## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER</b> 27	<b>TYPE OF INCIDENT:</b> Wildland Fire
<b>INCIDENT NAME:</b> Salmon August Complex	<b>OPERATIONAL PERIOD</b> Day shift 9/15/17
<b>DATE ISSUED:</b> 14 September 2017	<b>TIME ISSUED:</b> 2200
<b>UNIT:</b> Klamath National Forest	<b>SIGNED</b>  Ken Loda, FBAN

### INPUTS

**WEATHER SUMMARY** See the weather forecast preceding.

### FUELS CONDITIONS

The fire has burned in pockets of fuel that haven't seen fire in 60 years, but is moving into more recent burn scars. Fuels consist of moderate to heavy stringers of mixed conifer, snowbrush, white thorn and manzanita. Brush LFMC at 100%. Conifers 160%. Fine dead fuel moisture is 15-20% at 0700, going to 3-6% by afternoon, 1000-hr fuels are at 7-9%. Many large rock scree areas exist.

### OUTPUTS

#### GENERAL FIRE BEHAVIOR

The fire's main factors are heavy dead and down fuels with steep topography. Heavier fuels still burning likely held heat overnight. The recent fire activity has been most dependent upon slope and wind alignment.

Surface fire spread 8-14 ch/hr with headfire and around 1-3 ch/hr backing and flanking. Flame lengths 1-3 ft.

Spotting: Single-tree or group torching is possible, and short duration crown runs with gusts and slope alignment on a headfire. Spotting distance up to ¼-mile with torching, up to ½-mile with crown fire. Rollout potential exists in many areas. The probability of ignition will be 30% at the start of shift and 50% during peak burning conditions in shaded fuels and north aspects, 80% in other environments.

**Local Critical Thresholds:** Today we are meeting two local critical thresholds: RH under 22%, and 1000-hour fuels under 12%. We're flirting with another, temperatures over 79°.

#### SPECIFIC FIRE BEHAVIOR

**Wallow Fire:** Overall limited fire spread potential throughout the day. Interior burnout will continue. Much of the perimeter has steep slopes that promote rollout. Surface fire to crown transition is possible in areas exposed to the wind. Identify wind and slope alignment for increased fire spread.

**Division A:** We may see some fill-in on the south aspect of Hell Hole Ridge and the unnamed drainage northeast of Wild Lake.

**Division V:** Continued fire spread potential Southwest down Crapo and Morehouse drainages and Yellow Jacket Ridge, toward the Forks of Salmon and Sawyer Bar Road. Creeping and backing down slope/canyon expected. Rollout can enhance this fire movement potential when aligned with wind or slope.

**Deep Fire (DIV AA):** Gusty winds could challenge control lines. Surface fire spread transition to crown possible as sun exposure dries fuels throughout the day. Rollout can enhance this fire movement potential when aligned with wind or slope.

**Garden / Grizzly / Mary / Rush / Clair / Fourth:** None to Minimal fire growth is anticipated.

### SAFETY

**SAFETY** Rollout and fire-loosened rocks falling

**AIR OPERATIONS** Smoke accumulation and general gusts could complicate operations this afternoon.

## ***Health & Safety Message***

<b>Incident:</b> Salmon August Complex CA-KNF-006081	<b>Date/Op Period:</b> Day Shift Friday; 9/15/2017

### **Hazards & Risks**

**Transfer of Command:** As we make the transfer of command from Team 2 to Great Basin Team 7; maintain your situational awareness as new faces take over the fire. Review your IAP closely and share all the intel you've gathered over the last several shifts with the new folks. Identify all the hazards and mitigation measures and reevaluate your tactics each shift to reflect the changing conditions on the fire line.

**Communications:** Safety notice issued by the Lessons Learned Center regarding radio interference caused by electronic devices:

#### **Safety Notice**

Any electrical or electronic device can cause interference or blocking to your mobile and portable radio, and even nearby vehicles and radios. If you are having problems receiving—especially in areas where you know you had reliable radio coverage in the past—unplug any electrical or electronic device in your vehicle and test it again. If the reception improves, consider that device suspect. These devices include but are not limited to: inverters, USB chargers, phone chargers, cell phones, laptops, and MP3/music players.

In particular, the bullet-shaped USB chargers widely available have been shown to produce enough interference to completely block radio reception.

- Do not use USB chargers when radio reception is Mission Critical.
- While all 12V converters can cause radio interference, the higher-priced devices are usually engineered to reduce radio noise.
- Also, using a handheld inside a truck with tinted windows does not work due to the tint having metal in it. The radio signal just bounces around in cab—not getting out. Therefore, to talk on the handheld: turn off truck, then get out and away from it. We also found radio interference coming from the new vehicles due to the ignition coils on top of the engine and all the electronics now installed inside, especially on the keyless ignition model.

