

Eclipse Complex

Incident Action Plan

Thursday, Aug. 17th to Friday, Aug 18th 2017

Day Shift 0600 – 2000 & Night Shift 1800 - 0800

✓ **New Communications Plan.**

- **Ensure you have the current Frequencies**
- **Check your Division Assignment frequencies (ICS-204)**
- **Test Commo with Eclipse Communications when you reach your work area.**
- **Utilize Human Repeaters as needed**

✓ **Driving 2 way traffic on one lane roads**

- **Know that others are utilizing the same road systems**
- **Go slow to go fast. Keep your speeds down!**
- **Develop traffic plan as needed**

**KEEP A HIGH LEVEL OF
SITUATIONAL AWARENESS**
Eclipse Complex: CA-KNF-006098 (0505)
Klamath National Forest

| | | | |
|---|---|---|-------------------------------|
| INCIDENT OBJECTIVES | 1. Incident Name Eclipse Complex | 2. Date 08/16/2017 | 3. Time 2100 |
| 4. Operational Period August 17-18, 2017 DAY / NIGHT SHIFT | | | |
| <u>CONTROL OBJECTIVES</u> | | | |
| 1) Keep the Oak Fire: <ul style="list-style-type: none"> • South of Baldy Mtn. Lookout and the 17N11 Road to protect cultural and natural resources. • West of the 16N10 Road to protect private property and infrastructure. • North of 16N12 Road to protect private property, infrastructure, and cultural resources. • Within the western boundary of the Siskiyou Wilderness to protect natural resources. 2) Keep the Cedar, Clear, Prescott, East, and Four-Mile Butte fires: <ul style="list-style-type: none"> • Within remote national forest areas to protect heritage, cultural, and natural resources. 3) Confine, contain, or control all new fires commensurate with values at risk. | | | |
| <u>MANAGEMENT OBJECTIVES</u> | | | |
| 1) Provide for public and fire fighter safety by maintaining life first principles. 2) Implement strategies and tactics that have a high probability of success always taking into consideration responder exposure. 3) Minimize impacts to cultural resources, infrastructure, and private property. 4) Establish and strengthen cooperator, partner, and stakeholder relationships. 5) Provide for timely and accurate incident information via the media, public meetings, & public contacts. | | | |
| 6. Weather Forecast for Period <ul style="list-style-type: none"> • See attached weather forecast. | | | |
| 7. General Safety Message <ul style="list-style-type: none"> • See attached safety messages. | | | |

Eclipse Complex

National Weather Service Medford

2017-08-16 2:10 PM PDT

Spot Forecast for Eclipse Complex...Klamath National Forest
National Weather Service Medford OR
210 PM PDT Wed Aug 16 2017

Forecast is based on request time of 1700 PDT on August 17.
If conditions become unrepresentative...contact the National Weather Service.

.DISCUSSION...A thermal trough will continue across northern California through Thursday. Gusty northeast winds with poor humidity recoveries are expected on the fire through Friday morning...especially for upper slopes and ridges. Most of the terrain below the upper slopes and ridgetops will feature terrain driven upslope/downslope flows during the day/night. Rapid drying combined with gusty winds could cause "sleeper" fires to awaken from the past week. It will remain dry through the weekend. Temperatures by Friday afternoon will be 5 to 10 degrees above normal. Slight cooling is expected this weekend, but only a couple of degrees on average.

.THURSDAY...

Sky/weather.....Sunny. Areas of smoke.
Max temperature.....Valleys: 92 to 97.
Ridgetop: 82 to 87.
Min humidity.....14 to 22 percent.
WIND (20 FT).....Lower to upper slopes: Upslope 4 to 8 mph with gusts 12 mph.
Ridgetop: East-northeast 6 to 12 mph with gusts to 20 mph early becoming north 6 to 10 mph with gusts to 16 mph in the afternoon.
Mixing height.....500 ft AGL increasing to 6000 ft AGL.
Transport winds.....Northeast becoming north around 10 mph.
CWR.....0 percent.
LAL.....1.

.THURSDAY NIGHT...

