

ECLIPSE COMPLEX

**CA-KNF-006098
P5K9QB (0505)**

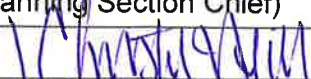

Tuesday, August 30th -31st, 2017

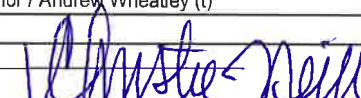

**Day Shift 0600 - 2000
Night Shift 1800 – 0800**

**0600 Day Operations Briefing
1800 Night Ops Briefing
1900 Planning Meeting**

	1. Incident Name	2. Date Prepared	3. Time Prepared
ICS 202	Eclipse Complex	08/29/2017	1700
4. Operational Period			
August 30th – 31st, 2017 Day / Night Operational Period 0600-2000			
5. Leaders Intent & General Control Objectives for the Incident (include alternatives)			
<p>LEADERS INTENT: Suppress the Fires in the Eclipse Complex utilizing strategies such as: confine, contain, point protection and monitoring in wilderness while mitigating exposure and protecting values at risk.</p> <p>Management Objectives:</p> <ul style="list-style-type: none"> • Ensure safety of emergency responders and the public by utilizing risk management processes, & implementing strategies & tactics that have a high probability of success, stop, think, talk, then act. • Protect and minimize undesirable fire & suppression effects to natural and cultural resources by using Resource Advisors, using MIST in wilderness, and using the right resources in the right places. • Provide structure protection for threatened structures, residences, ranches, cabins, & lookouts utilizing structure protection guidelines in the IRPG & established plans. • Establish and maintain good relationships with local cooperators, stakeholders and public while providing accurate and timely incident information. <p>Suppression Objectives:</p> <ul style="list-style-type: none"> • Keep the Oak & Young Fires <ul style="list-style-type: none"> ○ Confined to the Siskiyou Wilderness & East of the South Fork of Smith River ○ North & West of Hwy 96 to protect heritage, cultural & natural resources. • Keep the Cedar & Four Mile Fires within remote national forest, Red Butte Wilderness and east of the 18N01 Road to protect heritage, cultural & natural resources.

CA-KNF-006098 Complex Fire Weather Forecast

FORECAST NO: 25

NAME OF FIRE: KNF-006098-Complex

PREDICTION FOR: 0600-0600

UNIT: Klamath NF- Happy Camp RD

SHIFT DATE: 8/30-8/31

SIGNED: /s/

TIME AND DATE

Incident Meteorologist-Ryan Walbrun

FORECAST ISSUED: 2000 8/29/17

...Dry cool front with shifting ridgetop winds this afternoon...

WEATHER DISCUSSION: Heavy smoke again across most of the fire through midday as a strong morning inversion will be in place. A weak front will be approaching but represent a change in fire weather conditions today. Ridgetop winds will be southwest ahead of the front but then shift northwest around 1600-1700 hours as the front passes through. This may help to ventilate western sections of the complex, most notably the Young Fire and Branch III of the Oak Fire. In addition, the slight cooling aloft and wind shift associated with the front may help to weaken the inversion late in the day and allow for some wind driven fire on some of the unstaffed portions of the fire. Haines index of 4 is forecast today implying moderate potential for plume dominated fire. High temperatures will be in the 80s due to heavy smoke and the passing front while humidity will generally stay above 20%. Expect better humidity recovery overnight but with heavy smoke settling over the fire once again as high pressure quickly builds.

WEATHER FORECAST FOR TODAY:

WEATHER: Thick smoke under the inversion through midday, then slowly lifting. Look for a wind shift late in the operational period to West/Northwest on the ridges. Overall trend of slightly cooler.

TEMPERATURES: High near 80 smoke shaded ridges to around 90 along Hwy 96 in Div F and Z.

HUMIDITY: 38-48% morning then dropping 24-34% early afternoon, bottoming out 19-23% late.