Salmon August Complex - Friday, September 15, 2017

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
ALL	Extreme Fire Behavior	Share weather observations with all personnel assigned to division. Establish "Trigger Points" to withdraw. Use "Risk Management" process prior to engaging in suppression actions; refer to IRPG.
ALL	Hazard Trees	Follow "Hazard Tree Safety" guidelines, IRPG. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights.
ALL	Air Operations	Follow "Aviation Watch-Out Situations", IRPG. Don't plan on air resources for medical transport or resupply. Refer to IRPG for directing bucket drops. Ensure positive communication with all air
AA, A / D	Spike Camp/Coyote	Keep camp clean and free of trash and food scraps. Consider communications and evac plan. Reference IRPG for Line Spike.
ALL	Indirect Fireline	Post lookouts, identify escape routes and safety zones; refer to IRPG . Review "Strategy/Indirect Attack" in the IRPG.
ALL	Steep Terrain & Rolling Debris	Maintain 8'-10' spacing when working & walking. Don't work above any personnel. Be on the lookout for rolling rocks, debris, or burning material. Evaluate necessity to send personnel in areas with limited access. Post lookouts maintain LCES.
ALL	Spot Fires	Size up prior to engagement. Watch for multiple spot fires. Ensure LCES is in place. Maintain situational awareness at all times.
ALL	Communications	Maintain communication with aviation resources, and suppression organization. Ensure all know frequency and protocol for contacting resources. Utilize the ICS 205. Utilize human repeaters when working in dead spots.
ALL	Fatigue & Over Exertion	Drink 1 quart of water each hour during and after work. Rotate crews out of smoky areas. Set a reasonable work pace and allow adequate rest breaks while on the project. Stagger work crews start time to limit fatigue. Use buddy system to monitor personnel of heat related and fatigue issues. Follow work / rest guidelines.
ALL	Heat Related Illness (HRI)& Dehydration	Drink Fluids throughout operational period (6-8 qts/shift). Maintain water/electrolyte ratio of 3 to 1. Carry extra water on line and cache water at drop points. Take frequent breaks, minimum of 10 minutes every hour. Allow out of area resources time to acclimatize before expecting peak performance. Recognize symptoms of HEAT RELATED ILLNESS which include. <ul style="list-style-type: none"> <li>o Lack of energy</li> <li>o Headaches, dizziness</li> <li>o Lack of rest</li> <li>o No hunger, poor eating habits</li> <li>o Hot skin, and lack of sweating</li> </ul>
ALL	Environmental Hazards	Be alert for Rattlesnakes, watch footing and hand placement around rocks. Check yourself for ticks. Watch for biting and stinging insects Be alert for bears, cougars and other wildlife. Be aware of poison oak, seek treatment at medical if exposed.
ALL	Firing Operations & Devices	A written guideline shall be prepared and approved for major burning operations. Conduct thorough briefing for all personnel (inside cover IRPG) Qualified personnel for all firing operation assignments. Utilize Risk Mgmt. Process IRPG. Establish LCES prior to implementing burning operations. Assign an over-all Firing Boss to coordinate ignitions when simultaneous burning operations are planned for multiple locations.
A/D, H, S, P	Pack Train Operations	Do's, when pack mules are approaching you, move the crews preferably to the downhill side of the road. Do's, take all tools to the same side of the road as the crews. Don't, sneak up from behind a mule, make it known you are approaching the pack mule line. Don't move up to quickly to the mules, mules startle easily. Don't confront, feed or approach mules without permission from one of the mule team members.
K,M, Repair	Mop-up & Repair	Do not work above or below personnel during rehab/mop-up operations. Alert crew personnel of rolling debris by yelling to affected individuals. Position debris that could roll vertically on slope. Wear eye protection.
ALL	Driving & Traffic	Practice "Defensive Driving" techniques traveling on all roads and city streets. Use spotters when backing. Honk horn to alert personnel when backing. Keep clutter off dash and inside cab. Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts. Always use headlights. Yield to pedestrians and bicycles. Observe posted speed limits. Use the 3 second rule for following distance when driving. Use chock blocks, turn wheels into hill. Avoid distractions (eating, cell phones, radio). Ensure that windshields are kept clean of dust and bugs.

## Attitude

The longer I live, the more I realize the impact of attitude on life. Attitude to me is more important than facts. It is more important than the past, than education, than money, than circumstances, than failures, than successes, than what other people think or say or do. It is more important than appearance, giftedness, or skill. It will make or break a company...a church...a home. The remarkable thing is, we have a choice every day regarding the attitude we will embrace for that day. We cannot change our past...we cannot change the fact that people will act in a certain way. We cannot change the inevitable. The only thing we can do is plan on the one thing we have, and that is our attitude...I am convinced that life is 10% what happens to me and 90% how I react to it. And so it is with you...we are in charge of our attitudes.

### **BENEFITS OF POSITIVE ATTITUDE:**

- Family environment
- Career Advancement
- Increased life span
- Lower rates of Depression
- Lower levels of distress
- Feel Better psychological and physical well-being
- Better cardiovascular health and reduced risk of death from cardiovascular disease
- Better coping skills during hardships and times of stress.