Sky/weather.....Clear. Areas of smoke.
Min temperature.....Valleys: 61 to 64.
Ridgetop: 57 to 60
Max humidity.....46 to 51 percent.
WIND (20 FT).....Lower to upper slopes: Downslope 3 to 7 mph with gusts to 10 mph.
Ridgetop: East-northeast 6-12 mph with gusts to 15 mph becoming 6 to 10 mph with gusts to 12 mph after midnight.
Mixing height.....5400 ft AGL decreasing to 500 ft AGL after midnight.
Transport winds.....Northeast around 9 mph.
CWR.....0 percent.
LAL.....1.

FIRE BEHAVIOR FORECAST

| | |
|-------------------------------------|---|
| FORECAST NUMBER 3 | TYPE OF FIRE: Wildland Fire |
| FIRE NAME: Eclipse Complex | OPERATIONAL PERIOD: Day shift August 17, 2017 |
| DATE ISSUED: August 15, 2017 | TIME ISSUED: 1900 |
| UNIT: Klamath NF | SIGNED: Bob Patton FBAN <i>[Signature]</i> |

WEATHER SUMMARY: ****Please See attached Fire Weather Forecast****

Max Temp: Valleys 92-97°
Ridgetops: 82-87 °
Min RH: 14-22%
Winds: 20'
Slope/valley: Upslope/upvalley 4-8 mph with gusts to 12 mph
Ridgetop winds: East Northeast 6-12 mph with gusts to 20 early becoming north 6-10 mph with gusts to 16 mph in the afternoon.

GENERAL

The Eclipse Complex consists of four fires: Clear, Cedar, Oak and Prescott. The most active fires are the Cedar and Oak. The fires are burning in mostly timber with little or no recent fire history with the exception of the Oak Fire to the west has the 1987 Ten Bald fire scar with heavy brush and snags.
ERC's for the predictive service area are 61 around the 84th percentile, down from the 94th percentile over a week ago.
ERC's at Oak Knoll are 59 around the 83rd percentile down from the 94th percentile over a week ago.
Live fuel moisture is approximately 97% in Manzanita, and 116-118% in Tan Oak.
Probability of ignition: 50-80% depending on aspect and shading.
Maximum spotting distance up to one mile

SPECIFIC FIRE BEHAVIOR

Cedar Fire: Fire behavior in the morning under the inversion should be minimal with slow backing with slow forward rate of spread in available fuels prior to the smoke lifting out. As the smoke lifts out fire activity could increase in unshaded areas in alignment with the wind. Expect individual tree torching with some active surface fire. Gustly afternoon NNE winds that are in alignment with fuels and drainages could experience enhanced fire behavior throughout the afternoon and evening.
Four Mile Fire: Fire will continue to persistently grow by rolling hot material into jackpots that will preheat brush to ignition for short crown runs. Fire could be sheltered from the predicted east-northeast winds.
Oak Fire: Fire behavior in the morning under the inversion should be minimal with slow backing with slow forward rates of spread in available fuels. Fuels will continue to burn out from yesterdays firing operation on the north end of fire in Division D. In Division Afternoon north winds aligned with slope and fuels can expect enhanced fire behavior. Expect surface fire runs with occasional group torching and active crown runs.
Clear Fire: Minimal fire activity is anticipated
Prescott Fire: Fire will continue to be monitored

AIR OPERATIONS

Smoke inversion could hamper air operations in the morning and throughout the shift

SAFETY

Ensure LCES is in place prior to engaging in all work assignments,

AIR OPERATIONS SUMMARY

PREPARED BY: Kerry Koskela *KRK*

PREPARED DATE/TIME: 08/16/17 1930

1. INCIDENT NAME: Eclipse Complex **2. OPERATIONAL PERIOD DATE:** 08/17/17 **START TIME:** 0600 **END TIME:** 1800 **SUNRISE:** 0624 **SUNSET:** 2011

NOTE: AIRCRAFT CAN BE SHARED BETWEEN COMPLEXES

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc)
 Possible unidentified low wires & cables in the river corridor. Rafters on the Klamath River; Limited visibility due to smoke.
 Ensure all pilots are briefed on appropriate frequencies for that specific fire before launching. No dipping within 500 feet of the confluence of all major tributaries of the Klamath River. Use established procedures for bucket and tank sanitation where necessary.
 H-407 is located at Scott Valley and is used for fire line extrication and medivac only.