20 FT WINDS:

RIDGETOP - Southwest 4-8 mph turning West/Northwest after 1600 hours with gusts 14-18 mph.

SLOPE/VALLEY - Afternoon upslope 3-7 mph. A few late day gusts 10-12 mph.

HAINES INDEX: 4 **LAL:** 1 **STABILITY/INVERSION:** Strong morning inversion weakening after 1400.

WEATHER FORECAST FOR TONIGHT:

WEATHER: Breezy on the ridges until sunset then thick smoke settling over the lower slopes and drainages

TEMPERATURES: Lows 52-62, coolest along Highway 96 and the Klamath River.

HUMIDITY: Recovering 35-45% through 11 pm then 55-65% by morning except 75% Hwy 96.

20 FT WINDS:

RIDGETOP - Northwest 5-10 mph evening gusts to 15 mph...turning Northeast 4-8 mph by dawn.

SLOPE/VALLEY - Downslope-downcanyon 2-5 mph.

HAINES INDEX: 4 **LAL:** 1 **STABILITY/INVERSION:** Strong inversion setting up after 2100 hours.

Thursday thru Labor Day: High confidence for high pressure bringing dry Northeast 5-10 mph winds to the ridges. Daytime highs 88-98 with overnight lows 60-70. Humidity 13-23% afternoon...35-50% nights.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 27	TYPE OF FIRE: Wildfire
FIRE NAME: Eclipse	OPERATIONAL PERIOD: Day/Night, 08/30/2017
DATE ISSUED: 08/29/2017	TIME ISSUED: 2000
UNIT: CA-KNF	SIGNED: /s/ Kevin Hillard
Typed/printed: Kevin Hillard	

INPUTS

WEATHER SUMMARY: *PLEASE REFER TO IMET WEATHER FORECAST*

Sky: Heavy smoke lifting in the early afternoon, **WIND SHIFT to west/northwest late in the afternoon**
Maximum Temperatures: 90 valley bottoms otherwise 80 degrees F. Lows in the 50s-60s overnight.
Minimum Humidity: 34-48% morning dropping to 19-23% late recovering to 55-65%
Winds (20'): Ridgetops – Southwest 4-8 mph turning W/NW 5-10 mph after 1600 gusts to 14-18 mph
 Slope/valley – upslope/upvalley 2-4 mph gusts to 12 mph then downslope/downvalley 2-5 mph
CWR: 0% **LAL:** 1 **Haines Index:** 4

OUTPUTS

FIRE BEHAVIOR

GENERAL: Another day of southwest winds should continue to push the fires to the northeast until the **afternoon wind shift** which will cause the fires to grow to the east and southeast. Expect continued active surface fire with limited crown fire activity supported by the surface fire. Where the inversion lifts and winds are aligned with slopes crown runs could develop. Surface rates of spread will generally govern the fire spread, with some enhancement from short range spotting. Surface head fires will be fairly intense with high resistance to control.

Rate of Spread:	Timber/Brush/Heavy Down/Dead:	5-16 Chains per hour (head fire) 0.5-1 Chains per hour (backing fire)
Flame Length:	Timber/Brush Heavy Down/Dead:	5-12 Feet (head fire) 1-3 Feet (backing fire)

Crown Fire Potential: Isolated torching. Group torching with slope driven crown runs possible into the early evening where the fires are unshaded by smoke. Crown fire spread rates approximately 0.7 mile per hour.
Spotting Distance: 0-0.5 mi (under developed smoke columns, spotting up to 1.5 miles is possible)
Probability of Ignition: Day 70-80%, Night 20-50% (model) decreasing after dark
Rollouts: Watch out for burning material on steeper slopes that may roll across firelines

SPECIFIC:

Branch I: Expect fire spread to be mostly upslope and up drainage into the afternoon. Fire activity will be greatest in heavy fuels and in areas near ridgetops exposed to the **shifting ridgetop winds**. Watch for downslope and downvalley wind shift after sunset. The Fourmile and Cedar are expected to continue to burn together. Fire in Division G will continue to flank to the north and burn to the east into the Red Buttes wilderness.

