoff.
- 3) Place disturbed vegetation that was piled during line construction on the surface of safety zones and open areas as directed. This may be done with equipment or hand crews.

B. Roads

- 1) Repair roads to protect against erosion as requested by the Repair Specialist or designee. Repair Specialists may identify specific locations to install or repair existing waterbreaks, rolling dips or critical dips along roadways.
- 2) Re-establish existing berms where applicable to protect watercourses.
- 3) Breach berms to facilitate drainage, where applicable.
- 4) Clean culverts plugged with soil and rock resulting from fire road use.
- 5) Remove all slash and debris from culvert inlets/outlets.
- 6) Blading or grading of roads may be necessary. Grading shall be done after all suppression repair work is completed for areas accessed by the roads being graded.
- 7) Water roads as necessary for dust abatement.
- 8) Where vegetation was cut and deposited within 100 feet of permanent roads accessible by the general public, it shall be lopped and to a depth no greater than 30" of the soil surface and scattered on the exposed soil for erosion protection or masticated as directed.
- 9) Roads, trails or fire lines on public lands opened or constructed during suppression may need to be closed to prevent OHV access. Place barriers such as boulders, trees, vegetation, and/or "tank traps" across access points.

C. Firelines; Hand and Dozer

- 1) Install waterbars as described in the guidelines below. Waterbars are designed to intercept, slow and spread the precipitation run-off in order to reduce sediment transport and soil erosion. The idea is to move water off the fireline before it can build up enough energy to erode and transport sediment. Re-establish waterbars and rolling dips to provide adequate drainage using pre-fire locations.

Waterbar Guidelines

- a. **Spacing:** These spacing distances should be used as a guide. Judgment should be used in locating waterbars to minimize erosion potential. It may not be possible or necessary to place waterbars in steep or rocky areas. Install water-bars at the following recommended *minimum* intervals:

b. Fire line Gradient c. (% slope)	d. Minimum Distance Between Water-Bars (feet)
e. 0 to 10	f. 200
g. 11 to 25	h. 100
i. 25+	j. 50

- b. **Location:** Construct waterbars at natural slope breaks and/or take advantage of natural features when possible. Direct water to unburned areas, and/or resistant surfaces with high vegetation cover when possible. Waterbars should extend beyond the width of the trail and discharge into undisturbed areas, rocky ground, or filter areas well protected with slash and vegetative cover.
- c. **Depth and Width:** Waterbars need to be cut into the ground surface; do not simply push up soil. On dozer-constructed line, waterbar depths should be at least 6 inches. Total height from bottom of ditch to top of the berm should average at least 12 inches and not exceed 24 inches. On hand constructed lines waterbar depths should be at least 4 inches. Total height from bottom of ditch to top of water-bar should average at least 8 inches and not exceed 18 inches. The width of the waterbar channel should be enough to handle expected water flows and to avoid plugging when a normal amount of sloughing occurs.
- d. **Angle:** Determine the average gradient in percent slope of the fire line being waterbarred. Add 5 to the average gradient. This approximates the angle in degrees for the water bar. Do not install water bars at an angle steeper than 45 degrees as this will increase water velocity rather than slow it down.

- 2) Spread berms back onto fire lines to match natural contours. This will restore native seed source back to disturbed ground and prevent erosion.
- 3) Where able, spread cut vegetation back across lines for erosion control.
- 4) Coordinate with READs, RESP's, or their designee(s) for site specific measures on public lands.

D. Watercourses

- 1) Watercourse crossings along roads and dozer lines should be dipped and returned to their original configuration, as feasible. Waterbreaks shall be installed on each side of channel to lessen the likelihood of sediment delivering to the watercourse.
- 2) Remove all soil and debris that was placed in any stream channel. A Repair Specialist will review the site for acceptability. If all foreign material cannot be removed with heavy equipment, the material shall be removed by hand. The approaches to the crossing shall be sloped back to prevent future stream bank failure.

