# ECLIPSE COMPLEX

CA-KNF-006098 P5K9QB (0505)

# Friday

September 1st – September 2nd, 2017

Day Shift 0700 - 2000 Night Shift 1800 - 0800

0700 Day Operations Briefing 1800 Night Ops Briefing 1830 Planning Meeting

	Incident Name	2. Date Prepared	3. Time Prepared
ICS 202	Eclipse Complex	08/31/2017	1700
4. Operational Period			O.B.
September 1 <sup>st</sup> – 2 <sup>nd</sup> , 2017 D	ay / Night Operational Period 0	600-2000	
5. Leaders Intent & General Con	trol Objectives for the Incident (inc	clude alternatives)	

LEADERS INTENT: Suppress the Fires in the Eclipse Complex utilizing strategies such as: confine, contain, point protection and monitoring in wilderness while mitigating exposure and protecting values at risk.

#### **Management Objectives:**

- Ensure safety of emergency responders and the public by utilizing risk management processes, & implementing strategies & tactics that have a high probability of success, **stop**, **think**, **talk**, **then act**.
- Protect and minimize undesirable fire & suppression effects to natural and cultural resources by using Resource Advisors, using MIST in wilderness, and using the right resources in the right places.
- Provide structure protection for threatened structures, residences, ranches, cabins, & lookouts
  utilizing structure protection guidelines in the IRPG & established plans.
- Establish and maintain good relationships with local cooperators, stakeholders and public while providing accurate and timely incident information.

#### **Suppression Objectives:**

- Keep the Oak & Young Fires
  - o Confined to the Siskiyou Wilderness & East of the South Fork of Smith River
  - North & West of Hwy 96 to protect heritage, cultural & natural resources.
- Keep the Cedar & Four Mile Fires within remote national forest, Red Butte Wilderness and east of the 18N01 Road to protect heritage, cultural & natural resources.

## **CA-KNF-006098 Complex Fire Weather Forecast**

**FORECAST NO: 27** 

NAME OF FIRE: KNF-006098-Complex

**PREDICTION FOR: 0600-0600** 

UNIT: Klamath NF- Happy Camp RD

**SHIFT DATE:** 9/1-9/2

SIGNED: /s/

TIME AND DATE

Incident Meteorologist-John Franks

FORECAST ISSUED: 2000 8/31/2017

IMET (T)-Ryan Fliehman

# ...RED FLAG WARNING THROUGH 9AM TODAY... ...EXCESSIVE HEAT WARNING THROUGH MONDAY...

<u>WEATHER DISCUSSION:</u> Critical fire weather conditions are expected through mid-morning. Main concerns will be gusty winds on the ridges and mid-slopes coupled with low relative humidity. Late in the morning and for the remainder of the day winds will decrease. A ridge of high pressure will set up over the complex bringing lower relative humidities due to excessive temperatures. Smoke will remain in place for valleys. Overnight recoveries will be poor for mid-slopes and ridges.

#### **WEATHER FORECAST FOR TODAY:**

**WEATHER:** Smoke under the inversion through midday, then partially lifting out of the valleys. Gusty ridge winds early, tapering off late in the morning.

**TEMPERATURES:** Highs 85-90 on the ridges. 95-100 in the valleys.

**HUMIDITY:** 25-30% morning, bottoming out 12-17% late afternoon.

20 FT WINDS:

**RIDGETOP -** Northeast 10-15 mph gusting to 20 mph through mid-morning. East 3-7 mph gusting to 10 mph by late morning and persisting into the afternoon.

SLOPE/VALLEY – Afternoon upslope/upvalley 2-6 mph.

HAINES INDEX: 5 LAL: 1 STABILITY/INVERSION: Strong inversion weakening after 1400 on the ridges.

#### **WEATHER FORECAST FOR TONIGHT:**

WEATHER: Strong inversion overnight. Poor humidity recoveries for ridges and mid-slopes.

**TEMPERATURES:** Lows 60-65 on ridges, 55-60 in valleys.

**HUMIDITY:** Mid-slope and ridges: Recovering 16-21% through 11pm then 25-35% by morning.

Valleys: Good recoveries 50-70%

20 FT WINDS:

**RIDGETOP - Northeast 3-6 mph gusting to 10 mph.** 

**SLOPE/VALLEY** – Downslope/downvalley 2-5 mph.

HAINES INDEX: 5 LAL: 1 STABILITY/INVERSION: Strong inversion setting up after 2100 hours.