Branch II: Areas of active fire behavior will continue to be active and influenced by upslope/upvalley winds until after sunset with downslope/downvalley wind influence after sunset. RH recoveries should be better tonight. Expect fire to continue to back into the Highway 96 corridor. The western areas of the Branch should see more influence from the **shifting winds**. Interior islands will continue to burn together.

Branch III: Little change from yesterday. Fire activity will continue to be dominated by the inversion lifting and slope/valley and **shifting ridgetop winds**. Fire will continue to spread into the South Fork of the Smith River by backing and rollout with uphill runs. Growth to the northeast into the Siskiyou Wilderness expected to continue. Fire spread on Young will continue into the Clear Creek drainage on the southeast corner.

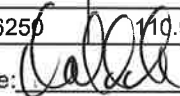

AIR OPERATIONS:

Smokey conditions expected all day. There may be some clear air on the west end of the Oak fire and on the Young fire.

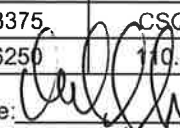

SAFETY

Watch for wind shift in the afternoon around 1600 and have LCES in place if fire activity picks up in your assigned area.

ASSIGNMENT LIST (ICS 204)

1. Incident Name: ECLIPSE COMPLEX		2. Operational Period: Date From: 08/30/17 Date To: 08/31/17 Time From: 0600 Time To: 0800			3. Branch: I Div/Group: Four Mile B

AIR OPERATIONS SUMMARY

PREPARED BY: Shawn Whittington

PREPARED DATE/TIME: 08/29/17 1930

1. INCIDENT NAME: Eclipse Complex

2. OPERATIONAL PERIOD DATE: 08/30/17

START TIME: 0600 END TIME: 1800 SUNRISE: 0638 SUNSET: 1901

NOTE: AIRCRAFT CAN BE SHARED BETWEEN COMPLEXES

3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc)
Possible unidentified low wires & cables in the river corridor. Rafters on the Klamath River. Limited visibility due to smoke, do not continue mission if visibility is marginal. Ensure all pilots are briefed on appropriate frequencies for that specific fire before launching. No dipping within 500 feet of the confluence of all major tributaries of the Klamath River. Use established procedures for bucket and tank sanitation where necessary. 128.1750 now linked to Scott Valley and Happy Camp helibases. Helicopter 407 assigned to Eclipse Complex as of 8/27/17 8PA at Gasquet available short haul

4. MEDEVAC A/C:
 H-407 out of Dunsmuir for 24 hour NVG hoist.
 With landing zone available non trama H-503 is available
 8PA Grand Canyon T3 short haul: See Medical Plan

5. TFR: 71565
 Ceiling :To and including 11000 MSL
 Polygon: See NOTAM
 TFR Frequency: 128.175
 Latest change 8/28/17

10. MISSIONS

Air to Ground Tactical 1 & 2 to be assigned to working aircraft and ground contact as needed where needed by aerial supervision.

Water drops as requested, may use aircraft from Scott Valley if smoked in at Happy Camp Helibase, Recons as requested

S A F E T Y M E S S A G E

Eclipse Complex

August 30-31, 2017 Day/Night Shift

LOOKOUTS, COMMUNICATIONS, ESCAPE ROUTES, SAFETY ZONES

Transportation

- ✓ **Driving on the Incident** - Hazardous mountain roads are common.
 - **The right vehicle for the right road for the right reason.** Scout roads before sending up large water tenders, masticators and other large suppression vehicles.
 - In Branch III There is a long steep downgrade coming back into camp. If you rely solely on your brakes, they will fade. Downshift or use retarders.
 - Div B/W-Turning out onto State Highway 96 off the FS 1801 rd brings you into west bound traffic coming off a blind curve; they don't have a long time to react to fire vehicles entering the roadway. Warning sign has been posted.
 - Inattention distracted driving, especially along HWY 96 where the fire is coming down to the road. The public is looking at the fire not the crews working along the road.
 - Driving through the community of Happy Camp or local residential areas, go slow 25 MPH max. Watch for kids, school is back in session. Be very respectful of the local residents who have been impacted by the fire for weeks on end.