4. MEDEVAC A/C:
 H-407 out of Scott Valley for hoist
 H-503 at Happy Camp with landing zones
 See Medical Plan

5. TFR: 7/3066

MEDICAL PLAN (ICS 206 WF)

Medical Incident Report

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS DECLARE: "MEDICAL EMERGENCY" OR "NON-EMERGENCY MEDICAL TRANSPORT"

Ex: "Communications, Div. Alpha. Stand-by for a medical emergency on Div. Alpha" (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: *Provide incident summary and command structure.*

- **Nature of Injury/Illness** *Describe the injury (Ex: Broken leg with bleeding)* _____
- **Incident Name** *Geographic Name + "Medical" (Ex: Trout Meadow Medical)* _____
- **Incident Commander (Division Sup. or designee)** *Name of IC* _____
- **Patient Care** *Name of Care Provider (Ex: EMT Smith)* _____

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each pt. This is only a brief, initial assessment. Provide additional pt. info after completing this report*

- **Number of Patients:** _____ - **Male / Female:** _____ - **Age:** _____ - **Weight:** _____
- **Conscious?** YES NO = MEDEVAC! - **Breathing?** YES NO = MEDEVAC!
- **Mechanism of Injury** *What caused the injury?* _____
- **Location, Lat/Long** (Datum WGS84) *Ex: N 40° 42.45' x W 123° 03.24'* _____

4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY

| SEVERITY | TRANSPORT PRIORITY |
|---|--|
| <input type="checkbox"/> URGENT-RED <i>Life threatening injury or illness.</i> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> | Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE. |
| <input type="checkbox"/> PRIORITY-YELLOW <i>Serious Injury or illness.</i> <i>Ex: Significant trauma, not able to walk, 2° – 3° burns not more than 1-2 palm sizes.</i> | Ambulance or consider air transport if at remote location. Evacuation may be DELAYED. |
| <input type="checkbox"/> ROUTINE-GREEN Not a life threatening injury or illness. <i>Ex: Sprains, strains, minor heat-related illness.</i> | Non-Emergency. Evacuation considered Route of Convenience. |

5. TRANSPORT PLAN:

Air Transport: (Agency Aircraft Preferred)

- Helispot
- Short-haul/Hoist
- Life Flight
- Other

Ground Transport:

- Self-Extract
- Carry-Out
- Ambulance
- Other

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

- Paramedic/EMT(s)
- SKED/Backboard/C-Collar
- Crew(s)
- Burn Supplies
- Oxygen
- Trauma Bag
- Medication(s)
- IV/Fluid(s)
- Cardiac Monitor/AED
- Other (i.e. splints, rope rescue, wheeled litter)

7. COMMUNICATIONS:

- Run Medical Emergency on Command
- Coordinate with air ambulance on CALCORD tone 6

8. EVACUATION LOCATION:

- **Lat/Long** (Datum WGS84) *EX: N 40 42.45' x W 123 03.24'* _____
- **Patient's ETA to Evacuation Location:** _____
- **Helispot/Extraction Size and Hazards:** _____

9. CONTINGENCY: *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...*

REMEMBER: -Confirm ETA's of resources ordered -Act according to your level of training
 - If air or ground ambulance is DELAYED: Package and transport patient to rendezvous with incoming Ambulance.
 Re-route EMS helicopter to rendezvous point as appropriate.

Eclipse Complex - Incident Risk Analysis (215a)

