### INPUTS

**WEATHER SUMMARY** See the weather forecast preceding.

### FUELS CONDITIONS

Fuels consist of dead and down timber, some standing dead, along with approximately 10-year old conifers, brush, and grass reproduction after previous fires, or areas of moderate to heavy stringers of mixed conifer, snowbrush, whitethorn and manzanita. Brush live moisture is at 100%, conifers 150%. Fine dead fuel moisture will be about 9% at 0700, and could get to 5% by mid-afternoon; 1000-hr fuels are at 15-17%.

### OUTPUTS

#### GENERAL FIRE BEHAVIOR

↑ ▲ ↑ ▲ Burning conditions still low, but rising ▲ ↑ ▲ ↑

☺ ☺ ☺ Enjoy another good day for repair and mop-up ☺ ☺ ☺

Moderate RH recovery still inhibited overnight burning coming into today. The fire's main behavior factors are heavy dead and down fuels that are still dry, with steep topography.

The forecast weather will support continued burnout of heavy fuels, and could support low intensity creeping fire behavior.

Spotting: Rollout potential exists in many areas. However, spotting success will be moderate, at best, as the probability of ignition will be 30% at the start of shift and will go to 60% during peak burning conditions.

#### SPECIFIC FIRE BEHAVIOR

Interior burnout of heavier fuels will continue. Once again, expect even more to be revealed today. In those few areas where fire persists, during the peak burning period (1300 to 1800) we might see 2 to 3 ch/hr spread and 1' flame lengths.

### SAFETY

**SAFETY** Continue to watch for rollout, snags, and falling fire-loosened rocks.

**AIR OPERATIONS** No expectation of complications from weather or fire behavior.

**SAFETY THOUGHT**

The most important thing that you can do to keep from getting sick is to wash your hands.

	<p><b>Major Hazards and Risks</b></p>	
<p><b>Weather</b> Increased Temperature Decreased Humidity</p>	<p><b>Driving</b> Speed (us and them) Complacency</p>	<p><b>Mop Up</b> Steep Slopes Snags</p>

Remember that it is your life that is on the line. You have the right to voice your opinion and concerns about personal safety. Don't hesitate to speak up if you feel uncomfortable with the situation or the circumstance in which you are. Firefighting is inherently hazardous. Discuss your concerns with your immediate supervisor or with a Safety Officer. We are in this together!