Think about it, Talk about it, Act on it! Don't let past lessons go unlearned and don't underestimate your leadership influence, regardless of your position or experience.

INCIDENT SAFETY ANALYSIS 215a

Eclipse Complex/ CA-KNF-6098 - Wednesday , August 30, 2017

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
All	Fireline Hazards	<ul style="list-style-type: none"> ~ Hazard trees are present over the entire fire ~ Watch for falling and rolling debris on steep slopes ~ Alert crew personnel of rolling debris by yelling to affected individuals ~ Position debris that could roll vertically on slope ~ Avoid stepping over debris that could roll by walking around object ~ Avoid radiant heat by wearing appropriate PPE correctly ~ Use correct tool for task assigned ~ Follow power line safety protocol as outlined on page 24 in IRPG ~ Flag and isolate all HAZMAT and alert all personnel working in Division ~ Follow WUI recommendations on pages 12-16 in IRPG
All	Driving & Traffic	<ul style="list-style-type: none"> ~Drive with lights on. ~Do not use cell phone while driving. Slow down in smoke and congested areas. ~Check bridge load rating before using for heavy equipment; if in doubt, find another route. ~Slow down at night - expect animals in the road. ~Use spotter for backing. ~Wash windshield. ~Utilize spike camps to reduce driving ~Follow piloted traffic control process
All	Line Constructions	<ul style="list-style-type: none"> ~Conduct thorough briefing for all personnel (inside rear cover IRPG). ~Ensure LCES in place prior to engagement (IRPG p. 7). ~Establish adequate safety zones (IRPG p.8). ~Follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4). ~Utilize Risk Management Process (IRPG p.1). ~Utilize Downhill Checklist (IRPG p 9)
All	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> ~Determine if the mission is necessary. ~Limit exposure by avoiding whenever possible. ~Use the proper resource. ~Post lookouts. Resources should not work directly above or below each other. ~Utilize fallers to clear hazard trees/snags
All	Communications	<ul style="list-style-type: none"> ~ Maintain communication with aviation resources, and suppression organization. ~ Ensure all your resources know frequency and protocol for contacting resources ~ Utilize the ICS 205. Brief others as needed, Communicate hazards to others, acknowledge messages, ask if you don't know
All	Extreme Fire Behavior	<ul style="list-style-type: none"> ~Share weather observations with all personnel assigned to division• Review "Severe Fire Behavior Potential" (IRPG p.68). ~Watch for inversion lifting ~Monitor current weather conditions and forecasts ~Make sure all personnel receive thorough briefings every shift. ~Maintain adequate escape routes and safety zones. ~Advise all personnel if these are compromised or changed. ~Set trigger points when appropriate. ~Adhere to 10 Std Orders, mitigate 18 situations. ~Maintain Situational Awareness
All	Helicopter Operations	<ul style="list-style-type: none"> ~ Stay clear of all bucket drops when suppression actions are in place and allow 5 minutes prior to re-entry ~ Follow aviation safety guidelines in IRPG pg 43-60