<u>Saturday thru Tuesday:</u> High pressure remains in place through early Monday leading to very hot and dry conditions. Overnight humidity recoveries will be poor and inversions will remain strong. Late Monday into Tuesday will bring an influx of monsoonal moisture leading to an increased chance for thunderstorms.

#### FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 29	TYPE OF FIRE: Wildfire					
FIRE NAME: Eclipse	OPERATIONAL PERIOD: Day/Night, 09/01/2017					
DATE ISSUED: 08/31/2017	TIME ISSUED: 2000					
UNIT: CA-KNF	SIGNED: <u>Is! Kenin Hillard</u>					
	Typed/printed: Keyin Hillard					

#### **INPUTS**

WEATHER SUMMARY: \*PLEASE REFER TO IMET WEATHER FORECAST\*

Sky: Heavy smoke lifting around midday

**Maximum Temperatures:** Highs 85-90 ridges, 95-100 in the valleys **Minimum Humidity:** 25-30% morning, bottoming out 12-17% late afternoon

Winds (20'): Ridgetops – Northeast 10-15 mph, gusts to 20 mph early, east 3-7 mph gusts to 10 by late

morning into evening

Slope/valley - Afternoon upslope/upvalley 2-6

CWR: 0% LAL: 1 Haines Index: 5

#### **OUTPUTS**

#### FIRE BEHAVIOR

#### **GENERAL:**

Continuing ridgetop winds out of the northeast this morning will cause fire growth to the southwest to continue. This activity should moderate around midmorning and fire growth will be driven by terrain and slope/valley winds. Expect continued active surface fire with crown fire activity supported by the surface fire. Surface rates of spread will generally govern the fire spread, with some enhancement from spotting. Surface fires will be fairly intense with high resistance to control.

Rate of Spread: Timber/Brush/Heavy Down/Dead: 5-20 Chains per hour (head fire)

0.5-1 Chains per hour (backing fire)

Flame Length: Timber/Brush Heavy Down/Dead: 5-12 Feet (head fire)

1-3 Feet (backing fire)

**Crown Fire Potential:** Isolated to group torching with crown runs possible where the fires are unshaded by smoke or winds align with slope. Crown fire spread rates approximately 1.0 mile per hour.

Spotting Distance: 0-0.6 mi (under developed smoke columns, spotting up to 1.5 miles is possible)

Probability of Ignition: Day 80-90%, Night 50-70% (model)

Rollouts: Watch for locations where rollout is set up for and uphill run

#### SPECIFIC:

**Branch I:** Areas of fire growth pushed by the northeast winds will turn to upslope/upvalley growth. Fire activity will be greatest in heavy fuels and in areas of heat midslope or lower with unburned fuels above them. The Fourmile and Cedar are expected to continue to burn together. Hot areas near Thompson Creek on the north section have the potential to cross the creek and spread upslope. Limited spread expected to the east into the Red Buttes wilderness.

**Branch II:** The eastern section of the branch is expected to remain smoked out under the persistent inversion and be influenced by terrain and upslope/upvalley winds. Expect fire to continue to back into the Highway 96 corridor and watch for spots across the highway due to rollout. Growth in the western section of the Branch is expected to slow. Interior islands will continue to burn together.

**Branch III:** Fire growth driven by the northeast winds should moderate today and become upslope/upvalley growth. Spread through rollout expected to continue. Fire spread expected to continue towards the South Fork of the Smith River. Upslope/upvalley growth developing in the Siskiyou Wilderness. Fire spread in the southeast corner on Young will continue in the Clear Creek drainage and into Doe Creek.

#### **AIR OPERATIONS**

Today will be smokier than yesterday. Visibilities will likely be poor all day.

#### **SAFETY**

The most active fire behavior of the day may be in the morning . Establish good LCES.

Task: Prep constructed dozer line from DP 90 to South Fork Indian Creek. Scout opportunities for contingency line.

Date/Time: 8/31/2017

Purpose: To hold fire perimeter.

End State: To keep fire out of Indian Creek subdivision.

#### 7. Special Instructions:

ICS 204

Identify any suppression repair needs.

Backhaul all excess supplies, equipment, and trash.

Sensitive plant sites are identified with yellow/black striped flagging.

Avoid any ground disturbing activities in areas with orange/white candy stripe flagging.

