# CA-KNF-006098 Complex Fire Weather Forecast

**FORECAST NO:** 31

**NAME OF FIRE:** KNF-006098-Complex

**PREDICTION FOR:** 0600-0600

**UNIT:** Klamath NF- Happy Camp RD

**SHIFT DATE:** 9/5-9/6 Tuesday and Tues Night

**SIGNED:**

**TIME AND DATE**

**Incident Meteorologist - John Franks**

**FORECAST ISSUED:** 2000 9/4/2017

**\*\*\*Fire Weather Watch Wednesday for lightning and erratic thunderstorm winds\*\*\***

**WEATHER DISCUSSION:** An increase in humidity will help temperatures to be a little more seasonal over the fire. Cloud cover will increase Tuesday, and an increased chance for thunderstorm activity is expected. The peak of the occurrence of any storms will be later Wednesday, but could linger into early Thursday. With the cooler temperatures expected under some more cloud cover, humidity will see a modest increase. Smoke will still be present in valleys under a persistent temperature inversion.

**WEATHER FORECAST FOR TODAY:**

**WEATHER:** Partly cloudy with areas of smoke. Continued thick smoke and fog in valleys.

**TEMPERATURES:** Highs 77-82 for ridges, middle 80s in valleys. Cooler under thick smoke.

**HUMIDITY:** 20-30% morning, 18-23% by afternoon. Higher in smoke filled valleys 40-50%.

**20 FT WINDS:**

**RIDGETOP** – Light and variable winds to start the day will become westerly on area ridges at 5-8 mph, gusting to 10-12 mph in the afternoon.

**SLOPE/VALLEY** – Calm winds may see a light downslope/downcanyon wind 1-3 mph late in the day.

**HAINES INDEX:** 4 **LAL:** 1 **STABILITY/INVERSION:** Persistent inversion may lower to 3500'.

**WEATHER FORECAST FOR TONIGHT:**

**WEATHER:** Partly cloudy. Cooler on ridges. A 20% chance of a thunderstorm - late.

**TEMPERATURES:** Lows 65-70 on ridges, 55-60 in valleys.

**HUMIDITY:** Mid-slope and ridges: gradual recoveries through the night to 30-35% by morning. If thunderstorms occur, brief 50% recoveries are possible.  
Valleys: Good recoveries 60-70%. Along Klamath River 70-80%.

**20 FT WINDS:**

**RIDGETOP** – Light downslope 1-3 mph becoming southerly by daybreak. Erratic gusts possible if a thunderstorm develops.

**SLOPE/VALLEY** – Downslope/downvalley 1-2 mph.

**HAINES INDEX:**4 **LAL:**1 **STABILITY/INVERSION:** Weaker inversion around 3500' developing after 21:00.

**Wednesday through Friday:** Cooler and more moist air will be brought into the fire with an upper level trough. This feature may spark thunderstorm activity on Wednesday and Wednesday night. Moist air will stream in on southerly winds Thursday, and a more pronounced upper level trough will cross Friday and evolve into a closed low off of the California coast, reinforcing cooler and more moist air over the fire.

## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 33	<b>TYPE OF FIRE:</b> Wildfire
<b>FIRE NAME:</b> Eclipse	<b>OPERATIONAL PERIOD:</b> Day/Night, 09/05/2017
<b>DATE ISSUED:</b> 09/04/2017	<b>TIME ISSUED:</b> 2000
<b>UNIT:</b> CA-KNF	<b>SIGNED:</b> /s/ Kevin Hillard
	<b>Typed/printed:</b> Kevin Hillard

### INPUTS

**WEATHER SUMMARY: \*REFER TO IMET WEATHER FORECAST\***

**Sky:** Partly cloudy heavy smoke

**Maximum Temperatures:** Highs 75-80 on ridges, 85 in valleys, lower in smoke filled valleys

**Minimum Humidity:** 20-30% morning, 18-23% by afternoon, 40-50% in smoke filled valleys

**Winds (20'):** Ridgetops – Light and variable early, becoming westerly 5-8 mph with gusts 10-12 mph  
afternoon

Slope/valley – Calm, light downslope 1-3 mph

**CWR:** 0%    **LAL:** 1    **Haines Index:** 4

### OUTPUTS

#### FIRE BEHAVIOR

**GENERAL:**

Areas of fire activity near ridgetops influenced by light west winds will spread to the east. Otherwise fire activity sheltered from the west winds will be influenced by terrain and fuels and spread upslope/upvalley. Fire behavior should still be primarily surface spread enhanced by spotting from torching and short crown runs.

**Rate of Spread:** Timber/Brush/Heavy Down/Dead: 5-14 Chains per hour (head fire)  
0.5-1 Chains per hour (backing fire)

**Flame Length:** Timber/Brush Heavy Down/Dead: 5-12 Feet (head fire)  
1-3 Feet (backing fire)

**Crown Fire Potential:** Isolated to group torching. Crown runs possible where the fires are unshaded by smoke or winds align with slope. Crown fire spread rates approximately 0.5 mile per hour.