INCIDENT SAFETY ANALYSIS 215a

All	Heat Related Illness (HRI)& Dehydration	<ul style="list-style-type: none"> ~Drink Fluids throughout operational period, up to 1.5 gallons per shift. ~Carry extra water on line and cache water at drop points ~Take Frequent breaks, minimum of 10 minutes every hour ~Recognize symptoms of HEAT RELATED ILLNESS which include <ul style="list-style-type: none"> o Lack of energy o Headaches, dizziness o Lack of rest o No hunger, poor eating habits o Hot skin, and lack of sweating
All	Chain Saw Operations	<ul style="list-style-type: none"> ~ Follow "Hazard Tree Safety" guidelines, IRPG pages 22-23 ~ Look up, down around for hazard tree indicators ~ Only fell and buck trees within your expertise, and training ~ Follow "Procedural Felling Operations" on page 79 in IRPG ~ Do not fall trees during high wind events
All	Injury & Medical Emergency	<ul style="list-style-type: none"> ~ Assist injured employee appropriate medical care ~ Use EMT's on Division for initial care ~ Follow medical protocol as outlined in ICS-206
All	Air Operations	<ul style="list-style-type: none"> ~Ensure that the mission is necessary. ~Observe weather minimums. ~Assign appropriate aircraft for the mission. ~Maintain good communications. Use ground contacts. ~Proper flight following. ~Use aerial supervision (air attack, Helco) ~Use discrete frequencies while utilizing aerial ignition.
All	Bees, Ticks, Spiders, Mosquitoes	<ul style="list-style-type: none"> ~Be aware of crew members with sting allergies. ~Perform daily self inspection ~Use repellent as necessary ~Inspect tent and sleeping bags for spiders. ~Always look before placing hands in or on anything. ~Carry EPI kits if known to be allergic to bee stings.
All	Hazard Trees	<ul style="list-style-type: none"> ~ Follow "Hazard Tree Safety" guidelines, IRPG pages 22 & 23 ~ Post lookouts, or use a spotter in mop-up areas with personnel ~ Don't park vehicles or take breaks in high concentrations of hazard trees ~ Establish trigger points for disengagement during high wind events
All	Heavy Equipment Operations	<ul style="list-style-type: none"> ~Ensure communications are established with operators ~Make positive contact with operator before approaching. ~Use hand signals if other communications are unavailable ~Maintain a 50'-100' exclusion area around equipment ~Use a spotter when backing ~Close roads or trails if necessary for public safety. ~PPE including hearing protection. ~Maintain safe working distance from equipment
All	Power Utilities	<ul style="list-style-type: none"> ~Notify all personnel of down electrical lines, use check back. ~Refer to the IRPG pages 24-25 for Power Line Safety ~Always treat downed wires as energized ~Identify and avoid high tension transmission lines. ~Identify and avoid high pressure natural gas lines ~ Identify and avoid damaged gas service near structures ~Be aware of utility restoration in your work area ~All excavators working under power lines you must keep at least 20 ft between your boom and the power lines ~ Flag all hazards," Three Stripes Your OUT" or use Exclusion Zone.
All	Smoke	<ul style="list-style-type: none"> ~Symptoms: Cough, Headache, Shortness of Breath, Hoarseness, Acute mental status changes, Confusion Mitigation: Drink plenty of fluids to flush added toxins from you body. Try to rotate crews out of high concentrations of smoke. You can utilize vehicle air conditioners selected to re-cycle with windows rolled up.

CIIMT T MEDICAL PLAN (ICS 206 WF)

Medical Incident Report

Use items one through nine to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS DECLARE: "MEDICAL EMERGENCY" OR "NON-EMERGENCY MEDICAL TRANSPORT"

Ex: "Communications, Div. Alpha, Stand-by for a medical emergency on Div. Alpha" (If life threatening request designated frequency be cleared for emergency traffic.)