Task: Continue to prep the 16N02 rd. from the N/P break north to Bear Basin.

Purpose: Create containment features on the western perimeter of the fire.

End State: Fire spread to the west into Big Flat and towards the Hwy 199 corridor is minimized.

#### 7. Special Instructions:

ICS 204

Identify any suppression repair needs.

Backhaul all excess supplies, equipment, and trash.

Sensitive plant sites are identified with yellow/black striped flagging.

Avoid any ground disturbing activities in areas with orange/white candy stripe flagging.

## SAFETY MESSAGE

September 1, 2017 Eclipse Complex

#### **Dehydration**—Did you know...

Caffeine speeds up loss of fluids in your body (limit coffee and cola intake)
Thirst always underestimates fluid needs (drink <u>before</u> you feel thirsty)
Potassium-rich foods help greatly (add bananas, citrus, tomato juice to your diet)
Signs of possible dehydration include rapid heart rate, weakness, excessive
fatigue, dizziness, painful urination and dark colored urine

Rolling rocks/snags/hazardous limbs/burned snags—all pose a serious threat. Assess conditions before going to work on or near the fire line. Flag and avoid trees or areas that cannot be mitigated. Large complex snags are very dangerous to fall, use qualified fallers. Keep at least a  $2\frac{1}{2}$  tree length buffer between yourself and falling operations. Keep your spacing and avoid taking breaks in slide-prone areas.

<u>LCES</u> is built on two guidelines: Before safety is threatened, each firefighter must know the LCES system will be used, and LCES must be continuously reevaluated as fire conditions change.

#### <u>Life First</u>

It means that knowing the dangers we face; we still expect that our personnel will not engage unless they can do so with the greatest margin of safety.

- ✓ <u>REMEMBER</u> Heat stress, dehydration, carbon monoxide can all add to your fatigue level.
- ✓ <u>Watch for hazardous attitudes</u>—complacency (just another routine fire), resigned (we can't make a difference), impulsive (do something even if it is wrong), invincible (it can't happen to us), and group think (afraid to speak-up or disagree). We could also add cocky, know-it-all, and "we have always done it that way" ...

#### **INCIDENT SAFETY ANALYSIS 215a**

All	Heat Related Illness (HRI)& Dehydration	~Drink Fluids throughout operational period, up to 1.5 gallons per shift.
All	Chain Saw Operations	<ul> <li>Follow "Hazard Tree Safety" guidelines, IRPG pages22-23</li> <li>Look up, down around for hazard tree indicators</li> <li>Only fell and buck trees within your expertise, and training</li> <li>Follow "Procedural Felling Operations" on page 79 in IRPG</li> <li>Do not fall trees during high wind events</li> </ul>
All	Injury & Medical Emergency	Assist injured employee appropriate medical care     Use EMT's on Division for initial care     Follow medical protocol as outlined in ICS-206
All	Air Operations	~Ensure that the mission is necessary. ~Observe weather minimums. ~Assign appropriate aircraft for the mission. ~Maintain good communications. Use ground contacts. ~Proper flight following. ~Use aerial supervision (air attack, Helco) ~Use discrete frequencies while utilizing aerial ignition.
Ali	Bees, Ticks, Spiders, Mosquitoes	~Be aware of crew members with sting alergies.  ~Perform daily self inspection  ~Use repellent as necessary  ~Inspect tent and sleeping bags for spiders.  ~Always look before placing hands in or on anything.  ~Carry EPI kits if known to be allergic to bee stings.
All	Hazard Trees	<ul> <li>Follow "Hazard Tree Safety" guidelines, IRPG pages 22 &amp; 23</li> <li>Post lookouts, or use a spotter in mop-up areas with personnel</li> <li>Don't park vehicles or take breaks in high concentrations of hazard trees</li> <li>Establish trigger points for disengagement during high wind events</li> </ul>
Ali	Heavy Equipment Operations	~Ensure communications are established with operators ~Make positive contact with operator before approaching. ~Use hand signals if other communications are unavailable ~Maintain a 50'-100' exclusion area around equipment ~Use a spotter when backing ~Close roads or trails if necessary for public safety. ~PPE including hearing protection. ~Maintain safe working distance from equipment
All	Night Operations	<ul> <li>Maitain high visibility in work area and wear vest while in roadway.</li> <li>Use glow sticks to mark hazards.</li> <li>Stay out of areas with bug killed hazard trees</li> <li>Watch for signs of fatigue</li> <li>Take breaks away from areas of known hazard</li> </ul>
All	Smoke	~Symptoms: Cough, Headache,Shortness of Breath, Hoarseness, Acute mental status changes, Confusion Mitigation: Drink pleanty of fluids to flush added toxins from you body. Try to rotate crews out of high concentrations of smoke. You can utilize vehicle air conditioners selected to re-cycle with windows rolled up.