E. Archaeological or Historic Sites (if discovered)

- 1) All known sites and potential sites shall be flagged and avoided to the furthest extent possible according to protection measures established by existing site records and/or RESP instructions.
- 2) Operations will stop immediately and the Division/Group Supervisor or Suppression Repair Specialist will be notified if any pre-historic, historic, and/or cultural sites are discovered.

F. Other Repair Concerns

- 1) Remove all trash from fire lines and other affected areas.
- 2) Collect and return ALL hose, including damaged portions, to the supply unit.
- 3) Repair damaged fences and/or gates damaged as the result of the fire control operations. Extent and condition of damage should be documented prior to repair. Consideration must be given to the pre-existing condition of fences and gates in the immediate vicinity that were not affected by official firefighting activities.

Direct any Suppression Repair-related questions or concerns to:

FOR ALL MEDICAL EMERGENCIES: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS/DISPATCH

Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: Provide incident summary and command structure.

Nature of Injury/Illness		<i>Describe the injury (Ex: Broken leg with bleeding)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
Incident Commander		Name of IC
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report.

Number of Patients:	Male / Female	Age:	Weight:
Conscious? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Breathing? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!			
Mechanism of Injury: <i>What caused the injury?</i>			
Lat/Long (Datum WGS84) <i>Ex: N 40° 42.45' x W 123° 03.24'</i>			

4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
<input type="checkbox"/> URGENT-RED Life threatening injury or illness. <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE.
<input type="checkbox"/> PRIORITY-YELLOW Serious Injury or Illness. <i>Ex: Significant trauma, not able to walk, 2° - 3° burns not more than 1-2 palm sizes.</i>	Ambulance or consider air transport if at remote location. Evacuation may be DELAYED.
<input type="checkbox"/> ROUTINE-GREEN Not a life threatening injury or illness. <i>Ex: Sprains, strains, minor heat-related illness.</i>	Non-Emergency. Evacuation considered Routine of Convenience.

5. TRANSPORT PLAN:

Air Transport: (Agency Aircraft Preferred)

<input type="checkbox"/> Helispot	<input type="checkbox"/> Short-haul/Hoist	<input type="checkbox"/> Life Flight	<input type="checkbox"/> Other
-----------------------------------	---	--------------------------------------	--------------------------------

Ground Transport:

<input type="checkbox"/> Self-Extract	<input type="checkbox"/> Carry-Out	<input type="checkbox"/> Ambulance	<input type="checkbox"/> Other
---------------------------------------	------------------------------------	------------------------------------	--------------------------------

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

<input type="checkbox"/> Paramedic/EMT(s)	<input type="checkbox"/> Crew(s)	<input type="checkbox"/> SKED/Backboard/C-Collar
<input type="checkbox"/> Bum Sheet(s)	<input type="checkbox"/> Oxygen	<input type="checkbox"/> Trauma Bag
<input type="checkbox"/> Medication(s)	<input type="checkbox"/> IV/Fluid(s)	<input type="checkbox"/> Cardiac Monitor/AED
<input type="checkbox"/> Other (i.e. splints, rope rescue, wheeled litter)		

7. COMMUNICATIONS:

Function	Channel Name/Number	Receive (Rx)	Tone/NAC *	Transmit (Tx)	Tone/NAC *
<i>Ex: Command</i>	<i>Forest Rpt, Ch. 2</i>	<i>168.3250</i>	<i>110.9</i>	<i>171.4325</i>	<i>110.9</i>
COMMAND					
AIR-TO-GRND					
TACTICAL					

*(NAC for digital radio system)

8. EVACUATION LOCATION:

Lat/Long (Datum WGS84) <i>EX: N 40 42.45' x W 123 03.24'</i>	
Patient's ETA to Evacuation Location:	
Helispot/Extraction Size and Hazards:	

9. CONTINGENCY:

Considerations: <i>If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...</i>	REMEMBER: Confirm ETA's of resources ordered Act according to your level of training Be Alert. Keep Calm. Think Clearly. Act Decisively.