2. INCIDENT STATUS: *Provide incident summary and command structure.*

- **Nature of Injury/Illness** *Describe the injury (Ex: Broken leg with bleeding)* _____
- **Incident Name** *Geographic Name + "Medical" (Ex: Trout Meadow Medical)* _____
- **Incident Commander (Division Sup. or designee)** *Name of IC* _____
- **Patient Care** *Name of Care Provider (Ex: EMT Smith)* _____

3. INITIAL PATIENT ASSESSMENT: *Complete this section for each pt. This is only a brief, initial assessment. Provide additional pt. info after completing this report.*

- **Number of Patients:** _____ - **Male / Female:** _____ - **Age:** _____ - **Weight:** _____
- **Conscious?** **YES** **NO = MEDEVAC!** - **Breathing?** **YES** **NO = MEDEVAC!**
- **Mechanism of Injury** *What caused the injury?* _____
- **Location, Lat/Long** (Datum WGS84) *Ex: N 40° 42.45' x W 123° 03.24'* _____

4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
<input type="checkbox"/> URGENT-RED Life threatening injury or illness. <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE.
<input type="checkbox"/> PRIORITY-YELLOW Serious Injury or illness. <i>Ex: Significant trauma, not able to walk, 2° – 3° burns not more than 1-2 palm sizes.</i>	Ambulance or consider air transport if at remote location. Evacuation may be DELAYED.
<input type="checkbox"/> ROUTINE-GREEN Not a life threatening injury or illness. <i>Ex: Sprains, strains, minor heat-related illness.</i>	Non-Emergency. Evacuation considered Route of Convenience.

5. TRANSPORT PLAN:

Air Transport: (Agency Aircraft Preferred)

- Helispot Short-haul/Hoist Life Flight Other

Ground Transport:

- Self-Extract Carry-Out Ambulance Other

6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

- Paramedic/EMT(s) SKED/Backboard/C-Collar Crew(s) Burn Supplies Oxygen
- Trauma Bag Medication(s) IV/Fluid(s) Cardiac Monitor/AED
- Other (i.e. splints, rope rescue, wheeled litter)

7. COMMUNICATIONS:

- Run Medical Emergency on Command - Coordinate with air ambulance on CALCORD tone 6

8. EVACUATION LOCATION:

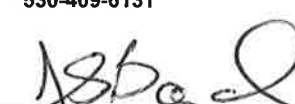

- **Lat/Long** (Datum WGS84) *EX: N 40 42.45' x W 123 03.24'* _____
- **Patient's ETA to Evacuation Location:** _____
- **Helispot/Extraction Size and Hazards:** _____

9. CONTINGENCY: *If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...*

REMEMBER:

- Confirm ETA's of resources ordered -Act according to your level of training
- If air or ground ambulance is DELAYED: Package and transport patient to rendezvous with incoming Ambulance. Re-route EMS helicopter to rendezvous point as appropriate.

BIG FOOT JAMBOREE

Friday, Saturday and Sunday

Pavilion down by the river

Please move your tents to designated sleeping areas in the incident base by **FRIDAY** Morning

Property Tracking Log

Turn into Div Sups

GPS / Note and ID pumps, portatanks, large stocks/cashes of hose, burn equipment etc.

Traffic Control “Piloted Traffic” Process “Oak Fire”

Located on the section of Div Z that run concurrent with State Highway 96

All traffic (Fire & Public) will wait to be Piloted when “Piloted Traffic” is in place.

- “Piloted Traffic” is utilizing the East bound (River side) lane.

★ “Emergency Incident Traffic” approved by Division Group Supervisor (or above), or Safety will utilize the West bound (Fire Side) lane.

- CALTRANS could be in the West bound (Fire side) lane going either direction bumping rocks from roadway.

★ Expect oncoming traffic at ALL times

★ Utilize Vehicle Hazard lights at a minimum, Overhead REDs if equipped

★ Piloted Traffic will be held (stopped) for One hour: **0700 to 0800**, to allow Day Fire Resources safe and effective transition between Day/Night Resources, and again at **1900 to 2000** to allow Night Fire Resources safe and effective transition between Night/Day.

★ Please keep your speeds down at all times.

No more than 25 MPH on HWY 96 within the Road Control’s Footprint