#### **INCIDENT SAFETY ANALYSIS 215a**

Eclipse Complex/ CA-KNF-6098 - Friday, September 01, 2017

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
All	Fireline Hazards	~ Hazard trees are present over the entire fire     Watch for falling and rolling debris on steep slopes     Alert crew personnel of rolling debris by yelling to affected individuals     Position debris that could roll vertically on slope     Avoid stepping over debris that could roll by walking around object     Avoid radiant heat by wearing appropriate PPE correctly     Use correct tool for task assigned     Follow power line safety protocol as outlined on page 24 in IRPG     Flag and isolate all HAZMAT and alert all personnel working in Division     Follow WUI recommendations on pages 12-16 in IRPG
All	Driving & Traffic	~Drive with lights on.
All	Line Constructions	~Conduct thorough briefing for all personnel (inside rear cover IRPG). ~Ensure LCES in place prior to engagement (IRPG p. 7). ~Establish adequate safety zones (IRPG p.8). ~Follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4). ~Utilize Risk Management Process (IRPG p.1). ~Utilize Downhill Checklist (IRPG p 9)
All	Steep Terrain & Rolling Debris	~Determine if the mission is necessary. ~Limit exposure by avoiding whenever possible. ~Use the proper resource. ~Post lookouts. Resources should not work directly above or below each other. ~Utilize fallers to clear hazard trees/snags
All	Communications	∼ Maintain communication with aviation resources, and suppression organization.   ∼ Ensure all your resources know frequency and protocol for contacting resources   ∼ Utilize the ICS 205. Brief others as needed, Communicate hazards to others, acknowledge messages, ask if you dont know
All	Extreme Fire Behavior	~Share weather observations with all personnel assigned to division• Review "Severe Fire Behavior Potential" (IRPG p.68).    ~Watch for inversion lifting    ~Monitor current weather conditions and forecasts    ~Make sure all personnel receive thorough briefings every shift.    ~Maintain adequate escape routes and safety zones.    ~Advise all personnel if these are compromised or changed.    ~Set trigger points when appropriate.    ~Adhere to 10 Std Orders, mitigate 18 situations.    ~Maintain Situational Awareness
All	Helicopter Operations	~ Stay clear of all bucket drops when suppression actions are in place and allow 5 minutes prior to re-entry ~ Follow aviation safety guidelines in IRPG pg 43-60