**Spotting Distance:** 0-0.4 mi (under developed smoke columns, spotting up to 1.5 miles is possible)

**Probability of Ignition:** Day 60-90%, Night 40-80% (model)

**Rollouts:** Watch for locations where rollout is set up for and uphill run

**SPECIFIC:**

**Branch I:** Areas of heat on the north perimeter of Cedar expected to continue to spread into the unnamed drainage of Thompson Creek and have potential to cross both drainages and spread upslope. Expect fire to spread into the Middle Fork and Butte Fork of the Applegate River in the Red Buttes Wilderness.

**Branch II:** The low elevations of the branch are expected to remain smoked out under the persistent inversion and any spread will be influenced by terrain and fuels. Fire activity in the Boulder Peak area expected to continue with limited spread into the headwaters of the West Fork of the Little South Fork of Indian Creek. Growth to the south/southwest in the western section of the Branch is expected to continue. Interior islands and fingers will continue to burn together.

**Branch III:** The branch could see less smoke today. Spread through rollout with upslope runs expected to continue in the South Fork of the Smith River on both sides of the drainage. Any new spots across the South Fork of the Smith River will spread upslope towards Blue Ridge. West ridgetop winds should provide favorable conditions for the burnout operation on Blue Ridge.

**Branch IV:** On the eastern perimeter, fire located higher on the ridgetops expected to spread to the east. Continued backing spread with rollout and upslope runs expected along the southern and eastern perimeters.

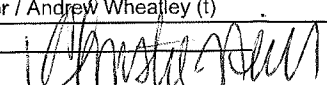

#### AIR OPERATIONS

There may be some clear air in Branch III and north Cedar. Otherwise expect heavy smoke and poor visibility.

#### SAFETY

Steep variable terrain can cause rapid changes in fire behavior. Maintain good lookouts.

# AIR OPERATIONS SUMMARY

PREPARED BY: Shawn Whittington

PREPARED DATE/TIME: 09/04/17 19:30

1. INCIDENT NAME: Eclipse Complex		2. OPERATIONAL PERIOD DATE: 09/05/17		START TIME: 0600		END TIME: 1800		SUNRISE: 0644		SUNSET: 1940	
NOTE: AIRCRAFT CAN BE SHARED BETWEEN COMPLEXES											
3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc) Possible unidentified low wires & cables in the river corridor. Rafters on the Klamath River. Limited visibility due to smoke, do not continue mission if visibility is marginal. Ensure all pilots are briefed on appropriate frequencies for that specific fire before launching. No dipping within 500 feet of the confluence of all major tributaries of the Klamath River. Use established procedures for bucket and tank sanitation where necessary. 128.1750 now linked to Scott Valley and Happy Camp helibases. Helicopter 407 assigned to Eclipse Complex as of 8/27/17 8PA at Gasquet, Ward HB available short haul				4. MEDEVAC A/C: H-407 out of Dunsmuir for 24 hour NVG hoist. # SAFETY MESSAGE

September 5, 2017

Eclipse Complex

## Structure Defense:

Structure protection is inherently dangerous because it involves indirect firefighting. Do not commit to stay and protect a structure unless a safety zone for firefighters and equipment has been identified at the structure during size-up and triage. Move to the nearest safety zone, let the fire front pass, and return as soon as conditions allow.

## Fire Behavior Prediction

- Base all actions on current and expected fire behavior - do this first!
- An estimate must be made of the approaching fire intensity in order to determine if there is an adequate safety zone and time available before the fire arrives.
- Due to the dynamic nature of fire behavior, intensity estimates are difficult to make with absolute certainty. It is imperative that firefighters consider the worst case and build contingency actions into their plan to compensate for the unexpected

## Firing operations:

- Ensure all personnel are aware of firing operation that may affect them.
- Wear appropriate PPE.
- Ensure aerial/ground ignition plans have been adequately developed and personnel are briefed.
- Use qualified personnel to conduct ignition operations

# Human Resource Message

## Thought for the Day

**Just as accident rates increase when you become a little complacent, so do human resource contacts and complaints of inappropriate behavior, harassment, and discrimination.**

- **The fire has been going on for awhile.**
- **People are starting to get tired, and some are ready to go home.**
- **People have a little more time to think about things that might have upset them during the fire**
- **People are more easily irritated.**

**Be aware of these facts and make the necessary effort to recognize and deal with human resource situations before they become conflicts that are painful and become more difficult to deal with.**

HRSP is located in the trailer at the far end of main street-shared with IC and Logistics.

**John Campbell-HRSP 951-203-4367 Cell**

### RESOURCE ADVISORS

- Avoid areas flagged with orange/white flagging.
- Use screens for drafting out of main creeks and Klamath River.
- Minimize backing when falling hazard trees

Please email all collected field observations and data to the GIS email.