| Div. | LCES Analysis of Tactical Applications (Hazardous Actions or Conditions) | LCES Mitigations/Warnings/Remedies |
|-------------------------------------|---|--|
| All | Communications | NEW Communications Plan..... Clone Required. Review the 204, 205 and 220 for accuracy. Set up Human Repeaters as needed. If spiking, test Commo with Eclipse Communications for viability. |
| All | Bees (aka Wasps & Hornets), & Snakes | Known areas? Flag off and Communicate to affected resources. Pre-Identify those resources with known allergies. Pre-plan your response (Epi-Pen's, Benadryl supply, Medical personnel etc). |
| All Personnel Includes ICP | Heat Related Illness/Injuries | STAY HYDRATED before, during and after shift. "Energy Drinks" such as Monster, Red Bull or Rockstar contribute to heat injuries and should not be consumed. Pre-Plan the needs of your crews. Stage more water and Electrolyte drinks along your work area. |
| All | Extreme Driving Concerns | Narrow, steep, unforgiving native surfaced roads within the fire area. You NEED to slow down and Expect the Unexpected! You MUST drive with caution. Maintain good sight/reaction distance. Headlights ON! Seatbelts ON! |
| OAK | Increase in Fire Behavior | Preplan! Identify Trigger Points! How long will it take you to get back to your vehicles and exit the area safely? Know your escape routes as the situations change. Keep your eye out for spots from previous shift |
| All | Steep Terrain | Ensure secure footing. Keep appropriate work spacing. Focus! Concentrate on foot placement to limit slips, trips and falls. |
| OAK | Working with Heavy Equipment | Stay at least 100' in front and 50' behind the equipment. In Timber, distances should be increased to 2½ times the tallest tree height. Avoid working below equipment. Make eye contact with operator: blade down, idle down, before approaching. |
| All | Difficult terrain and conditions for providing for emergency medical needs. | Review Med Plan before the need arises. Limit high risk activities. Have a backup plan AND don't depend solely on air resources. Practice the "What if" scenarios. |
| All | Danger Trees within Fire Area & Routes to work areas | Old fire scars. Fire weakened trees, shallow root systems, widow makers. Be aware of bind when cutting jackstrawed timber. Watch out when traveling/working during windy conditions. Limit exposure. Mitigate if safe. Use qualified fallers. |
| All | Poison Oak Exposure | Know what it looks like. "Leaves of three, let it be" Change or launder Nomex frequently. Ensure proper Personal Hygiene |
| All | Personal Protective Equipment | ALL Personnel are reminded to wear PPE when in route to and from the fire and within the fires perimeter. Insure PPE is compatible with hazards and risks. |
| All | Hygiene | Wash Hands prior to eating and after using the toilet facilities. Clean out ice chests with soap, bleach & water. |
| All | Wildlife | Watch for elk, deer and bears crossing roadways. Numerous sightings. Especially active around Dusk & Dawn |

Date & Time Prepared: August 16th, 2017 @ 2100

Operational Period: August 17, 2017 from 0600 - 2000

Prepared By: Michele Tanzi - SOF1, Robert Hilfer - SOF2(t) Operational Period: August 17/18, 2017 from 1800 - 0800

Klamath National Forest
Northern California Incident Management Team 1

**Today's discussion is from the
Fire/Weather Behavior Category.**

Proper Use of Trigger Points

Accurate situational awareness (SA) requires constant reassessment of conditions (existing or potential) that may impact the safety and effectiveness of tactics. Monitoring for the 18 Watchout Situations and establishing operational / environmental limits ("trigger points") ahead of time can help to focus SA, prompt reassessment, and help you re-evaluate the risk of current actions. The following items are things to consider in your planning and discussion. Remember, trigger points are NOT decision makers, but serve as predetermined cues to prompt you to re-evaluate the current and potential situation and associated risks, and help you to determine and implement the proper course of action.

- Preplan! Don't wait until you're in the wrong place at the wrong time---with no time.
- Trigger points should be based on measurable factors such as:
 - RH
 - Winds
 - Fire Behavior
 - Topographical boundaries
 - Time constraints/Time of day
 - Time/distance to safety zones
 - Loss of suppression resources
 - Other operational considerations (e.g., firefighter fatigue, loss of lookouts or communication, weather change)
- As you approach predetermined trigger points, go through the Risk Management Process to help you decide if a change in tactics is required. (See the Incident Response Pocket Guide)
 - Gather information to assure good Situational Awareness
 - Assess hazards to anticipate serious risks
 - Establish hazard controls to mitigate serious risks
 - Make decisions based on your ability to mitigate those serious risks
 - Evaluate effectiveness of current actions
- Command/Leadership responsibilities when changing tactics
 - Communicate the changes to your subordinates, as well as to adjacent forces and up the chain of command
 - Account for all your people
 - Make sure everyone knows and follows the new plan

TRAINING SPECIALIST MESSAGE

A Training Specialist is now on the incident.

All federal, state, and local government agency trainees working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment.

The TNSP office is in the ICP, and is located adjacent to Communications.

The Training Specialist is available immediately following each of the Operations Briefings.

Thank you

Greg Kurtz TNSP