# CIIMT 1 MEDICAL PLAN (ICS 206 WF)

Medical Incident Re	
Use items one through nine to communicate si	tuation to communications/dispatch.
1. CONTACT COMMUNICATIONS DECLARE: "MEDICAL EMERGE Ex: "Communications, Div. Alpha. Stand-by for a medical emergency on Div. Alpha" (If life three)	
2. INCIDENT STATUS: Provide incident summary and command structure.	
- Nature of Injury/Illness Describe the injury (Ex: Broken leg with bleeding)	
- Incident Name Geographic Name + "Medical" (Ex: Trout Meadow Medical)	
- Incident Commander (Division Sup. or designee) Name	
- Patient Care Name of Care Provider (Ex: EMT Smith)	Y
3. INITIAL PATIENT ASSESSMENT: Complete this section for each pt. This - Number of Patients: Male / Female:	
- Conscious? ☐ YES ☐ NO = MEDEVAC! - Breath	ing?   YES   NO = MEDEVAC!
- Mechanism of Injury What caused the injury?	
- Meeriamsin of injury what caused the injury:	
- Location, Lat/Long (Datum WGS84) Ex: N 40° 42,45' x W 123° 03.24'	
4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY	
SEVERITY	TRANSPORT PRIORITY
□ URGENT-RED Life threatening injury or illness.  Ex: Unconscious, difficulty breathing, bleeding severely, 2° − 3° burns more than 4 palm sizes, heat stroke, disoriented.	Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE.
□ PRIORITY-YELLOW Serious Injury or illness.  Ex: Significant trauma, not able to walk, 2° − 3° burns not more than 1-2 palm sizes.	Ambulance or consider air transport if at remote location. Evacuation may b <b>DELAYED.</b>
□ ROUTINE-GREEN Not a life threatening injury or illness. Ex: Sprains, strains, minor heat-related illness.	Non-Emergency. Evacuation considered  Route of Convenience.
5. TRANSPORT PLAN:	
Air Transport: (Agency Aircraft Preferred)  ☐ Helispot ☐ Short-haul/Hoist ☐ L	_ife Flight □ Other
Ground Transport:	
□ Self-Extract □ Carry-Out □ Am	bulance   Other
6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:	
<ul> <li>□ Paramedic/EMT(s)</li> <li>□ SKED/Backboard/C-Collar</li> <li>□ Crew(s)</li> <li>□ Trauma Bag</li> <li>□ Medication(s)</li> <li>□ IV/Fluid</li> <li>□ Other (i.e. splints, rope rescue, wheeled litter)</li> </ul>	
7. COMMUNICATIONS: - Run Medical Emergency on Command - Coord	linate with air ambulance on CALCORD tone 6
8. EVACUATION LOCATION:	
- Lat/Long (Datum WGS84) EX: N 40 42.45' x W 123 03.24'	
- Patient's ETA to Evacuation Location:	
- Helispot/Extraction Size and Hazards:	
9. CONTINGENCY: If primary options fail, what actions can be implemented in co	njunction with primary evacuation method? Be thinking ahead
EMEMBER: -Confirm ETA's of resources ordered -Act accordi	ng to your level of training
- If air or ground ambulance is DELAYED: Package and transport p  Re-route EMS helicopter to rendezvous point as appropriate.	

#### TRAINING MESSAGE

TRAINEES: IF YOU ARE WORKING ON A POSITION TASKBOOK AND HAVE NOT CHECKED IN WITH THE TRAINING SECTION, PLEASE DO SO AS SOON AS POSSIBLE. YOU CAN USE THE QR CODE BELOW FOR REMOTE CHECK IN.

TRAINEES: PLEASE ALLOW TIME BEFORE YOUR DEMOB TO CLOSE OUT WITH TRAINING. WHEN CLOSING OUT WITH TRAINING, PLEASE BRING YOUR COMPLETED PERFORMANCE EVALUATION (225/226) AND POSITION TASKBOOK WITH COMPLETED EVALUATORS PAGE.

Mary Leathers, Training Specialist

Please email all collected field observations and data to the GIS email.

GIS email eclipsefiregis@gmail.com

#### **BIG FOOT JAMBOREE**

Friday, Saturday and Sunday

Pavilion down by the river Please move your tents to designated sleeping areas in the incident base by **FRIDAY** Morning

#### STRESS REMINDERS

- Take action, don't ignore your stress
- Stay in touch with team members and communicate
- Talk and share feelings
- Replenish, rest, get some down time

Stress is normal and everyone has it

PRACTICE RANDOM ACTS OF KINDNESS! IT WILL MAKE ANOTHER PERSON'S DAY! IT WILL MAKE YOUR DAY!

HRSP located in the trailer at the far end of main street-shared with IC and Logistics.

John Campbell-HRSP 951-203-4367 Cell

#### Traffic Control "Piloted Traffic" Process "Oak Fire"

Located on the section of Div Z that run concurrent with State Highway 96

All traffic (Fire & Public) will wait to be Piloted when

"Piloted Traffic" is in place.

- "Piloted Traffic" is utilizing the East bound (River side) lane.
- **"Emergency Incident Traffic"** approved by Division Group Supervisor (or above), or Safety will utilize the West bound (Fire Side) lane.
  - CALTRANS could be in the West bound (Fire side) lane going either direction bumping rocks from roadway.
- **\*** Expect oncoming traffic at ALL times
- ttilize Vehicle Hazard lights at a minimum, Overhead REDs if equipped
- Piloted Traffic will be held (stopped) for One hour: 0700 to 0800, to allow Day Fire Resources safe and effective transition between Day/Night Resources, and again at 1900 to 2000 to allow Night Fire Resources safe and effective transition between Night/Day.
- Please keep your speeds down at all times.

No more than 25 MPH on HWY 96 within the Road Control's Footprint
